Subject: 2006 Annual Report and Closure Report for Rice Operating Company's Junction I-9 Release Site Unit Letter I, Section 9, T19S, R38E, Lea County, New Mexico Former AP008

Dear Mr. Hansen:

In response to your letter dated November 3, 2006 ARCADIS respectfully submits the following monitor well plugging report for the above-referenced site:

All of the monitoring wells (monitoring wells MW-1, MW-3 and MW-4) at the site with the exception of the McNeil were plugged on December 11, 2006 per the plugging plan submitted on November 9, 2006. The wells were be plugged by filling to the ground surface with a cement grout with 1-3% bentonite.

Your approval letter of the 2006 Annual Report and Closure report upon receipt of this plugging report will be appreciated.

If you have any questions or need additional information please contact me at (432) 687-5400 or Kristin Pope at (505) 393-9174.

Sincerely,

ARCADIS G&M, Inc.

RE: 2006 Annual Report and Closure Report for the Rice Operating Company's Junction I-9 Release Site Unit Letter I, Section 9, T19S, R38E, Lea County, New Mexico AP008 Termination

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (NMOCD) has received the Rice Operating Company's (ROC) plan (dated November 13, 2006) to plug the monitoring wells at the above referenced site. The plan is acceptable to the NMOCD; however, the material used to plug the wells must be a cement grout with 1% to 3% bentonite. Please submit to the NMOCD a final plugging report within 60 days of receipt of this letter.

The above referenced Closure Report, submitted in accordance with Rule 19.K, indicates that ROC has met the requirements of Rule 19.B; therefore, the NMOCD approves the abatement completion report and hereby notifies you that the abatement plan (AP008) is terminated in accordance with Rule 19.K.(2).

Please be advised that NMOCD approval of this plugging plan and closure report does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD approval does not relieve the owner/operator of responsibility for compliance with any NMOCD, federal, state, or local laws and/or regulations.

Carolyn Doran Haynes November 15, 2006 Page 2

Thank you for your cooperation in this matter. If you have any questions regarding this matter, please contact Edward Hansen of my staff at 505-476-3489 or <u>edwardj.hansen@state.nm.us</u>.

Sincerely,

1 Pin Ŵ

Subject: 2006 Annual Report and Closure Report for Rice Operating Company's Junction I-9 Release Site Unit Letter I, Section 9, T19S, R38E, Lea County, New Mexico AP008

Dear Mr. Hansen:

In response to your letter dated November 3, 2006 ARCADIS respectfully submits the following monitor well plugging plan for the above-referenced site:

All of the monitoring wells (monitoring wells MW-1, MW-3 and MW-4) at the site with the exception of the McNeil well will be plugged. The wells will be plugged by a water well driller with a valid New Mexico water well driller's license issued by the New Mexico State Engineer. The monitor wells will be plugged in accordance with 19.27.4.21 NMAC *Shallow Wells- Construction, Repair, Plugging.* That is, the wells will be plugged by filling to the ground surface, or, if the casing is not be removed, by welding a steel plate or cap to the casing.

Your approval letter of the 2006 Annual Report and Closure report upon receipt of this plugging plan will be appreciated.

If you have any questions or need additional information please contact me at (432) 687-5400 or Kristin Pope at (505) 393-9174.

RE: 2006 Annual Report and Closure Report for the Rice Operating Company's Junction I-9 Release Site Unit Letter I, Section 9, T19S, R38E, Lea County, New Mexico AP008

Dear Ms. Haynes:

The Oil Conservation Division (OCD) has received the Rice Operating Company's (ROC) 2006 Annual Report and Closure Report for the Junction I-9 Site, dated October 15, 2006, and has conducted an initial review of the Reports. The Closure Report, submitted in accordance with Rule 19.K, indicates that ROC has met the requirements of Rule 19.B. However, prior to issuing an approval letter for the Report, ROC must submit to the OCD a plan to plug all of the groundwater monitoring wells (expect for the McNeill well) at the site.

Once this issue has been adequately addressed, then the OCD will issue a completion approval and abatement plan termination letter. If you have any questions regarding this matter, please call me at 505-476-3489.

Sincerely,

V. Hansh

OCD is in receipt of the Stage 2 Abatement revision Request dated April 05, 2004 and hereby approves of the plan. Please submit the Stage 2 for OCD approval by June 30, 2004.

Please be advised that NMOCD approval of this plan does not relieve (Rice Operating Company) of liability should their operations fail to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD approval does not relieve (Rice Operating Company) of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject:

Rice Operating Company Junction I-9, Hobbs, New Mexico Stage 2 Abatement Plan Revision Request

Dear Mr. Price,

On behalf of Rice Operating Company (ROC), ARCADIS G&M respectfully requests a revision to the Stage 2 Abatement Plan submitted in December 2000 for the Junction I-9 site. The approved Stage 2 Abatement Plan calls for the reinstallation of the recovery well and installation of two additional wells, one downgradient of MW-2 and one downgradient of the source area (the near-source area well is to be drilled to the base of the aquifer). ROC requests a revision to the approved Stage 2 Abatement workplan to not drill the subject wells. The basis for the request is:

- 1. Site ownership- the site is now owned by Oxy Permian
- 2. Site conditions- the source of potential impacts has been removed (excavated) and an upper and lower clay liner have been installed
- 3. Analytical data- groundwater was collected and analyzed in March 2004. Groundwater analytical results indicate generally improved conditions.
- 4. No free product is evidenced at the site.

Attached is a table summarizing the analytical results of the March 2, 2004 groundwater sampling. The table is a revision (update) of Table 3 that was included in the Stage 1 Abatement Report submitted on September 10, 1999. Compounds highlighted in yellow were analyzed per the approved Stage 2 Abatement Workplan. The well designated as the McNeil well, downgradient of the site, was added to the sampling program. Monitor well MW-2 was not sampled, as the well was dry.

No hydrocarbons were detected in any of the wells. Metals analysis indicates a decrease in metals concentrations since the July and September 1999 sampling. Aluminum and lead were detected at concentrations in excess of New Mexico Water Quality Control Commission (WQCC) standards; however, the concentrations of these compounds have decreased since the wells were last sampled. Boron was

ARCADIS G&M, Inc. 1004 N. Big Spring Street Suite 300 Midland Texas 79701 Tel 432.687.5400 Fax 432.687.5401 www.arcadis-us.com

Part of a bigger picture

Wayne Price April 5, 2004

detected at a concentration in excess of the WQCC standard. Boron has not previously been analyzed. Total dissolved solids and sodium were detected at a concentration above the WQCC standard, and chlorides were detected above the WQCC standard in one well, MW-3.

No free product is evidenced at the site. During excavation activities the site was excavated to groundwater in the source area. No measurable product was evidenced in the excavation. Further, no hydrocarbon compounds were detected in any of the monitor wells. Therefore, re-installation of the recovery well is no longer warranted.

Based on the changes in site conditions since the submittal and approval of the Stage 2 Abatement Workplan (the site is now owned by Oxy Permian, the source of potential impacts has been removed (excavated) and an upper and lower clay liner have been installed and analytical results indicate generally improved conditions) ROC requests that the two additional monitor wells not be drilled and that monitoring of the existing wells, including the downgradient McNeil well continue as described in the Stage 2 Abatement Workplan. The McNeil well, which was installed as an irrigation well, will be added to the sampling program and should be sufficient to monitor downgradient density gradient effects. With your approval of this request ROC will prepare and submit the Stage 2 Abatement report that details the Stage 2 Abatement activities and results.

Sincerely,

ARCADIS G&M, Inc.

<u>February 17, 2003 Request for Additional Information:</u> Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Mr. Price:

On behalf of Rice Operating Company (ROC) ARCADIS G&M (ARCADIS) respectfully submits this response to your request for information dated February 17, 2003. The information provided here supplements the response sent to you on March 26, 2003 and is being provided to you by April 11, 2003 as indicated in our March 26 response.

4. Request – "ROC used the EPA HELP MODEL to determine the infiltration rate of .015 inches/year through the liner and backfilled soils. In order to assist OCD in determining the sensitivity of this parameter, please provide calculations showing the acceptable maximum soil concentration levels if a safety factor of ten (10x) were used. Please use .15 inches/year as a hypothetical infiltration rate and re-compute the groundwater dilution factor and apply it to the acceptable maximum soil concentration levels and provide the potential groundwater impact. Please provide this information before the hearing."

Response- As noted in the report, if the infiltration rate is 0.015 in/yr the maximum acceptable soil concentration is 1093 mg/kg. If the infiltration rate were 10 times higher the maximum acceptable soil concentration is 118.7 mg/kg. This concentration is approximately twice the levels in the proposed backfill soils (56.7 mg/kg) and approximately 40 percent less than the average sidewall and bottom soil concentrations (194 mg/kg).

5. Request – "ROC used a steady-state groundwater dilution equation to calculate potential groundwater impacts. A groundwater-mixing zone of 10 feet was selected. Please provide the OCD with a graph showing the mixing zone varying from 0-10 feet vs. computed groundwater impact concentration."

ARCADIS G&M, Inc. 1004 N. Big Spring Street Suite 300 Midland Texas 79701 Tel 432.687.5400 Fax 432.687.5401 www.arcadis-us.com

Environmental

Email: shall@arcadis-us.com

Mr. Wayne Price April 11, 2003

Response- Attached is a figure illustrating the maximum allowable soil concentration versus the thickness of the mixing zone. At zero feet, the maximum soil concentration is only 10.4 mg/kg. The pore water concentration at this soil concentration equals the water quality criteria of 250 mg/l. At 10 feet, the soil concentration corresponds to the computed maximum acceptable soil concentration of 1093 mg/kg reported in AP-8.

6. Request- "The information submitted to OCD does not provide a breakthrough or mass depletion curve versus time. OCD assumes that the values presented in the model gives maximum peak concentration worst-case values. However, OCD would like to know what will be the estimated mass remaining vs. time. In other words, how long will monitoring be required? Please provide this information before the hearing."

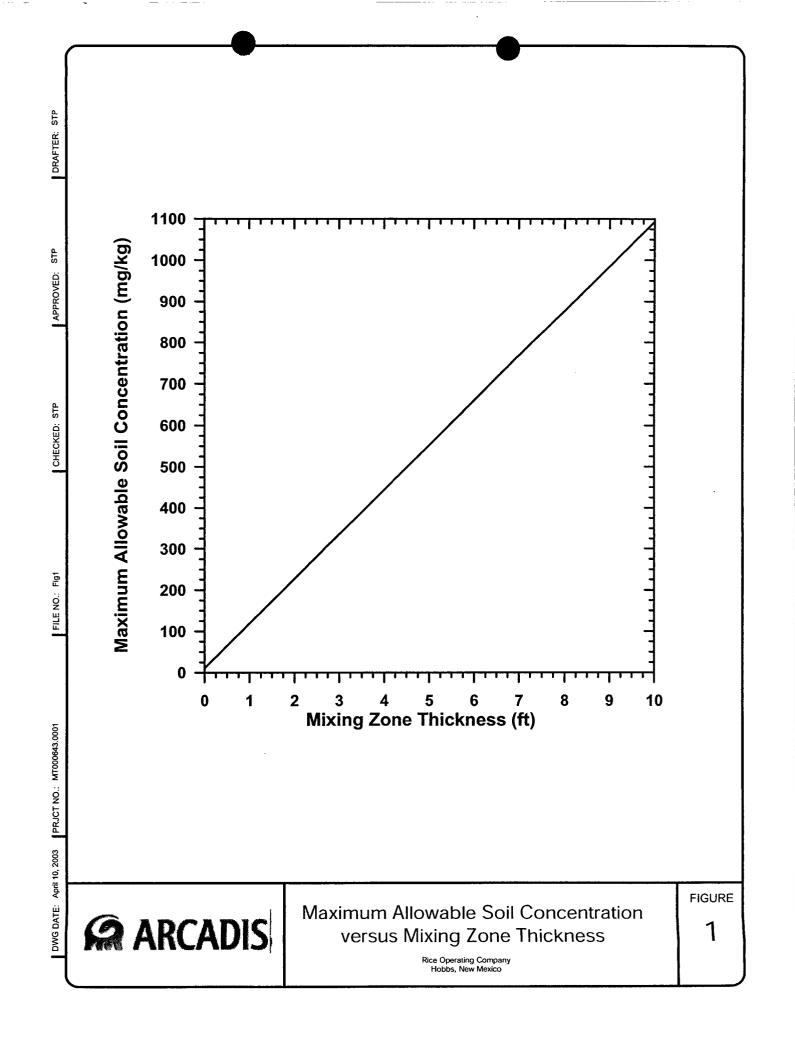

Response- The leaching analysis included with the AP-8 submittal assumes no dispersion and no adsorption. These assumptions allow the salt to migrate as a plug through the soil profile with the soil water. Therefore, the predicted time for excess chlorides to be leached is equal to the travel time of a drop of water through the vadose zone. At an infiltration rate 0.015 in/yr, and average moisture content of approximately field capacity (0.077), a drop of water would move vertically at approximately 0.2 in/yr. In the areas where soils were excavated 32 feet to the water , the backfilled soils will leach above background for 1920 years (192 years if the infiltration rate is 0.15 in/yr). In the areas excavated to 14 feet deep, it may take as long 1080 years (108 years at 0.15 in/yr) before chlorides from backfilled soils reach the water table and they would increase local chloride concentrations in groundwater for an additional 840 years (84 years at 0.15 in/yr).

If you have any questions or require additional information please do not hesitate to contact me at 915 687-5400.

Very truly yours,

Re: Case No. 12919; Application of the New Mexico Oil Conservation Division Pursuant to Rule 19.G(3) ["Rice I-9"]

Dear Examiners Stogner and Bayliss:

This Division joins in Mr. Carr's request (by letter of April 2) for a pre-hearing conference.

At such a conference, the Division would like guidance on the issues and order of presentation. The Division's position on these matters is that the order of presentation should be as follows:

1. Rice should present evidence and argument justifying the adequacy of its abatement plan.

2. The Division staff should present evidence of, and justification for, any conditions or changes staff urges the examiners to require.

3. The protesting parties should present evidence of, and justification for, any additional conditions or changes they urge the examiners to require.

Division counsel is available at your convenience for such a conferece.

Should you have any questions, please call me at (505)-476-3450.

Very truly yours,

, avid K. Brook

Re: <u>New Mexico Oil Conservation Division Case No. 12919</u>: Application of the New Mexico Oil Conservation Division for a public hearing pursuant to Rule 19.G (3) to consider the adequacy of a revised Stage 2 Abatement Plan, Lea County, New Mexico.

Dear Examiners Stogner and Bayliss:

Pursuant to the provisions of Division Rule 1211.B, Rice Operating Company hereby requests a Pre-Hearing Conference be scheduled at the earliest possible time in the above referenced case. A Pre-hearing Conference is needed to address the complete failure by the McNeill Ranch to comply with a subpoena issued by the Division and to arrange for an exchange of exhibits and identification of witnesses one week prior to the April 22, 2003 hearing in this case.

Very truly yours,

William F.^ICarr

February 17, 2003 Request for Additional Information:

Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Mr. Price:

On behalf of Rice Operating Company (ROC) ARCADIS G&M (ARCADIS) respectfully submits this response to your request for information dated February 17, 2003.

1. Request- "The OCD has not received any recent groundwater data and is concerned about the time lapsed from the last sampling event and possible contamination moving off-site. Therefore, OCD is requiring that ROC install at least three of the groundwater monitoring wells as proposed in the plan outside of the excavated area. Please install two down gradient and one up-gradient monitor well as soon as possible. These wells shall be located, constructed, developed, purged and sampled pursuant to ROC's submitted plans. All sampling shall be witnessed by OCD. Please submit the results before the Hearing."

Response- It is ROC's understanding that the monitoring wells would not be installed until ROC receives approval from the New Mexico Oil Conservation Division (NMOCD) that remediation of soils is complete and no further excavation is required. ROC requests clarification of this issue. ROC also needs to know if NMOCD is prepared to issue their approval that the proposed well locations will not require excavation.

Request - "The OCD noted that ROC proposed a clay liner with a permeability of 1 X 10⁻⁷ cm/sec, but actually used a number ten times less (1 X 10⁻⁸ cm/sec) in the EPA HELP Model (Hydrologic Evaluation of Landfill

Part of a bigger picture

Mr. Wayne Price March 26, 2003

Performance). This would require ROC to meet the more stringent permeability (1 X 10^{-8} cm/sec) for the constructed clay liner. OCD feels this may not be possible or practical. Please address this issue."

Response- It is ROC's intent to install a liner that achieves a permeability of 1×10^{-8} cm/sec as presented in the HELP model. If clay suitable to achieve this permeability is not readily available, the liner will be composed of poly liner material.

3. Request -"<u>City of Hobbs Stormwater Run-off</u>: ROC's latest response indicated that no modifications to the workplan are necessary. After a recent visit, the OCD has determined that there is a possible drainage pathway from the City of Hobbs stormwater retention basin to the ROC remediation site. This pathway runs southeast from the basin to the site. Therefore, please provide a technical basis for your decision including flood plain maps, drainage pathways, and methods to prevent ponding, erosion, etc. This information shall be submitted before the hearing."

Response- ROC has reviewed the aerial photographic obtained from the City of Hobbs and the topographic map of the site. The liner will be constructed with slopes to allow water to run-off the liner rather than collect. Particular attention will be paid to the northwest slope as run-off from the retention basin (located approximately 2000 feet northwest of the site) would likely occur from this direction.

4. **Request** –"ROC used the EPA HELP MODEL to determine the infiltration rate of .015 inches/year through the liner and backfilled soils. In order to assist OCD in determining the sensitivity of this parameter, please provide calculations showing the acceptable maximum soil concentration levels if a safety factor of ten (10x) were used. Please use .15 inches/year as a hypothetical infiltration rate and re-compute the groundwater dilution factor and apply it to the acceptable maximum soil concentration levels and provide the potential groundwater impact. Please provide this information before the hearing."

Response- This information will be provided to NMOCD by April 11, 2003.

