OIL CONSERVATION DIVISION BEFORE EXAMINE BY CATANACH

POST OFFICE BOX 2008  
STATE LAND OFFICE BUILDING  
SANTA FE, NEW MEXICO 87501

Revised 7-1-81

OIL CONSERVATION DIVISION

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose:  Secondary Recovery  Pressure Maintenance  Disposal  Storage  
Application qualifies for administrative approval?  Yes  No CASE NO. 10534
- II. Operator: American Hunter Exploration  
Address: 410 Seventeenth St., Suite 1200 Denver, CO 80202  
Contact party: Jim Artindale Phone: (403) 260-1981
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project?  yes  no  
If yes, give the Division order number authorizing the project \_\_\_\_\_.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- \* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
  2. Whether the system is open or closed;
  3. Proposed average and maximum injection pressure;
  4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
  5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- \* VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- \* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- \* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Jim Artindale Title: Chief Exploitation Engineer

Signature: Jim Artindale Date: July 24, 1992

- \* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

**AMERICAN HUNTER WEST PUERTO CHIQUITO  
MANCOS GAS INJECTION SCHEME**

**APPLICATION FOR AUTHORIZATION TO INJECT  
DATA SUPPORTING OCD FORM C-108**

**I. Purpose: Pressure Maintenance**

Application qualifies for administrative approval? No

**II. Operator: American Hunter Exploration**

Address: 410 Seventeenth St., Suite 1200, Denver, CO, 80202

Contact Party: Jim Artindale Phone: (403) 260-1981

**III. Well Data (see also Injection Well Data Sheet)**

Lease Name: Jicarilla 2A (Serial No. 701-90-0001)

Well Number: #1 (API No. 30-039-25118)

Location: Sec. 2, T27N R1W

Footage Location: refer to Injection Well Data Sheet

Surface Casing Size: 10 3/4" K-55

Surface Casing Weight: 40.5 lb/ft

Surface Casing Depth: 250'

Surface Casing Hole Size: 13 3/4"

Surface Casing Top of Cement: Surface

Top Determined By: Full Returns

Production Casing Size: 7 5/8" L-80

Production Casing Weight: 26.4 & 29.7 lb/ft

Production Casing Depth: 4569' MD

Production Casing Hole Size: 9 7/8"

Production Casing Top of Cement: 330'

Top Determined By: Temperature Log

Liner Size: 5 1/2"

Top of Liner: 4218' MD

Bottom of Liner: 6625' MD

Liner Top of Cement: Was Not Cemented

Tubing Size: 2 7/8"

Tubing Depth Set: 5739' MD

Tubing Lining Material: L-80 tubing-no added lining

Packer Set Depth: Tubing anchor set at 3975'MD

Name of Injection Formation: Niobrara Member of the Mancos

Pool: West Puerto Chiquito

Injection Interval: 5324'MD (4542'TVD) to 6632'MD (4854'TVD)  
372'FNL 2032'FEL to 620'FNL 3277'FEL

Preperforated liner, uncemented

Proposed injection well was drilled as a test of the fractured Niobrara interval. The well is currently an uneconomic well.

There are no other perforated intervals for other formations in the wellbore of the proposed injection well.

There are no other Stratigraphically deeper or shallower oil and gas producing formations in the area. The 'C' zone of the Niobrara is a minor contributor to the production of the Boulder Field to the North.

IV. Is this an expansion of an existing project? NO

V. A map which identifies all wells and leases within two miles of the proposed injection well and "area of review" is attached.

VI. The only well within the area of review is the proposed injection well. A well summary sheet and an injection well data sheet are attached for this well.

## VII Proposed Operations

Fluid to be injected: Solution Gas from the Mancos

Average Daily Rate: 600 to 800 mcf/d

Maximum Daily Rate: 1500 mcf/d

The system is a closed system.

Average injection Pressure: 600 to 800 psia  
Maximum injection pressure: 1200 psia

The injection fluid will be solution gas from a offsetting well producing from the same formation.

## VIII Geologic Data

Lithology: Fractured, calcareous very fine grained sandstone interbedded with calcareous shales.

Geologic Name: Niobrara Member of the Mancos Formation

Gross Reservoir Thickness: Approximately 110' vertically

Depth of Reservoir: MPP 5470'MD or 4570'TVD

To the best of the operators knowledge, there are no known wells which supply drinking water within the area of review. Additionally, the operator is unaware of any shallower or deeper water aquifers present within the regional area. The operator believes that the overlying Upper Mancos shale serves as a seal for both the oil present in the reservoir and any gas injected into the reservoir.

IX. No stimulation program is planned at this time.

X. Logging Information: Previously submitted  
Test Data: Copies of pressure tests are attached.

American Hunter Exploration: Jicarilla 2A

**WELL SUMMARY**  
**AMERICAN HUNTER EXPLORATION LTD.**  
**JICARILLA 2-A #1**  
**ne ne section 2 T27N R1W**

**Surface Location:**

- 442' FNL 1177' FEL

**Bottomhole Location:**

- 620' FNL 3277' FEL

**Spud Date:**

- 09/29/91

**Surface Casing:**

- Drilled 14  $\frac{3}{4}$ " hole to 250'.
- Set 10  $\frac{3}{4}$ " surface casing on 09/30/91.

**Intermediate Drilling History:**

- Drilled 9  $\frac{7}{8}$ " hole to 3796' MD (KOP) (3784'TVD) and ran Dual Induction, L.S. Sonic - G.R. logs.
- Drilled ahead with 9  $\frac{7}{8}$ " hole to 4569' MD (4415'TVD) and ran 7  $\frac{5}{8}$ " intermediate casing on 10/14/91.

**Final Drilling History:**

- Drilled 6  $\frac{3}{4}$ " hole to 5324' MD (4542'TVD) (372'FNL, 2,032'FEL), began to lose oil, experienced bit torque and temporarily lost sample returns.
- Continued drilling to 6632' MD (4854'TVD) through several more zones of bit torques and losses of oil to the formation.
- TD'd well on 10/28/91 at 6632' MD (620'FNL, 3,277'FEL).

### Completion History:

- Ran pre-perforated 5 1/2" liner to TD 6632' MD (4854'TVD) on 10/28/91.
- Placed alternating pre-perf'd/blank liner with perfs beginning at 4559' MD to TD 6625' MD (Gross Interval).
- Moved in completion rig on 11/07/91.
- Begin swabbing on 11/09/91. SITP 0 psi. SICP 15 psi.
- Ran Amerada pressure recorders with 360 hour clocks and shut in for build-up tests on 11/20/91.
- Rigged up pumping unit from 11/24/91 to 11/26/91.
- Began pumping well on 12/12/91.
- Continue pumping well. First new oil pumped on 02/02/92, corresponding to date of completion.
- Pumped until 02/10/92, when weather forced shut-in.
- Pumped for three day test 05/20/92 to 05/23/92. Shut-in well again due to road conditions.
- Began OCD-authorized commerciality and reservoir test at 0600 hrs. on 06/27/92. Began by running bottomhole pressure buildup.
- Pump well to 07/17/92.

Jicarilla 2A No. 1  
Rio Arriba County, New Mexico  
Our File No. 2-23839-O

Dear Mr. Lister:

Attached hereto are the results of a bottomhole pressure observation which was conducted on the above captioned well June 27 through June 28, 1992.

The data presented are in tabular and graphical form.

It has been our pleasure to have conducted this service for you. If we may be of further assistance, please do not hesitate to contact us.

Sincerely,

TEFTELLER, INC.
