NMOCD Examiner Hearing
May 28, 1992
Application of Merrion Oil & Gas
Case #10478

Temporary Special Rules and Regulations for the Rock Mesa Fractured Mancos Shale Oil Pool in Sandoval County, New Mexico.

Rule 1

Each well permitted, completed, or recompleted in the Rock Mesa Fractured Mancos Shale Oil Pool within the boundaries of the lands described in Exhibit "A", attached hereto and incorporated herein by reference, or in the Fractured Mancos Shale formation within one mile thereof shall be spaced, drilled, operated, and produced in accordance with the special rules and regulations hereinafter set forth.

Rule 2

A standard proration unit for a well completed in the Rock Mesa Fractured Mancos Shale Oil Pool shall be 632 to 648 acres which shall comprise a single governmental section being a legal subdivision of the United States Public Land Surveys. A second well may be drilled on a proration unit if the first well cannot produce more than 50 barrels of oil per day and more than 300 MCF per day after 180 days of production. A non-standard proration unit resulting for a correction in a lands survey may be approved administratively by the Director of the Division if such proration unit is no greater than 800 acres or less than 480 acres. To obtain such approval, the applicant shall furnish the Director with the appropriate plats and request that the application be published on the hearing docket as an administrative application. The applicant may furnish proof that all of the operators of direct and diagonal offset proration units were notified by registered or certified mail of his intent to form a non-standard unit. The Director may approve the application upon receipt of written consents, or if no offset operator has objected to the non-standard unit within 20 days after the offset operator was notified, or if no objections are received within 10 days of the notice being published in the regular hearing docket. The Director may docket any application for hearing.

Rule 3

A standard well location shall be no closer than 990 feet to the outer boundary of the proration unit nor closer than 10 feet to an interior line. A non-standard location can be approved only after notice and hearing and shall subject the entire proration unit to an allowable penalty. The second well on a proration unit cannot be located in the same quarter section as the first well. A directional survey will be required of any well drilled closer than 1090 feet to the proration unit boundary before an allowable is assigned to it. The requirement for a directional survey may be waived by the Director upon receipt of written consents by all Operators of direct and diagonal offset proration units.

Rule 4

The top allowable production for wells completed in the Rock Mesa Fractured Mancos Shale Oil Pool shall be 800 barrels of oil per day with a limiting gas-oil ratio of 2000 cubic feet of gas per barrel. Wells completed at non-standard bottomhole locations will be assigned top allowables according to the following formula:

(Actual bottomhole distance to drill tract boundary/990)³ X 800

More de la 3

Vor my proprie

Rule 5

Within 30 days of first production from a well drilled in the Rock Mesa Fractured Mancos Shale Oil Pool the well shall be shut-in and a bottom hole pressure build-up test conducted in accordance with procedures obtained from the Aztec office. The results of this test shall be submitted to the Aztec District office. At the request of the operator, these results will be kept confidential for a period of 365 days from the date of completion. (See Rule 1105)

Rule 6

The vertical limits of the Fractured Mancos Shale formation shall be from 500 feet below the top of the Point Lookout formation to the base of the Greenhorn formation.

Rule 7

These special rules and regulations shall be in force and effect for a period of two (2) years from and after their adoption by the Division. An examiner hearing shall be scheduled during the month of June, 1994, at which time the operators in the Rock Mesa Fractured Mancos Shale Oil Pool may appear and show cause why said pool should not be developed in accordance with statewide spacing and depth bracket allowable rules.
