Subject: Bertha Barbara Tank Battery Remediation
Importance: High

Bill,

Please find enclosed a scanned copy of the letter I sent you for former Bertha Barbara Tank battery. I appreciate your quick review and approval. Original signed letter was sent to you in regular mail.

Please call or reply to this e-mail if you need more information.

**RE: Request for withdrawal of Modified Stage 2 Abatement Plan
Former Bertha Barbara Tank Battery Facility
Lea County, New Mexico**

Dear Mr. Olson,

Marathon Oil Company (MOC) submitted a modified Stage 2 Abatement Plan for surface restoration of the above referenced site for OCD's review and approval in 2003. Since then, several documents have been submitted to the OCD for review and approval of modified Stage 2 Plan. Based on our meeting of April 21, 2004, Marathon is now withdrawing this modified plan with the understanding that the surface restoration of the above referenced site could be conducted reverting back to the original Stage 2 Abatement Plan approved by OCD in 2001.

The approved restoration plan (2001) consists of removing three foot of the surface petroleum contaminated soils from the former tank battery site and pit areas as outlined in Section 7 of the Stage 2 Abatement Plan. Prior to replacement of clean soils, a six inch layer of clay material will be placed in the excavation to eliminate groundwater contamination from residual hydrocarbon in the subsurface.

I have summarized Marathon's proposal/requests below. These requests were discussed in our meeting on April 21st. These requests were also presented in the 2003 Annual Report submitted in March, 2004.

1. Marathon requests the option of using 8 mil plastic liner instead of clay liner as proposed in the Stage 2 Abatement Plan (2001).
2. MW-1 and MW-2 are located in the former pit/tank battery pad area where excavation and clay liner cap is proposed. Since these wells are in the middle of the source, capping will not be effective with out removing these wells. Hence Marathon requests plug and abandoning of MW-1 and MW-2.
3. Marathon proposes to change sampling frequency to yearly. The site monitor wells were monitored in April 2004. If this proposal is approved, annual sampling will be performed in the month of April for this site.
4. Marathon also would like to request exclusion of Metals and Semi-VOCs compounds from sampling program. Annual sampling would consist of BTEX, TPH, Chlorides and TDS.

I appreciate your quick review and approval of the above request. You may reach me at (713) 296-2213 or (713) 408-6775 (cell) if you need more information.

Sincerely,

A handwritten signature in cursive script that reads "Vijay Kurki".

Subject: Former Bertha Barbara Tank Battery Site

Dear Bill,

I am in the process of completing the letter to retrieve modified Abatement Plan for Bertha Barbara Tank Battery site. I was out of the office last week as I was moving my family from Midland to Houston. I will get that letter out to you in the morning with other recommendations we discussed during the meeting and over phone.

The second quarterly sampling is due this month for this site. Based on our meeting, with your verbal approval to go with annual groundwater monitoring for this site, I have suspended second quarter sampling. Please confirm this is OK with you by replying to this e-mail.

Thank you.

Subject: Monitoring Well Installations - Dynegy Monument Gas Plant and Bertha Barber Tank Battery Site

Dear Bill and Paul,

Larson & Associates, Inc. has been retained to conduct subsurface investigations for Dynegy Midstream Services, L. P. at the Monument Gas Plant (GW-25) and the Marathon Bertha Barber Tank Battery (AP-11).

Monitoring well installation will commence at the Monument Gas Plant (SE/4, SW/4, Section 36, Township 19 South, Range 37 East, Lea County, NM) on Monday, December 15, 2003 at 9:00 am. Upon completion of one monitoring well at the Monument Plant, drilling will resume at the Bertha Barber site (N/2, SW/4, Section 5, Township 20 South, Range 37 East, Lea County, NM). Monitoring wells will be developed after completion, and groundwater sampling will be conducted on December 22, 2003.

Please call if you have any questions, or need additional information.

Sincerely,

Cindy Crain

**RE: STAGE 2 ABATEMENT PLAN MODIFICATION PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Kurki:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) August 22, 2003 correspondence titled "TPH REFERENCE MATERIAL REQUEST, FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO". This document provides 3 of 10 reference materials requested in the OCD's July 25, 2003 correspondence related to MOC's proposal to modify the previously approved Stage 2 Abatement Plan for soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North 1/2 of the Southwest 1/4 of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The proposed modification requests that MOC be allowed to place blended remediated soils with a concentration of up to 10,000 mg/l of total petroleum hydrocarbons (TPH) on top of the subsurface clay cap and up to the surface of the land.

MOC's technical justification for their abatement plan modification request is based upon a paper titled *Technical Basis for Current Soil Management Levels of Total Petroleum Hydrocarbons* by Wayne Hamilton et al.. The paper is part of a book titled *Risk-Based Decision-Making for Assessing Petroleum Impacts at Exploration and Production Sites* by Sara J. McMillen et al. The paper summarizes and makes conclusions about other published reference material and studies on TPH issues, but the reference materials were not provided. In order to consider the basis for conclusions regarding effects of TPH on plants, OCD's July 25, 2003 correspondence requested that MOC provide copies of references 15 through 24, which are listed on page 44 of McMillen et al.'s book. MOC's August 22, 2003 correspondence only supplied 3 of the 10 requested reference materials. Since these materials form the technical basis for MOC's modification request, the OCD requires that MOC provide the remaining 7 reference materials to the OCD Santa Fe Office by November 22, 2003 with a copy provided to the OCD Hobbs District Office.

If you have any questions, please contact me at (505) 476-3491.

Sincerely,

A handwritten signature in black ink, appearing to read "Will C. Olson". The signature is fluid and cursive, with the first name "Will" and last name "Olson" clearly distinguishable.

RE: TPH Reference Material Request
Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

Per your letter dated July 25, 2003, requesting additional reference material on the effects of TPH on plants, I have endeavored to obtain copies of the 10 papers you requested. However, I have only been successful in obtaining the three attached papers from Mr. Wayne Hamilton. Hopefully these papers will suffice in providing enough supporting data, since trying to obtain the remaining papers will be very time consuming.

If you have any questions or need any additional information, then please call me at (432) 687-8136.

Sincerely,

A handwritten signature in cursive script that reads 'Aaron B. Wilson Jr.'.

Re: Proposed Subsurface Investigation Work Plan, Dynegy Midstream Services, L.P., Pipeline Segment Near Bertha Barber Tank Battery, N/2, SW/4, Section 5, Township 20 South, Range 37 East, Lea County, New Mexico

Dear Mr. Olson,

Dynegy Midstream Services, L.P. (Dynegy) is submitting this work plan in response to your request dated March 6, 2003. Subsequent to your request I met with you in early May to gather additional information about the subject site and the work that Marathon had completed. At that time you approved an extension to file this work plan in June concurrently with a work plan for our Monument gas plant. Due to the small scope of this work plan it is our intent to reduce mobilization costs and complete this work back-to-back with the work at the Monument plant. The work plan for the Monument plant is also being submitted to your office under separate letter on this date.

Dynegy has two (2) steel natural gas gathering pipelines that cross along the northern border of the former Bertha Barber Tank Battery. Based on findings by Marathon and the previous repair history of these two (2) pipelines, Dynegy is proposing to conduct a limited investigation near the northwest corner of the Bertha Barber battery site in the vicinity of the previous pipeline repairs. Please note that Dynegy has previously investigated and sampled soil at the most recent repair site, (refer to our letter to your office from Mr. Cal Wrangham, dated June 9, 2000). Sample results from that investigation were non detect for BTEX and TPH.

Dynegy is proposing to complete two (2) borings from surface to groundwater to investigate possible impacts to soil and/or groundwater. The borings will be completed up gradient and down gradient of our pipeline where the repairs were completed. More specifically one of the borings will be located between Marathon's monitoring well MW-10 and our gathering lines. The second boring will be located further up gradient on the north side of our gathering line. The borings will be drilled using a truck-mounted air rotary drilling rig, and samples will be collected in clean glass sample jars, labeled, chilled in an ice chest and delivered under chain-of-custody control to an environmental laboratory for possible analysis.

Mr. William C. Olson
June 23, 2003
Page 2

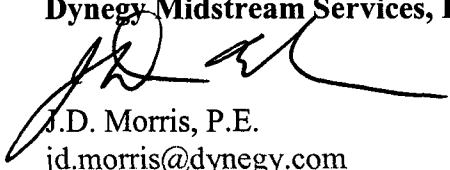

A duplicate of each sample will also be collected for headspace analysis using a photo ionization detector (PID) and the ambient temperature headspace (ATH) method.

Generally, the sample exhibiting the highest PID reading and the deepest sample (above groundwater) from each boring will be analyzed for total petroleum hydrocarbons (TPH) using EPA method SW-846-8015 for gasoline-range (GRO) and diesel-range organics (DRO). Samples exhibiting PID readings above 100 ppm will be analyzed for BTEX. All sampling equipment and tools will be thoroughly decontaminated between events.

The borings will be advanced to groundwater, and a groundwater sample will be collected using a dedicated disposable bailer, and carefully transferred to a laboratory-prepared container, labeled, chilled in an ice chest and delivered under chain-of-custody control to an environmental laboratory. The samples will be analyzed for BTEX using method SW-846-8021B. An observation for PSH will be determined using an electronic interface probe before the boring is plugged with cement and bentonite grout.

