## CERTIFIED MAIL RETURN RECEIPT NO. 5051 4638

Carolyn Doran Haynes Operations Engineer Rice Operating Company 122 West Taylor Hobbs, New Mexico 88240

RE: Stage 2 Abatement Plan (AP-8) Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) has reviewed Rice Operating Company's (ROC) January 05, 2000 "SUBMITTAL OF STAGE 2 ABATEMENT PLAN, Junction I-9 Release Site". This document contains ROC's Stage 2 Abatement Plan Proposal for remediation of soil and ground water contamination related to the above captioned site. The OCD has determined that the above referenced Stage 2 Abatement Plan Proposal is administratively complete. Before the OCD can complete a review of the Stage 2 proposal, the OCD requires that:

- 1. ROC issue by March 25, 2000 the attached public notice of the Stage 2 proposal in the Albuquerque Journal and the Hobbs News-Sun pursuant to OCD Rule 19.G.
- 2. Prior to issuing the public notice, ROC shall issue written notice of the Stage 2 proposal pursuant to OCD Rule 19.G.(1). Please refer to the previously supplied 3.5" disk for a listing of "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d) and the contact for the New Mexico Trustee for Natural Resources.

Please provide the OCD with proof of notice as soon as possible upon completing issuance of the written and public notice.

Carolyn Doran Haynes 03/10/00 Page 2

If you have any questions, please contact Wayne Price at (505) 827-7155.

Sincerely,

00

Roger C. Anderson Environmental Bureau Chief rca/wp xc: Chris Williams, OCD Hobbs District Supervisor Bill McNeill

## NOTICE OF PUBLICATION

## STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage II Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately 0.6 miles southwest of Hobbs in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. Rice Operating Company operates a saltwater disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage II Abatement Plan Proposal presents the following site soil and groundwater remedial activities: soil excavation and biodegradation of any remaining hydrocarbons; soil sampling and analysis; backfill excavation with clean fill soil; seed surface with native vegetation; PSH recovery from groundwater and treatment to promote natural biodegradation of hydrocarbons in the groundwater; quarterly sampling of all monitor wells until results meet NMWQCC standards for eight consecutive quarters and approval of the NMOCD; prepare a report summarizing field activities and laboratory results; report monitor well results annually until closure.

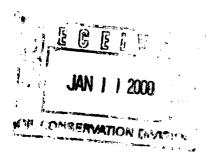

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 2 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

#### CERTIFIED MAIL RETURN RECEIPT NO. Z 577 009 527

January 10, 2000

Mr. Roger C. Anderson State of NM Energy and Minerals Dept. Oil Conservation Division 2040 South Pacheco St. Santa Fe, NM 87505

> Re: Stage II Abatement Plan Proposal Junction I-9 Release Site Hobbs Salt Water Disposal System NE/4 SE/4 Section 09-T19S-R38E Lea County, New Mexico

Dear Mr. Anderson:

Rice Operating Company (ROC) was pleased to receive NMOCD approval of the Stage I Abatement Report for the I-9 Release Site. ROC then consulted with Sharon Hall of ARCADIS Geraghty & Miller to discuss various remediation scenarios, to assist ROC in selecting and designing the site remediation plan and to prepare the Stage II Abatement Plan Proposal.

ROC and ARCADIS Geraghty & Miller concur that completion of the activities described in the enclosed Junction I-9 Release Site Stage II Abatement Plan Proposal will result in the attainment of the abatement standards and requirements set forth in Rule 19.B.

ROC will await the NMOCD's response to this Stage II Abatement Plan Proposal. Upon determination the Stage II Abatement Plan Proposal is administratively complete, ROC is prepared to issue written notice of this Stage II Proposal to the following persons:

Surface owners of record within 1 mile of the perimeter of the contamination boundary.

County Commission where contamination is located

Appropriate city officials if the contamination boundary is partially located within city limits or within 1 mile of the city limits.

ROC I-9 Release Site Stage II Abatement Plan Proposal January 10, 2000 Page 2

Those persons, as identified by the Director, who have requested notification.

The New Mexico Trustee for Natural Resources, and any other local, state, or federal governmental agency affected, as identified by the Director.

The appropriate Governor or President of any Indian Tribe if contamination boundary is partially located within tribal boundaries.

The public notice will include:

- a.) Statement that a copy of the abatement plan can be viewed by the public at the Division's main office or at the District office for the area in which the release occurred.
- b.) Statement that the following comments and requests will be accepted for consideration if received by the Director within 30 days after date of public notice publication.
  - (i) Written comments on the abatement plan
  - (ii) For Stage 2 abatement plan, written requests for a public hearing that include reasons why a hearing should be held.

A draft of the Notice Of Publication is enclosed for NMOCD's discretionary approval.

As always, the Hobbs and Santa Fe offices of the NMOCD will be notified at least 48 hours in advance of any significant event scheduled for this site.

If you have any questions, please contact me at 505-393-9174.

Sincerely,

Carolyn Dnan Hayme

## Memorandum of Meeting or Conversation

TelephoneX\_\_\_\_Personal\_\_\_\_\_E-Mail\_\_\_\_\_

**Time: 4:15 pm Date:** January 13, 2000

Originating Party: Wayne Price-OCD

#### Other Parties: Bill McNeill-Landowner

Subject: Abatement Plan (AP-8) Requirement Rice Operating Company Hobbs Salt Water Disposal System- in Unit Letter I, Section 9-Ts 19s-R38e. Lea County, New Mexico

#### **Discussion:**

Mr. McNeill expressed his concern about produced water contaminants ,salts and chlorides in the ground-water. He also indicated he thought that since chlorides are "sinkers" that OCD should require Rice to check the bottom of the aquifer at this site. Mr. McNeill was also concerned about the time it takes for the abatement process to occur.

