

APPLICATION FOR AUTHORIZATION TO INJECT

Case 10684
DIVISION

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no
- II. Operator: SDX RESOURCES, INC.
- Address: 300 WEST TEXAS, SUITE 525, P. O. BOX 5061 MIDLAND, TX 79704
- Contact party: CHUCK MORGAN Phone: (505) 748-9814
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project _____.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Chuck Morgan Title: Engg
Signature: Chuck Morgan Date: 1/13/93

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

C-108

January 11, 1993

APPLICATION FOR AUTHORIZATION TO INJECT
SDX Resources, Inc.

- 1.) Leonard Fed. #3
Unit F, Sec. 33, T-17-S, R-29-E,
Eddy County, New Mexico
- 2.) Leonard B Fed. #1
Unit B, Sec. 33, T-17-S, R-29-E,
Eddy County, New Mexico

I. SDX plans to convert these 2 wells to injection wells in the Grayburg and San Andres Formations.

II. Operator: SDX Resources, Inc.
300 W. Texas, Suite 525
P. O. Box 5061
Midland, TX 79704-5061

→ ARTESIA OFFICE 748-9724
FAX 748-9810

Chuck Morgan (915) 685-1761

III. Well Data: See Attachment A

IV. This is not an expansion of existing project.

V. See Attached maps. Attachment B-1 and B-2.

VI. Tabular list of wells within both areas of review. (See Attachments C-1 and C-2) (P&A Schematics Attachment D)

VII. (1) Proposed average daily injection volume: 200 BWPD
Maximum daily injection volume: 1,000 BWPD

(2) This will be a closed system.

(3) Proposed average injection pressure: unknown
Proposed maximum injection pressure: 530 psi

(4) Injected water would be produced water from the Grayburg Jackson. At a later date, supplemental make up water consisting of fresh water from the

Double Eagle fresh water supply system could possibly be added to the system. Injection Fluid Analysis (Attachment E).

- (5) Formation Water Analysis (Attachment E).

VIII.(1) The proposed injection interval is the portion of the Grayburg and San Andres Formations consisting of porous sand and dolomite.

- (2) Fresh water zones overlie the proposed injection zone at approximately 150'.

IX. The proposed injection interval in both wells may be acidized with 15% HCL.

X. Well logs and test data are on file at the OCD.

XI. A windmill exist very near the 1/2 mile area of review. (Location an Analysis see Attachment F.)

XII. Geologic and engineering data have been examined and no evidence of open faults or any other hydrological connection between the injection zones and any underground fresh water aquifers has been found.

XIII.(A) Certified letters sent to surface owners and offset operators attached. (See Attachment G)

- (B) Copy of legal advertisement attached. (See Attachment H) (Copy of affidavit of publication attached.)