Results of the investigation will be submitted to the NMOCD as soon as possible but no later than six (6) weeks after the sampling is completed. I anticipate discussing this work plan with you in mid July at your convenience, with the work scheduled to begin shortly after your approval. Please give me a call if you have any questions or need further information.

Sincerely,
Dynegy Midstream Services, L.P.

**RE: STAGE 2 ABATEMENT PLAN MODIFICATION PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Wilson:

The New Mexico Oil Conservation Division (OCD) has reviewed the following Marathon Oil Company's (MOC) documents:

- June 6, 2003 "PROOF OF PUBLIC NOTICE FOR STAGE 2 ABATEMENT PLAN MODIFICATION, FORMER BERTHA BARBER TANK BATTERY, GROUNDWATER ABATEMENT PLAN (AP-11), LEA COUNTY, NEW MEXICO".
- March 24, 2003 correspondence titled "SURFACE RESTORATION PLAN, FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO".
- March 17, 2003 "YEAR 2002 ANNUAL GROUNDWATER MONITORING REPORT, FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO".

These documents request to modify the previously approved Stage 2 Abatement Plan for soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The documents also contain proof of public notice of the proposed modification. The proposed modification requests that MOC be allowed to place blended remediated soils with a concentration of up to 10,000 mg/l of total petroleum hydrocarbons (TPH) on top of the subsurface clay cap and up to the surface of the land.

Mr. Aaron B. Wilson
July 25, 2003
Page 2

The March 17, 2003 document references the paper titled *Technical Basis for Current Soil Management Levels of Total Petroleum Hydrocarbons* by Wayne Hamilton et al. as one of the reasons for the proposed modification. The paper is part of a book titled *Risk-Based Decision-Making for Assessing Petroleum Impacts at Exploration and Production Sites* by Sara J. McMillen et al. Portions of this book are also used as justification for the proposed modification. The OCD has a copy of this book, but has some questions regarding the Hamilton et al. paper. The paper summarizes and makes conclusions about other published reference material and studies on TPH issues, but the reference material is not provided. In order to consider the basis for conclusions regarding effects of TPH on plants, please provide copies of references 15 through 24 which are listed on page 44 of McMillen et al.'s book. Please provide this information to the OCD Santa Fe Office by August 25, 2003 with a copy provided to the OCD Hobbs District Office.

If you have any questions, please contact me at (505) 476-3491.

**RE: STAGE 2 ABATEMENT PLAN MODIFICATION PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. King:

The Oil Conservation Division (OCD) has received your May 20, 2003 letter commenting on and objecting to Marathon Oil Company's (MOC) request to modify the previously approved Stage 2 Abatement Plan for soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, Lea County, New Mexico. The proposed modification requests that MOC be allowed to place blended remediated soils with a concentration of up to 10,000 mg/l of total petroleum hydrocarbons (TPH) on top of the subsurface clay cap and up to the surface of the land.

The OCD has included your name as an intervenor in this case and you will receive copies of all OCD correspondence concerning the abatement plan. The OCD will continue to process the abatement plan and comments received until the plan is determined to be administratively approvable or denied. If the abatement plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the abatement plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. All intervenors will be allowed thirty (30) days from receipt of the determination to submit final comments on the conditions or request a public hearing in lieu of administrative approval. A request for a public hearing must be in writing and must include the reasons why a hearing should be held.

The OCD appreciates your input on the environmental and public health issues relating to this abatement plan.

The OCD will continue to process the abatement plan and comments received until the plan is determined to be administratively approvable or denied. If the abatement plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the abatement plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. All intervenors will be allowed thirty (30) days from receipt of the determination to submit final comments on the conditions or request a public hearing in lieu of administrative approval. A request for a public hearing must be in writing and must include the reasons why a hearing should be held.

The OCD appreciates your input on the environmental and public health issues relating to this abatement plan.

**RE: STAGE 2 ABATEMENT PLAN MODIFICATION PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Samberson:

The Oil Conservation Division (OCD) has received your May 30, 2003 letter, on behalf of the Lea County Water Users Association, commenting on and objecting to Marathon Oil Company's (MOC) request to modify the previously approved Stage 2 Abatement Plan for soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, Lea County, New Mexico. The proposed modification requests that MOC be allowed to place blended remediated soils with a concentration of up to 10,000 mg/l of total petroleum hydrocarbons (TPH) on top of the subsurface clay cap and up to the surface of the land.

The OCD has included your name as an intervenor in this case and you will receive copies of all OCD correspondence concerning the abatement plan. The OCD will continue to process the abatement plan and comments received until the plan is determined to be administratively approvable or denied. If the abatement plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the abatement plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. All intervenors will be allowed thirty (30) days from receipt of the determination to submit final comments on the conditions or request a public hearing in lieu of administrative approval. A request for a public hearing must be in writing and must include the reasons why a hearing should be held.

The OCD appreciates your input on the environmental and public health issues relating to this abatement plan.

RE: Proof of Public Notice for Stage 2 Abatement Plan Modification
Former Bertha Barber Tank Battery, Groundwater Abatement Plan (AP-11)
Lea County, New Mexico

Dear Mr. Anderson:

Pursuant to your letter, dated April 17, 2003, attached are the affidavits of publication from the Albuquerque Journal, Hobbs News-Sun and Lovington Daily Leader for the public notice of the proposed Stage 2 Abatement Plan Modification for the above referenced site. The public notice was published in all three newspapers on May 1, 2003. Also, attached are copies of the certified mail receipts for the notification letters, along with an example of the notification letter and public notice, which were submitted to the surface owners and other parties, identified by the Director, who have requested notification. These notification letters were mailed on April 30, 2003, prior to the issuing the public notice.

Marathon is requesting written authorization as soon as possible from the OCD to commence with the proposed Stage 2 Abatement Plan modification for surface restoration activities at the site in order to maximize seed germination and plant growth during calendar year 2003. If you have any questions, then please give me a call at (432) 687-8136.

Sincerely,

A handwritten signature in cursive script that reads 'Aaron B. Wilson, Jr.'.

NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following State 2 Abatement Plan modification proposal has been submitted to the Director of the Oil Conservation Division, 1220 South St. Francis Drive, Santa Fe, NM 87505, telephone (505) 476-3440.

Marathon Oil Company, Aaron I. Wilson, Project Manager, telephone (915) 687-8136, P.O. Box 552, Midland, TX 79702-0552, has submitted a Stage 2 Abatement Plan modification proposal for the former Bertha Barber Tank Battery, located south of Monument NM in the North 1/4 of the South West 1/4 of Section 5, Township 2 South, Range 37 East, NMPN Lea County, NM. Marathon Oil Company operated a crude oil tank battery at the site. Phase separated hydrocarbon have been observed on the ground water. The Stage 2 Abatement Plan modification proposal presents Marathon Oil Company's proposal for excavation of contaminated soils at the site to a depth of 1 foot, emplacement of a clay cap over contaminated soils, blending of excavated contaminated soils to a concentration of 10,000 mg/l of total petroleum hydrocarbon (TPH) and placing the blended soils atop the constructed clay cap up to the land surface.

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan modification proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, NM 88240, telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on the proposed Stage 2 Abatement Plan modification proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

May 1, 2003

NOTICE OF PUBLICATION

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES
DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil
Conservation Division Regulations, the following Stage 2
Abatement Plan modification proposals has been submit-
ted to the Director of the Oil Conservation Division, 1220
South St. Francis Dr., Santa Fe, New Mexico 87505,
Telephone (505) 476-3440.

Marathon Oil Company, Aaron B. Wilson, Project
Manager, Telephone (915) 687-8136, P.O. Box 552,
Midland, Texas 79702-0552, has submitted a Stage
2 Abatement Plan modification proposal for the
former Bertha Barber Tank Battery, located south of
Monument, New Mexico in the North 1/2 of the
Southwest 1/4 of Section 5, Township 20 South,
Range 37 East, NMPM, Lea County, New Mexico.
Marathon Oil Company operated a crude oil tank
battery at the site. Phase-separated hydrocarbon
have been observed on the ground water. The Stage
2 Abatement Plan modification proposal presents
Marathon Oil Company's proposal for excavation of
contaminated soils at the site to a depth of 3 feet,
emplacement of a clay cap over contaminated soils,
blending of excavated contaminated soils to a
concentration of 10,000 mg/1 of total petroleum
hydrocarbons (TPH) and placing the blended
soils atop the constructed clay cap up to the land
surface.

Any interested person may obtain further information from
the Oil Conservation Division and may submit to the Direc-
tor of the Oil Conservation Division, at the address given
above, written comments or a written request for a public
hearing that include reasons why a hearing should be held.
The Stage 2 Abatement Plan modification proposal may be
viewed at the above address or at the Oil Conservation Di-
vision Hobbs District Office, 1625 N. French Drive, Hobbs,
New Mexico 88240, Telephone (505) 393-6161 between
8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to
ruling on the proposed Stage 2 Abatement Plan modifica-
tion proposal, the Director of the Oil Conservation Division
shall allow at least thirty (30) days after the date of publica-
tion of this notice during which written comments or a writ-
ten request for a hearing may be submitted.

