PRIVILEGED COMMUNICATION

MEMORANDUM

TO: BILL LEMAY, DIRECTOR  
FROM: BOB STOVALL, GENERAL COUNSEL *BBS*  
SUBJECT: PROPOSED ORDER IN CASE 9377 *M.S.*

I have reviewed Mike Stogner's proposed order in the above case, and it raises a significant legal question: can you deny a standard 640-acre spacing unit to an operator based upon a previous order which "grandfathered" existing 320-acre spacing units at the time the pool rules were changed from 320 to 640?

The essential facts are contained in the order, and I do not question the examiner's findings. The operator and all other working interest owners have agreed to form a 640 acre standard unit. Order R-7407-E changed the spacing of the Gavilan-Mancos Oil Pool from 320 acres to 640 acres, but rather than requiring operators to either form a standard unit or file for a non-standard unit, that order granted an exception to existing proration units.

Assuming that order had the effect of approving existing 320's as non-standard units, what authority does the Division have to disapprove the formation of a standard unit? Consider that in a force-pooling case the applicant would not put on drainage data when the unit to be pooled is standard. Consider also that the operator in this case has indicated an intent to drill a second well. Can the Division deny them the right to do so on a single standard unit?

I would anticipate that these issues may be raised on appeal should the applicant decide to do so. These are novel questions and I have not researched them. I only bring them to your attention so that you are aware of them in entering your order.

This memorandum should be considered as privileged attorney-client communication and should not be placed in the case file.

*I agree with this statement and the hearing officer, B. Stogner, is a part of the record in the case 9377.*
