Re: Statutory Unitization

**MYERS LANGLIE MATTIX UNIT
ROYALTY INTEREST OWNERS:**

Please refer to our letter of September 15, 1980. We have received ratifications from owners of over 99% of the royalty interests and working interests. The New Mexico Oil Conservation Commission Order No. R-6447 is now in force effective January 1, 1981.

The statutory unitization will improve unit operating efficiency and increase ultimate recovery. We appreciate your cooperation in bringing about this action which will benefit every royalty interest owner in the unit.

Sincerely,

Raymond W. Blohm
District Production Manager

Re: Statutory Unitization

MYERS LANGLIE MATTIX UNIT
ROYALTY INTEREST OWNERS

Dear Royalty Interest Owners:

On August 27, 1980, the New Mexico Oil Conservation Division entered its Order No. R-6447 approving statutory unitization of the Myers Langlie-Mattix Unit.

In 1974, the Myers Langlie-Mattix Unit was created by working interest owners and royalty interest owners who voluntarily committed their interests in a portion of the Langlie-Mattix Pool for the purpose of instituting secondary recovery operations by waterflooding. At present, owners of more than 99% of the working interest and 99% of the royalty interest in the unit area have voluntarily joined the unit. Statutory unitization will enable Getty Oil Company as unit operator to bring the remaining interests in the unit area into the unit.

In 1975, New Mexico adopted the Statutory Unitization Act. The purposes of this Act are to promote the formation of oil and gas units for secondary recovery operations and to provide for more efficiently operated units which will, in turn, produce greater volumes of oil and gas.

Statutory unitization of the Myers Langlie-Mattix Unit will benefit every royalty interest owner in the unit by enabling Getty to institute efficient operating practices that presently cannot be employed due to the small uncommitted interests in the unit area. The institution of more efficient operating practices will reduce the costs of unit operations and will enable the unit to produce for a longer period of time. Statutory unitization of the Myers Langlie-Mattix Unit should result in the recovery of an additional 500,000 barrels of oil. At present oil prices, this represents additional gross income to the unit of \$18,240,000. This income will be shared by you and other interest owners in the unit.

MYERS LANGLIE MATTIX UNIT
ROYALTY INTEREST OWNERS

PAGE 2
SEPTEMBER 15, 1980

The Oil Conservation Commission approved statutory unitization of the present unit area only after a public hearing in which Getty Oil Company appeared before the Commission and reviewed all the costs and benefits of unitization. Their order, a copy of which is attached for your review, finds that statutory unitization will benefit the working interest owners and the royalty interest owners in this unit, that the qualified tracts and present unit boundaries will remain the same, and that all tract participations will remain unchanged.

The Commission order provides that statutory unitization of this Unit will become effective upon ratification by the owners of 75% of the working interest and the owners of 75% of the royalty interest within the unit area. It is important, therefore, to obtain these ratifications as soon as possible for statutory unitization to become effective. Enclosed is a form to be used by royalty interest owners in ratifying this order. We request that you execute this Ratification and Approval, have your signature notarized, and return to us as soon as possible.

Copies of the January 1, 1973 Unit Agreement and Unit Operating Agreement and their two revisions dated February 1, 1974 and July 1, 1976 are not enclosed since they were previously provided and remain unchanged.

If you have questions concerning the enclosed Order or Ratification, do not hesitate to contact Mr. J. E. Eakin in this office (915/683-6301).