Dear «Salutation»:

RE: Stage 2 Abatement Plan Modification Notification
Former Bertha Barber Tank Battery

Pursuant to Oil Conservation Division Rule 19.G.(1), Marathon Oil Company (Marathon) hereby notifies you of the Stage 2 Abatement Plan Modification for Marathon Oil Company's Former Bertha Barber Tank Battery. Marathon is required to notify recipients specified in the rule, parties requesting notice of such matters and owners of surface tracts located within one (1) mile of the perimeter of the tank battery. The Notice Of Publication for the Stage 2 Abatement Plan Modification is enclosed.

Sincerely,

Aaron B. Wilson, Jr., P.G.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan modification proposal has been submitted to the Director of the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 476-3440.

Marathon Oil Company, Aaron B. Wilson, Project Manager, Telephone (915) 687-8136, P.O. Box 552, Midland, Texas 79702-0552, has submitted a Stage 2 Abatement Plan modification proposal for the former Bertha Barber Tank Battery, located south of Monument, New Mexico in the North $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon Oil Company operated a crude oil tank battery at the site. Phase-separated hydrocarbon have been observed on the ground water. The Stage 2 Abatement Plan modification proposal presents Marathon Oil Company's proposal for excavation of contaminated soils at the site to a depth of 3 feet, emplacement of a clay cap over contaminated soils, blending of excavated contaminated soils to a concentration of 10,000 mg/l of total petroleum hydrocarbons (TPH) and placing the blended soils atop the constructed clay cap up to the land surface.

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan modification proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on the proposed Stage 2 Abatement Plan modification proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

**Re: Marathon Oil Company/Bertha Barber Tank Battery
Stage 2 Abatement Plan**

Dear Ms. Wrotenbery,

This firm represents the Byrd Ranch and Mr. J.R. Byrd of Monument, New Mexico. Please accept this letter as Mr. Byrd's written request for a hearing on the above-referenced abatement plan (the "Plan") noticed on May 1, 2003, a copy of which is attached. The reasons for requesting such hearing are as follows:

1. The Plan may have an adverse impact on the public's health, safety and well-being.
2. The Plan does not adequately protect groundwater.
3. The Plan significantly deviates from the Guidelines for Remediation of Leaks, Spills and Releases (the "Guidelines").
4. Marathon's rationale to support a deviation from the Guidelines is flawed.
5. The Plan has an adverse impact on real property owned by Mr. Byrd, namely the Byrd Ranch.
6. The Plan places an undue burden on the public, Mr. Byrd and the owner of the surface estate at the Bertha Barber Tank Battery remediation site.

Because of the location of the Bertha Barber Tank Battery site and the impact to members of the public that live in and around Monument, I am requesting that the hearing be held at a public meeting place in Hobbs, New Mexico.

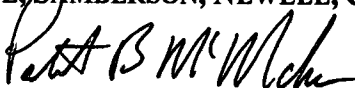

If you have any questions, please do not hesitate to call.

**Re: Marathon Oil company/Bertha Barber Tank Battery
Stage 2 Abatement Plan**

Dear Ms. Wrotenbery,

This firm represents the Lea County Water Users Association, whose members are comprised of the municipalities of Tatum, Lovington, Hobbs, Eunice and Jal; and the County of Lea, New Mexico, (hereinafter collectively referred to as "the Association").

The Association objects to the proposed Stage 2 Abatement Plan of Marathon Oil company (Marathon) described in the Legal Notice, published on May 1, 2003, a copy of which is attached hereto.

The Association has expended substantial time, effort and resources over the last several years to develop and implement a 40 year water plan for Lea County. The plan has been approved by the appropriate state authority and the Association in pursuing implementation of the plan. The Association believes approval of Marathon's proposal may adversely impact its 40 year water plan. In addition approval of such a plan appears to be contrary to the conservation of water and to be detrimental to the public welfare.

On behalf of the Association I request that a public hearing be held on Marathon's proposed Stage 2 Abatement Plan. In addition I request that the public hearing be held in Hobbs, New Mexico, in order to avoid placing a burden on members of the public of the time and expense required to attend a hearing in Santa Fe.

Sincerely,

RE Barber Tank Battery Stage 2 Remediation Plan

Dear Mr. Olson:

This letter presents our response to Marathon's proposed modification to the Stage 2 remediation plan for the Barber Tank Battery site near Monument, New Mexico.

We oppose the proposal to blend contaminated soil with uncontaminated soil until the mixture is below 1% TPH. The proposal presents no evidence that this process would be superior to the remediation originally proposed, or even that the resulting depth of contaminated soil would be successfully remediated by natural processes. The proposal presents no estimated time scale for the presumed natural remediation, and does not offer monitoring, addition of nutrients, or other means to assure progress of natural remediation.

Furthermore, the logic of this proposal would suggest that any unauthorized release of contaminants could be diluted until the concentration is below standards, without further remedial effort by the responsible person. Approval of such a proposal would set an unreasonable precedent.

If the proposal is approved by OCD, we request a hearing in which our objections may be presented.

Sincerely,

Dear Ms. Wrotenbery:

The New Mexico State Land Office has reviewed the request by Marathon Oil Company to modify the stage 2 abatement plan for reclamation of the Bertha Barber Tank Battery. Our staff has concluded that by increasing the total petroleum hydrocarbon levels (TPH) to a concentration of 10,000 mg/l. The existing topography of the land and ground water depths significantly increase the risk of contamination to the water table. Enclosed are copies of average ground water depths downloaded from the office of the State Engineer.

I would strongly encourage that the proposed adjustments to this stage 2 abatement plan be heavily considered. Thank you for your consideration in this manner. Please contact me at 505/827-5793 with any questions or comments.

Sincerely,

RE: Marathon Oil Co.
Stage 2 Abatement Plan
Bertha Barber Lease
N 1/2 of SW 1/4 Sect. 5, Tws. 20 S., Rng. 37 E.
Lea Co., NM

Director:

I just recently read the notice of publication and reviewed Marathon's plan concerning the Bertha Barber site. First of all, the proposed plan does not follow the guidelines set forth by the OCD for cleanup of leaks, spills and releases. It appears, to me, in order for the OCD to approve Marathon's plan, the rules and guidelines set forth by the OCD would have to change. Marathon has been studying this site for several years and as they prolong their obligation to cleanup, they continue to contaminate more groundwater. A reasonable and prudent operation would have taken care of this problem when it was discovered.

Also, from a study the New Mexico State Land Office conducted on the TPH levels in soil, they found that at the 1000 and 5000 ppm level, little or no growth of vegetation occurs, and Marathon wants to double this amount.

The OCD needs to take a close look at this proposal and deny this plan based on its own rules, regulations and guidelines and its own experience. If you cannot deny the application, I request a public hearing.

Thank you for your time.

Sincerely,

Eddie W. Seay

OIL CONSERVATION
DIVISIONDirector of the Oil Conservation Division
New Mexico Oil Conservation Division
1220 South St. Francis Drive
Santa Fe, New Mexico 87505

Madam Director:

I am writing this letter in opposition to Marathon Oil Company's request for modification to a Stage II Abatement Plan allowing Marathon to cap an old battery site at three feet and mix and blend the excavated materials to 10,000 mg/1 of the total petroleum hydrocarbons and placing the blended soil atop the clay barrier. The contamination site is located in the N1/2 of the SW1/4 of Section 5, Township 20 South, Range 37 East, of Lea County, New Mexico on property owned by Bertha Barber.

I am owner of the McNeill Ranch located in Lea County, New Mexico and Gaines and Andrews Counties, Texas. I am very concerned of the contamination in Lea County and its effect on the economic value of the affected lands. The site in question is within 25 feet of the top of ground water and the water table has been contaminated. NMOCD's present guide lines require TPH's within 50 feet of ground water to be cleaned to a level of less than 100 mg/1. The proposed modification would increase these guidelines 100 times and the water table being shallow requires the stricter requirements to protect its purity. Putting a cap on top of the contamination does not address the problem of washing the contamination from the side or overflow of the cap from above. The Monument community and Landowners at the present time have major contamination problems throughout the area and relaxing the existing regulations would only compound the present problem.

I respectfully request that the New Mexico Oil Conservation Division deny Marathon Oil Company's request of modification and adhere to the present regulations already in place.

Respectfully,

William F. McNeill

RE: Marathon Oil Company
Stage 2 Abatement Plan
Bertha Barber

Director:

As an offset landowner to the Barber lease, I strongly disagree with the plan that Marathon has proposed. If the OCD cannot turn this plan down based on its own rules and regulation, then a public hearing should be held. Listed are the things the OCD should consider:

1. This plan violated the Guidelines for Remediation of Leaks, Spills, and Releases set forth by the OCD in 1993.
2. The groundwater is much too shallow and precious to risk further contamination (groundwater is at 25' to 30').
3. There is no mention of salt water contamination.
4. This operator violates rule 313. It is clear Marathon failed to operate prudently.
5. Marathon has failed to properly cleanup after abandonment, Rule 202.
6. At the present cleanup level of 100, 1000, or 5000 parts TPH, we have problems getting re-vegetation to occur. The 10,000 TPH will make the site totally void of vegetation.
7. It appears that the abatement plan is strictly an economic plan, Marathon will save money by not properly cleaning up.