#### **Conclusions or Agreements:**

OCD will review the case file and determine if the site investigation performed by Rice properly addresses produced water constituents, salts and chlorides. As for the abatement process time, this is pursuant to NMOCD rules.

Signed:

CC: Roger Anderson, Bill Olson-OCD Bill McNeill-Landowner

i

#### 1. INTRODUCTION

The subject site is a former pipeline connection point on the Rice Operating Company Hobbs Salt Water Disposal System. The pipeline transports produced water from oil and gas leases to a permitted well for disposal by subsurface injection. The site is located in southwest Hobbs, New Mexico approximately 0.6 miles south of the intersection of Grimes Street and Stanolind Road (NE ¼ of the NE ¼ of Section 4, T19S-R38E, Lea County) (Figure 1).

#### 2. SUMMARY OF STAGE 1 ABATEMENT ACTIVITIES

Stage 1 Abatement activities as approved by the New Mexico Oil Conservation Division (NMOCD) were conducted during the period of June 1998 through September 1999.

A pipeline leak was discovered and repaired at the subject site on June 5, 1998. Notification of an unauthorized release was submitted to the NMOCD District I Office located in Hobbs, New Mexico. A Stage I Abatement Plan was submitted to NMOCD on January 19, 1999. Interim abatement site activities including assessment of impacts to soil and groundwater and excavation of impacted soil were conducted from August 24, 1998 to September 2, 1999. Recovery of phase-separated hydrocarbons from groundwater has been conducted from January 18 to May 7, 1999. A total of four monitor wells, one recovery well and nine boreholes were installed at the subject site.

A detailed description of site activities and results can be found in the report submitted to NMOCD dated September 10, 1999 entitled *Junction I-9 Release Site, Stage 1 Abatement Report (Site Assessment Investigation).* 

NMOCD approved the Stage 1 site investigation report on November 15, 1999.

#### 3. STAGE 2 ABATEMENT PLAN PROPOSAL

After review of various remedial options, Rice Operating Company proposes the following Stage 2 Abatement Plan. The plan addresses soil and groundwater remediation.

Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

#### 3.1 Soil Remediation

The selected remedial option will be the excavation of soils and biodegradation of any remaining hydrocarbons. The anticipated extent of excavation is based on assessment activities (laboratory analysis, photoionization detector readings and visual observation) and is shown in Figure 1. Soil excavation will continue until no visible staining of soils and/or no PID readings are observed. Soils will be excavated to a depth of approximately 25-30 feet below ground surface. If groundwater is encountered, excavation activities will be discontinued at the depth where groundwater is encountered in order to maintain safe and practical excavation of soils. Excavated soils will be disposed at an NMOCD-approved facility.

A five-point composite sample will be collected from the center of the floor and from the middle of the north, south, east and west walls of the excavation. The samples will be analyzed for total petroleum hydrocarbons (TPH), and benzene, toluene, ethylbenzene and xylenes (BTEX) using USEPA Methods 418.1 and 8260, respectively. When concentrations are at or below the NMOCD standards of 10 milligrams per kilogram (mg/kg), 50 mg/kg and 100 mg/kg for benzene, BTEX, and TPH, respectively, the excavation will be backfilled. The excavation will be backfilled with clean fill soil to a depth two feet below ground surface, and two feet of native topsoil will be placed above the caliche. Following placement of the native topsoil, the area will be seeded with native vegetation.

If TPH and BTEX concentrations at the bottom of the excavation are in excess of NMOCD standards because excavation was discontinued due to the presence of groundwater, remaining soils will be treated with naturally occurring hydrocarbon degrading microorganisms and nutrients to promote biodegradation.

Recovery well, RW1, will be replaced if the excavation activities result in removal of the well.

#### 3.2 Groundwater Remediation and Monitoring

Free product will be removed weekly from recovery well RW1. Either the well will be bailed or pumped to remove product, or a downhole passive hydrocarbon skimmer will be installed. Product level, groundwater level, product thickness, and recovered fluid volumes will be recorded weekly and submitted to the NMOCD annually on June 15

#### Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

(in table form). Recovered fluids will be placed in Rice Operating Company's saltwater disposal system pipeline.

Socks containing oxygen release compounds will be placed in monitor wells MW-1 and MW-2 to promote natural biodegradation of hydrocarbons in the groundwater.

All monitor wells will be sampled quarterly for four quarters. Groundwater samples will be analyzed for BTEX using USEPA method 8260-B for each of four quarters. Based on sample results for one year (four quarters), sampling frequency will be reviewed and may be revised.

Sampling will be discontinued when eight quarters of sample results indicate BTEX concentrations are below New Mexico Water Quality Control Commission, Title 20, Chapter 6, Part 2 standards. Sample results will be submitted to the NMOCD annually on June 15. Recovered fluids will be placed in Rice Operating Company's salt water disposal system pipeline.

#### 4. HEALTH AND SAFETY

All site activities will be performed in accordance with Occupational Safety and Health Administration (OSHA) standards. All on-site personnel will be required to wear a hard hat, safety glasses and steel-toe shoes during work activities. A daily tailgate safety meeting will be performed and a safety meeting record will be signed by all attendees and kept on file. Emergency phone numbers are as follows:

| Carolyn Haynes     | Rice Operating Company | 505 393-9174 |
|--------------------|------------------------|--------------|
| Police, Fire, Ambu | llance                 | 911          |
| Columbia Lea Reg   | gional Medical Center  | 505 392-9212 |

#### 5. PUBLIC NOTIFICATION

Written notification of submittal of the Stage 2 Abatement Plan Proposal and site activities will be sent to all surface owners of record within a one-mile radius of the site. NMOCD will be supplied with a list of parties to be notified. Publication of notice of activities will be published in a state-wide circulated newspaper, the Albuquerque Journal, and two county newspapers, the Hobbs-Daily News Sun and the Lovington Leader.