Mr. Wayne Price March 26, 2003

5. Request -- "ROC used a steady-state groundwater dilution equation to calculate potential groundwater impacts. A groundwater-mixing zone of 10 feet was selected. Please provide the OCD with a graph showing the mixing zone varying from 0-10 feet <u>vs</u>. computed groundwater impact concentration."

Response- This information will be provided to NMOCD by April 11, 2003.

6. **Request-** "The information submitted to OCD does not provide a breakthrough or mass depletion curve versus time. OCD assumes that the values presented in the model gives maximum peak concentration worst-case values. However, OCD would like to know what will be the estimated mass remaining vs. time. In other words, how long will monitoring be required? Please provide this information before the hearing."

Response- This information will be provided to NMOCD by April 11, 2003.

If you have any questions or require additional information please do not hesitate to contact me at 915 687-5400.

Very truly yours,

RE: <u>Request for Additional Information:</u> Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) Environmental Bureau has been notified that the Oil Conservation Commission Hearing Case No. 12819 concerning the Rice Operating Company (ROC) "Revised Stage 2 Abatement Plan (AP-8)" has again been postponed for sometime in April of 2003. Please note the OCD has the following concerns:

- 1. The OCD has not received any recent groundwater data and is concerned about the time lapsed from the last sampling event and possible contamination moving off-site. Therefore, OCD is requiring that ROC install at least three of the groundwater monitoring wells as proposed in the plan outside of the excavated area. Please install two down gradient and one up-gradient monitor well as soon as possible. These wells shall be located, constructed, developed, purged and sampled pursuant to ROC's submitted plans. All sampling shall be witnessed by OCD. Please submit the results before the Hearing.
- 2. The OCD noted that ROC proposed a clay liner with a permeability of 1 X 10⁻⁷ cm/sec, but actually used a number ten times less (1 X 10⁻⁸ cm/sec) in the EPA HELP Model (Hydrologic Evaluation of Landfill Performance). This would require ROC to meet the more stringent permeability (1 X 10⁻⁸ cm/sec) for the constructed clay liner. OCD feels this may not be possible or practical. Please address this issue.

- Carolyn Doran Haynes February 17, 200 Page 2
 - 3. <u>City of Hobbs Stormwater Run-off:</u> ROC's latest response indicated that no modifications to the workplan are necessary. After a recent visit, the OCD has determined that there is a possible drainage pathway from the city of Hobbs stormwater retention basin to the ROC remediation site. This pathway runs southeast from the basin to the site. Therefore, please provide a technical basis for your decision including flood plain maps, drainage pathways, and methods to prevent ponding, erosion, etc. This information shall be submitted before the hearing.
 - 4. ROC used the EPA HELP MODEL to determine the infiltration rate of .015 inches/year through the liner and backfilled soils. In order to assist OCD in determining the sensitivity of this parameter, please provide calculations showing the acceptable maximum soil concentration levels if a safety factor of ten (10x) were used. Please use .15 inches/year as a hypothetical infiltration rate and recompute the groundwater dilution factor and apply it to the acceptable maximum soil concentration levels and provide the potential groundwater impact. Please provide this information before the hearing.
 - 5. ROC used a steady-state groundwater dilution equation to calculate potential groundwater impacts. A groundwater-mixing zone of 10 feet was selected. Please provide the OCD with a graph showing the mixing zone varying from 0-10 feet <u>vs</u>. computed groundwater impact concentration.
 - 6. The information submitted to OCD does not provide a breakthrough or mass depletion curve versus time. OCD assumes that the values presented in the model gives maximum peak concentration worst-case values. However, OCD would like to know what will be the estimated mass remaining vs. time. In other words, how long will monitoring be required? Please provide this information before the hearing.

If you have any questions please do not hesitate to contact me at 505-476-3487 or E-mail WPRICE@state.nm.us.

Sincerely,

7 Jaims Price

From: Sent: To: Subject: Brooks, David K Thursday, January 30, 2003 3:09 PM Stogner, Michael; Bayliss, Randy; Price, Wayne Case No. 12819 - Rice I-9

Gentlemen:

As I expected, once I announced a setting of the referenced matter of February 25, Mr. Lyle requested further delay, again pleading his trial schedule.

He is now requesting a setting in mid to late April.

I want Lyle to participate, so let me know about available dates in April. Once we have a date, I would like the examiners to write to counsel and set a date. It will be my position that I will not thereafter agree to any more continuances, and the examiners will have to rule on further requests.

Please indicate any limitations on your schedules in April; then I will check dates with Bill Carr. Thereafter, I will let you know the specific date when I will request a setting.

Re: Case No. 12,919: Application of the New Mexico Oil Conservation Division ("Division") for a public hearing pursuant to Rule 19.G (3) to consider the adequacy of a revised Stage 2 Abatement Plan, Lea County, New Mexico.

Dear Messrs. Brooks, Carr, Lyle, and Reagan:

Reference is made to Mr. Lyle's most recent letter dated October 2, 2002 (see copy attached), due to my work schedule and other pressing matters that require my attention and the work schedules of others within the Division, this matter will not be heard in 2002. I suggest we have a meeting sometime after January 6, 2003 in order to determine a date to hear this case. I pass the responsibility of arranging this pre-hearing meeting to the representing attorneys.

This matter is hereby continued from the special November 6, 2002 hearing to a date to be determined at a later time. Thank you for your understanding and cooperation.

Sincerely,

Michael E. Stogner Chief Hearing Officer/Engineer

> RE: Case No. 12,919: Application of the New Mexico Oil Conservation Division ("Division")_For A Public Hearing Pursuant to Rule 19.6(3) To Consider The Adequacy of a Revised Stage 2 Abatement Plan, Lea County, New Mexico

Dear Mr. Stogner:

Pursuant to 19 NMAC 15.N.1203, I am requesting that a new hearing date be scheduled in this matter. I hope that this request will be honored given that the hearing has been twice rescheduled already by the Commission. The most recent Notice of Hearing we received moved the matter from October 22, 2002 to November 6, 2002. Mr. McNeill will be out of State the entire week of November 4, 2002 and cannot attend the hearing as scheduled in the most recent Notice.

Please let me know at the earliest convenience if there will be any difficulty in honoring this request. I look forward to hearing from you.

Very truly yours,

APPLICATION OF THE NEW MEXICO OIL CONSERVATION DIVISION, THROUGH THE ENVIRONMENTAL BUREAU CHIEF, FOR A PUBLIC HEARING PURSUANT TO RULE 19.G(3) TO CONSIDER THE ADEQUACY OF A REVISED STAGE 2 ABATEMENT PLAN; LEA COUNTY, NEW MEXICO

CASE NO.

APPLICATION FOR PUBLIC HEARING TO REVIEW ABATEMENT PLAN

1. Rice Operating Company ("Rice") is the operator of the Hobbs Salt Water Disposal System in Lea County, New Mexico.

2. On October 20, 1998 Rice discovered hydrocarbon-impacted ground water at the site of an earlier (June 5, 1998) release occasioned by a leak from its system. The site of the release and contamination is located in the NE/4 SE/4 (Unit I) of Section 9, Township 19 South, Range 38 East, in Lea County, New Mexico (the "Junction I-9 Release site"). Rice reported the contamination to the New Mexico Oil Conservation Division ("OCD") on October 22, 1998.

3. Pursuant to OCD Rule 19 [19 NMAC 15.A.19], OCD required Rice to submit an abatement plan. Rice submitted its Stage 1 (investigatory) abatement plan on January 19, 1999, and OCD approved the same. On November 19, 1999, following review of the results of the Stage 1 abatement plan, OCD required Rice to submit a Stage 2 (remedial) abatement plan. 4. Rice submitted its initial Stage 2 abatement plan on January 10, 2000. Following extended review and negotiations, Rice submitted its revised Stage 2 abatement plan (the "Revised Stage 2 Abatement Plan") on December 13, 2001.

5. On January 29, 2002, OCD received formal requests for a public hearing on the Revised Stage 2 Abatement Plan from the McNeill Ranch (through James P. Lyle, attorney) and from the City of Hobbs, New Mexico.

6. On May 9, 2002 OCD determined that the Revised Stage 2 Abatement Plan was administratively complete. On May 28, 2002 notice of the Revised Stage 2 Abatement Plan was published as required by Rule 19.G(2) [19 NMAC 15.A.19.G(2)].

7. On May 24, 2002 William F. McNeill and attorney, James P. Lyle filed additional requests for a public hearing on the Revised Stage 2 Abatement Plan. The Director determined, pursuant to Rule 19.G(3) [19 NMAC 15.A.19.G(3)] that there existed significant public interest.

8. The OCD staff, through the Environmental Bureau Chief, recommends that the Revised Stage 2 Abatement Plan be approved subject to the conditions set forth in Exhibit A hereto (which exhibit is by this reference incorporated into and made a part of this Application for all purposes).

WHEREFORE, the Environmental Bureau Chief of the Division hereby applies to the Director to:

A. Schedule a public hearing before a duly appointed hearing examiner, upon proper notice as provided in Rules 1204 and 1207 [19 NMAC 15.N.1204

and 1207], to consider the adequacy of the Revised Stage 2 Abatement Plan.

- B. Notify Rice to appear before the examiner at the hearing and then and there to demonstrate the adequacy of the Revised Stage 2 Abatement Plan.
- C. After notice and hearing as above requested, enter an order approving the Revised Stage 2 Abatement Plan subject to the conditions set forth in Exhibit A, and/or to such other and further conditions, either in addition to or in lieu thereof, as the Director deems appropriate.
- D. Alternatively, enter an order pursuant to Rule 19.H(4) [19 NMAC
 15.A.19.H(4)] identifying deficiencies in the Revised Stage 2 Abatement
 Plan and directing Rice to submit a modified plan as in said Rule
 provided.
- E. Order such other and further relief, either supplemental or alternative, as the Director deems appropriate.

RESPECTFULLY SUBMITTED,

David K. Brooks Assistant General Counsel Energy, Minerals and Natural Resources Department of the State of New Mexico 1220 S. St. Francis Drive Santa Fe, NM 87505 (505)-476-3450 Attorney for The New Mexico Oil Conservation Division

APPLICATION FOR PUBLIC HEARING TO REVIEW ABATEMENT PLAN

NMOCD Administrative Review of Rice Operating Company Junction I9 Site Revised Stage 2 Abatement Plan

The New Mexico Oil Conservation Division (OCD) has completed a review of the following Rice Operating Company (ROC) documents:

- June 14, 2002 Stage II Abatement Plan Revision Proposal Proof of Public Notice.
- March 08, 2002 Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2001 Junction I-9 Revised Stage 2 Abatement Plan Request from NMOCD.
- November 14, 2001 modeling information supplied during technical meeting held in Santa Fe, NM.
- August 21, 2001 Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site.
- May 15, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 30, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2000 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 31, 2002 Stage II Abatement Plan (AP-8) Junction I-9 Release Site. (Proof of Public Notice)
- January 10, 2000 Stage II Abatement Plan Proposal letter and Stage 2 Abatement Plan Proposal, Junction I-9 Release site.

These documents contain ROC's Proposal for remediation of soil and ground water contamination related to the Junction I-9 Release Site located in the NE/4

SE/4 Section 09-Ts19s-R38e Lea County, New Mexico and proof of public notice of the plan. The Stage 2 Abatement Plan (AP-8) for the ROC Junction I-9 Release Site as contained in the above-referenced documents is hereby approved with the following conditions:

- 1. Stage 2 activities shall start no later than 30 days after ROC is in receipt of final stage 2 approval.
- 2. ROC will notify the OCD Santa Fe office and the OCD District office at least 72 hours in advance of all scheduled activities such that the OCD has the opportunity to witness the events and/or split samples during OCD's normal business hours.
- 3. Representative composite samples shall be collected from each level of excavtion and walls and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 4. Each blended backfill lift shall be compacted to prevent future subsidence. In addition, a composite representative soil sample shall be collected from each lift and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 5. Soils used for backfill or contaminated soils left in place shall not exceed the standards found in the NMOCD "Guidelines for Remediation of Leaks, Spills and Releases" as proposed by ROC in the December 13, 2000 submittal. In addition, blended backfill soils placed between the clay liners shall not exceed 1099 mg/kg of chlorides as proposed by ROC in the December 13, 2001 submittal, and all other contaminated soils outside of the liner system that exceed 250 mg/kg of chlorides shall be excavated and removed as proposed by ROC in the March 08, 2002 submittal.
- 6. The clay liners shall be installed pursuant to ROC's proposal dated December 13, 2001 item # 4. In addition, the top liner shall extend a minimum of 20 feet beyond the edge of the bottom liner in order to prevent lateral infiltration between the liners. The permeability of the liners shall be no greater than 1×10^{-8} cm/sec as proposed in the model

percolation estimate attachment "B". Field test shall be conducted to verify the liner permeability.

- 7. Written approval from OCD shall be received before backfilling or covering any excavated area or clay liner. The top clay liner shall have an adequate slope to drain subsurface soils that may become saturated.
- 8. Proposed monitoring and recovery Wells shall be located, constructed, developed, purged, and sampled as outlined in the plan.
- 9. No less than 48 hours after the well(s) are developed, ground water from all monitor well(s) shall be purged, sampled and analyzed for concentrations of benzene, toluene, ethylbenzene, xylene, polycyclic aromatic hydrocarbons (PAH), total dissolved solids (TDS) and New Mexico Water Quality Control Commission (WQCC) metals and major cations and anions using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 10. All wastes generated during the investigation shall be disposed of at an OCD approved facility.
- 11. ROC shall submit a report by December 30, 2002 to the OCD Santa Fe office with a copy provided to the OCD Hobbs District Office describing the results of the work performed and shall include the following information:
 - a. A description of all investigation, remediation, monitoring activities, including photo documentation, conclusions and recommendations.
 - b. A geologic/lithologic log and well completion diagram for each monitor well.
 - c. A water table potentiometric map showing the location of the leaks and spills, excavated areas, monitor wells, and any other pertinent site features as well as the direction and magnitude of the hydraulic gradient.
 - d. Isopleth maps for contaminants of concern which were observed during the investigations.
 - e. Summary tables of all ground water quality sampling results and copies of all laboratory analytical data sheets and associated QA/QC data taken within the past year. A quarterly groundwater-sampling schedule for OCD approval.

- f. The quantity and disposition of all recovered product and/or wastes generated.
- g. A detailed scaled site map showing all major features such as the center and corners of the buried liner, all wells, etc. The map shall have at least one GPS coordinate for the center of the site over the liner system.
- 12. Contamination found beyond the most down gradient recovery system and or monitoring wells that exceed the Water Quality Control Commission Regulation (WQCC) groundwater standards shall require immediate corrective action. ROC shall submit a corrective action plan within 30 days of discovery.

Please be advised that OCD approval does not relieve ROC of responsibility if contamination exists which is outside the scope of the plan; if the plan fails to adequately remediate contamination related to ROC's activities; or if the plan fails to protect public health. In addition, OCD approval does not relieve ROC of responsibility for compliance with any other federal, state or local laws and regulations.

Case No._____: Application of the New Mexico Oil Conservation Division for a Public Hearing Pursuant to Rule 19.G(3) to Consider the Adequacy of a Revised Stage 2 Abatement Plan; Lea County, New Mexico. The Applicant asks the Director to set a public hearing to review the adequacy of the Revised Stage 2 Abatement Plan submitted by Rice Operating Company for abatement of ground water contamination at the Junction I9 Release Site in the NE/4 SE/4 (Unit I) of Section 9, Township 19 South, Range 38 East, in Lea County, New Mexico. The Applicant will recommend approval of the Revised Stage 2 Abatement Plan subject to conditions set forth in the Application. The documents constituting the Revised Stage 2 Abatement Plan are on file at the Santa Fe office of the Division at 1220 S. Saint Francis Drive, 3rd Floor, in Santa Fe, New Mexico, and may be examined by interested persons during ordinary business hours.

Wayne I sent out notices to 207 recipients on our mailing list of the Aug 22 hearing. Enclosed we each notice was a copy of the application, including Eihibit A thereto, which was excerpted from your draft administrative approval letter. I did not, herveres, send out the administrative approval letter That remains to be ibelf. done

brasmuch as you were not here to help w/ preparing the notices, I included your name and phone # in the notice letter as the contact person for questions.

RE: Revised Stage 2 Abatement Plan (AP-8)

Junction I-9 Release Site NE/4 SE/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) has completed a review of the following Rice Operating Company (ROC) documents:

- June 14, 2002 Stage II Abatement Plan Revision Proposal Proof of Public Notice.
- March 08, 2002 Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2001 Junction I-9 Revised Stage 2 Abatement Plan Request from NMOCD.
- November 14, 2001 modeling information supplied during technical meeting held in Santa Fe, NM.

- August 21, 2001 Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site.
- May 15, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 30, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2000 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 31, 2002 Stage II Abatement Plan (AP-8) Junction I-9 Release Site. (Proof of Public Notice)
- January 10, 2000 Stage II Abatement Plan Proposal letter and Stage 2 Abatement Plan Proposal, Junction I-9 Release site.

These documents contain ROC's Proposal for remediation of soil and ground water contamination related to the Junction I-9 Release Site located in the NE/4 SE/4 Section 09-Ts19s-R38e Lea County, New Mexico and proof of public notice of the plan. The Stage 2 Abatement Plan (AP-8) for the ROC Junction I-9 Release Site as contained in the above-referenced documents is hereby approved with the following conditions:

- 1. Stage 2 activities shall start no later than 30 days after ROC is in receipt of final stage 2 approval.
- 2. ROC will notify the OCD Santa Fe office and the OCD District office at least 72 hours in advance of all scheduled activities such that the OCD has the opportunity to witness the events and/or split samples during OCD's normal business hours.
- 3. Representative composite samples shall be collected from each level of excavtion and walls and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.

