CASE No. 2656
Order No. R-2405-A

APPLICATION OF WESTERN DEVELOPMENT
COMPANY FOR A SECONDARY RECOVERY
PROJECT, EAST MILLMAN QUEEN-GRAYBURG
FIELD, EDDY COUNTY, NEW MEXICO.

NUNC PRO TUNC ORDER

BY THE COMMISSION:

It appearing to the Commission that due to clerical error and mistake, Order No. R-2405, dated December 31, 1962, does not correctly state the intended order of the Commission,

IT IS THEREFORE ORDERED:

(1) That the phrase "80-acre" is hereby stricken from Rule 5 of the Special Rules and Regulations for the Western Development Company East Millman Queen-Grayburg Pressure Maintenance Project, and the phrase "40-acre" is hereby interlineated in lieu thereof.

(2) That this order shall be effective nunc pro tunc as of December 31, 1962.

DONE at Santa Fe, New Mexico, on this 24th day of January, 1963.

Reference is made to Commission Order No. R-3628-A, recently entered in Case No. 4152, amending Order No. R-3628, which order approved the Anadarko Far West Loco Hills Waterflood Project.

Injection into each of the three substitute wells authorized by Order No. R-3628-A shall be through internally plastic-coated tubing which shall be set in a packer located as near as practicable to the uppermost perforation.

As to allowable, our calculations indicate that when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project, as revised, will be eligible to receive under the provisions of Rule 701-E-3 is 896 barrels per day when the Southeast New Mexico normal unit allowable is 42 barrels per day or less.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.