#### Stage 2 Abatement Plan Proposal, Junction I-9 Release Site

#### 6. **REMEDIATION WORK SCHEDULE**

Soil remediation activities are expected to be completed in 15 working days (Monday through Friday). Groundwater remediation activities will be ongoing. An estimated completion date for groundwater remediation is not available.

#### CERTIFIED MAIL RETURN RECEIPT NO. Z 577 009 521

September 13, 1999

Mr. Roger C. Anderson State of NM Energy and Minerals Dept. Oil Conservation Division 2040 South Pacheco St. Santa Fe, NM 87505

> Re: Stage I Abatement Plan Report: Junction I-9 Release Site Hobbs Salt Water Disposal System NE/4 SE/4 Section 09-T19S-R38E Lea County, New Mexico

#### Dear Mr. Anderson:

Upon receipt of NMOCD approval for the Stage I Abatement Plan for the I-9 Release Site, Rice Operating Company (ROC) bid and then contracted with ARCADIS Geraghty & Miller to perform a sampling event and compose the Stage I Abatement Plan Report.

The sampling event of July 7, 1999 did confirm the presence of BTEX in levels higher than the NM WQCC limits in the two down-gradient monitor wells. Because of this result and because the NMOCD subsequently requested (August 10, 1999), ROC contracted through Arcadis Geraghty & Miller to drill an additional down-gradient monitor well in order to more exactly define groundwater impact. The results of the new boring (MW4) and its groundwater analytical results are included in the enclosed Stage I Abatement Report.

The enclosed ARCADIS Geraghty & Miller report compiles information acquired since the discovery of groundwater impact at the I-9 Release Site and incorporates the NMOCD requests described in the May 24, 1999 letter and the August 10, 1999 letter.

ROC I-9 Release Site Stage I Abatement Plan Report September 13, 1999 Page 2

ROC and Arcadis Geraghty & Miller concur that the area of groundwater impact has been adequately delineated with the drilling, completion, and sampling of MW4. The results of water samples from MW4 indicate that BTEX concentrations are non-detectable at this location.

ROC and ARCADIS Geraghty & Miller concur that the vadose zone impact has been adequately delineated with the previous borings. Further evaluation will be conducted and documented as excavation occurs during the Stage II Abatement Work Plan.

ROC will await the NMOCD's response to this Stage I Abatement Report before any further activities will be scheduled for this site. Upon approval of the Stage I Abatement Report, ROC will prepare and submit a Stage II Abatement Work Plan, describing the remedial activities planned for this site.

As always, the Hobbs and Santa Fe offices of the NMOCD will be notified at least 48 hours in advance of any significant event scheduled for this site.

If you have any questions, please contact me at 505-393-9174.

Sincerely,

Carolyn Doren Haynes

RE: Stage I Abatement Plan Junction I-9 Release Site Unit Letter I, Section 9 of T19S, R38E Hobbs Salt Water Disposal System Lea County, New Mexico

Mr. Price:

Attached please find the proof of notification for Rice Operating Company's Stage I Abatement Plan for the junction I-9 Release Site. Included in this package are the affidavits of publication from the three newspapers that were required: Albuquerque Journal, Hobbs News Sun, Lovington Daily Leader; copies of the certified mail return cards from the notification mailed to owners of record within one mile radius of the site; and copies of the certified mail return cards from the notification mailed to "those persons as identified by the Director, who have requested notification."

The public notice was published in these three newspapers on April 9, 1999. It is understood that there is a 30-day waiting period for public comment, and that after the 30 days, the Stage I Abatement Plan will be reviewed for approval or approval with conditions. Rice Operating Company will expect to hear from you the week of May 10, 1999.

Sincerely,

Carolyn Knan Hayne

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505) 393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately .6 miles southwest of Hobbs, NM in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, NMPM, Lea County, New Mexico. Rice Operating Company operates a salt water disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage Abatement Plan Proposal presents the following subsurface investigation activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install a minimum of 3 monitoring wells; if necessary, install additional wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground

water samples for labora tory analysis from each, monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted. Published in the Lovington Daily Leader April 9, 1999.

#### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505)827-7131:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505)393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately .6 miles southwest of Hobbs, NM in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, NMPM, Lea County, New Mexico. Rice Operating Company operates a salt water disposal pipeline at the site. Phase-se-parated hydrocarbon (PSH) has been observed on the ground water. The Stage 1 Abatement Plan Proposal presents the following subsurface investigation activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; in stall a minimum of 3 monitoring wells; if necessary, install additional wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; and prepare a report summarizing, field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to, the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505)393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted. #16540

### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505)393-9174 , 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately .6 miles southwest of Hobbs, NM in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, NMPM, Lea County, New Mexico. Rice Operating Company operates a salt water disposal pipeline at the Phase-separated hydrocarbon (PSH) has been observed on the site. ground water. The Stage 1 Abatement Plan Proposal presents the following subsurface investigation activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install a minimum of 3 monitoring wells; if necessary, install additional wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted.

RE: Stage I Abatement Plan Junction I-9 Release Site NE 1/4 SE 1/4 Section 09-Ts19s-R38e Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Ms. Haynes:

The New Mexico Oil Conservation Division (OCD) has reviewed Rice Operating Company 's (ROC) January 19, 1999 Stage I Abatement Plan for the above referenced site. This document contains ROC's Stage 1 Abatement Plan Proposal for investigating ground water contamination resulting from a salt water disposal pipeline spill at ROC's Junction I-9 Release site.

The OCD has determined that the Stage 1 Abatement Plan Proposal is administratively complete. Before the OCD can issue approval of the Stage 1 proposal, the OCD requires that:

- 1. ROC issue by April 9, 1999 the attached public notice of the Stage 1 proposal in the Albuquerque Journal, Hobbs News Sun and the Lovington Daily Leader pursuant to OCD Rule 19.G.(2).
- 2. Prior to issuing the public notice, ROC will also issue written notice of the Stage 1 proposal pursuant to OCD Rule 19.G.(1). For written notification of "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d), enclosed you will find a 3.5" disk containing a "WordPerfect" listing of those persons.

