Santa Fe, New Mexico

Re: Case No. 3193  
Application of International  
Oil & Gas Corporation for Ap-  
proval of the High Lonesome  
Penrose Unit Area

Dear Mr. Utz:

Enclosed herewith you will please find three copies of the  
Application in the subject case, and one copy of the pro-  
posed Unit Agreement.

Very truly yours,

A. J. Losee

AJL/jc

Enclosure:

cc: John A. Anderson

United States Geological Survey  
Drawer 1857  
Roswell, New Mexico

60 JAN 19 4 11 PM

BEFORE THE OIL CONSERVATION COMMISSION  
OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE APPLICATION OF :  
INTERNATIONAL OIL & GAS CORPORATION :  
FOR APPROVAL OF A UNIT AGREEMENT FOR :  
THE DEVELOPMENT AND OPERATION OF THE :  
HIGH LONESOME PENROSE POOL UNIT AREA, : No. 3193  
COMPRISING 320 ACRES OF STATE AND :  
FEDERAL LANDS IN THE E/2 OF SECTION :  
15, TOWNSHIP 16 SOUTH, RANGE 29 EAST, :  
N.M.P.M., EDDY COUNTY, NEW MEXICO :  
:

APPLICATION

COMES INTERNATIONAL OIL & GAS CORPORATION, by its at-  
torneys, Losee and Stewart, and states:

1. The applicant proposes to operate and develop the  
entire E/2 of Section 15, Township 16 South, Range 29 East,  
N.M.P.M., Eddy County, New Mexico, as a unitized area for the  
secondary recovery of oil from the Penrose Sand of the Queen  
formation under and by virtue of the terms of a Unit Agreement,  
a copy of which said agreement is filed herewith and by reference  
made a part hereof.

2. The applicant is proposed to be the operator of the  
unitized area, and all of the interest owners except the United  
States and the State of New Mexico have executed the Unit Agree-  
ment that is submitted for approval with this application.

3. On September 28, 1964, the United States Geological  
Survey advised the applicant that the E/2 of said Section 15  
is a logical unit area for secondary recovery operations, and  
the proposed form of Unit Agreement will be acceptable if modified  
as required by the survey. The attached Unit Agreement bears all  
changes required by the United States Geological Survey. The

State of New Mexico has tentatively given its approval to the unit area and to the Unit Agreement.

4. The proposed plan for the development and operation of the Penrose Sand underlying the E/2 of said Section 15 will prevent waste, and the method of allocating production among the various tracts within the unit area is fair to all of the royalty owners having interests underlying the same.

WHEREFORE, applicant prays that an order be entered approving the combining of the contiguous developed proration units within the E/2 of Section 15, Township 16 South, Range 29 East into a unitized area under and pursuant to the terms of the attached Unit Agreement.