Please consider these things in your evaluation of the Marathon Plan, and do what is good for the environment and the land.

Sincerely,

Jimmie T. Cooper

Subject: Follow-up to May 1 Meeting on Bertha Barber Site

Dear Bill,

As always I enjoyed meeting with you and I appreciate your time in discussing the subject site. As we discussed, I am sending this email to recap our discussion on submission of a work plan.

On the day before our meeting I visited the Bertha Barber site to take a look at it first hand. My primary purpose of meeting with you was to find out more about the work and findings that Marathon had completed at the battery location. Obtaining this information was necessary before Dynegy could begin to develop a work plan to address the issue raised in your letter to me dated March 6, 2003. Your letter requested that a work plan be submitted to your office by May 6, 2003.

During the meeting, I asked for an extension in providing the work plan by requesting that the work plan for the Bertha Barber site be submitted in conjunction with our response to you on the Monument Plant which is due in late June. You agreed with this schedule.

Thanks again for your help in addressing this issue and please call if any new information on the site becomes available.

Sincerely,

J. Dee Morris

NOTICE OF PUBLICATION

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES
DEPARTMENT OIL CONSERVATION DIVISION**

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan modification proposals has been submitted to the Director of the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505. Telephone (505) 476-3440.

Marathon Oil Company, Aaron B. Wilson, Project Manager, Telephone (915) 687-8136, P.O. Box 552, Midland, Texas 79702-0552, has submitted a Stage 2 Abatement Plan modification proposal for the former Bertha Barber Tank Battery, located south of Monument, New Mexico in the North 1/2 of the Southwest 1/4 of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon Oil Company operated a crude oil tank battery at the site. Phase-separated hydrocarbon have been observed on the ground water. The Stage 2 Abatement Plan modification proposal presents Marathon Oil Company's proposal for excavation of contaminated soils at the site to a depth of 3 feet, emplacement of a clay cap over contaminated soils, blending of excavated contaminated soils to a concentration of 10,000 mg/l of total petroleum hydrocarbons (TPH) and placing the blended soils atop the constructed clay cap up to the land surface.

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan modification proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on the proposed Stage 2 Abatement Plan modification proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

**RE: STAGE 2 ABATEMENT PLAN MODIFICATION PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Wilson:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) March 24, 2003 correspondence titled "SURFACE RESTORATION PLAN, FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO" and March 17, 2003 "YEAR 2002 ANNUAL GROUNDWATER MONITORING REPORT, FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO". These documents contain the results of MOC's 2002 monitoring of ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The document also requests to modify the previously approved Stage 2 Abatement Plan for excavation and capping of contaminated soils to allow blended remediated soils with a concentration of up to 10,000 mg/l of total petroleum hydrocarbons (TPH) to be placed on top of the subsurface clay cap.

The above-referenced proposal is a major modification of the previously approved Stage 2 Abatement Plan. Therefore, before the OCD can complete a review of the Stage 2 proposal, the OCD requires that:

1. MOC issue by May 2, 2003 the attached public notice of the Stage 2 modification in the Albuquerque Journal, Hobbs News-Sun and the Lovington Daily Leader pursuant to OCD Rule 19.G.
2. Prior to issuing the public notice, MOC shall issue written notice of the Stage 2 modification proposal pursuant to OCD Rule 19.G.(1). Please refer to the previously supplied 3.5" disk for a listing of "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d) and the contact for the New Mexico Trustee for Natural Resources.

3. MOC provide the OCD with proof of written and public notice by May 16, 2003. Proof of notice shall be sent to the OCD Santa Fe Office with a copy provided to the OCD Hobbs District Office.

If you have any questions, please contact Bill Olson at (505) 476-3491.

Sincerely,

RE: Surface Restoration Plan
Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

A surface restoration plan is scheduled to be implemented as part of the 2003 field activities at the former Bertha Barber Tank Battery remediation site. The plan was originally proposed in the December 8, 2000 letter to you from Mr. Paul Peacock of Marathon. The plan was also presented in the Former Bertha Barber Tank Battery 2002 Annual Groundwater Monitoring Report. The following is an excerpt from the original request letter.

“The surface restoration plan will consist of removing approximately three feet of the surface petroleum contaminated soils from the former tank battery and pit areas as outlined in Section 7 of the Stage 2 Abatement Plan. Prior to replacement of clean soils, a six inch layer of clay material will be placed in the excavation to ensure that residual hydrocarbons in the subsurface will not migrate to groundwater.”

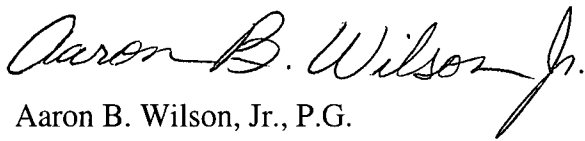

The areas included in this surface restoration plan are the pits around MW-1, MW-2, the sluice box, the former tank battery site (MW-3 and MW-4 areas), and the area around MW-5 (Figure 1). In addition to the areas in the original plan, the recently assessed produced water evaporation pit in the area around SB-1, SB-2 and SB-3 will be included. The OCD approved the original surface restoration plan in a letter dated June 18, 2001. The current plan is the same as the original, except that instead of clean soils, the surficial hydrocarbon impacted soils will be mixed and blended on-site to below 1% (10,000 parts per million (ppm)) Total Petroleum Hydrocarbons (TPH) and then placed on top of the clay liner. As indicated in the Former Bertha Barber Tank Battery 2002 Annual Groundwater Monitoring Report, 1% TPH has been documented to be an acceptable cleanup level in regards to groundwater protection and plant growth.

Mr. William Olson
March 24, 2003
Page 2

After the blended soils have been placed on top of the clay liner, the areas will be seeded with a Bureau of Land Management (BLM) or other approved native seed blend, fertilized, and watered.

Marathon is requesting written authorization as soon as possible from the OCD to commence with surface restoration activities at the former Bertha Barber Tank Battery site. We would prefer to begin the site restoration activities early in the second quarter (April 2003) to maximize seed germination and plant growth during calendar year 2003.

Sincerely,

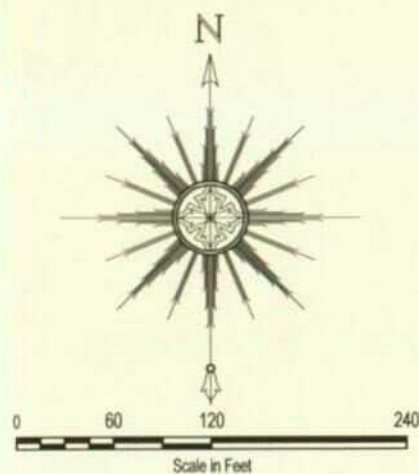

Aaron B. Wilson, Jr., P.G.
Advanced HES Professional

RE: Year 2002 Annual Groundwater Monitoring Report
Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

Marathon Oil Company (Marathon) submits the attached Year 2002 Annual Groundwater Monitoring Report to the New Mexico Oil Conservation Division (OCD). The annual report, which was prepared by ARCADIS G&M, Inc., summarizes the groundwater monitoring and additional assessment activities associated with the Former Bertha Barber Tank Battery Remediation Project during the 2002 calendar year. The report also discusses the proposed Surface Restoration Plan for remediating the upper three feet of hydrocarbon impacted soil in the former tank pad and pit areas at the site.

If you have any questions or need any additional information, then please call me at (915) 687-8136.

Sincerely,

A handwritten signature in cursive script that reads 'Aaron B. Wilson Jr.'.

**RE: ABATEMENT PLAN (AP-11)
BERTHA BARBER TANK BATTERY
MONUMENT, NEW MEXICO**

Dear Mr. Guthrie:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) October 25, 2002 correspondence titled "FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO." This document requests an interpretation on what constitutes a measurable thickness of phase separated hydrocarbons (PSH) for purposes of remediation of contaminated ground water.

Pursuant to 19 NMAC 15.1.19.B(2) ground water shall be abated such that "the standards of 20 NMAC 6.2.3103 shall be met." For the remediation of PSH in ground water, 20 NMAC 6.2.3103.A. states that "Non-aqueous phase liquid shall not be present floating atop of or immersed within ground water as can be reasonably measured." At this time, as a guide in the interpretation of this standard in the case of petroleum contaminated ground water, the OCD uses a physical measurement of 0.01 feet PSH floating atop of ground water as the amount of PSH that can be reasonably measured. This is the measuring precision that can be attained with current, readily available equipment.

If you have any questions, please contact me at (505) 476-3491.