ATTACHMENT A
Page 1

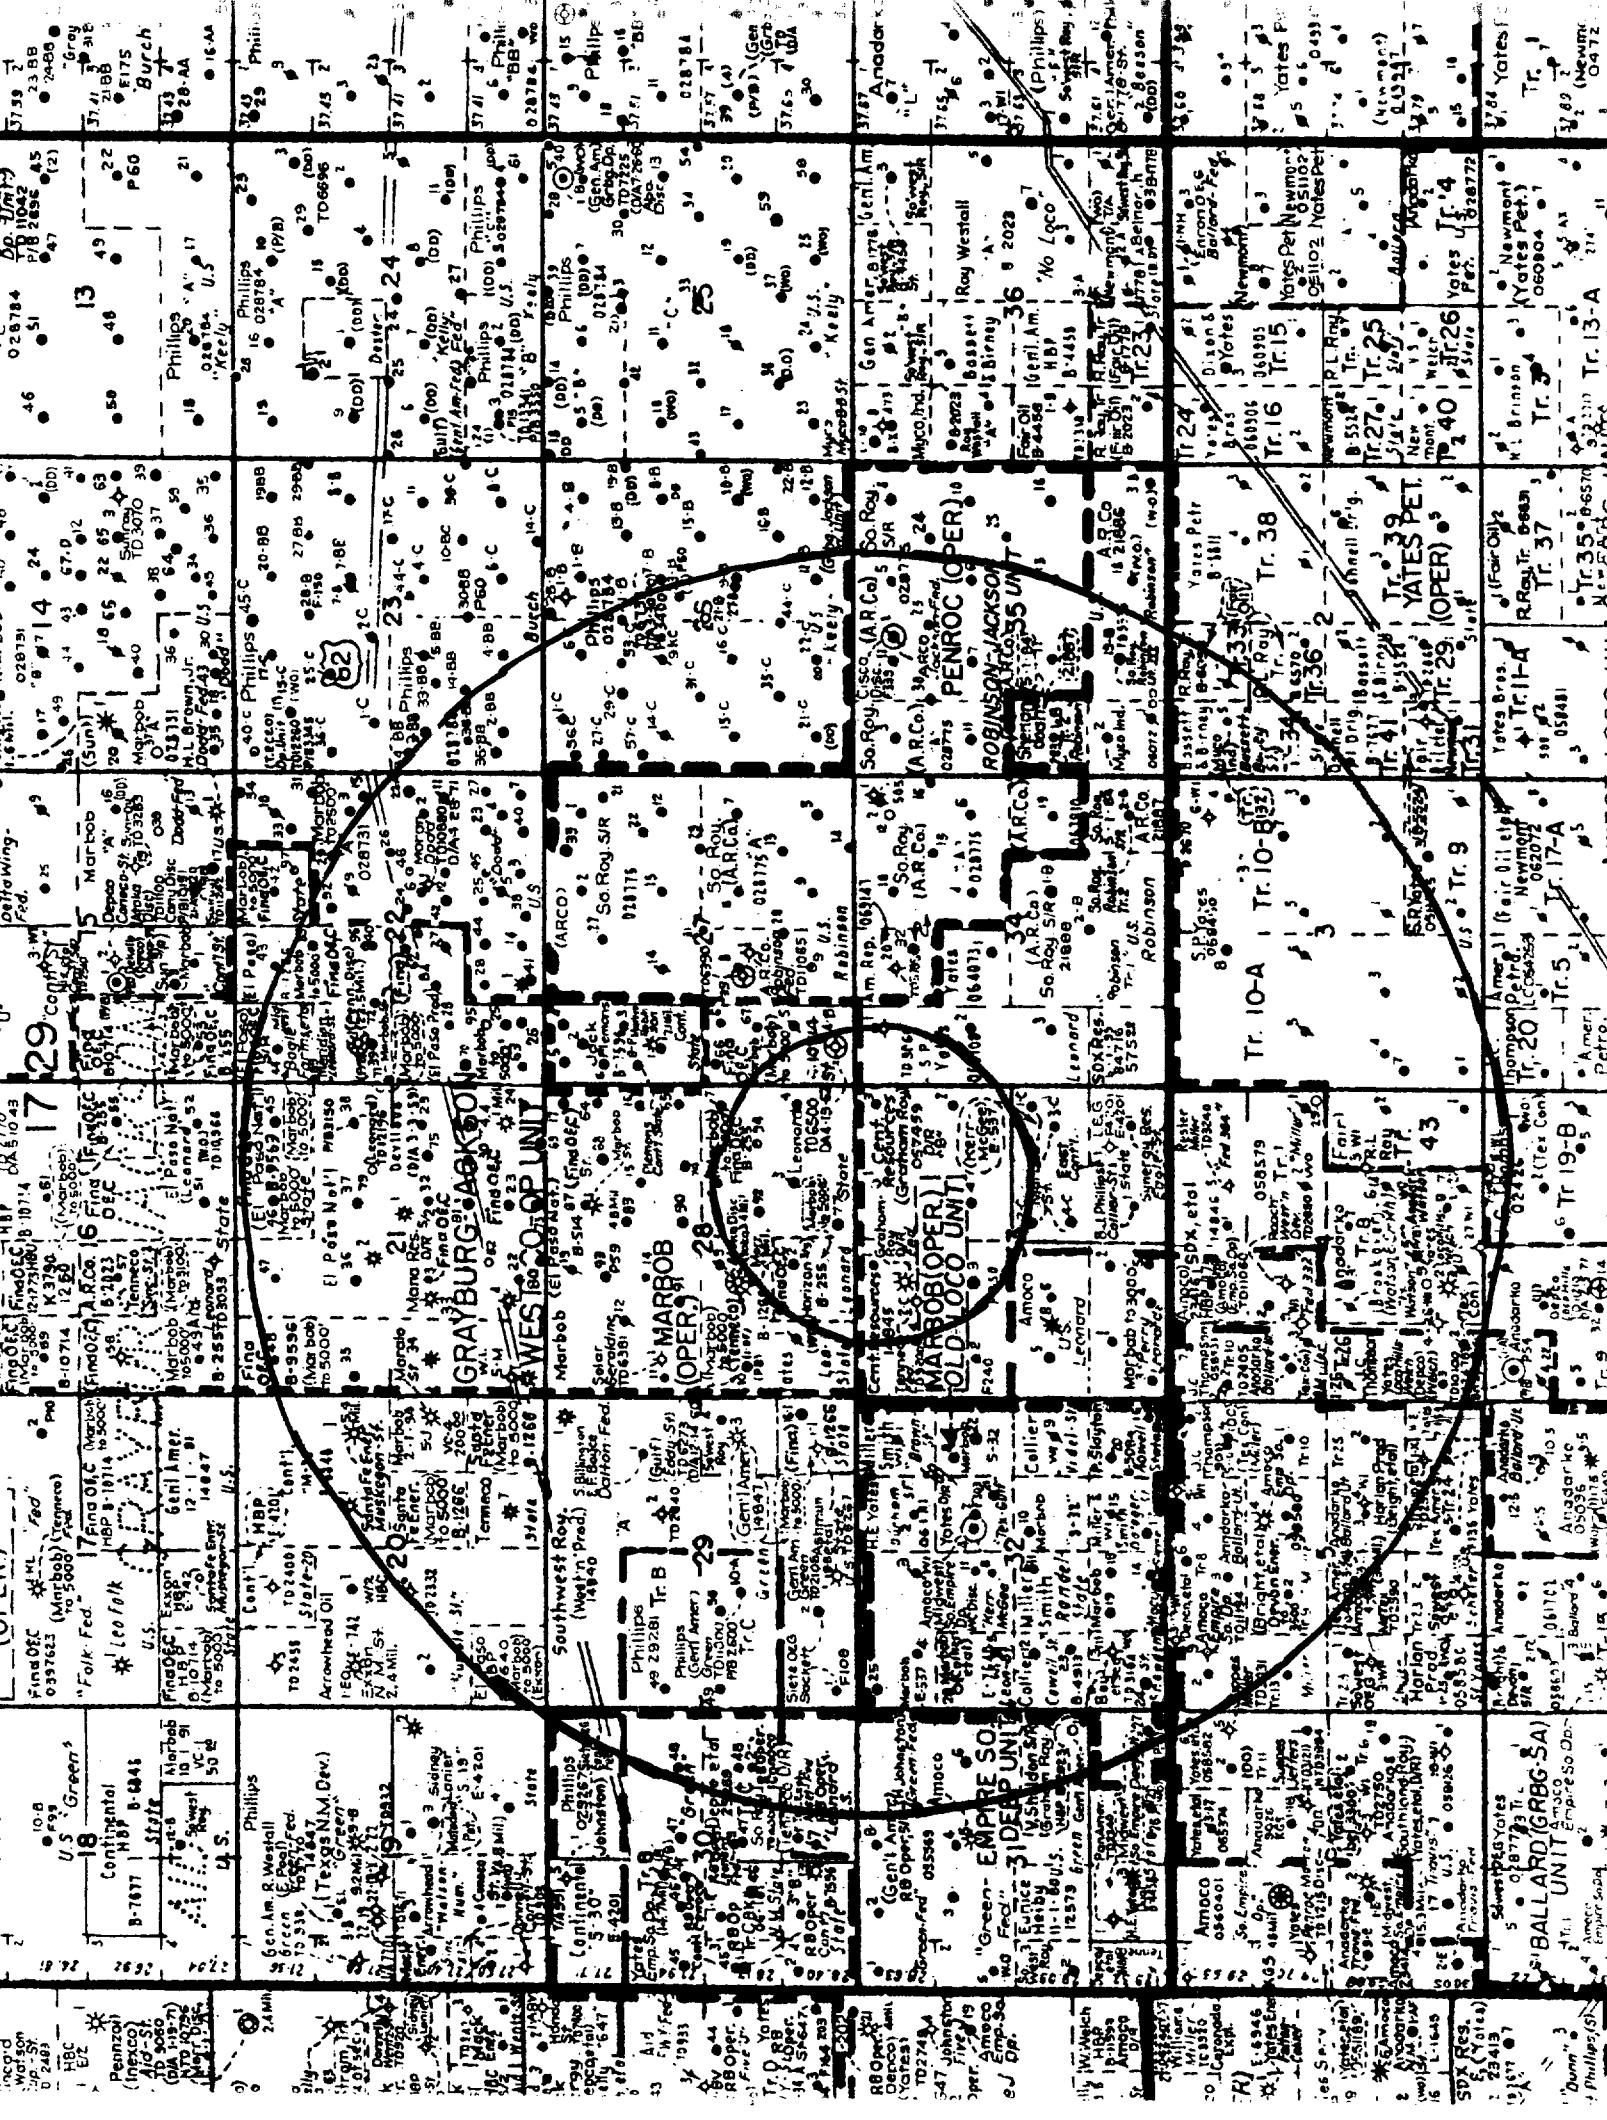

III. Well Data: Leonard Fed. #3

- A. (1) Unit F, Section 33, T-17-S, R-29-E, Eddy County, New Mexico being 1980' FNL and 1980' FWL.
- (2) Casing: 8 5/8", 24# at 357' cemented with 75 sx.
TOC at Surface (Calc.)
5 1/2", 15.5# at 2989' cemented with 125 sx.
TOC at 2227' (Calc.)
TD: 3052'
PBTM: 2989'
- (3-4) Proposed well condition: Same as above with 2 3/8" plastic coated tbg at 2550' with plastic coated R-4 packer at 2550'.
- B. (1) Injection Formation: Grayburg and San Andres
- (2) Injection interval will be thru existing perforations 2654'-2956'.
- (3) Well was drilled and completed as a producer in the Grayburg and San Andres.
- (4) Perforations: 2654-70, 2708-13, 2944-49, 2951-56.
- (5) Next shallow oil or gas zone: Queen
Next deeper oil or gas zone: Yeso

