P. O. BOX 2088

SANTA FE, NEW MEXICO 87501

November 11, 1970

Mr. A. J. Losee
Attorney at Law
Post Office Box 239
Artesia, New Mexico 88210

Dear Sir:

Reference is made to Commission Order No. R-4062, recently entered in Case No. 4452, approving the Collier East Turkey Track Water-flood Project.

Injection is to be through the casing in the four authorized water injection wells. Prior to injection the casing of each well shall be pressure-tested to a minimum of 2000 psi. Also, on Leonard State Wells Nos. 1 and 4, cement shall be placed in the hole outside the surface casing from the present top of cement (estimated at 100 feet) to the surface. This may be accomplished through one-inch tubing or other means satisfactory to the Commission's District Supervisor at Artesia. You are requested to please notify said supervisor when the aforementioned pressure tests and cement jobs are to be conducted.

As to allowable, our calculations indicate that when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 336 barrels per day when the Southeast New Mexico normal unit allowable is 42 barrels per day or less, provided the four leases are unitized or otherwise consolidated pursuant to the terms of Order No. R-4062. Until such time, each lease will be required to stand on its own allowable without allowable transfer privileges.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the project and the wells therein will be appreciated.

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director
