RE: Request for Unitization, -Huerfania Prospect
 Townships 26-27 North, Range 9 West
 San Juan County, New Mexico.

Dear Sir:

Submitted herewith in support of our request for unitization is the geological map showing the subsurface structure within the limits of the outlined area based upon seismograph interpretation. The formations are expected to show oil and gas possibilities at the estimated depths, as follows:

| | | |
|----------------|-------|-----|
| Pictured Cliff | 2500' | Gas |
| Point Lookout | 4500' | Gas |
| Dakota | 6800' | Oil |

The above estimates are based upon the nearest deep well, Byrd-Frost Harrover #1, Section 4-27N-10W, San Juan County, New Mexico, as correlated with the stratigraphic position of the surface outcrops with the areas which are considered to be at the top of the Torrejon formation.

Very truly yours,

Robert E. Murphy
 District Geologist