Please provide the OCD with proof of notice upon completing issuance of the written and public notice. If you have any questions, please contact Wayne Price of my staff at (505) 827-7155.

Sincerely,

and

Roger C. Anderson Environmental Bureau Chief

### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Rice Operating Company, Carolyn Doran Haynes, Operations Engineer, Telephone (505)393-9174, 122 West Taylor, Hobbs, New Mexico 88240, has submitted a Stage 1 Abatement Plan Proposal for the Pipeline Junction I-9, Hobbs Salt Water Disposal System, located approximately .6 miles southwest of Hobbs, NM in the NE 1/4, SE 1/4 of Section 09, Township 19 South, Range 38 East, NMPM, Lea County, New Mexico. Rice Operating Company operates a salt water disposal pipeline at the site. Phase-separated hydrocarbon (PSH) has been observed on the ground water. The Stage 1 Abatement Plan Proposal presents the following subsurface investigation activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install a minimum of 3 monitoring wells; if necessary, install additional wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted.

Re: Stage I Abatement Plan Junction I-9 Release Site Unit Letter I, Section 9 of T19S R38E Hobbs Salt Water Disposal System Lea County, New Mexico

Mr. Price:

Enclosed is the Stage I Abatement Plan required by your letter dated December 17, 1998. I have also enclosed a draft Notice of Publication. Within 15 days after the New Mexico Oil Conservation Division (OCD) determines that the Stage I Abatement Plan is administratively complete, Rice Operating Company will issue public notice in a form approved by OCD in a newspaper of general circulation in the county in which the release occurred, and in a newspaper of general circulation in the State. Prior to public notice, Rice shall give written notice, as approved by the OCD, of this Stage I Abatement Plan to the following persons:

- Surface owners of record within 1 mile of the perimeter of the geographic area where the standards and requirements are exceeded.
- The County Commission for the geographic area where the standards and requirements are exceeded is located.
- The appropriate city official(s) for the geographic area where the standards and requirements are exceeded is located.

- Those persons, as identified by the Director, who have requested notification.
- The New Mexico Trustee for Natural Resources, and any other local, state, or federal governmental agency affected, as identified by the Director, which shall be notified by certified mail.
- The appropriate Governor or President of any Indian Tribe, Pueblo or Nation if the geographic area where the standards and requirements are exceeded is located or partially located within tribal boundaries or within 1 mile of the tribal boundaries, who shall be notified by certified mail.

Please contact me at (505) 393-9174 with your comments or suggested changes.

Sincerely,

7. Wesley Root

## State of New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage I Abatement Plan has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Rice Operating Company, F. Wesley Root (505) 393-9174, 122 West Tavlor. Hobbs, New Mexico 88240, has submitted a Stage I Abatement Plan Proposal for Pipeline Junction I-9, Hobbs Salt Water Disposal System, 0.6 miles southwest of Hobbs in the NE/4, SE/4 of Section 09, Township 19 South, Range 38 East, Lea County, New Mexico. The site is approximately one acre where Rice Operating Company operates a saltwater disposal pipeline. Light Non-Aqueous Phase Liquid (LNAPL) has been observed on the ground water. The Stage I Abatement Plan presents the following subsurface investigation activities: determine site geology and hydrogeology, and physical properties of the aquifer; conduct a registered water well search within a one mile radius of the site; installation of monitoring wells to delineate impact at the site; collect soil and groundwater samples for laboratory analysis from each monitor well to determine the magnitude of impact to ground water; survey all well locations to establish a relative datum; obtain depth to ground water measurements; calculate the ground water gradient and flow direction; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage I Abatement Plan may be viewed at the above address or at the Oil Conservation Division District Office, 1000 West Broadway, Hobbs, New Mexico 88240, Telephone (505) 392-4046, between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage I Abatement Plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which comments may be submitted to him.

# Memorandum Of Conversation

<u>Telephone</u> XX Meeting

Date: December 17, 1998 Time: 11:00 am

To: W Price-NMOCD

From: Wes Root-Rice Operating Co.

Re: Abatement Plan (AP-8) Requirement Rice Operating Company Hobbs Salt Water Disposal System UL I-Sec 9-Ts19s-R38e Lea County, New Mexico

### **Discussions:**

Wes Root requested permission to install three monitor wells in addition to the one recovery well requested in letter/fax dated 12/15/98. This decision was made after ROC confirmed there is a nearby domestic water well.

### **Conclusions/Agreements:**

NMOCD will grant permission in letter with conditions to be drafted today and faxed.

ROC will fax request in writing today.

Mr. Bill McNeill P.O. Box 1058 Hobbs, NM 88241 505-392-8790

Re: Abatement Plan (AP-8) Requirement Rice Operating Company Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Mr. McNeill:

New Mexico Oil Conservation Division (NMOCD) hereby gives notice that NMOCD has required Rice Operating Company to submit an Abatement Plan for the above referenced facility located in Unit Letter I, Section 9-Ts 19s-R38e, pursuant to NMOCD Rule 19 (Prevention and Abatement of Water Pollution). A copy of Rule 19 has been enclosed for your information.

Pursuant to our telephone conversation on December 15, 1998 NMOCD understands that you are the current land owner and that one of your down gradient water wells approximately 1/4 mile away which is used for watering domestic stock has been impacted from this spill. We understand your technical adviser has sampled this well to verify this fact and has indicted to you that ground water movement could be as high as three feet per day. In order to expedite this matter NMOCD respectfully requests that you send us a map showing the location of your well in reference to the spill, the analytical results of any water quality sampling, and information from your technical adviser as to the ground water flow rate.

