Application for Compulsory Pooling Re: SG Interests I, Ltd. N/2 of Section 24, Township 29 North, Range 10 West, N.M.P.M., San Juan County, New Mexico

Gentlemen:

Please consider this letter the formal application of SG Interests I, Ltd. for an order of the New Mexico Oil Conservation Division force-pooling all mineral interests in the Basin-Fruitland Coal Gas Pool underlying the N/2 Sec. 24, T29N, R10W, N.M.P.M., San Juan County, New of Mexico, forming a standard 320.00 acre coal gas spacing and proration unit for said pool, to be dedicated to its Archunde 29-10-24 #1 Well to be drilled at a standard coal gas well location in the 1,030 feet from the North line and 640 feet from the East line of said Section 24. SG Interests I, Ltd. requests that such order designate SG Interests I, Ltd. as the operator of the proposed well, and that it provide for the recovery by the joining working interest owners of the cost of drilling, completing, equipping and operating the proposed well, together with a reasonable charge for risk involved in drilling the well. In addition, SG Interests I, Ltd. requests that the order establish a reasonable charge for the supervision of the well during the drilling and production stages.

State of New Mexico Oil Conservation Division Page 2 October 26, 1992

Please place this application on the November 19, 1992 docket of the New Mexico Oil Conservation Division. Please advise should you require any additional information.

Sincerely,

Jommy Roberts

Attention: A.M. O'Hare

Administrative Order NSL-3173

Dear Mr. O'Hare:

Reference is made to your application on behalf of the operator SG Interests I. Ltd., by letter dated September 10, 1992 for a non-standard coal gas well location for the Archunde 29-10-24 Well No. 1 to be located 1030 feet from the North line and 640 feet from the East line (Unit A) of Section 24, Township 29 North, Range 10 West, NMPM, Basin Fruitland Coal (Gas) Pool, San Juan County, New Mexico. The N/2 of said Section 24 shall be dedicated to the well forming a standard 320-acre gas spacing and proration unit.

By the authority granted me under the provisions of Rule 8 of the Special Rules and Regulations for the Basin-Fruitland Coal (Gas) Pool as promulgated by Division Order No. R-8768, as amended, the above-described unorthodox coal gas well location is hereby approved.

Sincerely,

WILLIAM J. LEM Director WJL/MES/jc

SG Interests I, Ltd., proposes to drill a vertical hole to develop the Fruitland Coal formation at the above described site. The well will be drilled with a low solids non-dispersed mud. A double ram type blowout preventer will be used to maintain well control at all times during the drilling of the well. Schematic sketches of the BOP and choke assembly, along with a description of that equipment are included as Exhibits to this application. A full suite of logs will be run upon reaching TD. Both strings of casing will be cemented in separate single stage cement jobs. A high strength cement will be placed across the pay zones and at least five hundred feet above the bottom of the hole. A minimum of ten centralizers will be used to optimize placement of the cement around the pipe on the long string.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: IF PROPOSAL IS TO DEEPEN OR PLUG BACK, GIVE DATA ON PRESENT PRODUCTIVE ZONE AND PROPOSED NEW PRODUCTIVE ZONE, GIVE BLOWOUT PREVENTER PROGRAM, IF ANY.

| I hereby certify that the information above is true and complete to the best of my know<br>SIGNATURE | Hedge and bedief.<br>Agent for SG Interests I, Ltd. August 19, 199 |

Exhibit #1 BOP Stack Arrangement

.

# Exhibit #2 Choke Manifold & Accumulator Schematic

### Exhibit #3 Biowout Prevention Equipment Specimations

- 1. All BOP equipment shall be fluid and/or mechanically operated.
- 2. BOP's and all fittings will be in good working condition.
- 3. Equipment through which the bit must pass shall be at least as large as the casing size being drilled
- 4. The nipple above the BOP shall be at least the same size as the last casing set.
- 5. The upper kelly cock with handle and lower kelly cock shall be rated at the BOP working pressure.
- 6. A floor safety value (full opening) or drill string BOP with appropriate pressure ratings shall be available on the rig floor with connections or subs to fit any tool joint in the string.
- 7. The minimum size choke line shall be 3 inches nominal diameter, with a minimum size for vent lines downstream of chokes of 2 inches nominal, and vent lines which by-pass shall be a minimum of 3 inches nominal and as straight as possible.
- 8. All valves, fittings and lines between the closing unit and the blowout preventer stack should be of steel construction with rated working pressure at least equal to working pressure rating of the stack. Lines shall be bundled and protected from damage.

9. Minimum size for kill line is 2 inches nominal.

10. Ram type preventers shall be equipped with extension hand wheels or hydraulic locks.
