*June 2nd  
Hearing*

May 1, 1971

Mr. A. L. Porter, Jr.,  
Oil & Gas Conservation Commission  
P. O. Box 2088  
Santa Fe, New Mexico 87501

*Page 41545*

Dear Mr. Porter:

It is our desire to water flood wells in the Shiprock Gallup Pool,  
by injection, and shall appreciate your setting a hearing date and  
letting us know the date.

Please give us the data and etc., so that we may prepare information  
to present to you for your consideration.

Thanks,

Very truly yours,

SHIPROCK CORPORATION

Case 4545

May 10, 1971

Mr. George Hatch  
Oil Conservation Commission  
Santa Fe, New Mexico 87501

Re: Injection of water into  
SHIPROCK GALLUP pool.

Dear Mr. Hatch:

We propose to flood the Gallup formation by injecting fresh water from the Dakota strata in order to stimulate production from our producing wells.

The Gallup zone in this area is producing from approximately 100' and we propose to drill a Dakota well or Morrison well which should come in above 1,000', to provide the necessary water. We plan to inject 50 barrels per day into each injection well.

We will provide logs on the injection wells, as designated on the enclosed plat.

There is no production within three miles of this Field.

We plan to use five low end producing wells as our injection wells, your records show casing strings, and etc. Logs will be available at the commission hearing.

We appreciate your cooperation.

Very truly yours,

SHIPROCK OIL CORPORATION
