Re: Case No. 9718

Dear David,

After reviewing the exhibits from this case, I am still unsympathetic to the idea of creating two pools in the Delaware in this area. Although it is obvious that the A and B zones are distinct and different, I feel that other factors outweigh the companies' desire to have multiple pools. Namely:

(1) Further production of these wells will undoubtedly lower production below allowables at which time both zones can be produced without commingling.

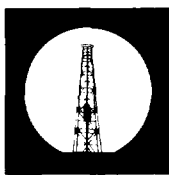

(2) To start breaking out "zones" in the Delaware or any other formation could set a precedent that has the possibility of becoming unmanageable.

(3) The Oil Conservation Division's job is to protect correlative rights and prevent waste. I think both will be taken care of with the single pool.

Admittedly, the companies won't be able to produce as much oil with one pool, but that brings us to what I perceive to be the bottom line. The companies want to produce more oil. With two pools they would have two allowables. I think a much better, simpler, and cheaper way to solve the problem is to increase the allowable in the pool. This would give the companies what they ultimately want (more oil to sell) and give the O.C.D. what we want (one pool).

Sincerely,

Darrell Moore

Attention: Mr. David Catanach, Petroleum Engineer

Addendum: Request by Meridian Oil Inc. for the Creation of a new Delaware oil pool in Eddy County, New Mexico; Parkway "B" sand; Case No. 9718, NMOCD hearing held August 23, 1989

Gentlemen:

Subsequent meetings following the August 23, 1989 hearing which addressed the above captioned request have been held. Those involved, Meridian Oil Inc., Santa Fe Energy Operating Partners, L.P. and Siete Oil & Gas Corporation have reached an agreement concerning the designation of the Parkway Delaware "B" sand.

It was mutually agreeable to all parties represented at the August 23, 1989 hearing, that the vertical limits for Parkway Delaware "B" sand should be as referenced on the previously submitted Santa Fe Energy's Exhibit - Stratigraphic Cross-section A-A'.

"B" Sand Vertical Limits

	Top	Bottom
a. Meridian's - Apache Federal #1-A	3947'	4124'
b. Meridian's - Apache Federal #2-A	3947'	4134'
c. Siete's - Renegade Federal #2	3917'	4122'
d. Siete's - Osage Federal #1	3914'	4134'
e. Meridian's - Apache Federal #1	3963'	4182'
f. Santa Fe's - Parkway State No. 2	4004'	4227'
g. Santa Fe's - Parkway State No. 4	4045'	4263'

The above cross-section was chosen primarily due to its higher resolution (log scale of five inches to one hundred feet) and the inclusion of Delaware producers in both Sections 35 and 36. Please note that the lower limits of the proposed Parkway "B" sand also correspond to the upper limits of the Parkway "A" sand.

All other items requested for in the hearing, pertaining to well spacing, production allowables, acreage covered, etc. remain unchanged.

Consenting to the above statements
