

OIL CONSERVATION COMMISSION  
P. O. BOX 871  
SANTA FE, NEW MEXICO

February 7, 1966

Mr. John Russell  
Attorney at Law  
Post Office Drawer 640  
Roswell, New Mexico

Dear Sir:

Reference is made to Commission Order No. R-3026, recently entered in Case No. 3358, approving the General American Grayburg Keely Cooperative Waterflood Project.

Initial injection is to be through the eight injection wells authorized in Stage I. If the need for additional injection wells is indicated, then the three wells authorized as Stage II may be converted. If the need for additional injection wells is still indicated, the two wells authorized in Stage III may be converted. Injection into all wells is to be through internally plastic-coated tubing set in packers, with the packers to be installed approximately 50 feet above the shoe of the 5½ inch liner.

As to allowable, our calculations indicate that when all of the authorized injection wells in Stage I have been placed on active injection, the maximum allowable which the project will be eligible to receive under the provisions of Rule 701-B-3 is 700 barrels per day. When the wells authorized in Stages II as well as Stage III have been placed on active injection, the maximum allowable will increase to 790 barrels per day. No allowable credit has been assigned to Units E and F of Section 26 inasmuch as the injection wells on these units are outside of the Grayburg Keely Unit Area, and there are no producing wells in the Grayburg Keely zone on the same lease outside of the Unit Area; no allowable credit has been assigned to Unit G of Section 26

**because there are no producing wells in the Grayburg Keely on this forty.**

**Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the commission and the appropriate district proration office.**

**In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.**

**Your cooperation in keeping the commission so informed as to the status of the project and the wells therein will be appreciated.**

**Very truly yours,**
