If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

July 18, 2014 Tomcat 21 -The produced water transfer line from the Tomcat 21 Battery to the Diamondtail SWD split resulting in a spill.

Describe Area Affected and Cleanup Action Taken.\*

The impacted area in the vicinity S-2 was excavated to a depth of 1-foot deep and the impacted area in the vicinity S-3 was excavated to a depth of 0.5 feet per the work plan. Talon mobilized personnel to the location to excavate below the drilling mud that was beneath the surface 1-foot deep. All the excavated material was hauled to an NMOCD approved solid waste disposal facility. The excavation was then backfilled with sand from a BLM sand pit off of Red Road. The disturbed area was re-contoured to match the surrounding terrain, and seeded with BLM seed mixture for the Lesser Prairie Chicken habitat.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
