1	MR. NUTTER: Case Number 4577, called again,
2	which is the matter of Case 4577 reopened pursuant to the
3	provisions of Order Number R-4181.
4	For the record, I would like to say that the
5	original Applicant has requested that the Case be dismissed.
6	We will make a recommendation that the case be dismissed
7	and that the pool revert to 40 acre spacing.
8	Hearing is adjourned.

PAGE

25.2

الم المراجعة والمراجعة المراجعة ال والمراجعة المراجعة ال

> and a second s Second second

	A	We seek to create a new oil pool producing from the
1		
2		Wolf-camp formation and our Petco State well number 2
3		located in section 26, T19 south, range 29 east, Eddy
4		County, New Mexico, and ask for special rules providing
5		for 160 acre spacing and proration units.
6		In addition we request the assignment of an oil discovery
7		allowable to this well.
8	Ω	Are you a graduate geologist?
9	A	Yes, sir.
10	Q	Have you previously testified before the commission.
11	А	Yes, I have.
12	Q	Are your qualifications as a Petroleum Geologist a matter
13		of record with the commission?
14	A	Yes, sir.
15		MR. HINKLE: Are the qualifications acceptable?
16		MR. NUTTER: Yes, they are.
17	Ω	(Mr. Hinkle continuing) Have you made a study of this
18		particular pool and of the wells that have been drilled
19		and are you familiar with them?
20	A	Yes, I am.
21	Q	Have you prepared, or has there been prepared under your
22		direct supervision, exhibits for introduction into this
23		case
24	A	Yes, sir, there have been.
25	Q	Refer to exhibit number 1 and explain what this is and what
	L	

1		it shows.
2	A	Exhibit number 1 is a land plat of the area of interest,
3		which shows the location of the subject well.
4		It is pointed to by the arrow. It is located in the
5	-	Southeast quarter of the Southwest quarter of section 26.
6		The acreage of which the Petroleum Corporation owns an
7		interest is indicated colored in yellow.
8		The ownership of adjacent lands, to the best of our
9		knowledge is also indicated on this map.
10	Q	Now, refer to exhibit number two and explain what
11		this shows.
12	A	Exhibit number 2 is a map designed to show the producing
13		formations in the area adjacent to the Petco State number
14		two Wolf-camp completion.
15		At the bottom of the page there is a legend showing
16		the different producing intervals. The nearest producing
17		well is a Petroleum Corporation number one Petco State
18		located 1 and one-half miles East, completed in the straum
19		formation at approximate depth of 10,600 feet.
20		The closest producing well outside of the number one Petco
21		State is the H. L. Brown Yates Federal located approximately
22		2 and one-half miles east of the number two Petco State,
23		producing from the Morrow formation.
24	Q	Does the Sun Ray well in section 32 also produce from the
25		Morrow?

dearnley-meier services and s

1	A	The Sun Ray alsowell also produces from the Totco
2		Morrow section, but it has been plugged and abandoned.
3	Q	Your number 1 Petroleum Corporation Petco State number
4		one was a discovery in section 26?
5	Α	Yes, sir. That was a discovery well for the Parkway
6		pool, producing from the straun formation.
7	Q	And special pool rules have been adopted for that area?
8	A	Yes, sir.
9	Q	Now, refer to exhibit number 3 and explain that to the
10		commission.
11	A	Exhibit number 3 is a structure map drawn on the top of
12		the Wolf-camp formation.
13		It shows the number 2 well, number 2 Petco State is
14		approximately 75 feet higher structurally on the top of
15		the straun formation, which was the original objective
16		in our number 2 well was dense, and it was not productive.
17		For this reason, we have plugged back and completed in the
18		Wolf-camp formation average depth of about 9600 feet.
19		This structure map shows a an east dipping Morrow
20		climb.
21		There is a change in strike in vicinity of this particular
22		area of interest.
23	Q	Now, you have a log of the well which is exhibit five,
24		and the history of the well and the production will be
25		explained a little later.
L		

