Attention Richard L. Stamets

Approval of Unorthodox *Case 8707*
Well Location
Eddy County, New Mexico
EMCjr Corp - Spitfire "18" #1

Gentlemen:

Earle M. Craig, Jr. Corporation ("Craig") proposes to drill a 13,000' Wolfcamp test at a location 660' FEL and 660' FSL of Section 18, T-26-S, R-31-E, NMPM, Eddy County, New Mexico, which requires approval by the Commission under Rule 104F. We hereby request a hearing before the Oil Conservation Commission on the 25 September 1985 agenda, to obtain an order approving the proposed location.

The proposed 320-acre proration unit consists of South Half (S/2) of said section, to provide for optimum development of prospective acreage. Operators of proration or spacing units offsetting the proposed proration unit, as shown on the attached plat, have been notified by certified mail.

Two geologic maps, cross-section including wireline porosity logs, and a discussion of geologic conditions necessitating the proposed location are enclosed. A cumulative production-producing zone map also is enclosed.

Yours truly,

Steven R. Foy
Landman

SRF/tjm
