

Special Pool Rules
Medano Area Delaware
Considerations in Granting Application

- No evidence of mechanical or chemical problems producing both zones together.
- No evidence of water coning.
- No evidence of a gas cap.
- Neither productive interval dominates production.
- Prevent economic waste by setting allowable based on the deepest perforation.
- Protect correlative rights by developing both zones simultaneously and by producing at an allowable based on the deepest perforation.
- Prevent mineral waste by fully developing both zones.