dearnley-meier seet and a service

	Do you have any further comments with respect to exhibit
	three?
А	No, sir.
Q	Refer to exhibit 4 and explain this.
Α	Exhibit 4 is a cross section of electrical log drawn from
	the Sun Ray number 1 mid-continental well on the west,
	in an easterly direction through the Petco State number
	two well.
	In terminating on the east with the Petco State number 1
	well in the Sun Ray well, the Wolf-camp zone was not tested.
	It was present at approximate depth of 9260.
	However, no drill stem test or production data, testing
	data had been recorded on this particular well.
	As we go to the east, you can see that there is considerable
	change in structure. It is an east dip, and the Wolf-camp
	zone, which we have completed in was present from depths
	of 9622 pardon me. From 9616 to 9654.
	The zone was approximatelyhad approximately 32 feet of
	crystaline limestone which was porous, had an average
	porosity of 5%.
	As we go in an easterly direction, the correlation in the
	number 1 Petco State, this same zone, was present, but
	was dense and no shows were recorded in this number one
	Petco State.
	The trap is definitely a stratagraphic in nature, being
	Q

dearnley-meier terring and a second

ſ	· · · · · · · · · · · · · · · · · · ·	
1		limited from our well control in the northwest and the
2		south and the east direction.
3	Q	If you will refer to exhibit 5, which is the well log,
4		and we only have two copies, explain exhibit 5.
5	A	Exhibit number 5 is a copy of the Schlumberger Borehole
6		compensated sonic log, gamma ray.
7		On the 5-inch scale, the top of the Wolf-camp section
8		as you see there, is at 9616. The base of the Wolf-camp
9		section is at 9654.
10		The well was perforated from a depth of 9622 to 9646.
11		The well flowed on a 2464 in choke at the rate of 810
12		barrels of oil, 1,001,200 mcf gas per day, a tubing
13		pressure of 320 pounds at the surface, a gas/oil ratio
14		of 1485 to 1, oil of 49 gravity.
15		The treatment after perforation was 500 gallons of acid.
16		The well is presently shut in.
17	Q	What about your number 1 well? Is it being produced at
18		the present time?
19	A	Yes, it is being produced at the present time from a
20		straun formation.
21	Q	Have you gas connections for that well, the number 1?
22	А	No, we do not have at this time, but we are anticipating
23		one.
24	Ω	Do you have a gas connection or anticipate a gas connection
25		for this number 2 well?

dearnley-meier regerties and second

<ul> <li>A Yes, sir.</li> <li>Do you have any idea how long it might be before the well might be connected?</li> <li>A Approximately we hope fully within a 30-day period.</li> <li>O And you will be producing both oil and gas from that?</li> <li>A Yes, sir.</li> <li>O So you really have no production history on this well at the present time.</li> <li>A No, sir, we do not.</li> <li>What is your recommendation to the commission with respect to the establishment of pool rules?</li> <li>A We request that we obtain 160 acre spacing with 160 acre proration units, and that we be given a discoverv allowable for this well.</li> <li>You are asking for a temporary field rule</li> <li>A Yes, sir.</li> <li>A Yes, sir.</li> <li>And what is the object of the temporary field rules?</li> <li>Well, from our exhibit number 1 of the land plat, there is considerable acreage in which we have an interest in and we would like to observe the production of this well, and then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively</li> </ul>								
<ul> <li>well might be connected?</li> <li>A Approximately we hope fully within a 30-day period.</li> <li>And you will be producing both oil and gas from that?</li> <li>A Yes, sir.</li> <li>O So you really have no production history on this well at the present time.</li> <li>A No, sir, we do not.</li> <li>What is your recommendation to the commission with respect to the establishment of pool rules?</li> <li>A We request that we obtain 160 acre spacing with 160 acre proration units, and that we be given a discovery allowable for this well.</li> <li>You are asking for a temporary field rule</li> <li>A Yes, sir.</li> <li>for a year?</li> <li>A Yes, sir.</li> <li>And what is the object of the temporary field rules?</li> <li>Well, from our exhibit number 1 of the land plat, there is considerable acreage in which we have an interest in and we would like to observe the production of this well, and then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively</li> </ul>	1	А	Yes, sir.

