Re: Case No. 9140  
Order No. R-8481

Dear Mr. Stogner:

This letter is to confirm our conversation this afternoon in which we discussed Permian's renewed interest in the construction and operation of the Brine disposal facility as approved by your office on June 3, 1987. Please confirm whether the above order has remained active as requested in my letter of April 20, 1989 or was closed. Should said order not be active, please consider this letter Permian's official request to reactivate said order in accordance with all the terms and conditions of the original application.

Your prompt attention to this matter will be greatly appreciated. I may be contacted at 713-787-2558 should you have any questions.

Sincerely,  
  
Thomas M. Harris
