REQUEST FOR HEARING ON EXPANSION OF WATERFLOODING OPERATIONS, VACUUM GRAYBURG SAN ANDRES FIELD, LEA COUNTY, NEW MEXICO

Dear Mr. Porter:

Mobil Oil Corporation respectfully requests that the Commission schedule an early hearing for the purpose of considering Mobil's application to expand waterflood operations in the Vacuum Grayburg San Andres Field, Lea County, New Mexico, to include the use of the Bridges State #127 for water injection purposes. Such well has been recently completed at a location 660 FSL and 560' FWL of Section 24, T-17-S, R-34-E. It has been perforated opposite San Andres porosities in intervals between 4484'-4785'.

Mobil will requestat the hearing permission to inject both Ogalalla and produced water into this well at rates the order of 1,000 barrels per day. Attached in support of this request and as required by Rule 701-B are a plat showing the location of the well, a Gamma Ray sonic log of the well, and a diagrammatic sketch showing the proposed condition of the well under injection operations.

A copy of this application and file is being forwarded concurrently to the State Engineer.

Yours very truly,

PWKelly/kim

OIL CONSERVATION COMMISSION P. O. BOX 2088 SANTA FE, NEW MEXICO 87501

September 13, 1968

Mr. James E. Sperling Modrall, Seymour, Sperling, Rochl & Harris Attorneys at Law Public Service Building Post Office Box 2168 Albuquerque, New Mexico

Dear Sir:

Reference is made to Commission Order No. R-3496, recently entered in Case No. 3851, approving the expansion of the Mobil Vacuum State Bridges Waterflood Project.

Additional injection is to be through the one newly authorized water injection well, which shall be equipped with tubing set in a packer at approximately 4450 feet. The casing-tubing annulus shall be loaded with an inhibited fluid and equipped with a pressure gauge to facilitate detection of leakage in the casing, tubing, or packer.

As to allowable, our calculations indicate that when all of the presently authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 2408 barrels per day when the Southeast New Mexico normal unit allowable is 42 barrels per day or less.

Please report any error in this calculated maximum allowable immediately, both to the Santa Pe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection

commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the project and the wells therein will be appreciated.

Very truly yours,

A. L. PORTER, Jr. Secretary-Director
