Re: 3RP # Site Name
 430 Wilmuth No. 1

Gwen:

I have reviewed the files on the release referenced above, including the 2016 Annual Groundwater Assessment and Monitoring Reports and the Report on Temporary Well Installation and Groundwater Sampling dated 30May17 which describes background groundwater quality upgradient of the site. The available information indicates ConocoPhillips has met the requirements of 19.15.29-30 NMAC. No further corrective action is required. This referenced remediation project is closed.

This finding by the OCD does not relieve ConocoPhillips of responsibility if future information shows a threat to ground water, surface water, human health, or the environment. Further, it does not relieve ConocoPhillips of responsibility for compliance with any federal, state, or local law.

Please plug remaining monitoring wells per requirements of the New Mexico Office of the State Engineer. Thanks.

Respectfully,

Randolph Bayliss P.E.,
Hydrologist, District III