NMOCD understands you wish to intervene in this case and will copy you on all correspondence concerning this issue. NMOCD is very concerned about any oilfield groundwater contamination in the state of New Mexico and requires that a responsible person abate pollution in accordance with all applicable rules and regulations.

If you require any further information or assistance please do not hesitate to write or call me at (505-827-7155).

Sincerely Yours,

Wayne Price

Re: Junction I-9 Release Site Unit Letter I, Section 9 of T19S R38E Hobbs Salt Water Disposal System Lea County, New Mexico

Mr. Price:

Rice Operating Company requests that the New Mexico Oil Conservation Division approve the installation of a recovery well at the above listed site as an interim abatement measure.

As we discussed during our telephone conversation this morning, the well would be used to recover crude oil floating on top of the water table at the site until an abatement plan pursuant to 19 NMAC 15.A.19 can be approved and implemented. A site map showing the proposed location for the recovery well (RW-1) and well construction diagram are enclosed.

Crude oil would be recovered by manually bailing the well a minimum of three days per week. The initial bailing schedule will be Monday, Wednesday, and Friday. After measuring the volume of crude oil recovered during each bailing event, the recovered fluids will be placed back into the Hobbs Salt Water Disposal System for disposal. A monthly summary of the crude oil volume recovered, including a cumulative total, will be prepared and kept on file at our Hobbs Office.

Your prompt response to this request will greatly assist our abatement efforts. If you have any questions please feel free to call.

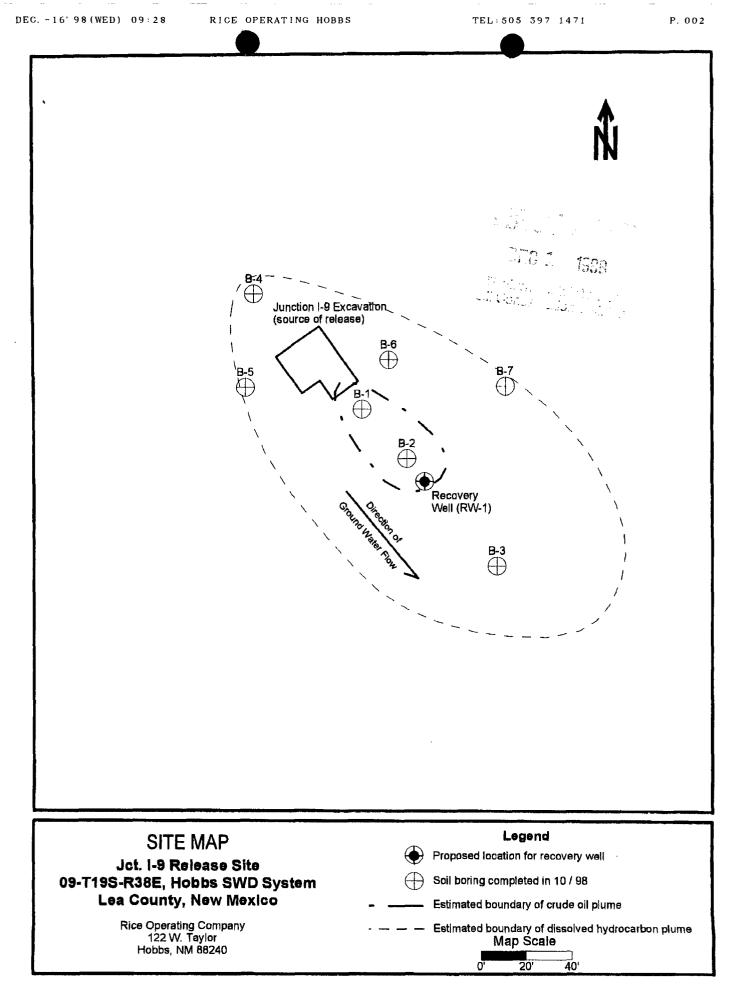

Sincerely,

F. Wesley Root

### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan (site investigation) proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco. Sante Fe, New Mexico 87505, Telephone (505) 827-7131;

Shell Oil Company, Wayne Hamilton, (800) 489-8109, 200 North Dairy Ashford, Houston, Texas 77079, has submitted a Stage 1 Abatement Plan (Site Assessment) proposal for the former Grimes Tank Battery site, Tasker Road site and portions of the Westgate Subdivision. Portions of the sites contain petroleum residues from former oil and gas operations. The abatement plan addresses: a) Site history, b) Proposed work in the Westgate Subdivision, Grimes Battery and Tasker Road locations, c) Quality assurance, d) Work schedule, e) Health and Safety Plan and, f) References. The Stage 1 Abatement Plan (site assessment) will define petroleum in the soil and groundwater to prepare a Stage 2 Abatement Plan (site remediation).

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan (Site assessment) proposal may be viewed at the above address or at the Oil Conservation Division District 1 Office, 1000 W Broadway, Hobbs, New Mexico 88240, Telephone (505) 393-6161, between 8:00 a.m. and 3:30 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement (site investigation) plan, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which comments may be submitted.

From: Williams, Chris Sent: Wednesday, November 18, 1998 4:48 PM To: Wrotenbery, Lori Cc: Olson, William Subject: Groundwater contamination case-Ref UL-I Sec 9-T19-38E, McNeill Ranch

Lorie- I met with Bill McNeill today (11/18/98) and discussed with him the problems he is having in dealing with Rice Operating Co. pertaining to a pipeline leak that occurred on his private land 6/5/98. The leak was called in to this office on the same day according to the C141. The C141 was filed on or about the time.(The date stamp was missing) Wayne Price calculated based on Rice's information that the penetration of the leak would be less than one foot.

Bill Olson has received word from Rice that the leak has impacted groundwater on 10/22/98 and they are being required to submit a groundwater abatement plan.

Mr. McNeill is upset about the time it has taken to get Rice to do the investigation to determine that groundwater had been impacted. I explained the normal process that we use in investigation of spills and leaks. At the time, when I was discussing the situation with Mr. McNeill I did not know that this leak had been reported by Rice.

