"Hand Delivered"

Re: Anadarko Production Company
Injection Well Applications
in the Square Lake Field
Eddy County, New Mexico

8380
a/c

Dear Mr. Stamets:

On behalf of Anadarko Production Company, I would appreciate you setting the enclosed applications for the Examiner Hearing now set for October 17, 1984:

(a) Anadarko Production Company seeks the expansion of its Federal "Q" Lease Waterflood Project, Eddy County, New Mexico, previously approved by Division Order R-4049 for the addition of two injector wells for the injection of water openhole into the Grayburg and San Andres formations, to-wit:

Federal "R" No. 3 Well, 330' FNL and 330' FWL Section 10, T17S, R30E, and

Federal "R" No. 8 Well, 1980' FNL and 660' FEL Section 10, T17S, R30E.

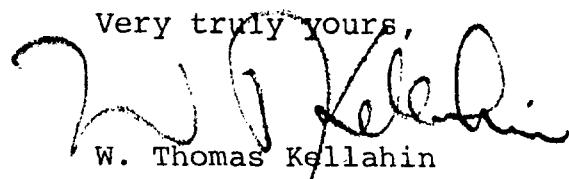

* (b) Anadarko Production Company seeks the expansion of its Burnham GSA Unit Waterflood Project, Eddy County, New Mexico, previously approved by Division Order R-4610 for the addition of the following injector well for injection of water openhole, into the Grayburg and San Andres formations, to-wit:

Burnham GSA TR 6 No. 1 Well, 1980' FSL and 1980' FWL, Section 2, R17S, R30E.

KELLAHIN and KELLAHIN

Mr. Richard L. Stamets
September 21, 1984

BEFORE THE OIL CONSERVATION COMMISSION
OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
COMMISSION OF NEW MEXICO FOR
THE PURPOSE OF CONSIDERING:

CASE NO. 5032
Order No. R-4610

APPLICATION OF ANADARKO PRODUCTION
COMPANY FOR A WATERFLOOD PROJECT,
EDDY COUNTY, NEW MEXICO.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 a.m. on July 25, 1973, at Santa Fe, New Mexico, before Examiner Richard L. Stamets.

NOW, on this 24th day of August, 1973, the Commission, a quorum being present, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant, Anadarko Production Company, seeks authority to institute a waterflood project in the Burnham GSA Unit Area, Square Lake Pool, by the injection of water into the Grayburg-San Andres formation through six injection wells in Section 2, Township 17 South, Range 30 East, NMMPM, Eddy County, New Mexico.

(3) That the wells in the project area are in an advanced state of depletion and should properly be classified as "stripper" wells.

(4) That the proposed waterflood project should result in the recovery of otherwise unrecoverable oil, thereby preventing waste.

(5) That the operator should take all steps necessary to ensure that the injected water enters only the proposed injection zones and is not permitted to escape to other formations or onto the surface from injection, production, or plugged and abandoned wells.

-2-

Case No. 5032
Order No. R-4610

(6) That the applicant proposes to treat the water to be injected to minimize corrosion.

(7) That the subject application should be approved and the project should be governed by the provisions of Rules 701, 702, and 703 of the Commission Rules and Regulations.

IT IS THEREFORE ORDERED:

(1) That the applicant, Anadarko Production Company, is hereby authorized to institute a waterflood project in the Burnham GSA Unit Area, Square Lake Pool, by the injection of water into the Grayburg-San Andres formation through the following-described wells in Section 2, Township 17 South, Range 30 East, NMPM, Eddy County, New Mexico:

Tract 1	-	Well No. 1	-	Unit F
Tract 1	-	Well No. 3	-	Unit H
Tract 2	-	Well No. 2	-	Unit J
Tract 4	-	Well No. 1	-	Unit P
Tract 5	-	Well No. 1	-	Unit L
Tract 6	-	Well No. 2	-	Unit N

(2) That prior to initial injection of water into any of said injection wells, the operator shall obtain the approval of the supervisor of the Commission's Artesia district office as to the casing and cementing of said well.

(3) That injection of treated water into each of said wells shall be through tubing, set in a packer which shall be located as near as practicable to the uppermost perforation, or in the case of open-hole completions, as near as practicable to the casing-shoe; that the casing-tubing annulus of each injection well shall be loaded with an inert fluid and equipped with an approved pressure gauge or attention-attracting leak detection device.