- 4. Each blended backfill lift shall be compacted to prevent future subsidence. In addition, a composite representative soil sample shall be collected from each lift and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 5. Soils used for backfill or contaminated soils left in place shall not exceed the standards found in the NMOCD "Guidelines for Remediation of Leaks, Spills and Releases" as proposed by ROC in the December 13, 2000 submittal. In addition, blended backfill soils placed between the clay liners shall not exceed 1099 mg/kg of chlorides as proposed by ROC in the December 13, 2001 submittal, and all other contaminated soils outside of the liner system that exceed 250 mg/kg of chlorides shall be excavated and removed as proposed by ROC in the March 08, 2002 submittal.
- 6. The clay liners shall be installed pursuant to ROC's proposal dated December 13, 2001 item # 4. In addition, the top liner shall extend a minimum of 20 feet beyond the edge of the bottom liner in order to prevent lateral infiltration between the liners. The permeability of the liners shall be no greater than 1x10⁻⁸ cm/sec as proposed in the model percolation estimate attachment "B". Field test shall be conducted to verify the liner permeability.
- 7. Written approval from OCD shall be received before backfilling or covering any excavated area or clay liner. The top clay liner shall have an adequate slope to drain subsurface soils that may become saturated.
- 8. Proposed monitoring and recovery Wells shall be located, constructed, developed, purged, and sampled as outlined in the plan.
- 9. No less than 48 hours after the well(s) are developed, ground water from all monitor well(s) shall be purged, sampled and analyzed for concentrations of benzene, toluene, ethylbenzene, xylene, polycyclic aromatic hydrocarbons (PAH), total dissolved solids (TDS) and New Mexico Water Quality Control Commission (WQCC) metals and major cations and anions using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 10. All wastes generated during the investigation shall be disposed of at an OCD approved facility.

- 11. ROC shall submit a report by December 30, 2002 to the OCD Santa Fe office with a copy provided to the OCD Hobbs District Office describing the results of the work performed and shall include the following information:
 - a. A description of all investigation, remediation, monitoring activities, including photo documentation, conclusions and recommendations.
 - b. A geologic/lithologic log and well completion diagram for each monitor well.
 - c. A water table potentiometric map showing the location of the leaks and spills, excavated areas, monitor wells, and any other pertinent site features as well as the direction and magnitude of the hydraulic gradient.
 - d. Isopleth maps for contaminants of concern which were observed during the investigations.
 - e. Summary tables of all ground water quality sampling results and copies of all laboratory analytical data sheets and associated QA/QC data taken within the past year. A quarterly groundwater-sampling schedule for OCD approval.
 - f. The quantity and disposition of all recovered product and/or wastes generated.
 - g. A detailed scaled site map showing all major features such as the center and corners of the buried liner, all wells, etc. The map shall have at least one GPS coordinate for the center of the site over the liner system.
- 12. Contamination found beyond the most down gradient recovery system and or monitoring wells that exceed the Water Quality Control Commission Regulation (WQCC) groundwater standards shall require immediate corrective action. ROC shall submit a corrective action plan within 30 days of discovery.

Please be advised that OCD approval does not relieve ROC of responsibility if contamination exists which is outside the scope of the plan; if the plan fails to adequately remediate contamination related to ROC's activities; or if the plan fails to protect public health. In addition, OCD approval does not relieve ROC of responsibility for compliance with any other federal, state or local laws and regulations.

RE: Revised Stage 2 Abatement Plan (AP-8)

Junction I-9 Release Site NE/4 SE/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) has completed a review of the following Rice Operating Company (ROC) documents:

- June 14, 2002 Stage II Abatement Plan Revision Proposal Proof of Public Notice.
- March 08, 2002 Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2001 Junction I-9 Revised Stage 2 Abatement Plan Request from NMOCD.
- November 14, 2001 modeling information supplied during technical meeting held in Santa Fe, NM.

- August 21, 2001 Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site.
- May 15, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 30, 2001 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- December 13, 2000 Revised Stage 2 Abatement Plan Additional Request, Junction I-9 Site; Hobbs, New Mexico.
- March 31, 2002 Stage II Abatement Plan (AP-8) Junction I-9 Release Site. (Proof of Public Notice)
- January 10, 2000 Stage II Abatement Plan Proposal letter and Stage 2 Abatement Plan Proposal, Junction I-9 Release site.

These documents contain ROC's Proposal for remediation of soil and ground water contamination related to the Junction I-9 Release Site located in the NE/4 SE/4 Section 09-Ts19s-R38e Lea County, New Mexico and proof of public notice of the plan. The Stage 2 Abatement Plan (AP-8) for the ROC Junction I-9 Release Site as contained in the above-referenced documents is hereby approved with the following conditions:

- 1. Stage 2 activities shall start no later than 30 days after ROC is in receipt of final stage 2 approval.
- 2. ROC will notify the OCD Santa Fe office and the OCD District office at least 72 hours in advance of all scheduled activities such that the OCD has the opportunity to witness the events and/or split samples during OCD's normal business hours.
- Representative composite samples shall be collected from each level of excavtion and walls and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.

- 4. Each blended backfill lift shall be compacted to prevent future subsidence. In addition, a composite representative soil sample shall be collected from each lift and analyzed for total petroleum hydrocarbons (TPH) EPA method 8015 (DRO+GRO) or 418.1, BTEX method 8021 or 8260, general chemistry and WQCC metals using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 5. Soils used for backfill or contaminated soils left in place shall not exceed the standards found in the NMOCD "Guidelines for Remediation of Leaks, Spills and Releases" as proposed by ROC in the December 13, 2000 submittal. In addition, blended backfill soils placed between the clay liners shall not exceed 1099 mg/kg of chlorides as proposed by ROC in the December 13, 2001 submittal, and all other contaminated soils outside of the liner system that exceed 250 mg/kg of chlorides shall be excavated and removed as proposed by ROC in the March 08, 2002 submittal.
- 6. The clay liners shall be installed pursuant to ROC's proposal dated December 13, 2001 item # 4. In addition, the top liner shall extend a minimum of 20 feet beyond the edge of the bottom liner in order to prevent lateral infiltration between the liners. The permeability of the liners shall be no greater than 1x10⁻⁸ cm/sec as proposed in the model percolation estimate attachment "B". Field test shall be conducted to verify the liner permeability.
- 7. Written approval from OCD shall be received before backfilling or covering any excavated area or clay liner. The top clay liner shall have an adequate slope to drain subsurface soils that may become saturated.
- 8. Proposed monitoring and recovery Wells shall be located, constructed, developed, purged, and sampled as outlined in the plan.
- 9. No less than 48 hours after the well(s) are developed, ground water from all monitor well(s) shall be purged, sampled and analyzed for concentrations of benzene, toluene, ethylbenzene, xylene, polycyclic aromatic hydrocarbons (PAH), total dissolved solids (TDS) and New Mexico Water Quality Control Commission (WQCC) metals and major cations and anions using EPA approved methods and quality assurance/quality control (QA/QC) procedures.
- 10. All wastes generated during the investigation shall be disposed of at an OCD approved facility.

- 11. ROC shall submit a report by December 30, 2002 to the OCD Santa Fe office with a copy provided to the OCD Hobbs District Office describing the results of the work performed and shall include the following information:
 - a. A description of all investigation, remediation, monitoring activities, including photo documentation, conclusions and recommendations.
 - b. A geologic/lithologic log and well completion diagram for each monitor well.
 - c. A water table potentiometric map showing the location of the leaks and spills, excavated areas, monitor wells, and any other pertinent site features as well as the direction and magnitude of the hydraulic gradient.
 - d. Isopleth maps for contaminants of concern which were observed during the investigations.
 - e. Summary tables of all ground water quality sampling results and copies of all laboratory analytical data sheets and associated QA/QC data taken within the past year. A quarterly groundwater-sampling schedule for OCD approval.

RE:

Stage II Abatement Plan Revision Proposal Junction I-9 Release Site Unit Letter I, Section 9 of T19S, R38E Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Mr. Price:

Enclosed please find the proof of notification for the Stage II Abatement Plan Revision Proposal for the Junction I-9 Release Site. Included in this package are the affidavits of publication from the two newspapers that were required: Albuquerque Journal and the Hobbs News Sun; copies of the certified mail return cards from the notification mailed to owners of record within one mile radius of the site; and copies of the certified mail return cards from the notification mailed to "those persons as identified by the Director, who have requested notification."

The public notice was published in these newspapers on May 28, 2002. It is understood that there is a 30-day waiting period for public comment, and that after 30 days, the Stage II Abatement Plan Revision Proposal will be reviewed for approval, approval with conditions, or for public hearing.

Rice Operating Company appreciates your consideration in this matter and as always, should you have any questions or concerns, please don't hesitate to call.

Sincerely, RICE OPERATING COMPANY

Carolyn Doran Haynes_

My Commission expires October 18, 2004 (Seal)

This newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Laws of 1937, and payment of fees for said publication has been made.

LEGAL NOTICE May 28, 2002 NOTICE OF PUBLICATION

State of New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage II Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87504, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Revision Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; backfill excavation with blended fill soil; isolation of contaminants with compacted clay layers; contour surface to prevent pooling of water, seed surface with native vegetation; PSH recovery from groundwater; quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive quarters and approval of the NMOCD; prepare a report summarizing field activities and

 laboratory results; report monitor well results annually until closure.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division ât' the address given above. The Stage II Abatement Plan-Revision Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage II Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

James P. Lyle, Esquire Judith M. Seff, Paralegal

May 24, 2002

Roger C. Anderson Environmental Bureau Chief New Mexico Oil Conservation Division 1220 S. St. Francis Dr. Santa Fe, NM 87504

> RE: Rice Operating Company Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4, SE 1/4, Section 09-Ts19-R38e Lea County, New Mexico

Dear Mr. Anderson:

This letter is in response to the Notice of Publication sent to my client, Mr. McNeill, regarding the changes proposed to the Abatement Plan which was previously ordered for this site. Late last year I notified your office over the phone that the surface owner, Mr. McNeill, was requesting a hearing on this proposed change. On January 25th of this year I confirmed this in writing to Mr. Anderson of your office. That letter also confirmed that the City of Hobbs wishes to participate in the hearing. The City has a legitimate interest in the proposed change due to its potential impact on the flood plane and the City's nearby drainage system.

Section 70-2-23 NMSA, requires a hearing on at least 10 days notice to any person having an interest in the subject matter of any proposed change to an order of the Division. We are once again requesting that we be provided with formal notice of the hearing date on this proposed change, and that such notice be provided as required by the Statute to all interested persons, including the City of Hobbs.

Very truly yours,

LAW OFFICES OF JAMES P. LYLE

James P. Lvle

Mr. Roger C. Anderson Environmental Bureau Chief New Mexico Oil Conservation Division 1220 South St. Francis Drive Santa Fe, New Mexico 87505

RE: Rice Operating Company's Revised Stage 2 Abatement Plan (AP-8)
Junction I-9 Release Site
NE 1/4 SE 1/4, Section 9, Township 19 S, Range 38 E
Hobbs Salt Water Disposal System
Lea County, New Mexico

Dear Mr. Anderson:

I am writing this letter in response to a Notice of Publication that I received from Rice Operating Company via certified mail on May 21, 2002. It is stated in the notice that I have 30 days from publication to respond in writing to the N.M.O.C.D. and submit written comments.

I would like to remind you that the City of Hobbs, New Mexico, my lawyer James Lyle, and I have requested that a hearing be held in regards to this matter so that concerns about the plan be documented and discussed. I have been told several time that such a hearing will be held at the proper time before approval of the Stage 2 Plan. It seems to me that the City of Hobbs representing a population of approximately 28,000 citizens represents adequate public response to call an immediate hearing. I am again requesting and demanding that the above-mentioned hearing be scheduled at the soonest possible date.

I have numerous concerns about the Stage 2 Plan and will try to touch on some of them.

- 1. The I-9 site is located in the middle of a flood plane for the City of Hobbs storm water, which make this spill a unique situation that requires a delicate solution. It is my opinion that mixing and blending contaminated soils and capping the site within a flood plane will not prevent future contamination of the Ogalala Aquifer.
- 2. The present spill site has not been vertically or horizontally identified. ROC does not have a clue the amount of contamination that needs to be addressed. The site was excavated down to the top of the aquifer approximately 2 years ago and as of today the aquifer is exposed to the elements and contamination from these actions is taking place as I write this letter.
- I am enclosing a copy of the notification I received and you will notice that chlorides are not mentioned one time. The leak in question was produced fluids from oil production and chlorides make up the majority of contaminates in the form of salt water. Chlorides must be addressed and expert testimony must be heard.
- 4. As landowner of the property impacted by the I-9 leak I am being rendered economically helpless due to the liability incurred by the contamination. Not one time has the O.C.D. contacted me to determine the impact of approving the Stage 2 Plan. A lending organization or a potential buyer of the McNeill Ranch will not take the risk to loan money or buy the property with such a contamination liability on the property. The N.M.O.C.D. has the sole responsibility of resolving all oil-related problems in the State of New Mexico. It is my opinion that the N.M.O.C.D. has a fiduciary duty not only to the oil companies but also to citizens, sportsmen, environmental groups, taxpayers, and property owners such as myself. Never has your division taken me as landowner into consideration. Time has come that this be rectified.

 It states in the notification that ROC will sample monitor wells, summarize laboratory results, and report monitor well results annually to the N.M.O.C.D. ROC's track record in Lea County is not the best and I request that a third party such as the N.M.O.C.D. undertake these responsibilities.

The above 5 points are only part of my concerns regarding the above matter. Again I request and demand a hearing to address my concerns in person and present expert testimony. If you have question please contact me at your convenience.

Respectfully,

William In : Neile

William F. McNeill

NOTICE OF PUBLICATION

State of New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage II Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87504, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Revision Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; backfill excavation with blended fill soil; isolation of contaminants with compacted clay layers; contour surface to prevent pooling of water; seed surface with native vegetation; PSH recovery from groundwater and treatment to promote natural biodegradation of hydrocarbons in the groundwater; quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive guarters and approval of the NMOCD; prepare a report summarizing field activities and laboratory results; report monitor well results annually until closure.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage II Abatement Plan Revision Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage II Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

RE: Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) has reviewed Rice Operating Company's (ROC) December 13, 2000 "SUBMITTAL OF Revised STAGE 2 ABATEMENT PLAN, Junction I-9 Release Site". In addition, OCD has reviewed the following subsequent submittals; March 30, 2001, May 15, 2001, August 21, 2001, the computer modeling information supplied during the technical meeting held in the OCD Santa Fe office on November 14, 2001, the December 13, 2001 and the March 08, 2002 document.

These documents contains ROC's Revised Stage 2 Abatement Plan Proposal for remediation of soil and ground water contamination related to the above captioned site. The OCD has determined that the above referenced Revised Stage 2 Abatement Plan Proposal is administratively complete. In order for OCD to continue the final review of the Stage 2 proposal, the OCD requires that:

- 1. ROC issue by May 29, 2002 the public notice submitted with the Revised Stage 2 proposal in the Albuquerque Journal and the Hobbs News-Sun pursuant to OCD Rule 19.G.
- 2. Prior to issuing the public notice, ROC shall issue written notice of the Stage 2 proposal pursuant to OCD Rule 19.G.(1). Please refer to the previously supplied 3.5" disk for a listing of "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d) and the contact for the New Mexico Trustee for Natural Resources.

Carolyn Doran Haynes May 09, 2002 Page 2

Please provide the OCD with proof of notice as soon as possible upon completing issuance of the written and public notice.

If you have any questions, please contact Wayne Price at (505) 476-3487 or E-mail WPRICE@state.nm.us.

Sincerely,

0

Roger C. Anderson Environmental Bureau Chief rca/wp xc: Chris Williams, OCD Hobbs District Supervisor Bill McNeill James P. Lyle-Attorney Gary Don Reagan-Hobbs City Attorney

Subject

Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico

Dear Mr. Price:

Rice Operating Company (ROC) and ARCADIS are in receipt of your letter dated February 6, 2002 requesting that additional information concerning the abovereferenced Stage 2 Abatement Plan be submitted to the New Mexico Oil Conservation Division (OCD) by March 15, 2002. In response to your requests:

Item 1. City Of Hobbs Stormwater Run-Off

ROC and ARCADIS are aware that the City Of Hobbs has an easement for stormwater run-off onto the subject site. ROC has contacted the city engineer to obtain details regarding the easement. While the easement location is described to be on the subject site, the actual runoff basin is located approximately onehalf mile to the west of the site. Additionally, the liner is designed to be constructed and graded in a manner that water will not collect at the liner location, and will instead run-off the liner. No modifications to the workplan are necessary.

Item 2. Public Notification

Written notification of submittal of the Stage 2 Abatement Plan Proposal and site activities will be sent to all surface owners of record within a one-mile radius of the site. The list of parties to be notified and the proposed notification are attached. Publication of notice of activities will be published in a state-wide circulated newspaper, the Albuquerque Journal, and two county newspapers, the Hobbs-Daily News Sun and the Lovington Leader.

Item 3. Delineation of Chlorides in Soil

During our meeting in Santa Fe on December 14, 2001, and in Item 8 of the December 13, 2001 proposal we proposed delineation of chlorides

ARCADIS

in soil to a concentration of 250 mg/kg, and in our meeting in Santa Fe on December 14, 2001 we indicated that any material outside of the liner system exceeding a chloride concentration of 250 mg/kg would be excavated and removed. To clarify, we are proposing a chloride concentration of 250 mg/kg for both delineation and for remediation of soils outside of the liner system.

Item 4. Liner System and Signs

The design of the liner system is similar to that used at landfills, and maintenance of the liner is not anticipated to be required. The buried liner system and signs will be routinely inspected by an ROC employee as part of routine field operations. ROC will ensure that the signs remain posted and that the liner remains buried and in-place by routine inspections. ROC did indicate that they would consider deed recordation of the site, however, it is not known if the current landowner will agree to deed recordation. Since ROC does not own or control the property, they cannot ensure that future property owners or users will be informed of the buried liner system in a manner other than the posted signs unless ROC is made aware of a change in use or ownership. If so informed, ROC will provide the new property owner or user with the details of the liner system (location, design and purpose).

If you have any questions, please call Carolyn Haynes of Rice Operating Company at (505) 393-9174 or me at (915) 699-1381.

Very truly yours,

ARCADIS G&M, Inc.

