Case 12993

Re: *Administrative application on behalf of Burlington Resources Oil & Gas Company (application reference No. pKRV0-235834926) filed with the New Mexico Oil Conservation Division ("Division") on December 23, 2002 for exceptions to Division Rule 104 within the Barker Creek-Dakota Pool (71529) in Irregular Sections 9, 10, and 11, Township 32 North, Range 14 West, NMPM, San Juan County, New Mexico.*

Dear Mr. Kellahin:

I am setting this application to the Examiner's hearing scheduled for January 23, 2003 for reasons that may not be apparent when reviewing the Division's rules. In 1999 when that portion of Division Rule 104 that addresses the formation and administrative approval of non-standard spacing units, it was not the Division's intent to allow the whole sale formation and establishment of non-standard units just because a section was skewed somewhat due to survey corrections. Operators would then be allowed to adjust units in a matter to met their acreage holdings or to avoid consolidation of acreage for little to no reasons other then a section containing a little over or under 640 acres.

Reading Rule 104.D (2) (b) could be interpreted in that way. It was my intent to restrict approval in these instances when the survey corrections where under 70 % or over 130 % of a normal spacing unit assigned a formation and were restricted to a quarter-quarter section for 40-acre spacing, half a quarter section for 80-acre spacing, a single quarter section for 160-acre spacing, and so on. Perhaps to word "or" should be changed to "and" in the last part of the sentence of 104.D (2) (b).

Because Burlington is purposing to cross a quarter section line in forming these three units I will not address this request administratively. Considering however in this instance the obvious necessity for the creation of these three units and why they would be in the best interest of conservation and to prevent waste, your application will be set for hearing but will be allowed to stand on its own merits, which is why it will be advertised as follows:

***"Application of Burlington Resources Oil and Gas Company for three non-standard gas spacing and proration units, San Juan County, New Mexico. Applicant seeks an exception to Division Rule 104.C (3) in order to create three non-standard gas spacing and proration units within the Barker Creek-Dakota Pool (71520) in Irregular Sections 9, 10, and 11, Township 32 North, Range 14 West, which area is located approximately 7.5 miles northwest of La Plata, New Mexico. IN THE ABSENCE OF OBJECTION, THIS APPLICATION WILL BE TAKEN UNDER ADVISEMENT".***

Sincerely,

Michael E. Stogner  
Chief Hearing Officer/Engineer

Re: Administrative Application of Burlington Resources Oil & Gas Company  
LP for approval of three non-standard gas proration and spacing units,  
Barker Creek-Dakota Gas Pool, San Juan County, New Mexico

Dear Ms. Wrotenberg:

On behalf of Burlington Resources Oil & Gas Company LP, please find  
enclosed our referenced application that is being filed in accordance with Division  
Rule 104.D(2)(b)).

Very truly yours,

W. Thomas Kellahin

**STATE OF NEW MEXICO  
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT  
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING  
CALLED BY THE OIL CONSERVATION  
DIVISION FOR THE PURPOSE OF  
CONSIDERING:**

**CASE 12993**

**APPLICATION OF BURLINGTON RESOURCES  
OIL & GAS COMPANY LP FOR APPROVAL OF THREE  
NON-STANDARD GAS PRORATION AND SPACING  
UNITS IN THE BAKER CREEK-DAKOTA GAS POOL,  
SAN JUAN COUNTY, NEW MEXICO**

**APPLICATION**

Comes now BURLINGTON RESOURCES OIL & GAS COMPANY LP ("Burlington") and by and through its attorneys, Kellahin & Kellahin, applies to the New Mexico Oil Conservation Division ("Division") for approval of three non-standard gas prorating and spacing units to be dedicated to any production from the Dakota Formations of the Baker Creek-Dakota Gas Pool, the units to be configured as follows: (i) all of Irregular Section 9 consisting of 199.71 acres; (i) all of Irregular Section 10 consisting of 200.48; and (iii) all of Irregular Section 11 consisting of 200.07 acres, T32, R14W, NMPM, San Juan County New Mexico.

In support, Burlington states:

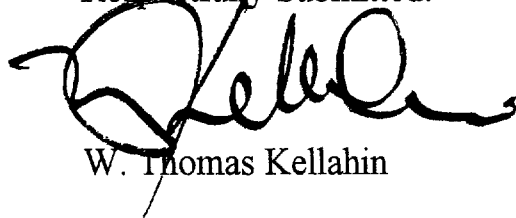

- (1) Burlington is the operator and the only working interest owner of the Ute Mountain Ute Tribe's oil and gas lease number I-22-IND-2772 which includes all of Irregular Sections 9, 10, 11 of T32N, R14W, San Juan County, New Mexico,

- (2) Burlington proposes the following non-standard proration and spacing units for Dakota production from these irregular sections in Township 32 North, Range 14 West:
  - (a) 199.71-acres consisting of all of Section 9
  - (b) 200.48-acres consisting of all of Section 10
  - (c) 200.07-acres consisting of all of Section 11
- (3) These proposed units are made necessary as a result of variations in the legal subdivisions of the United States Public Land Survey. **See Exhibit (1)**
- (4) This are the same sections approved by the Division as non-standard gas proration and spacing for production from the Baker Dome-Ismael Pool. **See Order R-46-B, dated November 6, 1996.**
- (5) The total acreage for each of these non-standard gas proration and spacing units as set forth in Paragraph (2) above is different from the acreage totals used in Order R-46-B which is now believed to be incorrect.
- (6) Irregular Sections 9, 10, 11, T32N, R14W are subject to the Division's rules for the Barker Creek-Dakota Gas Pool that provide for Standard 160-acre gas spacing units with wells located no closer than 660 feet to the side boundaries.
- (7) All the acreage contained within each of the proposed non-standard proration and spacing units constitutes a single common lease that is operated by Burlington
- (8) With the exception of Section 12 which is unleased and owned by the Ute Mt. Ute Tribe, all adjoining prospective and existing Dakota proration and spacing units in New Mexico are operated by Burlington and have the same ownership as the proposed non-standard proration and spacing units.
- (9) The establishment of the proposed non-standard gas proration and spacing units will ensure the orderly development of the gas reserves within the Dakota formation.
- (10) No notification of the application is required by Division rules.

- (11) Approval of this application will afford the owners and the applicant the opportunity to produce their just and equitable share of the gas in the Dakota formation, will promote the orderly development in this area, will prevent the economic loss caused by the drilling of unnecessary wells, avoid the augmentation of risk arising from the drilling of an excessive number of wells and will otherwise prevent waste and protect correlative rights.

WHEREFORE, Applicant requests that this application be approve by the Division.

Respectfully Submitted:
