Mr. Moskal:

I have reviewed the files on the releases referenced above. The available information indicates BP has met the requirements of 19.15.29 NMAC and no further corrective action is required. You are notified these referenced remediations are closed.

This finding by the OCD does not relieve BP of responsibility if future information shows a threat to ground water, surface water, human health, or the environment. Further, it does not relieve BP of responsibility for compliance with any federal, state, or local law.

Please properly plug remaining monitoring wells per requirements of the New Mexico Office of the State Engineer. Forward copies of plugging reports to me. Thanks.

Respectfully,

P.E., Hydrologist, District III