(4) That the operator shall immediately notify the supervisor of the Commission's Artesia district office of the failure of the tubing or packer in any of said injection wells, the leakage of water or oil from around any producing well, or the leakage of water or oil from any plugged and abandoned well within the project area and shall take such timely steps as may be necessary or required to correct such failure or leakage.

(5) That the subject waterflood project is hereby designated the Anadarko Burnham GSA Unit Waterflood Project and shall be governed by the provisions of Rules 701, 702, and 703 of the Commission Rules and Regulations.

-3-

Case No. 5032
Order No. R-4610

(6) That monthly progress reports of the waterflood project herein authorized shall be submitted to the Commission in accordance with Rules 704 and 1120 of the Commission Rules and Regulations.

(7) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

STATE OF NEW MEXICO
OIL CONSERVATION COMMISSION

I. R. TRUJILLO, Chairman

ALEX J. ARMIJO, Member

RECEIVED

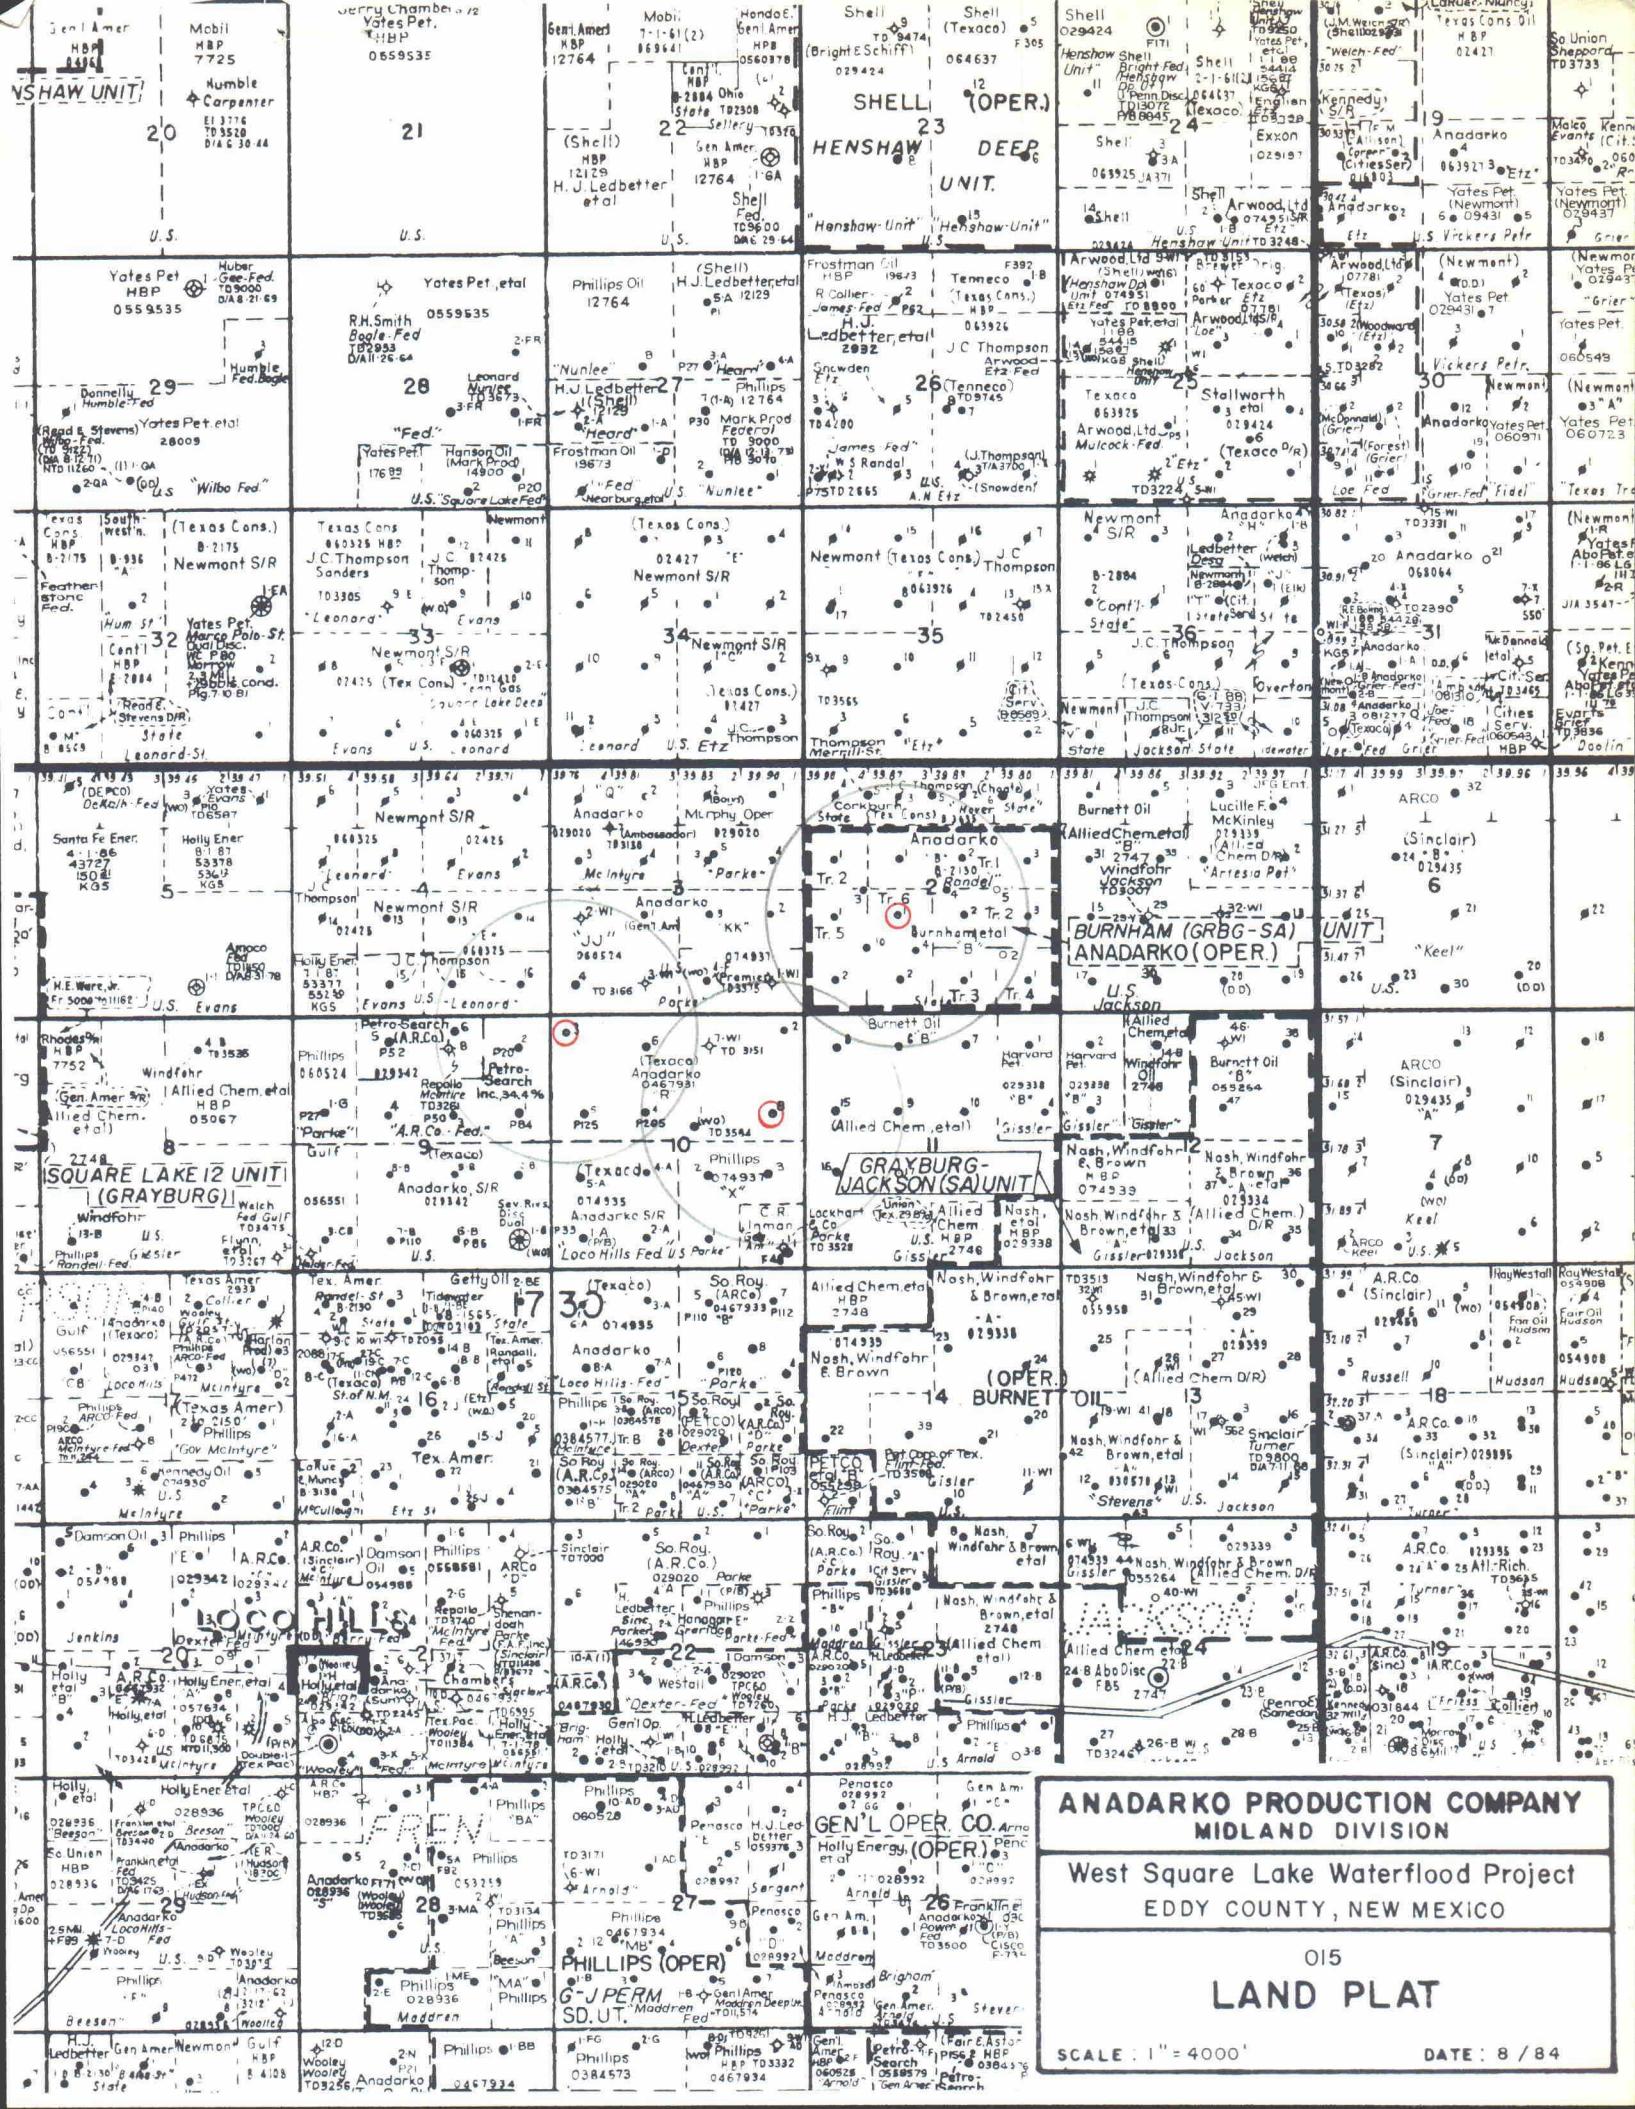

SEP 24 1984

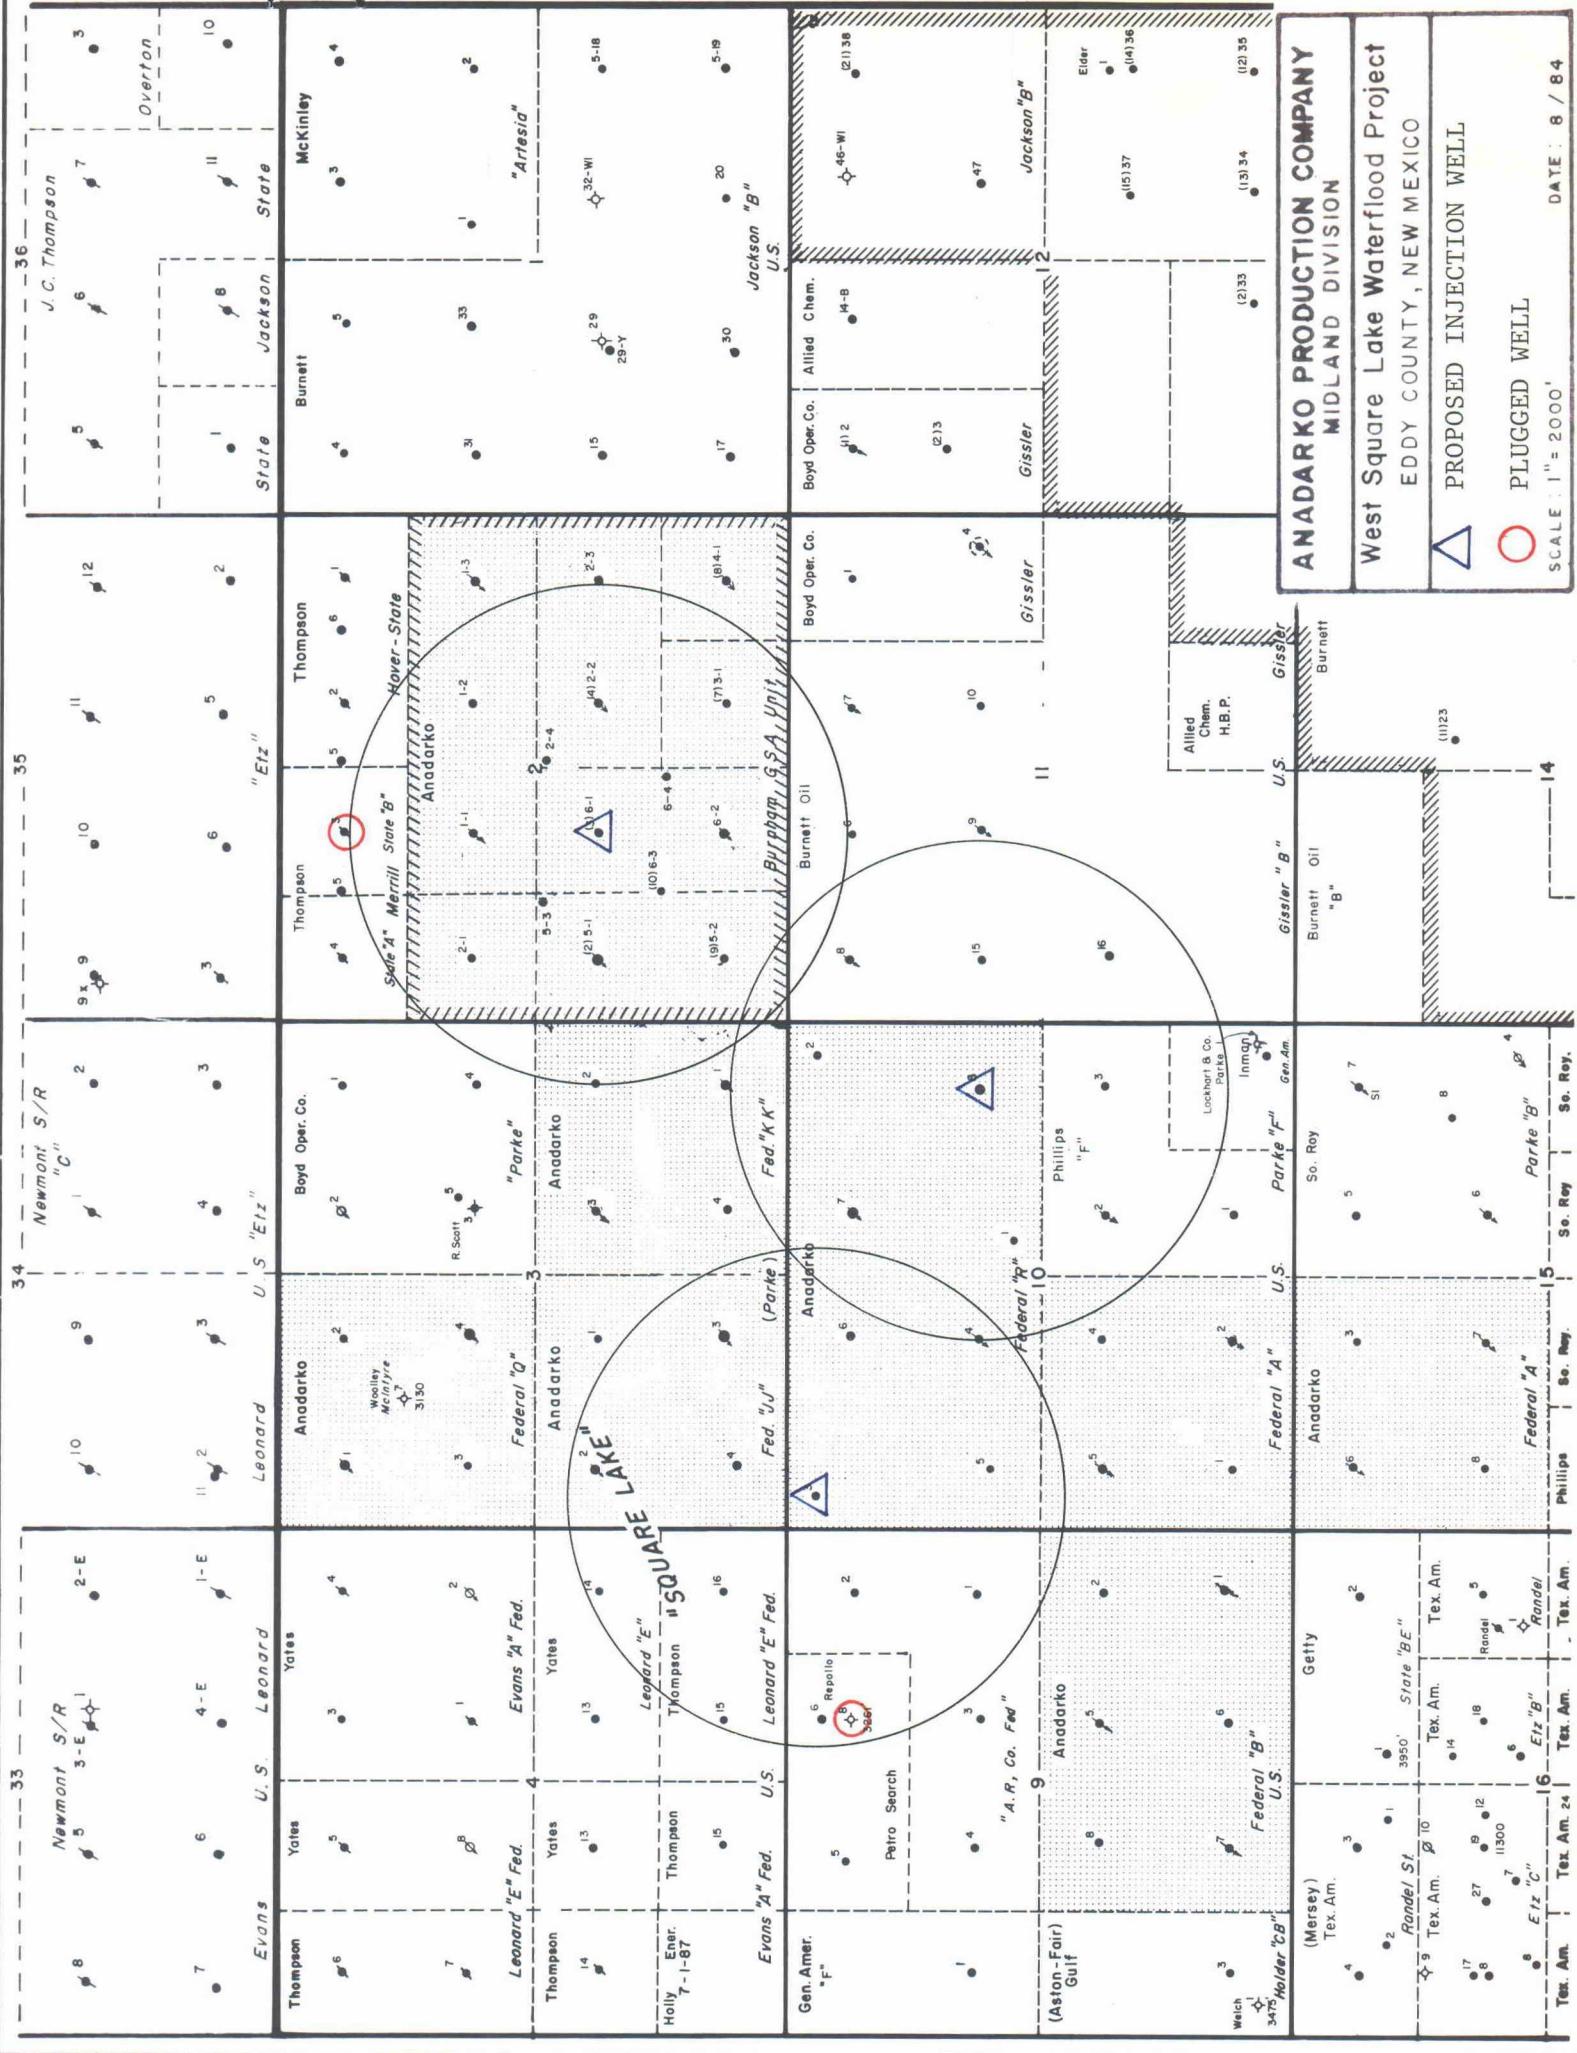

Case 5380

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no
- II. Operator: Anadarko Production Company
- Address: P. O. Box 2497, Midland, Texas 79702
- Contact party: D. G. Kernaghan Phone: 915/682-1666
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project R 4610 and R 4049.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification
- I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- Name: D. G. Kernaghan Title Division Operations Manager
- Signature: D. G. Kernaghan Date: September 12, 1984

- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

PROPOSED OPERATING DATA

Anadarko - Burnham GSA TR 6 No.1

Anadarko - Federal "R" No.3

Anadarko - Federal "R" No.8

Square Lake Field, Eddy County, New Mexico

Average Injection Volume - 250 BWPD/well

Injection Pressure - Within limits determined by NMOCD to be safe.

Type of System - Closed

Water Source - Produced water plus fresh makeup water

Injection Zones - Grayburg sands - 2700-3000'
Very fine to fine grained, sub-rounded,
Sub-arkosic w/dolomitic cement.
Lovington sand (San Andres), 3000'-3150'
same as Grayburg w/poorer sorting and
more clay.

Fresh Water Sources - Rustler, surface to 500'.

Water Analyses - Attached

Stimulation - Additional stimulation will consist of
small to medium sized acid jobs.

Subject: Recommendations relative to analysis #784482 (8-7-84)

Gentlemen:

We are not confident of the objective herein, but we do note that the windmill water has substantially more salts than the West Square Lake plant fresh water. However, the high salt content in the windmill water is almost entirely sulfate that is dominated by calcium sulfate (gypsum). Most of the other salts are sulfates of magnesium and sodium and/or potassium. Therefore, it is obvious that the excessive salts in the windmill water are not originating from any of the produced waters represented herein. Contact us for any additional discussion of this matter.

Yours very truly,

Waylan C. Martin, M.A.

Re: Expansion of Anadarko's
Burnham GSA Unit and
Federal "R" Waterflood Projects
Square Lake Field
Eddy County, New Mexico

Gentlemen:

Anadarko Production Company is making application to inject water in the following wells:

Burnham GSA Unit TR.6 No.1	Unit K, Sec.2, T17S, R30E
Federal R No.3	Unit D, Sec.10, T17S, R30E
Federal R No.8	Unit H, Sec.10, T17S, R30E

These wells are in currently active waterflood projects.

A copy of our application and a plat showing the location of the proposed wells is attached. Please contact me at 915-682-1666 if you have any questions.

Yours truly,

A handwritten signature in black ink, appearing to read "D. G. Kernaghan". The signature is fluid and cursive, with a large, stylized initial "D" and "G".
