Gentlemen:

Enclosed herewith is a letter received today from Norman W. Libby making a complaint about gas leakage from the Iceco carbon dioxide wells in Harding County. I am certain you know the location referred to.

He told me verbally that a geologist inspecting the property recently reported to him that gas was leaking beneath the surface, and, shortly thereafter, he observed gas bubbling through a water hole in the Ute Creek, which is about 200 yards from the nearest well and presumably the one which is apparently leaking.

He would appreciate it very much if you could investigate the matter, and, if you find waste is occurring, that you endeavor to cause Iceco to correct the situation.

Very truly yours,

A. K. Montgomery