ATTACHMENT A
Page 2

III. Well Data: Leonard B Fed. #1

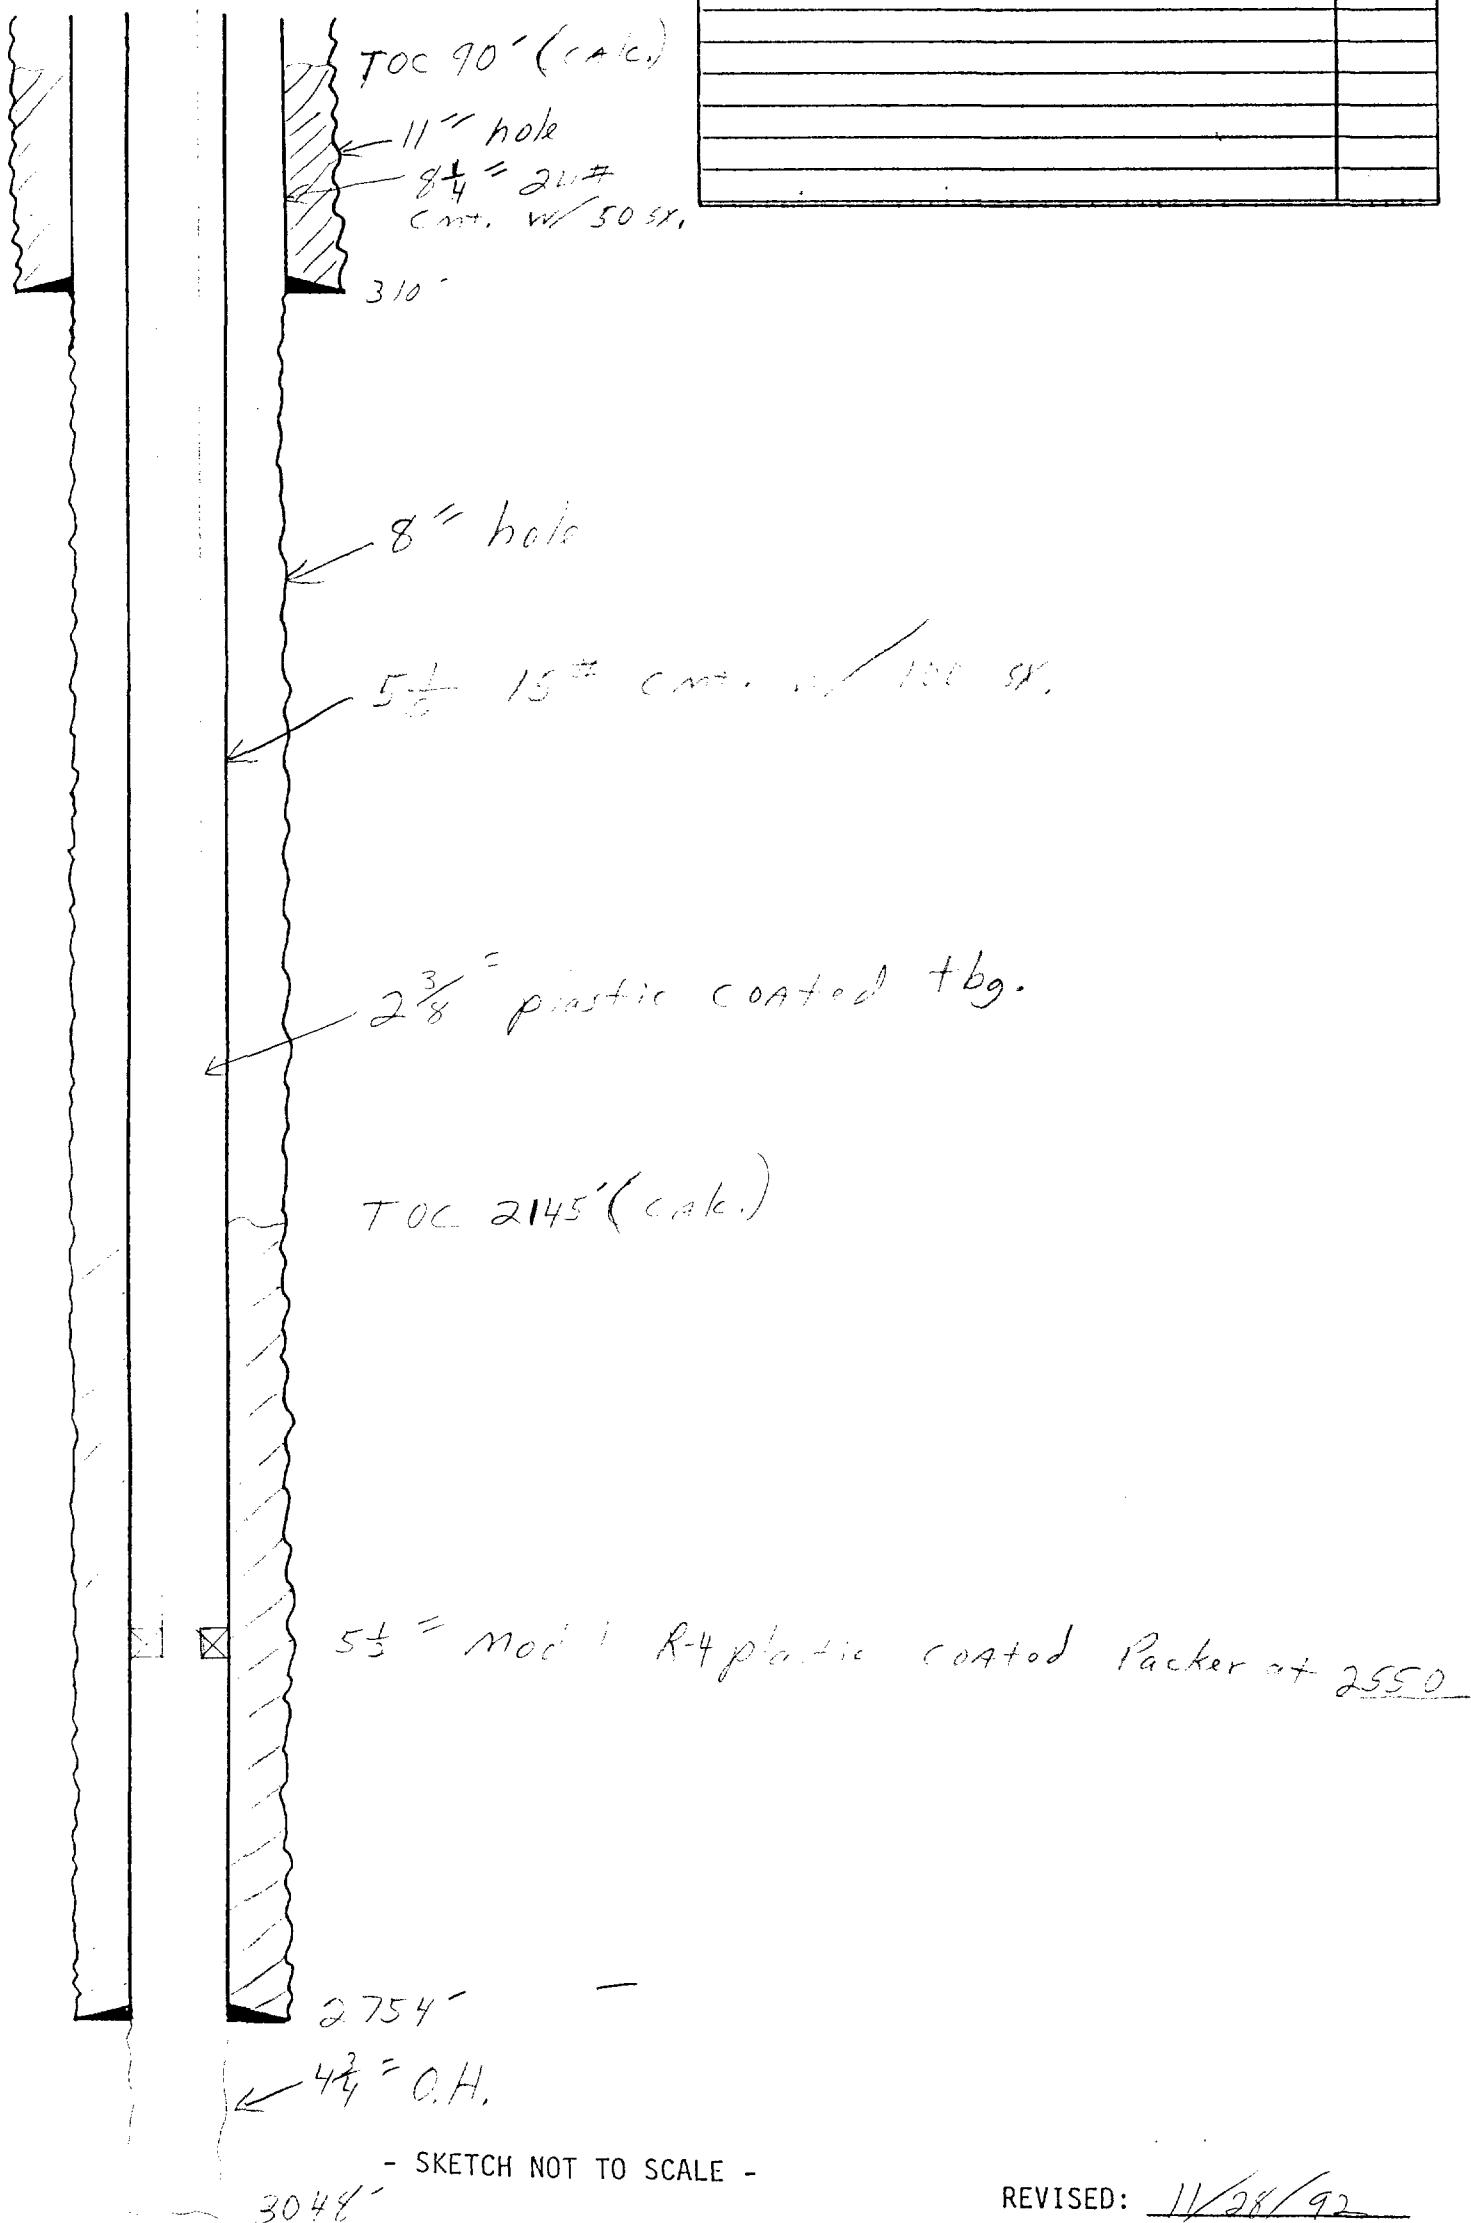

- A. (1) Unit B, Section 33, T-17-S, R-29-E, Eddy County, New Mexico being 330' FNL and 1650' FEL.
- (2) Casing: 8 1/4", 24# at 310' cemented with 50 sx.
TOC at 90' (Calc.)
5 1/2", 15# at 2754' cemented with 100 sx.
TOC at 2145' (Calc.)
O.H. 2754'-3048'
- (3-4) Proposed well condition: Casing same as above. Select perforations may be added in casing between 2650'-2754'. Injection will be into additional perfs 2650'-2754' and O.H. 2754'-3048' thru 2 3/8 plastic coated tubing with a R-4 plastic packer set at 2550'.
- B. (1) Injection Formation: Grayburg and San Andres
