

**OIL CONSERVATION COMMISSION**

**P. O. BOX 2088**

**SANTA FE, NEW MEXICO 87501**

**November 3, 1970**

**Mr. James T. Jennings  
Jennings, Christy & Copple  
Attorneys at Law  
Post Office Box 1180  
Roswell, New Mexico 88201**

**Dear Sir:**

**Reference is made to Commission Order No. R-4050, recently entered in Case No. 4440, approving the Moran Hobbs Rice Waterflood Project.**

**Injection shall be through the one authorized water injection well which shall be equipped with a string of tubing set in a packer located as near as is practicable to the casing shoe. The casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface.**

**As to allowable, our calculations indicate that when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 168 barrels per day when the Southeast New Mexico normal unit allowable is 42 barrels per day or less.**

**Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.**

**In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.**