<ul> <li>A Well, from our exhibit number 1 of the land plat, there</li> <li>is considerable acreage in which we have an interest in and</li> <li>we would like to observe the production of this well, and</li> <li>then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively</li> </ul>	18	A	Yes, sir.					
<ul> <li>is considerable acreage in which we have an interest in and</li> <li>we would like to observe the production of this well, and</li> <li>then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively</li> </ul>	19	Q	And what is the object of the temporary field rules?					
<ul> <li>we would like to observe the production of this well, and</li> <li>then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively.</li> </ul>	20	A	Well, from our exhibit number 1 of the land plat, there					
<ul> <li>then proceed to develop it, or at least hold acreage.</li> <li>Do you have reason to believe that one well will effectively.</li> </ul>	21		is considerable acreage in which we have an interest in and					
0 Do you have reason to believe that one well will effectively	22		we would like to observe the production of this well, and					
24 0 Do you have reason to believe that one well will effectively	23		then proceed to develop it, or at least hold acreage.					
	24	Q	Do you have reason to believe that one well will effectively					
and efficiently drain as much as a hundred sixty acres or	25		and efficiently drain as much as a hundred sixty acres or					

1		more?					
2	A	We are hopeful that it will do that.					
3	Ω	This will give you an opportunity to observe the					
4		production and possibility of other wells being drilled?					
5	A	Drilled in the area by ourselves and possibly other oper-					
6		aters.					
7	Q	So at the end of the year you should have additional					
8		information to determine that depth?					
9	A	Yes, sir.					
10	Q	What discovery allowable are you seeking?					
11	А	Discovery allowable of approximately 48,110 barrels to					
12		this particular well.					
13	Q	And have you filed a form which is required by the					
14		commission regulation for this discovery allowable?					
15	A	Yes, we have.					
16	Ω	In your opinion this is a new discovery, distinct from					
17	2	the straun discovery in the number 1 well?					
18	A	Yes, sir.					
19	Q	There is no communication between the two?					
20	A	No.					
21	MR. HINKLE: We would like to offer in evidence						
22	exhibits 1 through 5.						
23	MR. NUTTER: Applicant's exhibits 1 through 5 will						
24	be admitted in evidence.						
25		MR. HINKLE: Do you have anything else you would					

dearnley-meier ter ter ter ter

1		
1		like to present to the commission?
2		THE WITNESS: No, sir.
3		MR. HINKLE: That's all of the direct.
4		CROSS EXAMINATION
5	BY M	R. NUTTER:
6	Q	What is your name, sir?
7	A	Hal Dean.
8	Q	Okay. Mr. Dean, you haven't made any recommendations as
9		to what locations under your proposed pool rules.
10		What would you suggest would be the location requirement
11		for these wells?
12	Α	I think that they should be 660 feet from the lease
13		lines.
14	Q	No closer than 660 feet to the 160 acre
15	A	Yes, sir.
16	Q	units?
17	A	Yes, sir.
18		MR. HINKLE: Is that the same as in a straun special
19		THE WITNESS: Straun oil pool, yes, sir.
20	Q	(Mr. Nutter continuing) In other words, you are requesting
21		rules similar to what we recently approved for the straun
22		oil pool?
23	A	Yes, sir. Yes, sir.
24		MR. HINKLE: Yes sir.
25

· -

1	Q	What is the rate of production on that straun well?				
2	A	Well, it is producing approximately 20 barrels of oil				
3		and about 300 barrels of water and gas is around 500 mcf				
4		per day.				
5		We are hopeful that this second well we are moving up				
6	Q	And have you made a calculation as to what the allowable				
7		would be under 160 acres spacing for this Wolf-camp well?				
8	A	No. I have not, sir.				
9	Ω	Or what the rate of gas production would be?				
10	А	No. I think that it is approximately 400 barrels a day.				
11	The gas ratio thereof 1500 to 1 would be closer.					
12		MR. NUTTER: Are there any further questions of Mr.				
13		Dean? He may be excused.				
14		(Witness excused)				
15		MR. NUTTER: Do you have anything further, Mr. Hinkle?				
16		MR. HINKLE: That's all.				
17		MR. NUTTER: Does anyone have anything they wish to				
18		offer in case 4577?				
19		Take the case under advisement.
