RE: (Extension Request) Jazzbass 34 Federal #003H 06-08-2019 1RP-5555

Ms. Haskell,
Your request for an extension to 6, 2019 for Jazzbass 34 Federal #003H 06-08-2019 1RP-5555, is approved.
Regards,

Victoria Venegas

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

DeAnn,

Thanks for the report. As this is off the location and in the pasture (Lat/Long showing previous disturbed surface a possibility) the BLM will need a Sundry Notice (Form 3160-5) Requesting new surface disturbing activities, aerial showing the spill impact and buffers needed to access the release site and to perform sampling and extraction activities. Arch appears to not be an issue pending spill path. thanks

Mr. Rose-Coss/Mr. Amos,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,
