Describe Cause of Problem and Remedial Action Taken.*

The flange on the discharge side of the triplex pump ruptured and caused 40 bbls of produced water to leak onto the ground. 34 bbls were recovered via vacuum truck and the pump was repaired.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 15' x 40' on location around the pump and some overspray on the East side of the location. Remediation was completed in accordance with the remediation plan approved by Geoffrey Leking of NMOCD via email on 07/02/2014 and approved by Jennifer VanCuren of the BLM on 06/30/2014.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