NOTICE OF PUBLICATION

State of New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage II Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87504, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Revision Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; backfill excavation with blended fill soil; isolation of contaminants with compacted clay layers; contour surface to prevent pooling of water; seed surface with native vegetation; PSH recovery from groundwater and treatment to promote natural biodegradation of hydrocarbons in the groundwater; quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive quarters and approval of the NMOCD; prepare a report summarizing field activities and laboratory results; report monitor well results annually until closure.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage II Abatement Plan Revision Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage II Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

NEW IEXICO ENERGY, MINERALS and NATURAL RESOURCES DEPARTMENT

GARY E. JOHNSON Governor Carol Leach Acting Cabinet Secretary

February 06, 2002

Lori Wrotenbery Director Oil Conservation Division

<u>CERTIFIED MAIL</u> <u>RETURN RECEIPT NO. 5357 7232</u>

Carolyn Doran Haynes Operations Engineer Rice Operating Company 122 West Taylor Hobbs, New Mexico 88240

RE: Revised Stage 2 Abatement Plan Additional Informational Request Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) is in receipt of Arcadis Geraghty & Miller's Stage 2 Abatement Plan proposal modification dated December 13, 2001 submitted on behalf of Rice Operating Company (ROC). In order for OCD to continue its evaluation please provide the following information.

- 1. The City of Hobbs has notified OCD (copy of letter enclosed) they have "an easement for storm water runoff unto the rice I-9 site". If significant amounts of stormwater from the city of Hobbs runs onto the site then ROC shall modify the plan to reflect any changes this may have on the proposed plan. Please investigate this issue and provide OCD the results of your investigation.
- 2. A public notification proposal pursuant to OCD rule 19.E.4.b.vii.
- 3. Item 8. of the December 13, 2001 proposal response last sentence reads "We propose delineation of chlorides in soil to a concentration of 250 mg/kg". During the technical meeting in Santa Fe on December 14, 2001 Rice indicated that any material contaminated above 250 mg/kg of chlorides outside of the liner system would be excavated and removed. OCD would like a statement to that fact, since the word "delineation" does not implicitly imply a clean-up level.

Dear Ms. Haynes: February 06, 2002 Page 2

4. ROC shall demonstrate the anticipated life of the liner system and posted signs. ROC shall provide a plan demonstrating maintenance of these systems for the foreseeable future and how future property owners or users will be made aware of the buried system. OCD understood that ROC was going to deed record this event, is this still the case?

Please provide the above information by March 15, 2002.

OCD has enclosed copies of recent letters requesting a hearing on this matter. If you have any questions please do not hesitate to contact me at 505-476-3487 or E-mail WPRICE@state.nm.us.

Sincerely,

Wayne Price- Engineer

Re: Rice Engineering Contamination Site in Section 9, T19S, R38E

Dear Wayne:

The City of Hobbs hereby gives formal notice of its request that your Division schedule a hearing relating to the application of Rice Engineering for remedial work concerning the contamination at the I-9 Junction in Section 9, Township 19 South, Range 38 East, Lea County, New Mexico (McNeill Ranch).

The City of Hobbs has an easement for storm water runoff unto the above-described property. We have been advised that litigation has already determined that there is, in fact, contamination at the site and that Rice Engineering was responsible for the contamination.

At your earliest convenience please advise the City of the date, time, and place of your hearing.

If the City needs to file any other documents, other than this letter, with your office in order to be advised of and to be heard at the hearing, please advise.

Thank you very much,

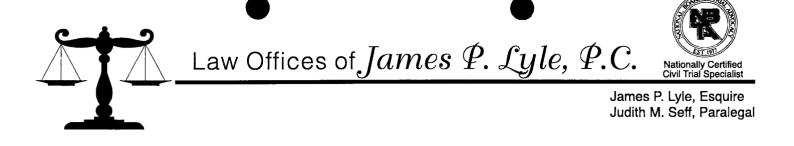

THE CITY OF HOBBS, NEW MEXICO

Gary Don Reagan City Attorney

> RE: Junction I-9 Release Site NE 1/4, SE 1/4, Section 09-Ts19-R38e

Dear Mr. Price:

Please accept this letter as a formal reminder that the McNeill Ranch has requested a hearing on the Rice proposal to modify and change the previously approved abatement plan at this site. My understanding is that the City of Hobbs also wishes to be notified of the hearing date.

Please also note my change of address shown below.

Very truly yours,

LAW OFFICES OF JAMES P. LYLE

Junction I-9 Revised Stage 2 Abatement Plan Request from NMOCD

Rice Operating Company Hobbs, New Mexico

13 December 2001

Wayne Price New Mexico Oil Conservation Division Environmental Bureau 1220 South Saint Francis Drive Santa Fe, New Mexico 87505

Subject: Junction I-9 Revised Stage 2 Abatement Plan Request from NMOCD

ARCADIS Project No.: MT000643.0001

Dear Mr. Price:

Thank you for meeting with Carolyn Haynes, Scott Potter and me to discuss the Junction I-9 site Stage 2 Abatement Plan Proposal. We appreciate the opportunity to answer your questions as requested in your October 4, 2001 e-mail regarding the leaching model and evaluation used for chlorides and metals. As we discussed in the meeting, on behalf of Rice Operating Company, we are providing you with this letter addressesing those requests and items discussed in our November 14, 2001 meeting. OCD requests per your October 4, 2001 e-mail and as discussed in our November 14, 2001 meeting are shown in bold type.

1. Provide OCD a copy of the model program with instructions including all input parameters and reasons why they were selected.

The model (leaching calculations) and evaluations were presented in our November 14, 2001 meeting. You were also provided with the United States Environmental Protection Agency (USEPA) guidance documents to support the use of the calculations and selected input parameters. A compact disc containing the calculations used is enclosed with this letter, and the calculations and evaluation are shown in Attachment B. Attachment B is a revision of Appendix B as submitted in the *Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site* on August 21, 2001.

2. Provide OCD detailed calculations for all the Equilibrium equation results. Provide references where all equations were obtained.

Equilibrium equation calculations and results were provided to you in our November 14, 2001 meeting. You were also provided with the United States Environmental

ARCADIS G&M, Inc. 1030 Andrews Hwy. Suite 120 Midland Texas 79701 Tel 915-699-1381 Fax 915-699-1978

ENVIRONMENTAL

December 13, 2001

Contact: Sharon E. Hall

Extension: 916 699-1381

Mr. Wayne Price December 13, 2001

Protection Agency (USEPA) guidance documents to support the use of the calculations and selected input parameters.

3. The term backfill should be properly defined. Page 3 of the document indicates that backfill is blended soil consisting of previously excavated soils and replacement soils. This is confusing because there were equilibrium results for backfill soils. Is this number for excavated soils, replacement soils or backfill?

Backfill to be placed in the excavation between the two liners will consist of a mixture of excavated soil and replacement soil obtained from off-site blended together. The equilibrium results were based on analysis and evaluation of the replacement soils to be obtained from off-site. As we discussed in our meeting, we have evaluated the chloride concentrations of excavated blended soils that can be placed back into the excavation or that can be left in-place between the liners and have determined that a chloride concentration of 1,099 milligrams per kilogram (mg/kg) or less will not result in an increase of chlorides in groundwater exceeding the NMWQCC standard of 250 milligrams per kilogram. No soil with chloride concentrations in excess of 1,099 mg/kg will be placed back into the excavation.

4. Provide a more detailed description on how the upper liner will be constructed, size, etc and the liner marker posts.

The upper liner will be placed across the entire excavation beneath approximately 3 feet of native topsoil. The upper liner (and the lower liner) will consist of a 12 to 15-inch compacted clay layer installed according to NMOCD clay layer specifications (meet or exceed 95% of a Proctor Test ASTM-D-698 and permeability equal to or less than 1 X 10^{-7} cm/sec). A schematic liner construction cross-section was submitted to OCD as Figure 2 in the Stage 2 Abatement Plan Additional Information Request letter dated March 30, 2001. Each corner of the liner will be posted and marked with a sign reading "Buried Liner".

5. Page 4 indicated sample locations, figures and tables were in Appendix B. OCD's copy did not have these in Appendix B.

As we discussed, the sample locations, figures and tables are included in the text and tabbed sections of the report, not in Appendix B.

6. Tables did not have any units referenced. The analytical results had reporting limits. Please have the lab verify if these are arbitrary reporting limits or detection or PQL's.

Mr. Wayne Price December 13, 2001

The units missing from Table 1 are in milligrams per kilogram. The reporting limits in the analytical reports are detection limits.

7. Last page of Appendix B gives dissolved portions of Chloride in pore water ranging from 883 mg/l to 2782 mg/l. OCD saw where the 883 number came from, but where did the 2782 mg/l came from?

The numbers from the report have been revised and were presented in the meeting. The revised numbers show that the dissolved portions of chloride in pore water range from 1316 to 4502 mg/L. The 1316 mg/L number is the equilibrium pore water concentration of the average backfill laboratory measured concentrations and the 4502 mg/L number is the equilibrium pore water concentration of the average sidewall and bottom laboratory measured soil concentrations.

8. The document gives the maximum acceptable chloride concentration level in soils as 2920 mg/kg. OCD requires a detail explanation on how this number was developed. Also the document implies this would be used for stopping delineation. OCD will require justification. This number appears to have been developed for soils that can be placed back into the hole with a protective cover. What about areas outside of the protective cover what number will be used there?

The maximum concentration of chlorides in soil to be placed back or left in-place in the excavation has been re-evaluated and revised to 1,099 mg/kg as discussed in our meeting and calculated in the enclosed model. The derivation of this number is provided in Attachment A. This number was developed for soils that could be placed back into the excavation or left in-place between the clay liners. We propose delineation of chlorides in soil to a concentration of 250 mg/kg.

If you have any questions or need additional information please call Carolyn Haynes at (505) 393-9174 or me at (915) 699-3181.

Very Truly Yours,

ARCADIS G&M, Inc. Sharn E. Norf Sharon Hall Project Manager

 $C_{s} = C_{w} \cdot \left(K_{d} \cdot \frac{\sigma_{v}}{\rho_{b}} \right)$

Attachment A

1. Determination of the maximum pore water concentration that would cause the groundwater chloride concentration to exceed 250 mg/L:

$$C_{x} = \frac{Q_{gw} \cdot C_{gw} + Q_{F} \cdot C_{w}}{Q_{T}}$$

$$(6)$$

$$flool flool ft^{3} / day \cdot 163mg / L + 55.5 ft^{3} / day \cdot C_{w}$$

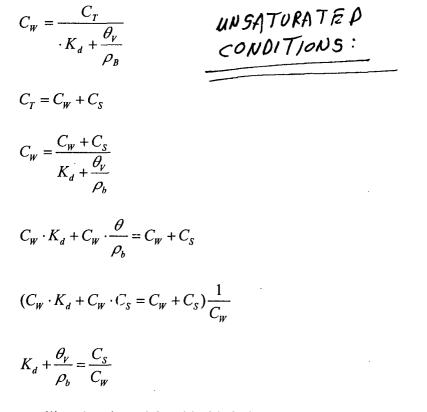

$$(6)$$

$$flool ft^{3} / day \cdot C_{w}$$

(5)

 $C_w = 26408 mg / L$

2. Determination of the equilibrium soil concentration from the pore water concentration:

recalling that the Kd for chloride is 0:

$$C_{s} = C_{w} \left(\frac{\theta_{v}}{\rho_{b}} \right)$$

Attachment B

Model Input and Evaluation

Sampling and analysis of soils was performed in order to provide technical data to determine the final levels of Resource Conservation and Recovery act (RCRA) metals and chlorides that can be placed into the excavation, and to provide delineation information. Three background samples, three samples from proposed backfill materials, and the four sidewall and one bottom samples were collected from the excavation. The sidewall and bottom samples were collected from locations that were most visibly impacted by hydrocarbons. Sample locations are shown in Appendix B, Figure 2. Each of the samples were analyzed for arsenic, barium, cadmium, total chromium, chromium (III), chromium (VI), lead, nickel, selenium, mercury, chloride, and soil pH.

The results of the soil analyses are summarized in Table 1 and laboratory reports are included in Appendix B. Based on analytical results, barium, chromium (III), and chloride were detected at levels above background concentrations. These constituents are the focus of the remaining discussion to evaluate the potential for leaching and impacting groundwater.

The laboratory sample method uses acid to extract the metals in sediment. The "acid digest" method assumes that all of the metals are extracted from the solid phase and does not account for the fraction of the metals that are dissolved in the liquid phase of soil moisture when the sample was collected in the field. Therefore, the laboratory analysis overestimates the actual solid phase concentration. The important implication of this observation will occur after the soil is placed at the site. Soil moisture levels will gradually increase to field capacity if there is any groundwater recharge at the site (a necessary assumption for there to exist the potential for constituents to leach). As the soil moisture increases, the total mass quantified in the soil samples will reach a new equilibrium between the dissolved and adsorbed phases. This redistribution of constituents in the replacement soils was evaluated for each constituent exceeding background levels.

SOIL PARTITIONING CALCULATIONS

The total mass of a particular metal is distributed between two phases in soil, one fraction in the soil moisture and the other fraction adsorbed to the solid phase. The distribution of the concentration of the metal in the two phases is described by the distribution coefficient (K_d). The distribution coefficient is defined as follows:

$$K_d = \frac{C_s}{C_w} \tag{1}$$

where:

 C_s = the fraction of the metal sorbed to the soil phase (mg/g) and

 C_w = the fraction of the metal in the dissolved phase (mg/ml).

Equation 1 assumes a linear relationship between the processes of sorption and desorption.

The total mass in the adsorbed phase is computed by multiplying the soil concentration (C_s) by the bulk density of the soil (ρ_b ; g/cm³). The total mass in the dissolved phase in unsaturated conditions is determined by multiplying the pore water concentration (C_w) by the volumetric water content at field capacity of the soil (θ_{V_i} %). Therefore, the total mass in both phases is determined by the following equation:

$$M_T = C_s \cdot \rho_B + C_w \cdot \theta_v \tag{2}$$

where: $M_T = is$ the total mass of the sample (mg/cm³).

The total mass of the sample is expressed as a function of the laboratory concentration using the following equation:

Dividing equation (2) by ρ_b and substituting equation (1) and (3) yields equation (4):

$$C_T = C_W \left[K_d + \frac{\theta_V}{\rho_B} \right] \tag{4}$$

Or, in a more useful form, the potential concentration as a function of the laboratory measured concentration:

$$C_{W} = \frac{C_{T}}{K_{d} + \frac{\theta_{V}}{\rho_{B}}}$$
(5)

The soil concentration can be computed from the concentration of a constituent in pore water known the soil concentration can be computed by substituting $C_W + C_S$ for C_T in equation (5), rearranging, and recalling that the K_d for chloride is 0:

$$C_{s} = C_{w} \cdot \left(K_{d} \cdot \frac{\theta_{v}}{\rho_{l}} \right)$$
(6)

Soils are heterogeneous with respect to the distribution of inorganic constituents. Therefore, the soil data were averaged to determine concentration values more representative of site conditions. Table 2 compares the soil and pore water equilibrium concentrations of background samples to the average concentration of the backfill samples. Table 3 compares the equilibrium concentrations of background samples to the average concentration from the sidewall and bottom samples. These tables show that chloride exceeds background soil concentrations and pore water concentrations, and barium exceeds pore water concentrations.

PERCOLATION ESTIMATE

The Hydrologic Evaluation of Landfill Performance (HELP) model (Schroder et al., 1995A, 1995B) was used to calculate the water flux though the backfilled portion of the site in order to evaluate the potential effects of chloride on the groundwater system. The HELP model design for the site consisted of three layers: a soil cover, a compacted clay layer, and the blended backfill soils. The compacted clay liner was assumed to have a permeability no greater than 1×10^{-8} cm/sec. The entire excavation area was assumed have the potential to generate runoff. The final grade of the soil surface was assumed to be 4 percent, consistent with site landfill closure plan and NM LCRS. The HELP model predicted a flux rate of 0.015 in/yr through the backfill. It should be noted that this value is a conservative over-estimate of the true recharge value. The HELP model was developed to ensure that engineering components were adequately designed and to evaluate the merits of engineered alternatives, and as such, consistently over-predicts percolation through cover elements. Due to the presence of significant caliche in undisturbed soils adjacent to the site, it is unlikely that measurable recharge occurs at the site or that there is a significant potential for constituents to be leached from placement soils.

GROUNDWATER DILUTION FACTOR

The potential impact of the constituents on the groundwater system was determined by mixing the potential flux through the replacement soils with ambient groundwater. The change in concentration in the local groundwater system directly beneath the site was determined using a mixing model:

$$C_X = \frac{Q_{GW} \cdot C_{GW} + Q_F \cdot C_W}{Q_T} \tag{7}$$

where;

 C_x = the mixed groundwater concentration,

 Q_{GW} = flux of groundwater through the mixing zone (ft³/yr),

 C_{GW} = ambient concentration in groundwater (mg/L),

 Q_F = water flux through the landfill area (ft³/yr),

 Q_T = total groundwater flux = $Q_{GW} + Q_F$ (ft³/yr), and

 C_W = constituent concentration in the pore water of the backfill soils

(mg/L).

The groundwater flux through the mixing zone was computed from Darcy's Law:

$$Q_{GW} = K \cdot i \cdot A \tag{8}$$

where:

K = is the hydraulic conductivity (ft/yr),

i = the hydraulic gradient (ft/ft), and

A = is the cross-sectional area of the aquifer within the mixing zone perpendicular to groundwater flow.

Groundwater beneath the site is approximately 30 feet below land surface. There is no site-specific data on the hydraulic conductivity for the limestone; however, there is published hydraulic conductivity data for this geologic formation of 2.0 ft/day. The hydraulic gradient was computed from observed water levels to be 0.00917 ft/ft. The cross-sectional area of the aquifer within the mixing zone was computed to be 2500 ft²; the width of the placement area was approximately 250 feet and the mixing thickness was estimated to be ten feet (screen length). The flux of groundwater through this zone beneath the site is computed to be 16,735 ft³/yr (0.24 gpm). The flow of water through the backfill was computed from the HELP model results to be 55.5 ft³/yr. Inputting the water balance data into Equation 7, the dilution factor from pore water to groundwater is computed to be 0.0033 [55.5/(55.5+16,735)].