Sincerely,

William C. Olson

Houston, Texas 77002

**RE: DYNEGY PIPELINE SPILL SITE
MARATHON BERTHA BARBER TANK BATTERY**

Dear Mr. Morris:

The New Mexico Oil Conservation Division's (OCD) has been reviewing ground water monitoring data related to Marathon Oil Company's (MOC) ground water abatement plan project at the Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. As stated to you in OCD's May 23, 2000 correspondence, data at the site has shown that ground water from a monitor well (MW-10) upgradient of MOC's Bertha Barber Tank Battery, but downgradient and adjacent to a Dynergy Midstream Services, L.P. (Dynergy) pipeline that was recently repaired, is contaminated with phase separated hydrocarbons (PSH). MOC has a monitor well with no detectable concentrations of PSH or benzene between MW-10 and other downgradient MOC monitor wells with PSH. While Dynergy provided the OCD with information on June 9, 2000 stating that they did not believe that they were the source of this contamination, the OCD does not believe this information is conclusive.

In order to resolve this issue, the OCD requests that Dynergy submit a work plan to delineate any contaminant migration at the source of Dynergy's prior leak site. Please submit the work plan to the OCD Santa Fe Office by May 6, 2003 with a copy provided to the OCD Hobbs District Office.

If you have any questions, please contact me at (505) 827-7154.

**RE: ABATEMENT PLAN (AP-11)
BERTHA BARBER TANK BATTERY
MONUMENT, NEW MEXICO**

Dear Mr. Wilson:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) January 16, 2003 correspondence titled "FORMER BERTHA BARBER TANK BATTERY REMEDIATION PROJECT, LEA COUNTY, NEW MEXICO. This document requests that OCD provide MOC with a written statement indicating that MOC is not responsible for the phase separated hydrocarbons (PSH) found in upgradient well MW-10.

Monitor well MW-10 contains PSH and is located adjacent to a prior Dynegy pipeline leak site. MOC has a monitor well (MW-6) with no observable PSH and no detectable benzene contamination in ground water between MW-10 and other MOC monitor wells with PSH. Therefore, at this time, the OCD does not require that MOC address ground water contamination in the vicinity of MW-10 under the previously approved abatement plan for the site. Please be aware that, if future investigations show that contamination in the vicinity of MW-10 is a result of activities at the Bertha Barber Tank Battery, OCD will require MOC to include remediation of this area in MOC's abatement plan.

If you have any questions, please contact me at (505) 476-3491.

RE: Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

Per your conversations with Paul Peacock and myself, as well as previous correspondence dated 12/8/00 and 2/13/01, regarding the source of the condensate located in the up-gradient monitoring well MW-10 at the above reference site, it is our understanding that you are in agreement with our determination that the source of the condensate is not from our site, but more likely from the nearby pipeline leak (see attached Groundwater Gradient Site Plan). Therefore, Marathon is requesting that the OCD provide us with a written statement indicating that Marathon is not responsible for the remediation of the condensate in the area of MW-10.

We appreciate your consideration and timely response to this request. If you have any questions or need any additional information, please call me at (915) 687-8136.

Sincerely,

RE: Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

Per your recent conversations with Aaron Wilson and Paul Peacock of my staff regarding the technical feasibility of remediating the remaining phase separated hydrocarbon (PSH) on the groundwater at the above referenced site, you indicated to them that it would be based on whether or not we had a measurable thickness of PSH. The question then was asked, "what is a measurable thickness of PSH?" You indicated that you were not sure what constituted a measurable thickness and that your legal department would need to answer the question. Therefore, Marathon is requesting an interpretation on what constitutes a measurable thickness of PSH.

We appreciate your consideration and timely response to this request. If you have any questions or need any additional information, please call me at (915) 687-8128.

Sincerely,

A handwritten signature in cursive script that reads 'Jerry L. Guthrie'.

ARCADIS Project No. MT000749.0001.0002

Dear Mr. Olson:

Lubbock
July 26, 2002

ARCADIS, Inc. is pleased to submit the Modified Stage 2 Abatement Plan for the former Bertha Barber Tank Battery site on behalf of Marathon Oil Company.

Contact:
Judy A. Reeves, Ph.D.

The Stage 1 Abatement Plan was submitted to the Oil Conservation Division in April 1999 and the Stage 2 Abatement Plan was submitted in July 2000. The update to the Stage 2 Abatement Plan is based on a review of all soil and groundwater data collected to date at the facility, as discussed in our telephone conversation on May 7, 2002.

Extension:
806-799-4467

Thank you for your consideration of the modifications to the Stage 2 Abatement Plan. Please call if you have any questions regarding the proposed activities. I can be reached by phone at 806 799 4467 or through the Midland office at 915 687 5400.

Sincerely,

ARCADIS, Inc.

RE: Year 2001 Annual Groundwater Monitoring Report
Former Bertha Barber Tank Battery Remediation Project
Lea County, New Mexico

Dear Mr. Olson:

Marathon Oil Company (Marathon) submits the attached Year 2001 Annual Groundwater Monitoring Report to the New Mexico Oil Conservation Division (OCD). The annual report, which was prepared by ARCADIS G&M, Inc., summarizes the groundwater monitoring and remediation activities associated with the Former Bertha Barber Tank Battery Remediation Project during the 2001 calendar year.

The report recommendations discuss the possible need for a Human Health Risk Assessment to be conducted and that the groundwater monitoring plan may need to be revised to meet the requirements of the risk assessment. I look forward to discussing the need for a risk assessment during your meeting with Paul Peacock and myself on May 8, 2002.

If you have any questions or need any additional information, then please call me at (915) 687-8136.

Sincerely,

A handwritten signature in cursive script that reads 'Aaron B. Wilson, Jr.'.

**RE: STAGE 2 ABATEMENT PLAN PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has completed a review of the following Marathon Oil Company (MOC) documents:

- December 8, 2000 "STAGE 2 ABATEMENT PLAN, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".
- October 31, 2000 "GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".
- July 20, 2000 "STAGE 2 ABATEMENT PLAN, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".

These documents contain MOC's Stage 2 Abatement Plan Proposal for remediation of soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The documents also contain MOC's proof of public notice.

The OCD did not receive a request for a public hearing as a result of issuance of public notice or the OCD's draft document containing the conditions of approval. Therefore, the Stage 2 Abatement Plan for the Bertha Barber Tank Battery as contained in the above-referenced documents is approved with the following conditions:

1. All wastes generated will be disposed of at an OCD approved facility.

2. MOC shall submit the annual report to the OCD Santa Fe Office with a copy provided to the OCD Hobbs District Office. The report shall include:
 - a. A description of all soil and ground water remediation and monitoring activities which have occurred during the previous calendar year including conclusions and recommendations.
 - b. A quarterly water table potentiometric map showing the location of pits, spills, monitor wells, boreholes and any other pertinent site features as well as the direction and magnitude of the hydraulic gradient.
 - c. Quarterly isopleth maps for contaminants of concern.
 - d. Summary tables of all past and present soil and ground water quality sampling results including copies of all recent laboratory analytical data sheets and associated QA/QC data.
 - e. Summary tables of the amount of product recovered from the ground water each quarter and the total volume recovered to date.
 - f. Summary tables of the mass of hydrocarbon contaminants recovered from each soil vapor extraction well on a quarterly basis and the total mass recovered to date.
 - g. The disposition of all wastes generated.
3. MOC shall notify the OCD at least 24 hours in advance of all scheduled activities such that the OCD has the opportunity to witness the events and split samples.

Please be advised that OCD approval does not relieve MOC of responsibility if the abatement plan fails to adequately remediate or monitor contamination related to MOC's activities. In addition, OCD approval does not relieve MOC of responsibility for compliance with any other federal, state or local laws and regulations.

If you have any questions, please contact Bill Olson at (505) 476-3491.

**RE: STAGE 2 ABATEMENT PLAN PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Cooper:

The New Mexico Oil Conservation Division (OCD) has completed a review of Marathon Oil Company's (MOC) Stage 2 Abatement Plan for the remediation of soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The abatement plan including all supplemental information is open for public inspection at the OCD Santa Fe and Hobbs District Offices. The OCD has determined that the abatement plan is in compliance with all Division rules and could be administratively approvable. Attached is a draft approval letter containing a list of the documents which comprise the Stage 2 Abatement Plan.

An objection to MOC's Stage 2 Abatement Plan was filed by you. If your objections to the plan have not been addressed and you wish to present testimony at a hearing, please submit a request for hearing by May 25, 2001. The request should include a concise statement of objections or concerns and a summary of the evidence you will present at hearing. If the Director determines there is significant public interest or that your request has technical merit, the matter will be set for hearing. At the hearing the applicant and intervenors will present technical testimony to an examiner. Based on the merits of the testimony the examiner will make a recommended decision to the Director regarding the abatement plan. If no request for hearing is received by May 25, 2001, then the abatement plan will be administratively approved.

If you have any questions, please contact Bill Olson at (505) 476-3491.

Sincerely,

A handwritten signature in cursive script, appearing to read "Roger C. Anderson".

RE: Stage 2 Abatement Plan
Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Olson:

In my letter dated December 8, 2000, I submitted the additional information that you requested in your letter dated November 9, 2000 concerning the Stage 2 Abatement Plan for Marathon's former Bertha Barber Tank Battery. At the time that I submitted the information to your office, sufficient sample of the separate phase hydrocarbons in well MW-2 could not be obtained for fingerprint analysis. However, sufficient sample was collected from well MW-2 on December 28, 2000. The sample was submitted to Core Laboratories, Inc. of Houston, TX for chromatography and fingerprint analyses. The fingerprint analysis of the sample determined that the separate phase hydrocarbon sample is a weathered crude oil, as stated on the attached analytical report No. 106048-1 dated January 25, 2001. The weathered crude oil in well MW-2 is due to the operation of the former pits that were abandoned approximately 30 years ago. Therefore, the results of these laboratory analyses and the information previously submitted to you support the conclusion that the separate phase hydrocarbons in the area of upgradient well MW-10 are not related to Marathon operations.

If you have any questions or need any additional information, then please call me at (915) 687-8118.

Sincerely,

A handwritten signature in black ink that reads 'M. Paul Peacock'.

RE: Stage 2 Abatement Plan
Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Olson:

Marathon Oil Company (Marathon) has received your letter dated November 9, 2000 concerning the Stage 2 Abatement Plan for Marathon's former Bertha Barber Tank Battery dated July 19, 2000. The information that you requested in your letter is outlined below.

1. As you requested, the historical aerial photographs of the former tank battery facilities are enclosed. The 1966 photo depicts the former tank battery facilities with operational pits, and the 1975 photographs depicts the former tank battery facilities with abandoned pits. The photographs also depict the approximate location of the monitoring wells. As shown on the photographs, the tank battery facilities were not located in the vicinity of well MW-10, which currently contains separate phase hydrocarbons.

On November 14, 2000, a sample of the separate phase hydrocarbons from well MW-10 was collected and submitted to Core Laboratories, Inc. of Houston, TX for chromatography and fingerprint analyses. The fingerprint analysis of the sample collected from well MW-10 determined that the separate phase hydrocarbon sample is a retrograde condensate, as stated on the attached analytical report No. 105434-01 dated December 1, 2000. The former tank battery facilities processed crude oil not natural gas condensate liquids. Although sufficient sample for laboratory analysis could not be obtained from wells MW-1 and 2, the appearance of separate phase hydrocarbons in these wells is black weathered crude oil with the consistency of tar. The weathered crude oil in these wells is due to the operation of the former pits that were abandoned approximately 30 years ago. Therefore, the results of the laboratory analyses, visual observations and the information evidenced by the aerial photographs support the conclusion that the separate phase hydrocarbons in the area of well MW-10 are not related to Marathon operations.

In a letter dated May 23, 2000, Mr. Roger Anderson stated that Marathon's Stage 1 site investigation report is approved. During the site investigation activities, Marathon installed monitoring well MW-6, which is located between upgradient well MW-10 (containing retrograde condensate) and well MW-1 (containing weather crude oil). As documented in the site investigation report, well MW-6 does not contain either separate phase or dissolved phase hydrocarbons. This clean well further supports the conclusion that the separate phase hydrocarbons in the area of well MW-10 are not related to Marathon operations.

Mr. Olson
December 8, 2000
Page 2

Marathon's site investigation report concluded that it is likely that the impacts observed in the upgradient, off-site well MW-10 are related to the recent release associated with the adjacent Warren Pipeline. In a letter dated May 23, 2000, you requested that Mr. J. D. Morris of Dynegy Midstream Services, L.P. submit all information related to the pipeline leaks, spills, repairs and remediation actions at this site. In a response letter dated June 9, 2000, Mr. Cal Wrangham of Dynegy Midstream Services stated that "there was a leak on a steel section of the line approximately 9 months ago". Mr. Cal Wrangham also stated that "the pipeline is just on the north side of the former Bertha Barber tank site and also appears to intersect the remains of dike walls which were visible to the west of the tank site". As shown on the historical aerial photographs, Marathon did not construct or operate tanks west of the former pits. The earthen wall that Mr. Cal Wrangham identified as dike walls was likely formed by the former lease road, which is depicted on the historical aerial photographs. The former lease road was constructed on the west side of the former pits. The former tank battery facilities were not located west of the former pits or west of the former lease road as implied by Mr. Cal Wrangham. As shown on the historical aerial photographs, well MW-6, which does not contain any hydrocarbon contamination, is located upgradient of the former tank battery facilities near the former lease road. As previously stated, this clean well and the information evidenced by the historical aerial photographs further supports the conclusion that the separate phase hydrocarbons in the area of well MW-10 are not related to Marathon operations.

The source of the retrograde condensate in well MW-10 could also be the result of a release from other pipelines located in the same pipeline right-of-way as the Warren Pipeline. I am willing to discuss this issue with you further or meet at the site to observe the site conditions. However, Marathon has completed the site investigation activities associated with the former tank battery facilities and submitted further documentation with this letter, which supports the conclusion that the separate phase hydrocarbons in the area of well MW-10 are not related to Marathon operations.

2. Marathon proposes to monitor the performance of the soil vapor extraction system and monitor groundwater to verify that hydrocarbon impacted soils will not cause an exceedance of the Water Quality Control Commission (WQCC)'s groundwater standards. Based on the groundwater monitoring results, dissolved Benzene in groundwater and separate phase hydrocarbons on the groundwater are the only contaminants above the WQCC's groundwater standards. The proposed remedies of soil vapor extraction, passive free product recovery and natural attenuation are designed to remove separate phase hydrocarbons from the groundwater and reduce the dissolved benzene concentrations in groundwater below the WQCC standard of 10 µg/L. Soil vapor extraction will remove the volatile fraction (Benzene) of the residual hydrocarbons from the soils and promote biodegradation of hydrocarbons (Benzene) in the soil and groundwater by adding oxygen to the subsurface. The mass of the volatile fraction (Benzene) of the residual hydrocarbons removed by the soil vapor extraction system will be monitored on a monthly basis as outlined in the Stage 2 Abatement Plan. The biodegradation of hydrocarbons (Benzene) in the soil and groundwater will also be monitored monthly from the effluent of the soil vapor extraction system as outlined in the Stage 2 Abatement Plan. The significant decline of both the vapor phase hydrocarbon removal rate and the biodegradation rate shows that the volatile fraction (Benzene) of the residual hydrocarbons in the soil have been removed and will not cause an exceedance of the Water Quality Control Commission (WQCC)'s groundwater standards.

Mr. Olson
December 8, 2000
Page 3

3. The surface restoration plan will consist of removing approximately three feet of the surface petroleum contaminated soils from the former tank battery and pit areas as outlined in Section 7 of the Stage 2 Abatement Plan. Prior to the replacement of clean soils, a six inch layer of clay material will be placed in the excavation to ensure that the residual hydrocarbons in the subsurface will not migrate to groundwater. Although the soil vapor extraction system will remove the volatile fraction (Benzene) of the residual hydrocarbons in the soil, the clay layer is an additional abatement measure to ensure that the low solubility and high molecular weight compounds of the residual hydrocarbons in the soil will not migrate to groundwater.
4. Marathon will include the adjacent livestock water well in the groundwater monitoring plan. Currently, groundwater from the livestock water well is overflowing the water tank onto the ground. Therefore, Marathon proposes to sample the groundwater discharged from the water tank.

If you have any questions or need any additional information, then please call me at (915) 687-8118.

