Mr. Dan Nutter Oil Conservation Commission Box 2088 Santa Fe, New Mexico 87501

Dear Dan:

It is our understanding that Case No. (4482) has been set down for hearing on January 3. This case is reopened to show cause why the Parkway Strawn Pool special rules should be continued in full force and effect. As I told you in our telephone conversation, Larry Shannon of The Petroleum Corporation states that they are in the process of drilling a well in the pool and the drillstem test in the Strawn formation indicated production which would justify completion and that they had run casing but were going to carry the well on down to test the Morrow formation. Larry did not think they would have the well completed or a proper test made by January 3 and would like to have this matter go over until the hearing on January 17.

You may consider this as a motion or application by The Petroleum Corporation to have the matter continued until January 17 and you have indicated that you see no objection to the same.

Yours very truly,

HINKLE, BONDURANT, COX & EATON
