**RE: Injection Pressure Increase (IPI-148),
Premier Sand Unit,
Eddy County, New Mexico**

Reference is made to your request dated November 13, 2000 to increase the surface injection pressure on 10 wells in the above referenced waterflood project. This request is based on step rate tests conducted on November 1, 3, and 6, 2000. The results of these tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells:

Recently Tested Well Name and Number	Adjacent Well Name and Number	ULSTR	Authorized Pressure