I believe that Mr. McNeill feels that we are not doing our jobs in keeping up with the groundwater problems in this area. I told Mr. McNeill that I would convey his concern about the groundwater issues and the state's performance problems. Chris

Re: Junction I-9 Release Site Unit Letter I, Section 9 of T19S R38E Hobbs Salt Water Disposal System Lea County, New Mexico

505-827-8177

Mr. Price:

Rice Operating Company requests that the New Mexico Oil Conservation Division approve the installation of a recovery well at the above listed site as an interim abatement measure.

As we discussed during our telephone conversation this morning, the well would be used to recover crude oil floating on top of the water table at the site until an abatement plan pursuant to 19 NMAC 15.A.19 can be approved and implemented. A site map showing the proposed location for the recovery well (RW-1) and well construction diagram are enclosed.

Crude oil would be recovered by manually bailing the well a minimum of three days per week. The initial bailing schedule will be Monday, Wednesday, and Friday. After measuring the volume of crude oil recovered during each bailing event, the recovered fluids will be placed back into the Hobbs Salt Water Disposal System for disposal. A monthly summary of the crude oil volume recovered, including a cumulative total, will be prepared and kept on file at our Hobbs Office.

Your prompt response to this request will greatly assist our abatement efforts. If you have any questions please feel free to call.

Sincerely,

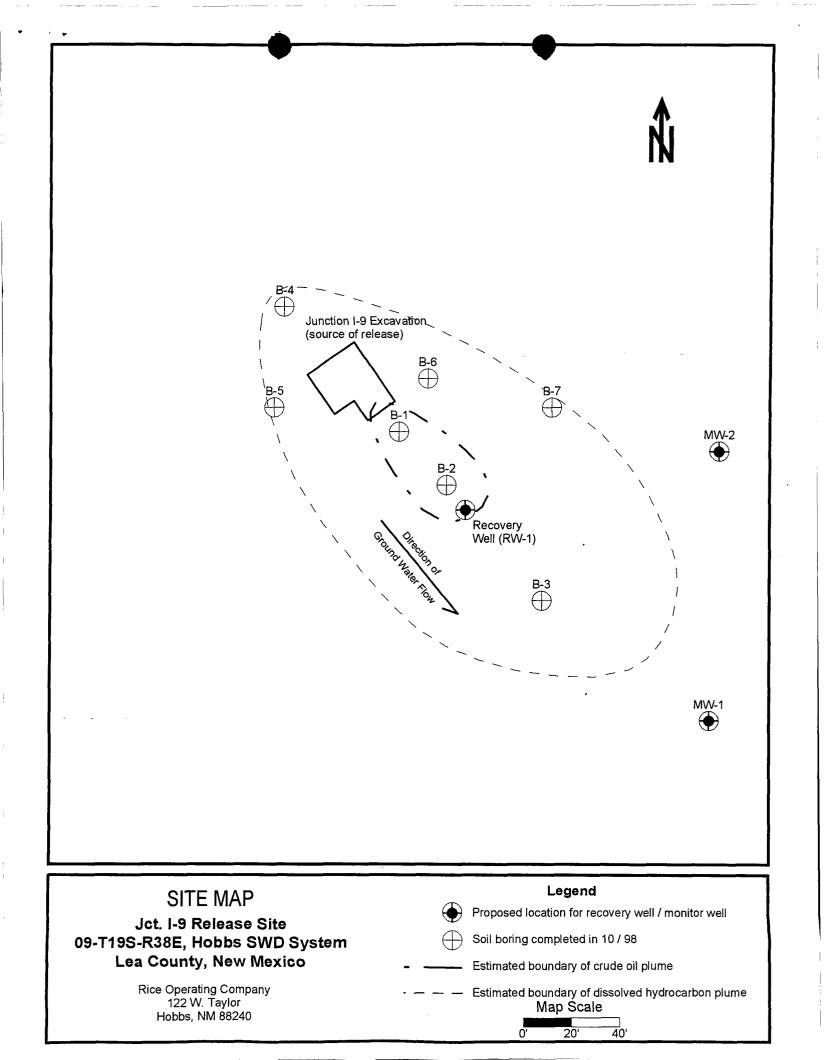

F. Wesley Root

# Memorandum Of Conversation

<u>Telephone</u> XX Meeting

Date: December 15, 1998 Time: approx. 9am

To: Bill McNeil 505-392-8790

From: Wayne Price- Return call Roger Anderson, Bill Olson, Jack Ford

- Re: Complaint concerning Rice Operating Co. Groundwater Abatement Plan for the Rice Hobbs Salt Water Disposal System UL I-sec 9-Ts19s-R38e.
- **Discussions:** Mr. McNeil complained about the amount of time that Rice had been given concerning the abatement plan process. Mr. McNeil told us that this problem had already impacted one of his down gradient water wells and that his technical consultants had advised him that the ground water could be moving as fast as three feet a day. We ask Mr. McNeil if OCD could get a copy of sampling report he declined our request.

Mr. McNeil wants Monitor wells to be installed immediately and does not like the time frame allowed in the abatement process.

Mr. McNeil indicated that he was notifying us that OCD would be included in a law suit concerning this issue.

**Conclusions/Agreements:**

Mr. F. Wesley Root Projects Manager Rice Operating Company (ROC) 122 West Taylor Hobbs, New Mexico 88240

RE: Abatement Plan (AP-8) Requirement Rice Operating Company Hobbs Salt Water Disposal System Lea County, New Mexico

Dear Mr. Root:

The New Mexico Oil Conservation Division (OCD) has reviewed Rice Operating Company's (ROC) Release Notification letter dated October 22, 1998 concerning the discovery of hydrocarbon-impacted ground water on October 20, 1998 located at ROC's Hobbs Salt Water Disposal System Unit letter I, Section 9, Township 19 south, Range 38 east in Lea County, New Mexico.

Pursuant to 19 NMAC 15.A.19.C.1, the OCD requires an abatement plan for the ROC site to abate ground water pollution. To initiate the abatement plan process, the OCD requires that ROC submit to the OCD by January 20, 1999 a Stage 1 abatement plan investigation proposal pursuant to OCD Rule 19.E.1. and OCD Rule 19.E.3.

If you have any questions, please contact Wayne Price of my staff at (505) 827-7155.

Sincerely,

Roger C. Anderson Environmental Bureau Chief

Mr. Roger Anderson State of New Mexico Energy and Minerals Department Oil Conservation Division 2040 South Pacheco Street Santa Fe, New Mexico 87505

Re: Release Notification Unit Letter I, Section 9 of T19S R38E Hobbs Salt Water Disposal System Lea County, New Mexico

Mr. Anderson:

On October 20, 1998, Rice Operating Company discovered hydrocarbon-impacted ground water at the above listed location and immediate verbal notification of the impact was made to the New Mexico Oil Conservation Division (NMOCD) District I Office. The purpose of this letter is to provide a timely written notification of an unauthorized release to the NMOCD pursuant to Rule 116.

The impacted ground water was identified during the course of a subsurface investigation to delineate the extent of soil impact from a pipeline leak that occurred in June 1998. Our initial findings indicate that a small plume of crude oil, approximately 30 feet long by 20 feet wide, is floating on the ground water beneath the site at a depth of approximately 30 feet below ground surface.

The pipeline leak was discovered and repaired on June 5, 1998. Notification of an unauthorized release was submitted to the NMOCD District I Office in accordance with Rule 116. The surface area adversely impacted by the release covered approximately 6,360 square feet. A copy of the Release Notification (Form C-141) is enclosed.

If you have any questions please feel free to call.

Sincerely,

7. Welesley Root

# **HYDRUS-1D for Windows**

The demo version of the program, and examples and manican be downloaded from our <u>FTP</u> site. HYDRUS-1D tutorial

### October 1998 Version: 2.0

HYDRUS-1D is a Microsoft Windows-based modeling environment for analysis of water flow and solute transport in variably saturated porous media.

The software package includes the one-dimensional finite element model HYDRUS (version 7.0) for simulating the movement of water, heat, and multiple solutes in variably saturated media.

The model is supported by an interactive graphics-based interface for data-preprocessing, discretization c the soil profile, and graphic presentation of the results.

# HYDRUS Model (version 7.0)

The HYDRUS program is a finite element model for simulating the **one-dimensional** movement of wate heat, and multiple solutes in variably saturated media. The program numerically solves the Richards' equation for saturated-unsaturated water flow and Fickian-based advection dispersion equations for heat solute transport.

The Flow equation incorporates a sink term to account for water uptake by plant roots.

The Heat transport equation considers conduction as well as convection with flowing water.

The **Solute** transport equations consider advective-dispersive transport in the liquid phase, and diffusion the gaseous phase.

# The transport equations also include provisions for:

- Nonlinear and/or Nonequilibrium reactions between the solid and liquid phases,
- Linear equilibrium reactions between the liquid and gaseous phases,
- Zero order production, and
- Two First order degradation reactions:
  - One which is independent of other solutes, and
  - One which provides the coupling between solutes involved in sequential first-order decay

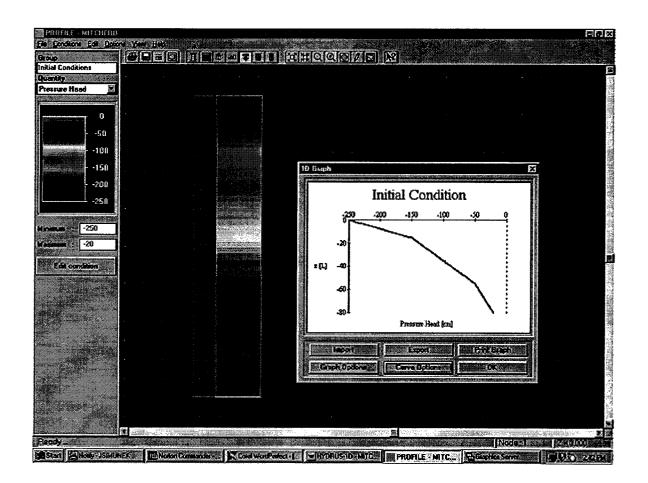

Page 3 of 7

reactions.

The program may be used to analyze water and solute movement in unsaturated, partially saturated, or fu saturated porous media.

The flow region itself may be composed of nonuniform soils. Flow and transport can occur in the vertica horizontal, or a generally inclined direction. The water flow part of the model can deal with (constant or time-varying) prescribed head and flux boundaries, boundaries controlled by atmospheric conditions, as as free drainage boundary conditions. Soil surface boundary conditions may change during the simulation from prescribed flux to prescribed head type conditions (and vice versa).

For solute transport the code supports both (constant and varying) prescribed concentration (Dirichlet or first-type) and concentration flux (Cauchy or third-type) boundary conditions. The dispersion coefficient includes terms reflecting the effects of molecular diffusion and tortuosity.

The Unsaturated Soil Hydraulic Properties are described using van Genuchten [1980], Brooks and Co [1964] and modified van Genuchten type analytical functions. Modifications were made to improve the description of hydraulic properties near saturation. The HYDRUS code incorporates hysteresis by using empirical model introduced by Scott et al. [1983] and Kool and Parker [1987]. This model assumes that drying scanning curves are scaled from the main drying curve, and wetting scanning curves from the mai wetting curve.

