October 16, 1974

Mr. Carl Ulvog  
Oil Conservation Commission  
P. O. Box 2088  
Santa Fe, New Mexico 87501

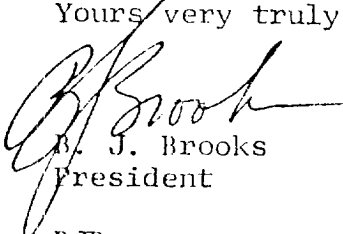

Dear Carl:

Thank you for your letter of October 9, 1974 concerning the #1 Towndrow well. This location is a little difficult to get to but if it is no inclement weather you should be able to find it. Take State Highway 72 and go approximately ten miles east of Raton until you reach the top of the mesa. When on top, you are going south and the highway turns back east; do not go east but continue south on gravel road for one mile. Then turn west one mile. At this point you are approximately one mile north of the location which you have to wind down to.

The location has not been cleaned but a settlement was made with land owner to leave it in its present condition. Enclosed is a xerox copy of our check for this settlement. I hope this will help you approve our C-103 plugging report form.

I am about ready to drill some more south of Springer this fall and look forward to some more Dakota gas.

Yours very truly,

B. J. Brooks  
President
