Approval of Unorthodox
Well Location
Eddy County, New Mexico
EMCjr Corp - #1 Spitfire

Gentlemen:

Earle M. Craig, Jr. Corporation ("Craig") proposes to drill a 13,000' Wolfcamp test at a location 1,970' FNL and 670' FEL of Section 19, T-26-S, R-31-E, NMPM, Eddy County, New Mexico, which requires approval by the Commission under Rule 104F. We hereby request a hearing before the Oil Conservation Commission on the 10 April 1985 agenda, to obtain an order approving the proposed location.

The proposed 320-acre proration unit consists of N/2 of said section, to provide for optimum development of prospective acreage. Operators of proration or spacing units offsetting the proposed proration unit, as shown on the attached plat, have been notified by certified mail.

Three geologic maps, wireline log, cross-section, and a discussion of geologic conditions necessitating the proposed location are enclosed. We are obtaining waivers of objection from the offset operators. When we have received all waivers, we respectfully will request our application be granted approval administratively pursuant to Rule 104F (II) and (III) of Oil Conservation Division Rules and regulations. Subsequently, we then would request our cause to be dismissed from the 10 April 1985 agenda.

As the proposed leasehold situation requires our well be commenced in April, 1985, your prompt consideration is appreciated.

Very truly yours,

Steven R. Foy
Landman
