Dear Sir:

Enclosed herewith is Commission Order No. R-1971, entered in Case No. 2239, approving the Ambassador Oil Corporation Loco Hills Water Flood Project.

You will note that a portion of the flood is in a buffer zone, wherein capacity allowables will be permitted. The remaining acreage in the flood is to be operated in accordance with Rule 701 and the rules prescribed in the subject order.

According to our calculations, when all of the authorized injection wells have been placed on active injection, the maximum allowable which the project area outside the buffer zone will be eligible to receive is 168 barrels per day.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly

notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the project and the wells therein will be appreciated.

Very truly yours,