POTENTIAL GROUNDWATER IMPACTS

Review of Tables 2 and 3 indicate that three constituents (barium, chromium(III), and chloride) are of potential concern because they were detected either in replacement soils or in sidewall soils at levels equal to or exceeding background data. The data were evaluated first by computing future equilibrium pore water concentrations and comparing the values to New Mexico action levels. This comparison is very conservative as it does not account for dilution that will occur after pore water mixes with groundwater. This comparison showed that barium and chromium(III) in both soil and pore water are the same as background levels. Of these constituents, chromium(III) is less than New Mexico action levels, and barium is slightly above. This concentration exceedence for barium is not associated with remedial activities, but is because barium is naturally abundant in the soils surrounding the site. This observation is supported by the groundwater data (average levels are 1.47 mg/L consistent with background pore water concentrations of 1.48 mg/L) and by the physical properties of barium in soils. The physical properties of barium cause it to be strongly adsorbed to soil (K_d is equal to 42), which limits its mobility in both soil water and groundwater; barium will move 900 times slower than water in soils and 150 times slower in groundwater. Therefore, the barium that has been detected in groundwater is not correlated to a recent release but is the result of long-term leaching from natural soils.

Chloride has been detected in both the replacement soils, and the sidewall soils and bottom soils at levels above background soils. Chloride is highly soluble and can be expected to dissolve in pore water after the soils have been replaced. Dissolved concentrations in the pore water may range from 1316 to 4502 mg/L. The dissolved concentration increase at these levels was determined using the groundwater dilution factor computed above to be 4.34 to 14.86 mg/L. This is a small incremental change in concentration relative to the New Mexico action levels.

ACCEPTABLE MAXIMUM SOIL CONCENTRATION LEVELS

The maximum site-specific soil concentrations were also computed. These values were computed from the difference between average groundwater concentrations and the New Mexico action levels. They also reflect the size of the site, the anticipated percolation rate and the ambient groundwater flow conditions. These results are summarized in Table 4. Barium indicates that soils should have concentrations consistent with background levels to ensure no further concentration increases. Chromium (III) is a very stable compound at pH levels above 7.0 (with increasing stability at increasing pHs) and will not partition into pore water at significant concentrations if the soil were 100% Cr. Given the higher than neutral pHs of the soils samples and the buffering capacity of the underlying limestone, the chromium will not leach from the soil under anticipated site conditions. The maximum acceptable chloride level in soils is 1,128 mg/L as shown in Table 4.

Price, Wayne

From: Sent: To: Subject: Hall, Sharon E. [SHall@arcadis-us.com] Thursday, November 15, 2001 9:31 AM Price, Wayne Junction I-9 Stage 2 Revision

Wayne, Thank you for meeting with Carolyn Haynes, Scott Potter and myself to discuss the Junction I-9 site Stage 2 Abatement Plan Proposal. We appreciate the opportunity to answer your questions as requested in your October 4, 2001 e-mail regarding the leaching evaluation used for chlorides and metals. As we discussed in the meeting, we will provide you with a letter that addresses your requests as outlined in your October 4 e-mail and your requests discussed in our meeting yesterday by December 14, 2001. Additional information we will provide to you by December 14 are:

 Response to your eight October 4, 2001 e-mail requests,
 Provide you with a CD that contains the evaluation and calculations for chloride concentrations that can be placed back into the excavation between the upper and lower liners
 Provide you with a CD that contains evaluation and calculations for concentration of chlorides in soil to be used delineation

If you have any questions or need additional information at this time please call me at (915) 699-1381. Regards, Sharon Hall

CC: BILL Me Neil

Contacts: Carolyn Doran Haynes

Attention: Carolyn Haynes:

The OCD is in receipt of the captioned document. In order for OCD to properly evaluate this proposal the following will be required:

1. Provide OCD a copy of the model program with instructions including all input parameters and reasons why they were selected.

2. Provide OCD detail calculations for all the Equilibrium equation results. Provide references where all equations were obtained.

3. The term backfill should be properly defined. Page 3 of the document indicates that backfill is blended soil consisting of previously excavated soils and replacement soils. This is confusing because there were equilibrium results for backfill soils. Is this numbers for excavated soils, replacement soils or backfill?

4. Provide a more detail description on how the upper liner will be constructed, size, etc and the liner marker posts.

5. Page 4 indicated sample locations, figures and tables were in Appendix B. OCD's copy did not have these in Appendix B.

6. Tables did not have any units referenced. The analyticals had reporting limits. Please have the lab verify if these are arbitrary reporting limits or detection or PQL's.

7. Last page of Appendix B gives dissolves portions of Chloride in pore water ranging from 883 mg/l to 2782 mg/l. OCD saw where the 883 number came from, but where did the 2782 mg/l came from?

8. The document gives the maximum acceptable chloride concentration level in soils as 2920 mg/l. OCD requires a detail explanation on how this number was developed. Also the document implies this would be used for stopping delineation. OCD will require justification. This number appears to have been developed for soils that can be placed back into the hole with a protective cover. What about areas outside of the protective cover what number will be used there?

OCD recommends that Rice Operating coordinate a technical meeting in OCD Santa Fe office within the next 30 days to discuss these issues.

Subject:

Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico

RECEIVED

Alic 2 4 2001 Environmental Bureau

Oil Conservation Division

Dear Mr. Price:

Rice Operating Company (ROC) and ARCADIS G&M (ARCADIS) are in receipt of your letter dated July 12, 2001 requesting that additional information concerning the above-referenced Stage 2 Abatement Plan be submitted to the New Mexico Oil Conservation Division (OCD) by August 15, 2001. We appreciate your approval to extend the submittal date for the requested information to August 22, 2001. Attached you will find the requested final Stage 2 Abatement Plan proposal, results of sampling and analysis findings and leaching model information. Sampling and analysis results and leaching model information are included in Appendix B of the revised Stage 2 Abatement Plan proposal. In response to your requests:

Item 1. Public Notice

ROC and ARCADIS understand that the OCD defers comment on public notice until additional information is submitted.

Item 2. Provide the design and completion of wells.

ROC and ARCADIS acknowledge OCD's approval of the design and completion of the wells as proposed.

Item 3. OCD defers approval of how the liners will be protected in the future and recommends that ROC propose additional methods.

Access to the site is limited to the current landowner and ROC. ROC will provide the landowner with global positioning system (GPS) Midland, Texas, 21 August 2001

Contact: Sharon E. Hall

Extension: 915 699-1381

ARCADIS GERAGHTY& MILLER

coordinates and will request that the landowner deed record the location in the event that the land is sold in the future. Fence posts with engraved markers that read "Buried Liner" will be placed at the corners of the liner.

Item 4. Complete

Item 5. & 6.

As approved by OCD, interim sampling and analysis was performed in order to provide technical data to assist ROC in determining the final levels of Resource Conservation Recovery Act RCRA metals and chlorides that may be placed in the excavation and provide delineation information. Sampling, analysis, and leaching model evaluation are included in Appendix B of the attached revised Stage 2 Abatement Plan proposal.

Item 7. Proposed MW-7 Location

As requested, ROC proposes to locate the upgradient monitor well MW-7 location 300 feet upgradient from the location as proposed in the March 30, 2001 proposal. The revised well location is shown in Figure 1 of the attached revised Stage 2 Abatement Plan proposal.

If you have any questions, please call Carolyn Haynes of Rice Operating Company at (505) 393-9174 or me at (915) 699-1381.

Very truly yours,

Dear Sharon:

Due to the amount of time this project has taken and the fact that OCD has been very liberal with previous extensions, I do not feel that an extension is in order at this time. I want to see this project keep moving in a timely fashion.