#### HYDRUS-1D 1998 VERSION 2.0

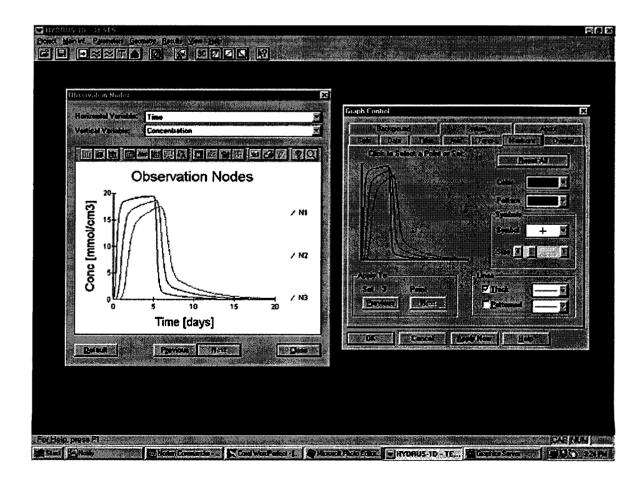

Page 4 of 7

HYDRUS also implements a **scaling** procedure to approximate hydraulic variability in a given soil profil means of a set of linear scaling transformations which relate the individual soil hydraulic characteristics t those of a reference soil.

**Root growth** is simulated by means of a logistic growth function. Water and salinity stress response functions can be defined according to functions proposed by Feddes et al. [1978] or van Genuchten [198].

The governing flow and transport equations are solved **numerically** using Galerkin type linear finite eler schemes. Integration in time is achieved using an implicit (backwards) finite difference scheme for both saturated and unsaturated conditions. Additional measures are taken to improve solution efficiency for transient problems, including automatic time step adjustment and adherence to preset ranges of the Coura and Peclet numbers. The water content term is evaluated using the mass conservative method proposed b Celia et al. [1990]. Possible options for minimizing numerical oscillations in the transport solutions inclu upstream weighing, artificial dispersion, and/or performance indexing.

HYDRUS implements a Marquardt-Levenberg type parameter estimation technique for inverse estimatio selected soil hydraulic and/or solute transport and reaction parameters from measured transient or steady-state flow and/or transport data. The procedure permits several unknown parameters to be estimated from observed water contents, pressure heads, concentrations, and/or instantaneous or cumulative boundary flu (e.g., infiltration or outflow data). Additional retention or hydraulic conductivity data, as well as a penalt function for constraining the optimized parameters to remain in some feasible region (Bayesian estimatio can be optionally included in the parameter estimation procedure.

# **User Interface**

A Microsoft Windows-based graphical user interface (GUI) manages the input data required to run HYDRUS, as well as for nodal discretization and editing, parameter allocation, problem execution, and visualization of results.

All spatially distributed parameters, such as soil type/layer, root water uptake distribution, and the initial conditions for water, heat and solute movement, are specified in a graphical environment.

The location of discretization nodes can be graphically edited by a user to optimize the thickness of differelements.

The program includes controls to allow a user to build an application specific flow and transport model,  $\varepsilon$  to perform graphical analyses on the fly.

Both input and output can be examined using graphical tools.

The HYDRUS-1D shell program translates all geometric and parameter data into the HYDRUS input for

File management is handled by a sophisticated project manager.

# **Post-Processing**

Post-processing is also carried out in the shell.

HYDRUS-1D offers graphs of the distribution of the pressure head, water content, water and solute fluxe root water uptake, temperature and the concentration in the soil profile at preselected times.

Output also includes variable-versus-time plots, such as actual, potential and cumulative fluxes across boundaries or leaving the root zone.

Observation points can be added anywhere in the profile to obtain graphical output for the water content, pressure head, temperature, and/or the concentration.

Peripheral devices supported include most popular types of printers and plotters.

A small catalog of soil hydraulic properties is included in the program.

Extensive context-sensitive, online Help is part of the interface.

# Test Examples distributed with the model:

# Direct:

- 1. Water Flow and Solute Transport in a field soil profile under grass Seasonal simulation
- 2. Infiltration and Drainage in a large caisson
- 3. Transient Flow involving hysteresis

- 5. Solute Transport with nonlinear cation adsorption Data from Lai and Jurinak
- 6. Solute Transport with nonlinear cation adsorption Data from Selim
- 7. Solute Transport with nitrification chain
- 8. Solute Transport with non-equilibrium cation adsorption
- 9. Heat Transport under fluctuating atmospheric condition

#### Inverse:

- 1. One-step outflow experiment Data from Kool et al. (1987)
- 2. Multistep Outflow Experiment Data from Jan Hopmans
- 3. Evaporation Experiment Data from Ole Wendroth
- 4. Upward Infiltration
- 5. Transient Flow involving hysteresis
- 6. Solute Transport with nonlinear cation adsorption Data from Lai and Jurinak
- 7. Solute Transport with nonlinear cation adsorption Data from Selim
- 8. Solute Transport with nitrification chain
- 9. Horizontal infiltration Data from George Vachaud
- 10. Horizontal infiltration and redistribution Data from George Vachaud
- 11. Drainage in a sand column Data from George Vachaud
- 12. Water Flow in a field soil profile under grass Seasonal simulation

#### System Requirements:

Intel 80386 with math coprocessor, Intel 80486DX, or higher processor, 4 Mb RAM, DOS 5.0 or higher, hard disk with at least 10 Mb free disk space, VGA graphics (SVGA with 256 colors recommended), MS Windows 95, 98, or Windows NT.

#### Authors:

J. Simunek, K. Huang, <u>M. Sejna</u>, and <u>M.Th. van Genuchten</u> U.S. Salinity Laboratory, USDA/ARS, Riverside, California

#### **Ordering Information:**

The **HYDRUS-1D** software package is distributed by the International Groundwater Modeling Center. <u>IGWMC</u> also prints the manual and provides help with its installation and use. Below is the reference of manual and the <u>IGWMC</u> contact address where you can get more information, and where you can order t software.
