**RE: No Further Action Site Closure Request
DCP X-Line Pipeline Release (1RP-400-0)
Unit B, Section 7, T15S, R34E (Lat 33° 02' 11", Long 103° 32' 48")**

Dear Dr. Oberding:

DCP Midstream, LP (DCP) is pleased to submit for your review, one copy of the No Further Action (NFA) Site Closure Request for the DCP X-Line Pipeline Release located within the Etcheverry Ranch, Lea County, New Mexico.

This NFA request is based on 9 consecutive quarters in which the BTEX concentrations in all groundwater monitor wells have been below New Mexico Water Quality Control Commissions Groundwater Standards. Upon your approval of the NFA, DCP will then move forward with decommissioning the remediation site and reclaiming the site as required by the settlement agreement with the present landowner.

If you have any questions regarding the NFA request, please call at 303-605-1718 or e-mail me swwathers@dcpmidstream.com.

Sincerely

DCP Midstream, LP

Stephen Weathers, PG
Principal Environmental Specialist