- (2) Injection interval: perfs 2650'-2754' and O.H. 2754'-3048'.
- (3) Well was drilled and completed as a producer in the Grayburg and San Andres.
- (4) Perforations: Proposed 2650'-2754' O.H. 2754'-3048'
- (5) Next shallow oil or gas zone: Queen
Next deeper oil or gas zone: Yeso

LEGAL NOTICE

SDX Resources, Inc., P.O. Box 5061, Midland, Texas 79704, has filed form C-108 (Application for Authorization to Inject) with the New Mexico Oil Conservation Division seeking administrative approval for injection wells. The proposed injection zone for the "Leonard Fed. #3" located 1980' FNL & 1980' FWL of Section 33, Township 17 South, Range 29 East of Eddy County, New Mexico, is the Grayburg and San Andres formations with perforations from 2654' to 2956'. The proposed injection zone for the "Leonard B Fed. #1" located 330' FNL & 1650' FEL of Section 33, Township 17 South, Range 29 East of Eddy County, New Mexico, is the Grayburg and San Andres formations with perforations from 2650' to 3048'. SDX Resources, Inc. intends to inject a maximum of 1000 bbls of produced formation water per day at a maximum of 530 psi. Interested parties must file objections with the Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico, 87501 within 15 days of this notice.

Published in the Artesia Daily Press, Artesia, N.M. January 15, 1993.