Thank You.

~~~~~~~~

#### Subject:

Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico

MAY I A 2001

#### Dear Mr. Price:

Rice Operating Company (ROC) and ARCADIS G&M (ARCADIS) are in receipt of your letter dated April 16, 2001, requesting that additional information concerning the above-referenced Stage 2 Abatement Plan be submitted to the New Mexico Oil Conservation Division (OCD) by May 18, 2001. In response to your requests:

1. Public Notice

ROC and ARCADIS understand that the OCD defers comment on public notice until additional information is submitted.

2. Provide the design and completion of wells.

The monitor wells will be constructed using 2-inch inside-diameter Schedule 40 PVC casing. The recovery well will be constructed of 4-inch insidediameter Schedule 40 PVC casing. The wells will be constructed with fifteen feet of slotted PVC casing, 10 feet below top of groundwater and five feet above top of groundwater. The wells will be sand-packed with a five-foot bentonite plug placed immediately above the sand pack. The wells will be grouted above the bentonite plug with cement containing 3-5% bentonite and completed with a flush mounted cover. An example of the well completion is shown on the attached Well Completion Diagram.

3. Provide a plan for OCD approval describing how the liners will be protected in the future.

ARCADIS G&M Inc. 1030 Andrews Hwy. Suite 120 Midland Texas 79701 Tel 915-699-1381 Fax 915-699-1978

ENVIRONMENTAL

Midland, Texas, 15 May 2001

Contact: Sharon E. Hall

Extension: 915 699-1381

## **ARCADIS** GERAGHTY&MILLER

Access to the site is limited to the current landowner and ROC. ROC will provide the landowner with global positioning system (GPS) coordinates and will request that the landowner deed record the location in the event that the land is sold in the future.

- 4. Complete
- 5. Provide information pertaining to levels of metals and geochemistry compounds to be placed back in the excavation.

A leaching model will be performed in order to determine levels of metals and geochemistry compounds to be placed back in the excavation. Three background samples and three samples from the backfill soils to be used at the site will be collected and submitted for analysis for Resource Conservation and Recovery Act (RCRA) metals (arsenic, barium, cadmium, chromium, lead, mercury, nickel and selenium) and chlorides. One soil sample will be collected from each of the four sides of the excavation at a location that is the most visibly impacted. One soil sample will be collected from the floor of the excavation at a location that is the most visibly impacted. Any compound that is detected at a concentration exceeding background or backfill concentrations will be evaluated using a leaching model to determine the concentration of the compound to be placed back in the excavation. The soils will be sampled within one week (7 days) of OCD approval of this proposed evaluation and the results of the leaching model will be submitted to the OCD within 45 days of OCD approval of this proposed evaluation.

6. Provide delineation levels for metals and general chemistry.

A leaching model will be performed in order to determine the delineation levels for metals and geochemistry compounds. Three background samples and three samples from the backfill soils to be used at the site will be collected and will be submitted for analysis for RCRA metals (arsenic, barium, cadmium, chromium, lead, mercury, nickel and selenium) and chlorides. One soil sample will be collected from each of the four sides of the excavation at a location that is the most visibly impacted. One soil sample will be collected from the floor of the excavation at a location that is the most visibly impacted. Any compound that is detected at a concentration exceeding background or backfill concentrations will be evaluated using a leaching model to determine the concentration of the compound to be placed back in the excavation. The soils will be sampled within one week (7 days) of OCD approval of this proposed evaluation and the results of the leaching

## ARCADIS GERAGHTY& MILLER

model will be submitted to the OCD within 45 days of OCD approval of this proposed evaluation.

7. Complete

If you have any questions, please call Carolyn Haynes of Rice Operating Company at (505) 393-9174 or me at (915) 699-1381.

RE: Revised Stage 2 Abatement Plan (AP-8) Additional Information Request Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) is in receipt of Rice Operating Company's (ROC) Revised Stage 2 Abatement Plan Proposal Additional Information Request, Junction I-9 Release Site dated March 30, 2001. The OCD considers this revised proposal to be a significant modification because there were considerable deviations from the originally approved plan. The submitted plan is deficient and in order for OCD to continue its evaluation process please provide the following information by May 18, 2001.

Item 1. OCD defers comment on public notice until additional information is submitted.

Item 2. Please provide the design and completion of wells.

Item 3. Please provide a plan for OCD approval describing how the liners will be protected in the future.

Item 4. Complete.

Item 5. Please provide the information requested.

Item 6. Please provide the information requested.

Item 7. Complete.

#### Subject:

Revised Stage 2 Abatement Plan Additional Information Request, Junction I-9 Site; Hobbs, New Mexico

#### Dear Mr. Price:

Rice Operating Company and ARCADIS Geraghty and Miller (ARCADIS) are in receipt of your letter dated March 2, 2001, requesting that additional information concerning the above-referenced Stage 2 Abatement Plan be submitted to the New Mexico Oil Conservation Division (OCD) by April 2, 2001. On behalf of Rice Operating Company, ARCADIS would like to request clarification of your request and would like to respond to your request. We would like clarification as to why the OCD considers the Revised Stage 2 Abatement Plan proposal to be what you describe as a significant modification of the previously approved Stage 2 Abatement Plan. The installation of an additional liner enhances the protection of human health and the environment. In response to your requests:

1. Provide copy of public notice.

A copy of the public notice is included in Appendix A for pre-approval by the OCD. Public notice will be sent to the parties who received original public notice and all parties designated by OCD.

2. Provide plot plan map with well locations.

Figure 1 is a site plan that depicts the locations of the existing recovery well (RW-1) and monitor wells (MW-1, MW-2, MW-3 and MW-4.) Proposed monitor well locations are also shown (MW-5, MW-6 and MW-7). If any wells are removed as a result of excavation activities, they will be replaced in the original location as shown on Figure 1. Additional monitor wells and replacement wells will be drilled and installed following backfilling and capping of the excavation. The monitor wells will be constructed using 2-

ARCADIS Geraghty & Miller, Inc. 1030 Andrews Hwy. Suite 120 Midland Texas 79701 Tel 915-699-1381 Fax 915-699-1978

inch inside-diameter Schedule 40 PVC casing. The recovery well will be constructed of 4-inch inside-diameter Schedule 40 PVC casing. The wells will be constructed with fifteen feet of slotted PVC casing, 10 feet below top of groundwater and five feet above top of groundwater. The wells will be sand-packed with a five-foot bentonite plug placed immediately above the sand pack. The wells will be grouted above the bentonite plug with cement containing 3-5% bentonite and completed with a flush mounted cover.

3. Provide cross section view showing liner locations.

Figure 2 is a schematic cross section showing the location of the liners proposed at this site. One liner will be placed at the base of the excavation in any areas where the groundwater has been encountered by excavation activities. A second liner will be placed approximately three feet below ground surface across the entire excavated area. Each liner will consist of a 12-15-inch compacted clay layer installed according to NMOCD clay layer specifications (meet or exceed 95% of a Proctor Test ASTM-D-698 and permeability equal to or less than 1 x 10<sup>-7</sup> cm/sec).

4. Provide information pertaining to oxygen release socks.

Information pertaining to the proposed oxygen release socks is included in Appendix B.

5. Provide information pertaining to levels of metals and geochemistry compounds to be placed back in the excavation.

The plan does not provide information pertaining to what levels of metals and general chemistry compounds will be placed back in the hole because the double liner is designed to prevent leaching of these compounds to groundwater, and therefore they have not been addressed. It is expected that if elevated concentrations of these compounds were present, they would be found in hydrocarbon-impacted soils. Hydrocarbon-impacted soils with concentrations in excess of OCD total petroleum hydrocarbon (TPH), benzene and benzene, toluene, ethylbenzene and xylenes (BTEX) guidelines will be removed and blended to OCD guideline concentrations. Additionally, sampling and analysis of groundwater from the existing and proposed monitor wells will provide sufficient data to identify if these compounds are leaching to groundwater and impacting groundwater above New Mexico Water Quality Control Commission standards.

Wayne Price March 30, 2001

## **ARCADIS** GERAGHTY& MILLER

6. Provide delineation levels for metals and general chemistry.

Hydrocarbon impacted soils with concentrations in excess of OCD total petroleum hydrocarbon (TPH), benzene and benzene, toluene, ethylbenzene and xylenes (BTEX) guidelines will be removed and blended to OCD guideline concentrations. Following completion of the excavation, soil samples will be obtained from the bottom and sidewalls of the excavation and will be analyzed for metals and general chemistry. Additionally, sampling and analysis of groundwater from the existing and proposed monitor wells will provide sufficient data to identify if these compounds are leaching to groundwater and impacting groundwater above New Mexico Water Quality Control Commission standards.

7. Propose another location for the up-gradient monitor well outside of the disturbed area.

The location for the up-gradient monitor well outside of the disturbed area is shown as MW-7 in Figure 1.

If you have any questions, please call Carolyn Haynes of Rice Operating Company at (505) 393-9174 or me at (915) 699-1381.

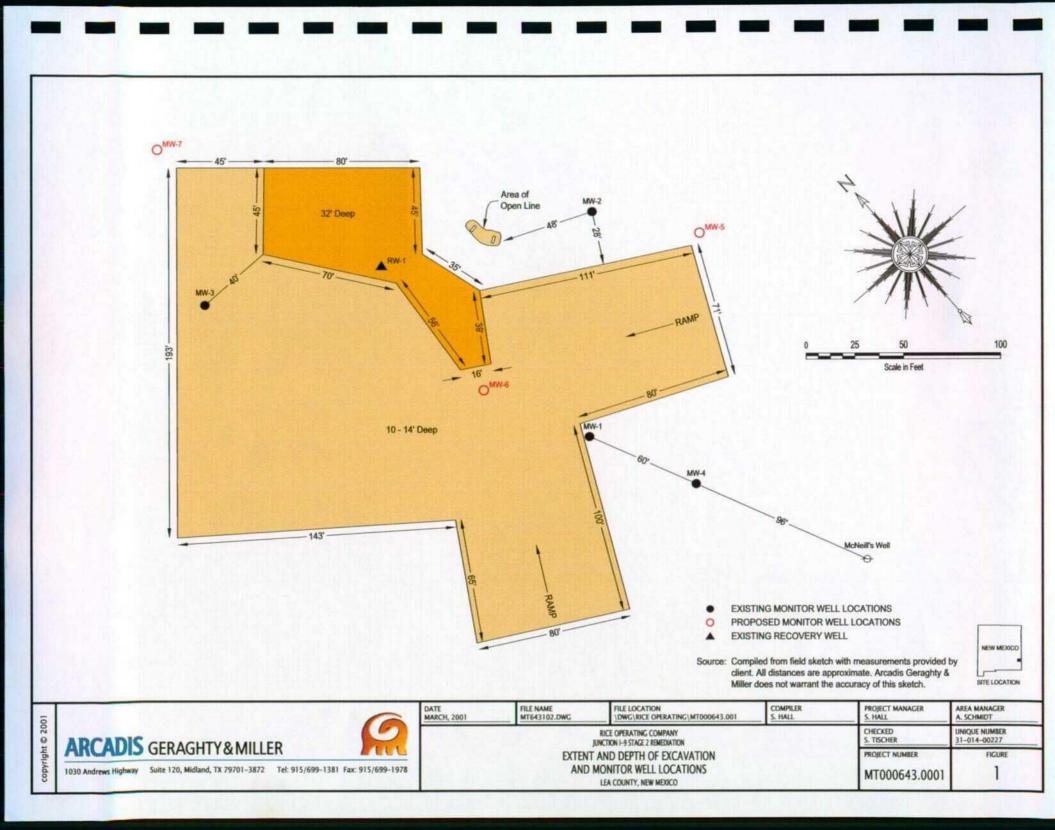

Very truly yours,

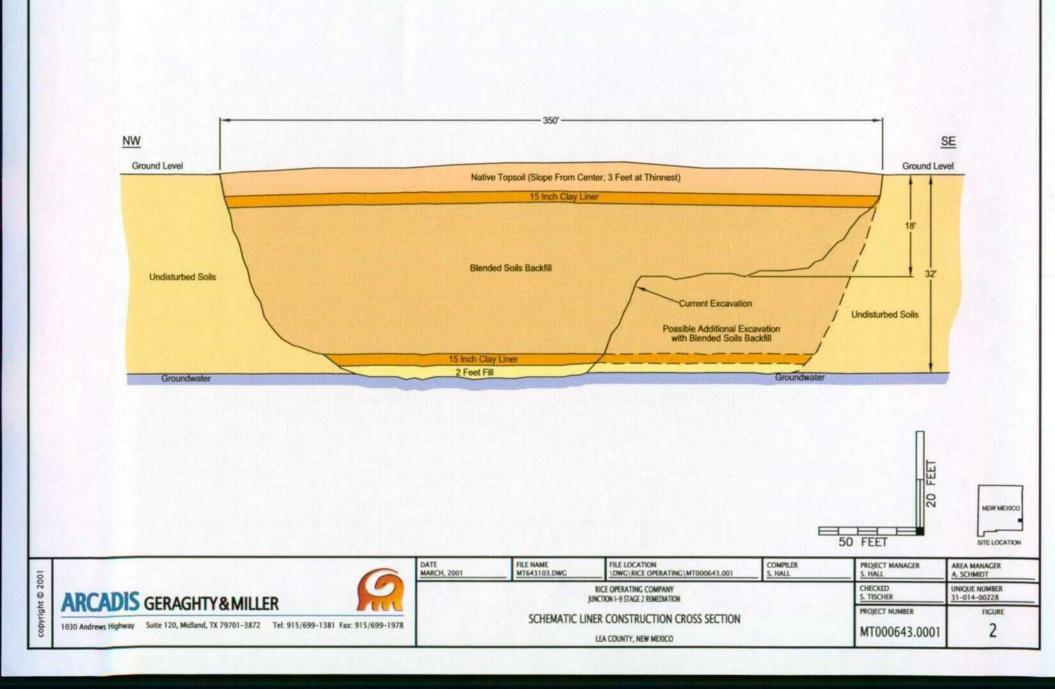

ARCADIS Geraghty & Miller, Inc.

DRAFT FOR REVIEW

## NOTICE OF PUBLICATION

## State of New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage II Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1220 S. St. Francis Dr., Santa Fe, New Mexico 87504, Telephone (505) 476-3440:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Revision Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; install clay layer at groundwater interface; backfill excavation with blended fill soil to within 3 feet of surface; backfill remaining with clean topsoil; seed surface with native vegetation; PSH recovery from groundwater and treatment to promote natural biodegradation of hydrocarbons in the groundwater; quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive quarters and approval of the NMOCD; prepare a report summarizing field activities and laboratory results; report monitor well results annually until closure.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage II Abatement Plan Revision Proposal may be viewed at the above address or at the Oil Conservation Division District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage II Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted to him.

### CHEMICAL DESCRIPTION:

A mixture of Magnesium Peroxide [MgO2], Magnesium Oxide [MgO], and Magnesium Hydroxide 2]

#### **CHEMICAL FAMILY:**

Inorganic Chemicals

PRODUCT NAME:

Oxygen Release Compound (ORC®)

### **PRODUCT USE:**

Used for environmental remediation of contaminated soil and groundwater

## SECTION# 2 - CHEMICAL IDENTIFICATION

#### CHEMICAL CHARACTERIZATION

Magnesium Peroxide [MgO2]: CAS Reg. No. 14452-57-4

Magnesium Oxide [MgO]: CAS Reg. No. 1309-48-4 Magnesium Hydroxide ((Mg(OH)2): CAS Reg. No. 1309-42-8 FORM : powder COLOR: white ODOR: odorless ASSAY: 25 - 35% Magnesium Peroxide (MgO2) \*\*\*\*\*\*\*\* SECTION# 3 - PHYSICAL AND TECHNICAL SAFETY DATA MELTING POINT: Not Determined BOILING POINT: Not Determined DENSITY: .6 - .8 g/cc BULK DENSITY: ---VAPOR PRESSURE: Data not available VISCOSITY: ---SOLUBILITY: Reacts with water. Soluble in acid pH VALUE: Approx. 10 in saturated solution FLASH POINT: Not applicable SELF-IGNITION TEMPERATURE: Not applicable EXPLOSION LIMITS % BY VOLUME: ---THERMAL DECOMPOSITION: Spontaneous decomposition possible about 150° C HAZARDOUS DECOMPOSITION PRODUCTS: Not known HAZARDOUS REACTIONS: Hazardous polymerization will not occur FURTHER INFORMATION: Non-combustible, but will support combustion **SECTION# 4 - REACTIVITY DATA** 

STABILITY: Product is stable unless heated above 150°C. Magnesium Peroxide reacts with water release oxygen. React by product is magnesium hydroxide

CONDITIONS TO AVOID: Heat above 150°C. Open flames

INCOMPATIBILITY: Strong Acids. Strong chemical agents

HAZARDOUS POLYMERIZATION: None known

## SECTION# 5 - REGULATIONS

PERMISSIBLE EXPOSURE LIMITS IN AIR: Not established. Should be treated as a nuisance dus

# SECTION# 6 - PROTECTIVE MEASURES, STORAGE, AND HANDLING

#### TECHNICAL PROTECTIVE MEASURES

STORAGE: Keep container tightly closed. Keep away from combustible material

HANDLING: Use only in well-ventilated areas

PERSONAL PROTECTIVE EQUIPMENT

RESPIRATORY PROTECTION: Recommended (HEPA Filters)

HAND PROTECTION: Wear suitable gloves

EYE PROTECTION: Use chemical safety goggles

OTHER: ---

INDUSTRIAL HYGIENE: Avoid contact with skin and eyes

PROTECTION AGAINST FIRE AND EXPLOSION: ---

DISPOSAL: Dispose via sanitary landfill per state/local authority

FURTHER INFORMATION: Not flammable, but may intensify fire

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

## SECTION# 7 - MEASURES IN CASE OF ACCIDENTS AND FIRE

AFTER SPILLAGE/LEAKAGE/GAS LEAKAGE: Collect in suitable containers. Wash remainder copious quantities of water.

EXTINGUISHING MEDIA

SUITABLE: Carbon dioxide, dry chemicals, foam

#### NOT TO BE USED: ---

FURTHER INFORMATION: Self contained breathing apparatus or approved gas mask should be v to small particle size. Use extinguishing media appropriate for surrounding fire.

FIRST AID: After contact with skin, wash immediately with plenty of water and soap. In case of cc eyes, rinse immediately with plenty of water and seek medical attention.

FURTHER INFORMATION: ---

#### 

## SECTION# 8 - INFORMATION ON TOXICOLOGY

TOXICITY DATA: Data not available

#### \*\*\*\*\*\*\*\*\*\*\*

## SECTION# 9 - INFORMATION ON ECOLOGY

#### WATER POLLUTION HAZARD RATING (WGK): 0

## SECTION# 10 - FURTHER INFORMATION

After the reaction of magnesium peroxide to form oxygen the resulting material, magnesium hydro:

mildly basic. The amounts of magnesium oxide (magnesia) and magnesium hydroxide in the initial have an effect similar to lime, but with lower alkalinity.

The information contained in this document is the best available to the supplier at the time of writin provided without warranty of any kind. Some possible hazards have been determined by analogy to classes of material. The items in this document are subject to change and clarification as more infor becomes available.

## **Cost Effective Passive Treatment**

The use of ORC technology to restore contaminated groundwater, is generally more effective than other alternative technologies. Because standard natural attenuation re considerable time and involves routine monitoring, the cost of using ORC to accelera projects often pays for itself within a year of application, restoring property to marke Treatment with ORC is typically.

- Less than the long term monitoring costs of unassisted natural attenuation sites results in the restoration of property values in a timely manner
- ▲ 1/4 to 1/2 the cost of air sparging with vapor recovery
- ▲ 1/4 the cost of a pump and treat system

Please visit our <u>ORC Technical Bulletin</u> page for further information relating to cost cleanup including case histories.

## **ORC's Time-Release Feature: How it works**

ORC is a proprietary formulation of magnesium peroxide intercalated with food-grac phosphate. This gives it the time-release properties that are critical in a passive, lowoxygen application system. The term "intercalation" is used here to describe the pern of phosphates into the crystal structure of the magnesium peroxide. This placement ( phosphates within the crystalline structure at the molecular level forms pores within crystal which allows for a continued release of the oxygen for a period of up to one y time.

The phosphate intercalation also prevents the "lock up" problem associated with offshelf magnesium and calcium peroxide. Without the phosphate, these commodity ch form a cement-like coating of hydroxides, which inhibits any further hydration and ri oxygen, resulting in a mere two to three weeks of oxygen release.

## World-wide Acceptance of ORC Technology

ORC was first introduced to the environmental remediation market in February 1995 three years of testing and development. It has now been used on over 5,000 soil an groundwater restoration projects in the U.S. and in several foreign countries, in Canada, Japan, Australia, Korea, Denmark, Italy, England, Germany, Holland. Poland.

## **ORC<sup>®</sup> FILTER SOCK INSTALLATION INSTRUCTIONS**

ORC Filter Socks are used to enhance bioremediation of petroleum hydrocarbons in groundwater. The filter sock contains ORC and an inert carrier matrix. The socks c one foot sections. They are laced together to span the vertical polluted saturated zon monitoring type wells. Once the socks are laced together and lowered into the wells become hydrated and begin releasing oxygen. The following instructions are vital to installation and subsequent removal of the socks.

## SAFETY PRECAUTIONS

- ORC is completely non-toxic, but is composed of ultra-fine particles.
- Wear dust masks and goggles to prevent soft tissue irritation
- Reference the Material Safety Data Sheet for specific technical and physical information.

## **CONDITION OF SOURCE WELL**

- Test for well deviation and smoothness before ORC installation.
- For the test, use a 5 foot section of pipe with an outside diameter 1/2 inch sma the source well's inside diameter.

## **KEY REQUIREMENTS FOR INSTALLATION**

- **♦** SOCKS MUST BE INSTALLED WITH BLACK GROMMETS ON TOF
- Wrap Socks as independent units (see page 3, figure 5)
- A maximum of 20 ea. 2-inch socks per section.
- A maximum of 8 ea. 4-inch socks per section.
- A maximum of 6 ea. 6-inch socks per section.
- Make sure each sock is properly shaped (cylindrical and without bends) to fac ease of installation and removal.

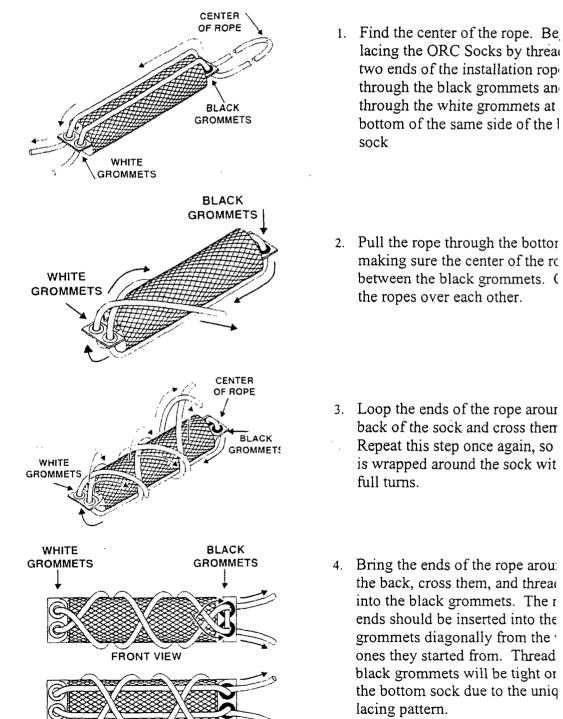

## **HELPFUL HINTS**

- ORC matrix hardens into a cement once hydrated
- Minimize slack between each sock, by periodically pulling up slack while laci
- Tie off ORC retrieval lines to the well cap. Regenesis recommends the use of diameter x 6" long eyebolt.
- The ORC Socks should be wetted to prevent excessive dusting prior to install:
- A Make sure your work area is clean to avoid oil and dirt deposits on the socks.

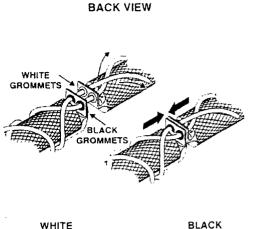

## **ORC REMOVAL**

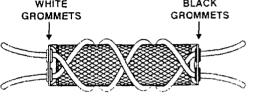

Sock Instructions

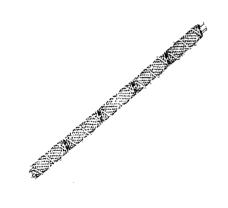

- ORC Socks will be approximately 20% heavier after water saturation
- Static friction from screened casing may cause difficulty in removal
- A winch and stanchion (or comparable equipment) may be necessary to help r the socks due to increased weight, friction, etc.

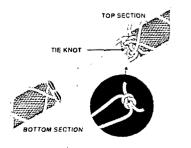

## 4 INCH AND 6 INCH LACING DIAGRAM

- To avoid the ORC Sock slippin each other, the socks must be la with the grommet flaps of the b sock and second sock butting a each other (as shown)
- The remaining socks on the rop section are laced up according t Figure 6. Make sure that the ro turned around the sock two full with the grommets of each sock butting up against the next sock shown in Figure 5.
- Lace each subsequent ORC Sock exactly the same as in Figure 5 and 6.

## **IMPORTANT:**

Do not exceed the maximum number of socks per section (see "Key Requirements D & E" on page 1).

Minimize the slack between the socks

8. If you need to install more ORC Socks than the maximum allowed per well size (see "Key Requirements D & E on page 1), then multiple sections must be installed. Each section is laced exactly the same, but they should be tied off to each other. Tie the end of the rope from the lower section to the bottom sock of the upper section; this allows each section to be

