**CASE 9018: (Reopened)**

In the matter of Case 9018 being reopened pursuant to the provisions of Division Order No. R-8170-F, which order temporarily amended Rule 11(b) by providing for a 12 times overproduction limit for gas wells in Northwest New Mexico. Said Case 9018 is being reopened to take evidence on the following: (a) whether larger overproduction limits in Northwest New Mexico established by Rule 11(b) as amended by Order Nos. R-8170-A and D is preventing waste and protecting correlative rights, while providing operator flexibility in supplying natural gas to meet interstate and intrastate market demand; (b) the interaction between the changing gas markets, revised proration rules, and Rule 11(b) as amended by Order Nos. R-8170-A and D; and (c) any transition mechanism which should be adopted if the Commission determines that a return to the 6 times overproduced limit is appropriate.
