Dear Mr. Catanach:

OIL CONSERVATION DIVISION

At the hearing held on August 26, 1987 I presented the referenced case to you for consideration. You have requested that I obtain a waiver of objection and notice from Penroc Oil Corporation. I have enclosed a copy of that waiver signed by Mr. M. Y. Merchant on behalf of Penroc.

I believe that this now completes all of the information you requested. Please advise me if you need anything further prior to issuance of an order of approval.

Very truly yours

W. Thomas Kellahin

Re: Samedan Oil Corporation Hughes Federal #3-N Section 17, T23S, R37E

Dear Sterling:

At yesterdays New Mexico Oil Conservation Division hearing I represented Samedan Oil Corporation and presented their request for the approval of a non-standard 160 acre spacing and proration unit for the referenced well in the Jalmat Gas Pool.

I have enclosed a copy of their exhibits for your information. You will note that the plat shows Penroc to have a Jalmat Gas well located in the NW/4NW/4 of Section 20.

During the course of the hearing, Samedan requested that its allowable for the 160 acre non-standard unit be made effective as of April 28, 1987, the approximate date that the Division received the original administrative application, which was subsequently set for hearing.

Because of Samedan's request for an allowable that pre-dated the hearing, Mr. Catanach, the Division hearing officer, requested I contact you and obtain from you a waiver from Penroc to remove any objection to making the Samedan allowable for this well effective as of April 28, 1987.

Re: Hughes Federal #3-N Section 17, T23S, R37E Jalmat Gas

Gentlemen:

This will confirm conversation between your Vertis Diamond and Evelyn Downs of the OCD that the recompletion of the above-referenced well from the Langlie Mattix Pool to the Jalmat Gas Pool cannot be approved until you have obtain approval of an unorthodox location and a non-standard proration unit. Since this is a recompletion there should not be a problem.

Please make your application to Santa Fe for the above exceptions and furnish this office with a copy of your application.

Also, please submit a Form C-102, acreage dedication plat outlining the acreage to be dedicated to the Jalmat completion.

When the unorthodox location and the non-standard proration unit have been approved and the acreage dedication plat has been received, we will approve your C-104 for an allowable assignment.

Very truly yours,

OIL_CONSERVATION DIVISION

Gerry Sexton

Supervisor, District I

ed

Attn: Vertis Diamond

P.S. In view of your second conversation with Evelyn Downs the following situation may exist. If you plan to dedicate the SE/4 SW/4 and the S/2SE/4 & NE/4 SE/4 for your 160 acre proration unit the location will be ok. However, the non-standard proration unit will not all lie within one quarter section and cannot be approved administratively.

> Re: Hughes Federal #3-N Section 17, T-23-S, R-37-E, Jalmat Gas, Lea County

Samedan Oil Corporation requests approval of the recompletion of the above well from the Langlie Mattix Pool into the Jalmat Gas Pool. Acreage held requires approval of a non-standard proration unit.

Back in the 70's, Samedan turned this 160 acre lease over to Getty to be put into their Hughes Federal Queen unit. A contingency in the agreement called for Samedan to have the option to "take-over" these wells should Getty ever decide to abandon the lease. All surface and down-hole equipment would revert to Samedan, as would plugging responsibilites.

A delay in an assignment by the BLM coincided with the drop in oil prices, causing a further delay in Samedan's recompletion. On December 15th, 1986, the New Mexico Oil and Gas Conservation Commission sent correspondence indicating the above well failed a pressure annulus test. Work to return the well to production or be plugged was required to be completed by February 28th, 1987.

Samedan has successfully made repairs and recompleted the well into the Jalmat Gas Pool and at this time requests the approval of a non-standard proration unit.

All operators owning interests in the quarter section in which the non-standard proration unit is situated and which acreage is not included within the non-standard proration unit have been sent, by registered mail, copies of this request and a waiver request to be submitted directly to the New Mexico Oil Consevation Commission. A list of such operators is attached.

Should you have any questions, please contact this office.

Yours truly,

William G. Murray William G. Murray Division Production Superintendent
