All in Sec. 14, T-18-S, R-32-E,
Lea County, New Mexico

Gentlemen:

Santa Fe Energy Operating Partners, L.P. hereby proposes the drilling of the three (3) referenced wells to be drilled as 10,200' Bone Springs test at a legal location in the appropriate 40 acre quarter sections to be allocated to these wells. Estimated costs for drilling each well is \$344,315.00 Dry Hole and \$758,562.00 completed.

Santa Fe invites you to join us in the drilling of these wells, and in this regard we have enclosed two (2) Cost Estimates (AFES). Should you choose to join in the drilling of these tests, please execute and return one copy of the AFE to the undersigned.

If you are not interested in drilling any of these tests, we would request that you farmout your interest in the applicable proration unit, delivering a 75% NRI with the option to convert any retained ORRI to a proportionate 25% WI at Payout of the well. All interests to be proportionately reduced to your interest in the lease and proration unit.

Once you have made your elections concerning each of these tests, the appropriate contracts will be forwarded for your execution.

Due to the considerable time required to secure commitments in the Shinnery "14" Fed #1, Santa Fe is in the process of filing for a Compulsory Pooling Action on each of the above wells at the Oil Conservation Division (OCD) for the State of New Mexico with the hearing date set for December 21, 1988. Therefore your immediate response to this proposal will be most appreciated. Also enclosed please find a copy of the Application to be filed with the OCD.
