

EXHIBIT NO. 3
CASES 9226 and 9227
November 19, 1987

This exhibit shows proration units not yet included within either pool.

The units shown in yellow are 160-acre units which are proposed as extensions to the Northeast Ojito Gallup-Dakota Pool.

The two 640-acre units in Sections 21 and 28 of Township 26 North, Range 2 West were heard on November 4, 1987, as forced pooling cases and are proposed as extensions to the Gavilan-Mancos Pool.

The two units in Township 25 North, Range 2 West are drilling wells proposed to be extensions to the Gavilan-Mancos Pool.

The units in Sections 6, 8 and 9 of Township 24 North, Range 2 West are wells which are within the one-mile requirement of the Gavilan-Mancos Pool and which were completed in March and April, 1987.

The 40-acre units were completed in Section 24 were completed in 1984 and are still classified as wildcat wells.

We are confused by the recent action to the expand the pool to the north, but not to the south.

The proposed Buffer Zone does not address any recommended action regarding the well in Section 6, T24N, R2W which is listed in the Oil Proration Schedule as being within the Gavilan-Mancos Pool.