Sincerely,

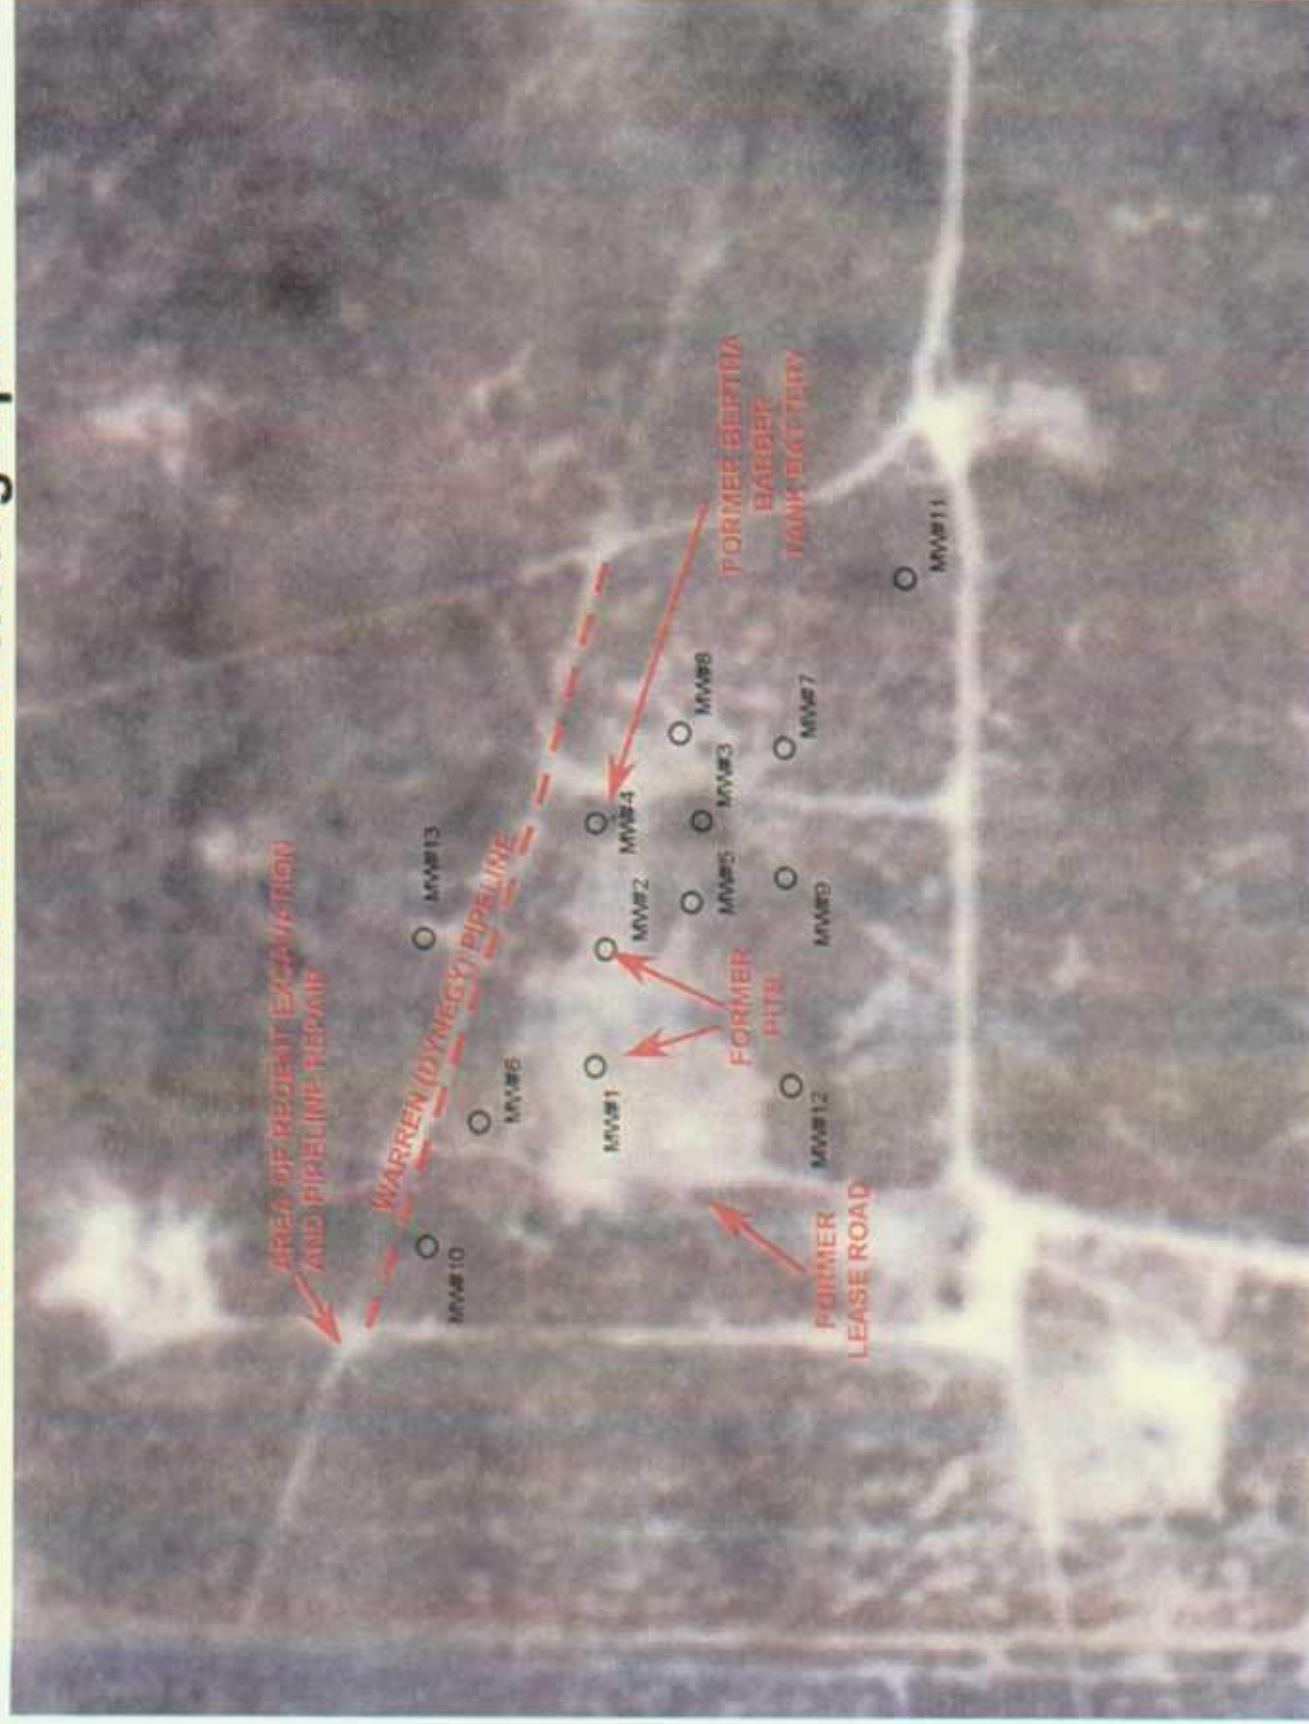

M. Paul Peacock
Advanced Environmental & Safety Engineer

ATTN: M. Paul Peacock

Dear Paul:

Core Laboratories received two samples to determine whether they were a crude oil or condensate. We analyzed an oil sample labeled as MW-10 on 11-16-00 for a fingerprint analysis. Our analytical results are attached.

A natural gas condensate usually has an end point of around carbon #12. This sample has a majority of compounds ending at carbon #12, however, there are an unusual amount of heavier compounds eluting after carbon #12. This is typical of a retrograde condensate. A crude oil has a much wider range of compounds. Many crudes have end points beyond carbon number 40. It is our opinion that this is a retrograde condensate-not a natural gas condensate.

If you have any additional questions, please call.

Sincerely,
CORE LABORATORIES

RETURN RECEIPT NO: 5051-3822

Mr. Paul Peacock
Marathon Oil Company
P.O. Box 552
Midland, Texas 79702-0552

**RE: STAGE 2 ABATEMENT PLAN PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has reviewed the following Marathon Oil Company (MOC) documents:

- October 31, 2000 "GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".
- July 20, 2000 "STAGE 2 ABATEMENT PLAN, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".

These documents contains MOC's Stage 2 Abatement Plan Proposal for remediation of soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The documents also contain MOC's proof of public notice.

The OCD has also received public comments on MOC's Stage 2 Abatement Plan Proposal. One comment is from Mr. Jim Cooper in a letter dated September 6, 2000. The second comment is from Ms. Glenna Dean of the New Mexico Office of Cultural Affairs Historic Preservation Division in a letter dated September 26, 2000. Enclosed are copies of these letters.

Upon review of the above referenced documents, the OCD has the following comments, requirements and requests for information:

1. In regards to the discovery of product in monitor well MW-10, Dynegy Midstream Services, Limited Partnership (Dynegy), in correspondence dated June 9, 2000 (enclosed), has provided information that the pipeline in this area contains scrubbed natural gas. Dynegy also provided sample analyses from beneath the pipeline in the identified leak area northwest of MW-10. These soil sample analyses did not detect any hydrocarbon contamination in the soils beneath the pipeline in the area of the leak. Based on the current information, it is not clear whether the pipeline or disposal activities at MOC's tank battery are the source of contamination in MW-10. Therefore the OCD requires that MOC provide the OCD with any available historical ariel photos which show the tank battery facilities during and after actual operation of the site.
2. The soil remediation plan does not include a plan for verifying that soils will be remediated to the proposed standards upon completion of operation of the soil vapor extraction system. Please submit a soil monitoring plan which will accomplish this purpose.
3. MOC's plan proposes to remove surface petroleum contamination for offsite disposal as part of the site restoration plan, but does not specific to what extent this will occur. The OCD requires that the surface be reclaimed to a depth of 2-3 feet to accommodate restoration of surface vegetation. Please provide a surface restoration plan to accomplish this purpose.
4. The OCD requires that the ground water monitoring plan include sampling of the adjacent livestock water well. Please provide a commitment to conduct this sampling.

Please provide the above information to the OCD Santa Fe Office by December 11, 2000 with a copy provided to the OCD Hobbs District Office. Submission of this information will allow the OCD to continue a review of the Stage 2 Abatement Plan Proposal.

If you have any questions, please contact me at (505) 827-7154.

Sincerely,

William C. Olson

RE: Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Olson:

As you requested in our telephone conversation on October 30, 2000, I have enclosed a copy of the public notice documents for the Stage 2 Abatement Plan at the former Bertha Barber Tank Battery. The former tank battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico.

The public notice documents are outlined below.