## About Regenesis Source Treatment for Groundwater Plume Remediation

ORC may be used directly in the contaminant plume area to treat the body of dissolv phase contamination as well the source of continuing dissolved phase – the sorbed fr which is found clinging to the aquifer matrix by the capillary fringe and sorbed onto below the water table. The purpose here is to induce what is now often referred to as "accelerated natural attenuation". Since aerobic bioremediation is at least 10 to 100 faster than anaerobic bioremediation, the ORC application stimulates much faster contaminant reduction rates when compared to unamended natural attenuation which generally oxygen deficient.

This type of application generally has one of two objectives. The first is to expedite s closure by accelerating the natural attenuation of the entire plume area. However, a often less costly objective is risk reduction. This is where ORC is applied not with th objective of reaching drinking water standards across the entire site, but rather to trea the "hot spot" thereby decreasing the ongoing source of contamination.

For source treatment, ORC may be applied using retrievable filter socks placed in co application wells, or in a water and ORC powder slurry mixture. In slurry form the ( may be back filled or injected into direct-push bore holes, or back filled into augered Specific instructions on each of these delivery methods may be download from our ( Application Instructions page. Using any one of these methods, a saturated zone sou treatment with an ORC slurry targets dissolved phase contamination plus sorbed mat within the saturated, capillary fringe, and smear zones. It is important that the entire distance of these contaminant zones be covered by the ORC for a source treatment.

## **Economics of ORC Source Treatment Applications**

The economics of groundwater source treatment-type applications can be compelling considering alternative active treatment systems or even monitored natural attenuatio accelerating natural attenuation ORC applications can be more cost-effective than alt technologies and can inexpensively restore contaminated properties to market value. Treatment with ORC is typically:

- ♠ 1/4 to 1/2 the cost of air sparging with vapor containment
- equal to or less that the cost of excavation, hauling and disposal of residual hydrocarbons from the floor of the UST excavation
- less that long-term monitoring costs of unassisted natural attenuation sites
- ▲ 1/4 the cost of a pump and treat system

## Compared with Air Sparging plus Vapor Containment

An ORC application is typically much more cost effective that air sparging with vap containment. The following includes a summary of costs comparing ORC to air span

| systems  | 0.10 | 1/010000   | 01100×1 |
|----------|------|------------|---------|
| SVSIEIUS | 1111 | VALIDHIS   | SHES !  |
| 0,000110 | UII. | , at to ab | 01000 . |
|          |      |            |         |

| Site       | AS/SVE    | ORC      | Savings   | % Savings |
|------------|-----------|----------|-----------|-----------|
| Oklahoma   | \$158,000 | \$46,000 | \$112,000 | 70%       |
| California | 180,000   | 80,000   | 100,000   | 55%       |
| Alabama    | 99,000    | 26,000   | 73,000    | 74%       |

\*all values were derived by the sites' consultants. The costs are full system costs with the objective of site closures.

## Compared with Natural Attenuation (Monitoring Only)

ORC treatments, if properly applied, can result in site closure in as little as one year. This can also be effective than only monitoring the site and relying on unassisted natural attenuation. Applying ORC property to market value and avoid long term monitoring costs as well as potential future liability\*:

| Site     | Monitor Only | ORC      | Savings | % Savings |
|----------|--------------|----------|---------|-----------|
| Oklahoma | \$54,000     | \$46,000 | \$8,000 | 15%       |
| Alabama  | 54,000       | 26,000   | 28,000  | 52%       |

\*All values were derived independently by the sites' consultants.

## ORC TECHNICAL BULLETIN # 1.3.4

# Oxygen Release Compound, ORC®

## **Basic Theory on the Disposition of Compounds**

## **Basic Chemistry**

Oxygen Release Compound (ORC $\mathfrak{D}$ ), is a proprietary formulation of magnesium peroxide. ORC is "oxygenated magnesia" which gives up the oxygen upon contact with water. Magnesium peroxide is converted to magnesium hydroxide (Mg(OH)2) as oxygen is released. This also is the fate of the magnesium oxide which simply hydrates to form the hydroxide. The reactions are:

MgO<sub>2</sub> + H<sub>2</sub>O  $\rightarrow$  1/2 O<sub>2</sub> + Mg(OH)<sub>2</sub>; and

 $MgO + H2O \rightarrow Mg(OH)_2$ 

Therefore, the uniform endpoint of ORC, from both compounds, is magnesium hydroxide. The safety of this material is easily conveyed by the fact that a suspension of magnesium hydroxide in water is ordinary Milk of Magnesia.

## Free Magnesium

Levels of free magnesium coming from ORC or magnesium hydroxide are not a problem. Both magnesium peroxide and magnesium hydroxide are virtually insoluble ( $K_{sp} = 1.8 \times 10{-}11$ ). Additionally, because ORC is contained in a filter sock, the magnesium is contained and removable. Small particles of a few microns in diameter could leave the sock and be carried a limited distance in the sub-surface, before becoming part of the soil matrix. The compounds are simple minerals. Microorganisms can metabolize these compounds using their internal organic acids to solubilize them.

## **Free Phosphate**

ORC contains up to three percent of food grade potassium phosphate. The phosphate is specifically KH2PO4, also known as monopotassium phosphate or MKP and/or K2HPO4, which is dipotassium phosphate or DKP. The concentration cited is intimately bound to the crystalline structure of magnesium peroxide. Some may eventually be released since the potassium phosphates are water soluble.

Even though a portion will remain with the spent product, to be conservative we may assume it will all be released. If this is the case one has to evaluate the total volume of water that will solubilize the extant phosphate, in order to derive a concentration that could permeate the aquifer. It can be easily shown that the amounts fall below 1 ppm in the immediate vicinity of the source well.

Qualitatively, several points should be made with respect to the benign nature of the phosphates in question. First, they are ingestible and harmless; they are used as meat moisturizers and in baby food. Regenesis uses a food-grade product for the extra purity. It is not imperative that it be food-grade pure to be safe - as the lesser grades are sold as fertilizer. Furthermore, the phosphates are invariably going to be metabolized by any of the sub-surface microorganisms, aerobic or anaerobic, as it is a basic nutrient that is essential to life. Its ultimate fate in living organisms, from microbes to mammals, is that it will become part of the ubiquitous array of biochemicals that contain phosphate.

#### however, an irritant.

Contact with skin should be avoided, but is of less concern - it may cause some dryness and mild irritation. The fine nature of the dust, independent of its chemical makeup, is enough to warrant respiratory protection. Full face protection is recommended to avoid both breathing the material and contacting it with the eyes. Separate goggles and mask are an alternative. Gloves should be worn.

These precautions are more important with regard to the use of pure ORC in soil applications than with the ORC filter socks that are almost dust free. Wetting the filter socks down while in the bucket and before removal and insertion into the wells or trenches is a good precaution to take.

Technical Bulletin Index Regenesis Home Page

## ORC TECHNICAL BULLETIN # 1.3.1

# Oxygen Release Compound, ORCª

# **Environmentally Safe**

With reference to the safety of contacting ORC with ground water the following review is provided. Regenesis welcomes any further inquiries.

Definition of ORC and its Components:

ORC is a proprietary formulation of magnesium peroxide (MgO2), which is the active agent. The product contains both magnesium oxide (magnesia, MgO) and magnesium peroxide. A few percent of food grade potassium phosphate (KH2PO4 or K2HPO4) is also present.

## Behavior of ORC in Contact with Water:

ORC is designed to release oxygen when wet. Essentially ORC is "oxygenated magnesia" and it gives up the oxygen upon contact with water. The spent magnesium peroxide is converted to magnesium hydroxide (Mg(OH)2). This also is the fate of the magnesium oxide which simply hydrates to form the hydroxide:

 $MgO + H2O \rightarrow Mg(OH)2.$ 

Therefore, the uniform endpoint of ORC, from both directions, is magnesium hydroxide. The safety of this material is easily conveyed by mention of the fact that a suspension of magnesium hydroxide in water is ordinary Milk of Magnesia. The levels of phosphates from the product are low and they are the same materials that are used to support microbial growth for bioremediation.

## Other Features:

All of the magnesium products discussed are virtually totally insoluble.

The ORC can be used in pure form or mixed with an inert carrier matrix and contained in a filter sock that is removable from the source well at will.

Magnesium oxide, peroxide and hydroxide are all safe to ingest in small quantities. Magnesium oxide is sold as a magnesium supplement for cattle and is used as a fertilizer material. Magnesium peroxide and magnesium hydroxide are also safe to ingest as they are both used as anti-acids. ORC is used in retail horticultural products, such as Oxygen Plus fertilizer, which is now produced by Ringer Corporation. These products are sold in all fifty states, where they have met Department of Agriculture fertilizer registration requirements and safety criteria for entering the environment and the food chain.

Magnesium peroxide has been used in dentifrices and other dental products.

As with all chemicals safe handling practices should be used to avoid any excess exposure to skin and eyes.

A full MSDS is provided with the product. The following statement is useful as a convenient summary of the key issues covered in the MSDS:

ORC is the trade name for a form of magnesium peroxide. It is important to avoid contact with skin and eyes and to avoid breathing the dust. The material is not toxic, in fact, it is listed in certain handbooks as an anti-acid for the stomach. It is

Sock Instructions

installed and removed independently (see well diagram)

## CERTIFIED MAIL RETURN RECEIPT NO. 3771 7132

Carolyn Doran Haynes Operations Engineer Rice Operating Company 122 West Taylor Hobbs, New Mexico 88240

RE: Revised Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) is in receipt of Rice Operating Company's (ROC) Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site dated December 13, 2000. The OCD considers this proposal to be a significant modification of the previously approved Stage 2 abatement plan. In order for the plan to be administratively complete OCD requires the following information to be submitted by April 2, 2001:

- 1. Provide a copy of the public notice for OCD pre-approval as required in 19 NMAC 15.A.19E.4.b.vii.
- 2. Provide a plot plan map depicting the location of all recovery and monitor wells. Describe how all wells will be designed and completed.
- 3. Provide a cross-section view showing the location of all liner(s). Provide information concerning the design, construction, and hydrogeologic properties, etc. Also provide a plan describing how the liner(s) will be protected in the foreseeable future.
- 4. Provide information pertaining to the socks that will release oxygen compounds.
- 5. The plan does not provide sufficient information pertaining to what levels of metals and general chemistry contaminants that will be placed back in the hole. Please provide.

## Carolyn Doran Haynes 03/02/01 page 2

- 6. The plan does not provide delineation levels for metals or general chemistry. Please provide.
- 7. Please propose another location for the up-gradient monitor well that is outside of any disturbed area.

If you have any questions please do not hesitate to contact me at 505-476-3487.

Sincerely;

Wayne Price-Pet. Engr. Spec.

#### <u>CERTIFIED MAIL</u> RETURN RECEIPT NO. 3771 7125

Mr. James P. Lyle Branch Law Firm 2025 Rio Grande Boulevard, NW Albuquerque, New Mexico 87104

#### RE: REVISED STAGE 2 ABATEMENT PLAN PROPOSAL Junction I-9 RICE OPERATING COMPANY GROUND WATER ABATEMENT PLAN (AP-008)

Dear Mr. Lyle:

The Oil Conservation Division (OCD) received the Branch Law Firm's November 14, 2000 letter titled "Stage 2 Abatement plan Proposal-Junction I-9 Release Site- Response To Rice Request for Extension of Completion of Remediation Activities At Site". This correspondence requests that a hearing be set on this matter and provide notification.

The OCD has included your name as an intervenor in this case and you will receive copies of all OCD correspondence concerning the abatement plan. The OCD will continue to process the abatement plan and comments received until the plan is determined to be administratively approvable or denied. If the abatement plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the abatement plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. All intervenors will be allowed fifteen (15) days from receipt of the determination to submit final comments on the conditions or request a public hearing in lieu of administrative approval. A request for a public hearing must be in writing and must include the reasons why a hearing should be held.

Mr. James P. Lyle 03/01/01 Page 2

The OCD appreciates your input on all environmental and public health issues relating to the abatement plan.

If you have any questions or comments, please do not hesitate to contact me at (505) 476-3490 or Wayne Price of my staff at (505) 476-3487.

Mr. Glen Waldrop EOTT Energy Pipeline Limited Partnership P.O. Box 1660 Midland, Texas 79702

#### RE: STAGE 1 GROUND WATER ABATEMENT PLAN (AP-7) DARR ANGELL RANCH

Dear Mr. Waldrop:

The New Mexico Oil Conservation Division (OCD) has reviewed EOTT Energy Pipeline Limited Partnership's (EOTT) November 1, 2000 "DARR ANGELL RANCH STAGE 1 GROUNDWATER ABATEMENT PLAN (AP-7)" which was submitted on behalf of EOTT by their consultant Environmental Technology Group, Inc. This document contains EOTT's response to the OCD's October 5, 2000 request for additional information on EOTT's Stage 1 investigation of the extent of soil and ground water contamination resulting from a crude oil spill at EOTT's Darr Angell Ranch leak site.

The Stage 1 investigation actions are still deficient because the eastern limits of the dissolved phase contamination of ground water have not been completely defined. The ground water benzene concentration in monitor well MW-13 is 200 times the New Mexico Water Quality Control Commission (WQCC) standard and the downgradient limit of this contamination has not been defined. The OCD understands that there are other potential contaminant sources downgradient of MW-13. However, that does not relieve EOTT of responsibility for defining the extent of contamination related to their activities. Therefore, the OCD requires that EOTT submit a work plan to completely define the downgradient extent of ground water contamination which is in excess of the standards of OCD Rule 19.B. Please submit the work plan to the OCD Santa Fe Office by March 7, 2001 with a copy provided to the OCD Hobbs District Office.

## Figures

1. Extent and Depth of Excavation

ARCADIS GERAGHTY& MILLER

#### 1. INTRODUCTION

The subject site is a former pipeline connection point on the Rice Operating Company Hobbs Salt Water Disposal System. The pipeline transports produced water from oil and gas leases to a permitted well for disposal by subsurface injection. The site is located in southwest Hobbs, New Mexico approximately 0.6 miles south of the intersection of Grimes Street and Stanolind Road (NE ¼ of the NE ¼ of Section 4, T19S-R38E, Lea County).

## 2. SUMMARY OF STAGE 1 ABATEMENT ACTIVITIES

Stage 1 Abatement activities as approved by the New Mexico Oil Conservation Division (NMOCD) were conducted during the period of June 1998 through September 1999.

A pipeline leak was discovered and repaired at the subject site on June 5, 1998. Notification of an unauthorized release was submitted to the NMOCD District I Office located in Hobbs, New Mexico. A Stage I Abatement Plan was submitted to NMOCD on January 19, 1999. Interim abatement site activities including assessment of impacts to soil and groundwater and excavation of impacted soil were conducted from August 24, 1998 to September 2, 1999. Recovery of phase-separated hydrocarbons from groundwater has been conducted from January 18 to May 7, 1999. A total of four monitor wells, one recovery well and nine boreholes were installed at the subject site.

A detailed description of site activities and results can be found in the report submitted to NMOCD dated September 10, 1999 entitled *Junction I-9 Release Site, Stage 1 Abatement Report (Site Assessment Investigation).* 

NMOCD approved the Stage 1 site investigation report on November 15, 1999.

## 3. REVISED STAGE 2 ABATEMENT PLAN PROPOSAL

The Stage 2 Abatement Plan Proposal submitted to NMOCD March 31, 2000 was approved by NMOCD on May 30, 2000. On October 26, 2000, ARCADIS Geraghty and Miller, on behalf of Rice Operating Company, submitted a letter of clarification of the Stage 2 Abatement Plan Proposal to NMOCD. The letter provided clarification concerning the definition of clean soil as proposed in the Stage 2 Abatement Plan Proposal, and requested modification of the original work plan by using blended Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

Rice Operating Company Hobbs, New Mexico

1

#### **ARCADIS** GERAGHTY&MILLER

excavated soil as backfill, and an extension for submission of the remediation results. The letter further proposed the installation of a liner.

Following review of the October 26, 2000 clarification letter, NMOCD requested that Rice Operating submit a detailed workplan describing proposed modifications to the Stage 2 Abatement Plan proposal. As a result, Rice Operating Company (ROC) requests approval to amend the Stage 2 Abatement Plan Proposal, Junction I-9 Release Site for remediating the site.

The proposed amendments involve Section 3 of the Stage 2 Abatement Plan Proposal: Subsections 3.1 Soil Remediation and 3.2 Groundwater Remediation and Monitoring. The proposed amendments are as follows:

#### 3.1 Soil Remediation: December, 2000 Amended Proposal

The selected remedial option will be the excavation of soils, blending of impacted soils with clean overburden, isolation of contaminants with compacted clay layers to prevent/inhibit any downward migration of moisture or contaminants, and natural attenuation and biodegradation of hydrocarbons remaining in place.

The excavation activities at the Junction I-9 Release Site have identified impacted soils extending horizontally and vertically more than the Stage I Assessment predicted. The current extent of the excavation is shown in Figure 1. The extent of sub-surface soil impacts will be further delineated with excavation activities.

Soil excavation will continue until no visible staining of soils and no photo ionization detector readings are observed. Excavation activities will be continued in the area where hydrocarbons were detected on the groundwater until the soil associated with the phase-separated hydrocarbons (PSH) is removed. Soil in this area will be excavated to 30-32' below ground surface (BGS.) When groundwater is encountered, excavation will be discontinued just below the depth where groundwater is encountered in order to maintain safe and practical excavation of soils. PSH will be recovered with absorbent material where possible. Remaining soils at the groundwater/soil interface will be treated with naturally occurring hydrocarbon degrading organisms and nutrients to promote biodegradation.

#### Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

Rice Operating Company Hobbs, New Mexico **ARCADIS** GERAGHTY& MILLER

A 12-15" compacted clay layer will be installed according to NMOCD clay layer specifications (meet or exceed 95% of a Proctor Test ASTM-D-698 and permeability equal to or less than 1 x  $10^{-7}$  cm/sec) over the area excavated to the groundwater interface in order to inhibit downward migration of constituents and to protect the groundwater interface that was exposed. When the most deeply excavated area has been backfilled to the ground level of the overall area-wide excavation, an additional compacted clay layer will be installed (to NMOCD specifications) at the base of the entire excavation in order to inhibit downward migration of potential constituents in unexcavated soils remaining below the compacted clay layer.

