Subject: Plains CS Caylor Release Site AP-052

Mr. Griswold,

Plains Pipeline, L.P., respectfully requests NMOCD approval to conduct the following activities at the CS Caylor Release Site NMOCD Ref# AP-052. Plains proposes to install seven (7) additional monitor wells (PMW-5A, PMW-15A, PMW-16A, PMW-17A, PMW-19, PMW-20, and PMW-21) at the site. Monitor wells PMW-5A, PMW-15A, PMW-16A, and PMW-17A will be replacement wells for the existing wells MW-5, MW-15, MW-16, and MW-17. Existing wells MW-5, MW-15, MW-16, and MW-17 no longer exhibit sufficient water levels to conduct groundwater

remediation activities. The replacement wells will be installed in close proximity to the original wells. Monitor well PMW-19 will be installed to the southeast of MW-3A, PMW-20 will be installed to the northeast of MW-8A, and PMW-21 will be installed to the northeast of MW-11A. Please reference the attached Proposed Monitor Well Location Map.

Following drilling activities, MW-5, MW-15, MW-16, and MW-17 will be plugged and abandoned in accordance with applicable NMOSE guidelines. Upon NMOCD approval, Plains will commence with the described activities.

Please contact me with any questions or concerns.

Sincerely,

Camille Bryant
Remediation Coordinator
