

SUMMARY  
CASE NO. 8715  
SPECIAL POOL RULES FOR WEST PUERTO CHIQUITO MANCOS POOL

Applicant requests the following special rules for the West Puerto Chiquito Mancos pool:

1. That the allowable for each 640 acre proration unit within the West Puerto Chiquito Mancos pool be set at twice the allowable of that for the Gavilan Mancos oil pool; which would be  $2 \times 702 = 1404$  BOPD.

2. That two wells may be drilled on a 640 acre proration unit in the West Puerto Chiquito Mancos pool if such proration unit is located in the west two rows of sections in the pool.

3. That only one well shall be allowed in the west one-half of a proration unit in the West Puerto Chiquito Mancos pool if such proration unit is located in the westernmost row of sections in the pool.

4. That any well in the West Puerto Chiquito Mancos pool which is located closer than 2310' from the east boundary of the Gavilan Mancos pool shall not be allowed to produce a share of its proration unit's top allowable in excess of the top allowable (702 BOPD) for a well in the Gavilan Mancos oil pool.

5. That any well in the West Puerto Chiquito Mancos pool which is the only well on a 640 acre proration unit and which is located more than 2310' from the east boundary of the Gavilan Mancos oil pool be allowed to produce a full 640 acre proration unit top allowable (1404 BOPD).

SUMMARY  
CASE NO. 8714  
UNORTHODOX LOCATION

(ORTHODOX LOCATIONS MUST BE A MINIMUM OF 1650' FROM A SECTION LINE  
AND 330' FROM A QUARTER-SECTION LINE)

The unorthodox location requested is to meet an offset location which lies west of the north-south boundary between the West Puerto Chiquito Mancos oil pool and proposed extension to the Gavilan Mancos oil pool and which boundary also is the west boundary of the Canada Ojitos Unit.

The offset location (Dugan Tapacitos #4) is located 1100' FSL and 1600' FEL of Section 36, Township 26 North, Range 2 West.

The requested unorthodox location is 900' FSL and 1650' FWL of Section 31, Township 26 North, Range 1 West.

The location is unorthodox because it lies closer than 1650' from the south section line of Section 31. The reason the well cannot practicably be located farther from the south line is because of terrain.
