McComack Well No. 18: 210'FNL - 2390'FEL
(Unit B) of Section 32, Township 21 South, Range
37 East, NMPM, Tubb oil and Gas Pool, Lea
County, New Mexico.**

Dear Mr. Trautman:

Reference is made to your letter dated March 16, 1995 concerning the subject application and Division's correspondence dated January 6, 1995. A most interesting administrative dilemma appears to have developed in this situation in that:

- (1) Texaco Exploration and Production Company ("Texaco") has refused to submit a waiver of objection in this matter; and,
- (2) no written record of notification to Zia Energy, Inc. ("Zia") exist in this filing.

The Division, having reviewed this matter further, will not act on this application under the administrative process; therefore, this application will be set for hearing on the next available docket scheduled for April 20, 1995.

Because of the unique situation that exists in this matter, the Division will accept for the record Chevron's application in this matter, the Division's records and file on the subject well, the waiver letter submitted by Amoco Production Company, dated January 24, 1995 (provided the "original" and not a "faxed" copy is submitted for the record), and a copy of the certified notification of this case, pursuant to the procedures in General Rule 1207. A, to both Texaco and Zia. It will not be necessary for Chevron to appear at this hearing, unless either party objects to the application.

Chevron U.S.A. Production Company
March 27, 1995

Attention: Mr. William J. LeMay - Director

Dear Mr. LeMay:

Chevron U.S.A. Inc. submitted an administrative approval for a non-standard gas well location for the W. T. McComack No. 18 on December 8, 1994. The OCD responded on January 6, 1995 with a letter advising Chevron to obtain written waivers from the offset operators (copy attached).

Chevron has recieved a written waiver from Amoco, attached. Arco sold their interest in the Tubb to Zia Energy Inc. and in numerous verbal communications with Zia, Zia indicated they will not sign the waiver, but will not object to the non-standard location. Texaco also indicated they will not sign the waiver, due to internal procedures, but will not object to the non-standard location.

Chevron U.S.A. Inc. respectfully requests your approval of our original application filed on December 8, 1994, in light of the information provided. If you have any questions, or if you require further information, please contact Lloyd Trautman at (915) 687-7152.

Sincerely,

L. V. Trautman

Dear Mr. Trautman:

Subsequent to the Division's initial review of the subject application we have determined that due to the extreme nature of this matter and the crowding to other off-set operators, written waiver from Amoco, Texaco and ARCO would be advisable.

Please provide me with waivers from the three aforementioned off-set operators so that I may process this application.

Thank you for your cooperation.

Sincerely,

WAIVER TO OBJECTION

We, the undersigned, as an offset operator, waive any objection to Chevron U. S. A., Inc.'s application for NMOCD approval of a Non-Standard gas well location in the Tubb Oil and Gas Pool. The location is 210 feet FNL and 2390 feet FEL, Section 32, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico. We further understand that this well will be dedicated to a standard 160-acre gas proration unit. This proration unit comprises the NE/4 of Section 32, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico.

NSL-Tubb

Dear Mr. LeMay:

Chevron U.S.A. Inc. respectfully requests administrative approval for a non-standard gas well location for the W. T. McComack No. 18.

Chevron U.S.A. is planning to recomplete the W. T. McComack No. 18 well from the Drinkard into the Tubb Oil and Gas Pool. Well No. 18 is located at 210' FNL and 2390' FEL in Section 32, T21S, R37E, Lea County, New Mexico. This makes the well a non-standard location per the Tubb Gas Pool regulations. The standard gas proration unit would consist of the NE/4 of Section 32, T21S, R37E, Lea County, New Mexico. This is the only well bore available for this recompletion and we can not justify a new well to acquire these reserves.

A copy of this administrative application is being provided to our offset operators via Certified Mail. Attached is a commercial map and a Form C-102 plat illustrating the proration unit acreage and well location. Also included is a copy of the letter sent to our offset operators.

If you have any questions, or if you require further information, please contact Lloyd Trautman at (915) 687-7152.

Sincerely,

A handwritten signature in cursive script, appearing to read "L. V. Trautman".

Case 11259

Attention: Lloyd V. Trautman

*Administrative Order NSL-*****

Dear Mr. Trautman:

Reference is made to your application dated December 8, 1994 for a non-standard Tubb gas well location for your existing W. T. McComack Well No. 18 (API No. 30-025-86440) which was originally drilled as the Central Drinkard Unit Well No. 428 and completed in the Drinkard Pool at an unorthodox oil well location (approved by Division Administrative Order NSL-1071, dated September 4, 1979) 210 feet from the North line and 2390 feet from the East line (Unit B) of Section 32, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico.

It is our understanding that the Drinkard interval will be properly plugged back and said well will be recompleted as a gas well in the Tubb Oil and Gas Pool, which pursuant to the "*General Rules for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the Tubb Oil and Gas Pool*", as promulgated by Division Order No. R-8170, as amended, is also unorthodox. Further, the NE/4 of said Section 32 shall be dedicated to the well forming a standard 160-acre gas spacing and proration unit for the Tubb Oil and Gas Pool.

By authority granted me under the provisions of Rule 2(c) of said Special Rules and Regulations, the aforementioned W. T. McComack Well No. 18 located at an unorthodox Tubb gas well location is hereby approved.

Sincerely,

William J. LeMay
Director