Approximately 11,000 loose cubic yards of impacted soil has been already disposed at an NMOCD-approved facility. All remaining excavated soils (predicted to be 4,000-5,000 loose cubic yards) will be blended with overburden/replacement soils (approximately 40,000 loose cubic yards) and returned to the excavation as backfill. Total petroleum hydrocarbon (TPH) and benzene, toluene, ethylbenzene and xylenes (BTEX) concentrations will be verified by laboratory analysis for each 3' thick backfill lift. TPH and BTEX concentrations of blended soils used for backfill material will not exceed NMOCD standards concentrations of 100 milligrams per kilogram (mg/kg) TPH, 10 mg/kg benzene and 50 mg/kg BTEX.

Five-point composite samples will be collected from the floor of each level of excavation and from each wall of the excavation. The samples will be analyzed for TPH, and BTEX using USEPA Methods 8015 and 8260, respectively. The composite samples will also be analyzed for General Chemistry and WQCC metals.

# 3.2 Groundwater Remediation and Monitoring: December, 2000 Amended Proposal

Recovery well, RW1, will be replaced since the excavation activity resulted in removal of the well. RW1R will be the designated name of the replacement recovery well.

Free product will be removed weekly from recovery well RW1R. Either the well will be bailed or pumped to remove product, or a downhole passive hydrocarbon skimmer will be installed. Product level, groundwater level,

#### Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

Rice Operating Company Hobbs, New Mexico

3

**ARCADIS** GERAGHTY&MILLER

product thickness, and recovered fluid volumes will be recorded weekly and submitted to the NMOCD annually on June 15 in table form. Recovered fluids will be placed in the Hobbs SWD System pipeline.

Two additional monitor wells will be drilled. One monitor well will be located down gradient from existing monitor well MW-2 and will be completed in a manner consistent with previously approved wells. The second monitor well will be located down gradient of the source area and will be used to monitor possible water contamination caused by density gradient effects. The completion method and location of the monitor wells will be approved by NMOCD prior to installation. The monitor wells that will be drilled at this site will be drilled in locations that are currently excavated. The monitor wells and replacement well RW1R will be installed following the completion of excavation and backfilling activities.

Socks containing oxygen release compounds will be placed in monitor wells MW-1 and MW-2 to promote natural biodegradation of hydrocarbons in the groundwater.

All monitor wells will be sampled quarterly for four quarters and groundwater samples will be analyzed for BTEX, General Chemistry and WQCC metals. Based on sample results for one year (four quarters), sampling frequency will be reviewed and may be revised.

Sampling will be discontinued when eight quarters of sample results indicate BTEX concentration are below New Mexico Water Quality Control Commission, Title 20, Chapter 6, Part 2 standards. Sample results will be submitted to the NMOCD annually on June 15. Recovered fluids will be placed in the Hobbs SWD System pipeline.

Sections 1, 2, 4, 5, 6 and 7 of the original Stage 2 Plan remain as previously submitted.

#### 4. HEALTH AND SAFETY

All site activities will be performed in accordance with Occupational Safety and Health Administration (OSHA) standards. All on-site personnel will be required to wear a hardhat, safety glasses and steel-toe shoes during work activities. A daily tailgate safety meeting will be performed and a safety meeting record will be signed by all attendees and kept on file. Emergency phone numbers are as follows: Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

#### Rice Operating Company Hobbs, New Mexico

#### 5. PUBLIC NOTIFICATION

Written notification of submittal of the Stage 2 Abatement Plan Proposal and site activities will be sent to all surface owners of record within a one-mile radius of the site. NMOCD will be supplied with a list of parties to be notified. Publication of notice of activities will be published in a state-wide circulated newspaper, the Albuquerque Journal, and two county newspapers, the Hobbs-Daily News Sun and the Lovington Leader.

#### 6. REMEDIATION WORK SCHEDULE

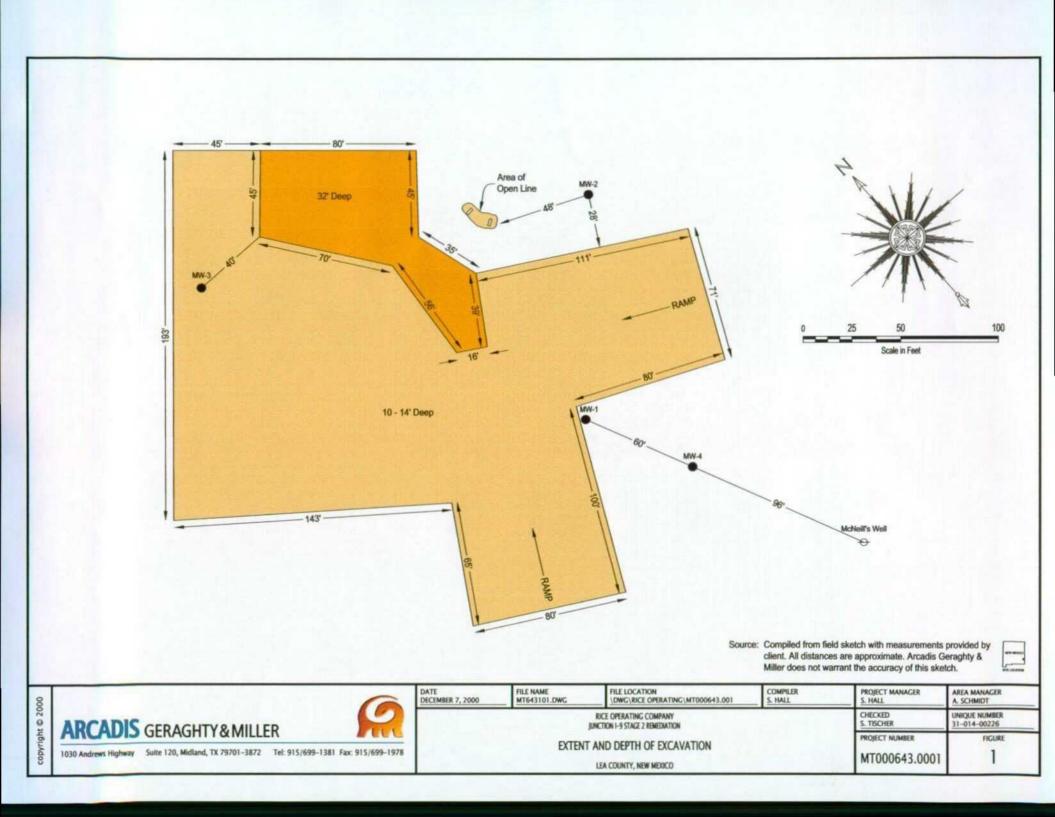

Soil remediation activities are expected to be completed in 15 working days (Monday through Friday). Groundwater remediation activities will be ongoing. An estimated completion date for groundwater remediation is not available.

# ARCADIS GERAGHTY& MILLER CONSERVATION DN.

CO DEC 13 PMII: 36

Roger C. Anderson New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division 2040 South Pacheco Street Santa Fe, New Mexico 87505

Subject: Revised Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

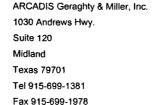

Dear Mr. Anderson:

On behalf of Rice Operating Company, ARCADIS Geraghty and Miller respectfully submits this Revised Stage 2 Abatement Plan Proposal for the Junction I-9 Release Site located in Hobbs, New Mexico.

The Stage 2 Abatement Plan Proposal submitted to NMOCD March 31, 2000 was approved by NMOCD on May 30, 2000. On October 26, 2000, ARCADIS Geraghty and Miller, on behalf of Rice Operating Company, submitted a letter of clarification of the Stage 2 Abatement Plan Proposal to NMOCD. The letter provided clarification concerning the definition of clean soil as proposed in the Stage 2 Abatement Plan Proposal, and requested modification of the original work plan by using blended excavated soil as backfill, and an extension for submission of the remediation results. The letter further proposed the installation of a liner.

Following review of the October 26, 2000 clarification letter, NMOCD requested that Rice Operating submit a detailed workplan describing proposed modifications to the Stage 2 Abatement Plan proposal. Attached is the proposed revised workplan.

In the October 26, 2000 clarification letter ARCADIS Geraghty and Miller requested an extension to the deadline of October 31, 2000 to complete remediation activities. Remediation activities at the site have been suspended pending NMOCD approval of the revised workplan and access to the site by the landowner. We request that the deadline for completion of remediation activities be identified following approval of the workplan. We also again request that the October 31, 2000 deadline for

Environmental

Midland, Texas, 13 December 2000

Contact: Sharon E. Hall

Extension: 915 699-1381

## **ARCADIS** GERAGHTY& MILLER

submission of remediation results be extended to a date to be identified following approval of the workplan. A letter describing the status of the remediation activities will be submitted to you at your request.

Very Truly Yours,

ARCADIS Geraghty & Miller, Inc.

RE: Clarification of Stage 2 Abatement Plan Proposal (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) is in receipt of Rice Operating Company's letter dated October 26, 2000 requesting clarification concerning the definition of what constitutes "clean soil" and a request to modify the original work plan by using blended contaminated soil as backfill in lieu of hauling in clean soil as previously proposed, installing a liner to impede leachate from reaching groundwater and requesting an extension for submission of the remediation results.

The OCD understands the size of the excavated area has become considerably larger than previously anticipated. After reviewing your request the OCD has determined the changes requested would constitute a significant modification to the original plan.

Please submit for OCD approval by December 29, 2000 a detailed work plan describing the proposed plan.

Sincerely,

Roger Ć. Anderson Environmental Bureau Chief RCA/lwp

Dear Mr. McCallum:

Please find enclosed a copy of Sharon E. Hall's October 26, 2000 letter to Wayne Price of the OCD. I note that she sent you two copies, one of which was to be forwarded to me. Fortunately, Mr. McNeill found out about this in talking to Mr. Price. Why did you not send me a copy of this?

Again, your client does not have permission to enact this proposal which does not come close to meeting the terms of our requirement. Your client will be trespassing if they attempt to perform any type of work other than that work previously agreed upon.

Very truly yours,

#### RE: Stage 2 Abatement Plan Proposal - Junction I-9 Release Site - Response To Rice Request for Extension of Completion of Remediation Activities At Site

Dear Mr. Price:

Thank you for providing me with a copy of the letter you received from Arcadis, Geraghty & Miller dated October 26, 2000 in regard to the above matter. This is to notify you that the landowner, Bill McNeill, hereby requests that a hearing be set on this matter at the earliest possible convenience. Please notify us when this matter can be heard by the Commission and the time that will be allotted to each side for their presentation.

Additionally, as per our earlier telephone conversation today, we have been notified by the Attorney General's office that they would also like to receive notice of the hearing date to allow their representative to be in attendance. As I informed you, once the hearing is set, please contact John Grubesic in the Attorney General's office (827-6010) and notify him of the date and time of the hearing.

Thank you for your anticipated assistance in this regard. We look forward to hearing from you in the near future regarding the scheduling of this matter.

Very truly yours,

THE BRANCH LAW FIRM

Dear Ms. Hebert:

We have rescheduled the deposition of Wayne Price for Friday, December 1, 2000 at 10:00 a.m. there at the OCD Offices in Santa Fe. I have already cleared this date and time with Mr. Price. I have also scheduled an appointment with Mr. Price for Thursday, November 30<sup>th</sup> at 3:30 p.m. to get a handle on the scope and breadth of his file and how it should be referred to most efficiently in the deposition. We are having a Subpoena personally served upon Mr. Price for his attendance at the deposition.

I am forwarding a copy to you of the Amended Notice to Take Oral Deposition Duces Tecum and a copy of the Subpoena Duces Tecum which I am having served upon Mr. Price.

I look forward to making your acquaintance when I arrive in Santa Fe for the deposition.

Thank you.

Very truly yours

#### NOTICE TO TAKE ORAL DEPOSITION DUCES TECUM

TO: ALL COUNSEL OF RECORD

PLEASE TAKE NOTICE that on the 16<sup>th</sup> day of November, 2000, commencing at 10:00 a.m., at the offices of Wayne Price, New Mexico Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico, the Defendants Rice Engineering and Operating, Inc., et al will take the oral Deposition Duces Tecum of **WAYNE PRICE** before a Certified Shorthand Reporter.

PLEASE TAKE FURTHER NOTICE that said deposition may be videotaped.

PLEASE TAKE FURTHER NOTICE that the deposing party intends to use the deposition taken pursuant to this notice for all purposes provided under the Rule, including use at trial.

On the date and time of taking of the deposition, the witness shall produce the following:

All of your files which have been developed for purposes of the I-9 Junction Release Site, Hobbs Salt Water Disposal System, involving Rice Operating Company and the McNeill Ranch.

## ARCADIS GERAGHTY& MILLER

### OCT 3 0 2000

CON SCRATTER OF LEVEL

Mr. Wayne Price State of New Mexico Energy and Minerals Department Oil Conservation Division 2040 S. Pacheco Santa Fe, New Mexico 87505

Subject: Clarification of Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

Dear Mr. Price:

7

On behalf of Rice Operating Company (ROC), ARCADIS Geraghty & Miller (AG&M) respectfully submits this letter of clarification to the Stage 2 Abatement Plan Proposal, Junction I-9 Release Site. The plan proposal was submitted to New Mexico Oil Conservation Division (NMOCD) on March 31, 2000 and was approved by OCD on May 30, 2000.

Section 3.1 (Soil Remediation) of the Stage 2 Abatement Plan Proposal states that soils with concentrations of total petroleum hydrocarbons (TPH), benzene and bezene, toluene, ethylbenzene and xylenes (BTEX) in excess of OCD standards of 100 milligrams per kilogram (mg/kg), 10 mg/kg and 50 mg/kg, respectively will be excavated and the excavation will be backfilled with clean soil. We would like to clarify that clean soil is soil that meets OCD standards and does not exceed concentrations of 100 mg/kg TPH, 10 mg/kg benzene and 50 mg/kg BTEX.

Approximately 11,000 loose cubic yards of impacted soil has been disposed at an NMOCD approved facility. All remaining soils (estimated to be 4,000-5,000 loose cubic yards) will be blended with overburden/replacement soils (approximately 40,000 loose cubic yards) and returned to the excavation as backfill. TPH, benzene, and BTEX concentrations will be verified by laboratory analysis for each three-foot thick lift. Blended soils will not exceed concentrations of 100mg/kg TPH, 10 mg/kg benzene and 50 mg/kg BTEX.

As stated in Section 3.1 of the approved Stage 2 Abatement Proposal Plan, if TPH and BTEX concentrations at the bottom of the excavation are in excess of NMOCD

ARCADIS Geraghty & Miller, Inc. 1030 Andrews Hwy. Suite 120 Midland Texas 79701 Tel 915-699-1381 Fax 915-699-1978

Environmental

Midland, Texas, 26 October 2000

Extension: 915 699-1381

#### **ARCADIS** GERAGHTY& MILLER

standards, because excavation was discontinued due to the presence of groundwater, remaining soils will be treated with naturally occurring hydrocarbon degrading microorganisms and nutrients to promote biodegradation. In addition to treatment of these soils, a 12 to 15 inch-thick compacted clay layer will be installed in areas of the excavation where groundwater is encountered to inhibit downward migration of constituents and to protect the groundwater interface. The compacted clay layer will be installed according to NMOCD clay layer specifications (meet or exceed 95% of a Proctor Test ASTM-D-698 and permeability equal to or less than 1 x  $10^{-7}$  centimeters per second.)

We would like to request an extension of the October 31, 2000 deadline to complete remediation activities at this site. The size of the excavation is larger than anticipated. Because the depth of the excavation is greater than 20 feet deep, excavation activities are being performed in accordance with OHSA Specific Excavation Requirements. Therefore, the number and type of excavation equipment used at this site are limited, which limits the volume of soil that can be excavated per day.

Additionally, the two monitor wells that will be drilled at this site will be drilled in locations that are currently excavated. The wells cannot be installed until excavation and backfilling activities are completed. We request that the October 31, 2000 deadline for submission of remediation results be extended to December 31, 2000. A letter describing the status of the remediation activities will be submitted to you at your request.

If you have any questions or would like additional information, please call me at 915 699-1381.

Sincerely,

ARCADIS Geraghty & Miller, Inc.

#### Price, Wayne

From:riceswd[SMTP:riceswd@gte.net]Sent:Monday, September 11, 2000 11:56 AMTo:Price, WayneSubject:Updates on Several Subjects

Wayne,

Just a few notes to update you on several projects that are on-going.

#### The Stage II Abatement for the Hobbs I-9 Release site on Bill McNeill's land:

The AFE has been approved and the money was supposed to be IN today. Well, it isn't. Oxy Permian has decided that they are responsible for the well commitment of all the wells in the North and South Hobbs Units. This was confirmed by email and Rice is awaiting the hard paper copy. Anyway, what this means is that Rice will have to re-bill according to the new percentages. I'm still hoping we can get started with the one-call before Friday, September 15th.

Rice finally heard from Mr. McNeill's legal representative concerning Mr. McNeill's requirements for the vadose zone remediation. Basically:

- 1. chlorides removed to background levels
- 2. Zero BTEX
- 3. less than 100 ppm TPH
- 4. ground re-planted in gramma grass
- 5. no outside fill soils
- 6. damages
- 7. McNeill caliche for purchase
- 8. McNeill topsoil for purchase

I believe these stipulations are not deal-breakers and we can abide with them.

Now, we just wait for money. I'll keep you informed.

#### RICE SWD F-29 located on West Co. Road between Bender and Sanger Streets

This is the wellsite where Rice replaced redwoods and closed an emergency overflow pit. The groundwater results of the new monitor well was found to be high in TDS and Chlorides, but below limits for BTEX and no hydrocarbon product. This result is highly frustrating because the vadose zone investigation clearly indicated that chloride impact at the redwood site stopped between 30 and 40 feet BGS and the pit site at 8 feet BGS (pit was hardly ever used). The reason Rice agreed to sample a monitor well was because of the TPH pocket found at 40 feet BGS (which also stopped before GW impact) at the redwood site. Initial GW sampling (while you were present with Wes Root at the well drilling) found the GW to be not impacted with TDS.

I contacted you by phone with these recent results and we decided that an up-gradient well would allow for information about other possible sources of TDS impact. I contacted the landowner of the surrounding property, Mr. Gary Schubert of Grimes Land Company to negotiate drilling a monitor well. Mr. Schubert feels that drilling a monitor well on his land in order to investigate groundwater impact is not in his best interest or the best interest of the value of his property, and he declines to allow permission or right-of-way to drill a well.

At this point, Rice will continue to sample the monitor well for TDS, CI, and BTEX for the allotted time frame. Again, we were willing to monitor because of the TPH found at 40' BGS and to be sure that it did not migrate downward. Rice did install a compacted clay layer to inhibit downward migration before the excavation was backfilled.

If you have suggestions about an alternate path to proceed, please inform Rice of the possibilities.

#### JUNCTION BOX UPGRADE WORK PLAN

Rice is preparing the junction box locations and site assessments to send in to you for the EME and BD systems, where the AFE's have been approved and funding is available. Please expect this before the end of the month.

I should be in the office most of this week and next. Thank you,

-----

Carolyn Haynes

Mr. Roger C. Anderson State of NM Energy and Minerals Dept. Oil Conservation Division 2040 South Pacheco St. Santa Fe, NM 87505

Re: Stage II Abatement Plan (AP-8) Junction I-9 Release Site Hobbs Salt Water Disposal System NE/4 SE/4 Section 09-T19S-R38E Lea County, New Mexico

Dear Mr. Anderson:

Rice Operating Company (ROC) has been directed to report progress quarterly on the above referenced site, with the first report due July 31, 2000.

The progress to date has been to write and distribute the AFE for the site remediation. As of this date, the Hobbs SWD System Partners have not approved the AFE. A Partner meeting is being organized to facilitate discussion concerning this environmental remediation project.

Projects of this magnitude require System Partner AFE approval and pre-work funding in order to begin the on-site work. ROC has no ownership of pipelines, wells, or facilities of the Hobbs SWD System. The Hobbs SWD System is owned by a consortium of System Partners who provide operating capital based on percent ownership or usage.

This project will be updated to the NMOCD again October 31, 2000. If you have any questions, please contact me at 505-393-9174.

Sincerely,

Carolyn Doran Haynes

Dear Mr. Anderson:

Rice Operating Company (ROC) has compiled the documentation of the written and public notice concerning the Stage 2 Abatement Plan, Junction I-9 Release Site. The certified mailing was distributed March 20, 2000 and the published notice appeared in the Hobbs News Sun and the Albuquerque Journal on March 24, 2000. Proof of Notice is enclosed with this letter.

ROC will await the public and NMOCD response to this Stage II Abatement Plan Proposal.

If you have any questions, please contact me at 505-393-9174.

Sincerely,

#### LEGAL NOTICE March 24, 2000 NOTICE OF PUBLICATION STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Rice Operating Company, Carolyn Doran Haynes, Opera-tions Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice, Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; backfill excavation with clean fill soil; seed surface with native vegetation; PSH recovery from groundwater and treatment to promote natural biodegradation of hydrocarbons in the groundwater, quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive guarters and approval of the NMOCD; prepare a report summarizing field activities and laboratory results; reports monitor well results annually until closure.

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement, Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240. Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 2 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted. #17279