1. Copy of one of the notification letters, which were submitted to the surface owners and the parties requesting a notice.
2. Copies of the certified mail receipts and the returned certified mail envelopes for the notification letters, which were submitted to the surface owners and the parties requesting a notice.
3. Copy of the affidavits for the legal notice, which was published in The Albuquerque Journal, Hobbs-News-Sun and The Lovington Daily Leader on August 23, 2000.

If you have any questions or need any additional information, then please call me at (915) 687-8312.

Sincerely,

A handwritten signature in black ink that reads 'M. Paul Peacock'.

RE: Stage 2 Abatement Plan Notification
Former Bertha Barber Tank Battery
Lea County, New Mexico

Dear Mr. Buford:

Pursuant to Oil Conservation Division Rule 19.G.1, Marathon Oil Company (Marathon) hereby notifies you of the Stage 2 Abatement Plan for Marathon Oil Company's Former Bertha Barber Tank Battery in Lea County, New Mexico. Marathon is required to notify recipients specified in the rule, parties requesting notice of such matters and owners of surface tracts located within one (1) mile of the perimeter of the tank battery. The Notice Of Publication for the Stage 2 Abatement Plan is enclosed.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. P. Peacock'.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Marathon Oil Company, Paul Peacock, Project Manager, Telephone (915) 687-8312, P.O. Box 552, Midland, Texas 79702-0552, has submitted a Stage 2 Abatement Plan Proposal for the former Bertha Barber Tank Battery, located south of Monument, New Mexico in the North $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon Oil Company operated a crude oil tank battery at the site. Phase-separated hydrocarbon have been observed on the ground water. The Stage 2 Abatement Plan Proposal presents Marathon Oil Company's proposed methods for remediation of the site including remediation of contaminated soils; remediation of contaminated ground water; site maintenance activities; a monitoring and sampling plan for soils and ground water; preparation of regular remediation reports; and, a schedule for implementation of all remediation and monitoring activities

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 2 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

CERTIFIED MAIL

RETURN RECEIPT NO. 5051-3662

Mr. Jim Cooper
P.O. Box 55
Monument, New Mexico 88265

**RE: STAGE 2 ABATEMENT PLAN PROPOSAL
MARATHON BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Cooper:

The Oil Conservation Division (OCD) received your September 6, 2000 letter disagreeing with the Marathon Oil Company's (MOC) July 20, 2000 "STAGE 2 ABATEMENT PLAN, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY".

The OCD has included your name as an intervenor in this case and you will receive copies of all OCD correspondence concerning the abatement plan. The OCD will continue to process the abatement plan and comments received until the plan is determined to be administratively approvable or denied. If the abatement plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the abatement plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. All intervenors will be allowed fifteen (15) days from receipt of the determination to submit final comments on the conditions or request a public hearing in lieu of administrative approval. A request for a public hearing must be in writing and must include the reasons why a hearing should be held.

The OCD appreciates your input on all environmental and public health issues relating to the abatement plan.

Mr. Jim Cooper
October 26, 2000

(505) 827-6320

26 September 2000

Director
Oil Conservation Division
2040 South Pacheco
Santa Fe, New Mexico 87505

Dear Sir or Madam:

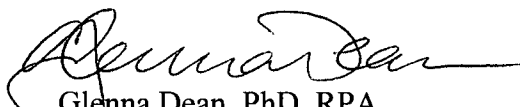

This is in response to the Notice of Publication of the Stage 2 Abatement Plan Proposal for Marathon Oil Company's former Bertha Barber Tank Battery in Lea County, New Mexico, received in this office 21 August 2000. We have not reviewed the abatement plan proposal.

The Historic Preservation Division recommends that pedestrian survey be conducted by a professional archaeologist of any areas slated for borrow or other excavation to identify and evaluate any archaeological sites that might be present. Up-front evaluation of any archaeological sites that might also contain unmarked human burials will avoid delays later on during project construction while the requirements of Section 18-6-11.2 of the New Mexico Cultural Properties Act are met.

A list of permitted archaeologists and archaeological firms is available from this office upon request or can be downloaded from our web site <http://museums.state.nm.us/hpd/>.

Thank you for the opportunity to comment on this abatement plan proposal.

Sincerely,

Glenna Dean, PhD, RPA
State Archaeologist

Olson, William

Subject: BBTB Quarterly Groundwater Sampling Event

Bill,

The quarterly groundwater sampling event at the former Bertha Barber Tank Battery is scheduled to begin on September 27, 2000. If you wish to collect duplicate samples, then please advise.

Sincerely,

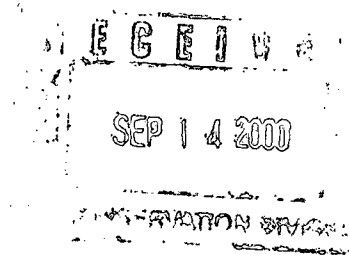

M. Paul Peacock

Advanced Environmental & Safety Engineer

Santa Fe, NM 87505

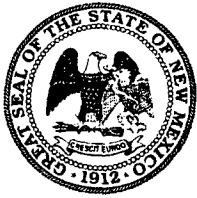

RE: Marathon Oil Co.
Stage 2 Abatement Plan

Dear Mr. Anderson:

As offset landowner to the Barber lease and grazing leasee, I am disturbed with this ongoing and long term plan Marathon has proposed. With the time that has already passed, the oil, which is in the ground and on the water, is moving toward my property. I already have enough contamination on my ranch. The only way I have seen that eliminates these problems is dig up the dirty soil and replace it with clean soil, this stays the source of the problem. I disagree with Marathon's plan and hope the OCD will enforce a clean up which is quicker and better. Marathon should have cleaned up when they abandoned the facility.

Thank You,

Jim Cooper

**RE: STAGE 2 ABATEMENT PLAN PROPOSAL
BERTHA BARBER TANK BATTERY
GROUND WATER ABATEMENT PLAN (AP-11)**

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) July 20, 2000 "STAGE 2 ABATEMENT PLAN, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY". This document contains MOC's Stage 2 Abatement Plan Proposal for remediation of soil and ground water contamination at MOC's Bertha Barber Tank Battery located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico.

The OCD has determined that the above referenced Stage 2 Abatement Plan Proposal is administratively complete. Before the OCD can complete a review of the Stage 2 proposal, the OCD requires that:

1. MOC issue by August 24, 2000 the attached public notice of the Stage 2 proposal in the Albuquerque Journal, Hobbs News-Sun and the Lovington Daily Leader pursuant to OCD Rule 19.G.
2. Prior to issuing the public notice, MOC shall issue written notice of the Stage 2 proposal pursuant to OCD Rule 19.G.(1). Please refer to the previously supplied 3.5" disk for a listing of "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d) and the contact for the New Mexico Trustee for Natural Resources.

Please provide the OCD with proof of notice as soon as possible upon completing issuance of the written and public notice.

If you have any questions, please contact Bill Olson at (505) 827-7154.

Sincerely,

A handwritten signature in black ink, appearing to read "Roger C. Anderson". The signature is fluid and cursive, with the first name "Roger" being more legible than the last name "Anderson".

NOTICE OF PUBLICATION

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 2 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Marathon Oil Company, Paul Peacock, Project Manager, Telephone (915) 687-8312, P.O. Box 552, Midland, Texas 79702-0552, has submitted a Stage 2 Abatement Plan Proposal for the former Bertha Barber Tank Battery, located south of Monument, New Mexico in the North $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon Oil Company operated a crude oil tank battery at the site. Phase-separated hydrocarbon have been observed on the ground water. The Stage 2 Abatement Plan Proposal presents Marathon Oil Company's proposed methods for remediation of the site including remediation of contaminated soils; remediation of contaminated ground water; site maintenance activities; a monitoring and sampling plan for soils and ground water; preparation of regular remediation reports; and, a schedule for implementation of all remediation and monitoring activities

Any interested person may obtain further information from the Oil Conservation Division and may submit to the Director of the Oil Conservation Division, at the address given above, written comments or a written request for a public hearing that include reasons why a hearing should be held. The Stage 2 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 2 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments or a written request for a hearing may be submitted.

RE: Stage 2 Abatement Plan
Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Anderson:

As required by your letter dated May 23, 2000, I have enclosed the Stage 2 Abatement Plan dated July 19, 2000 that was prepared by ARCADIS Geraghty & Miller, Inc for Marathon Oil Company's former Bertha Barber Tank Battery. The former tank battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The plan outlines the proposed remediation activities to address the impacts that were identified in the approved Site Investigation Report dated January 25, 2000. The plan was prepared in accordance with the New Mexico Oil Conservation Division Rule 19.

If you have any questions or need any additional information, then please call me at (915) 687-8312.

Sincerely,

A handwritten signature in black ink that reads 'M. Paul Peacock'.

RE: Pipeline Spill Site
Marathon Bertha Barber Tank Battery

Dear Mr. Olson:

Mr. J. D. Morris forwarded your letter dated May 23, 2000 to me for site investigation. I visited the site June 1, 2000 and inspected the tank battery area and it's relation to our pipeline.

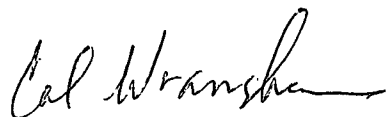

Our pipeline runs east to west angling slightly to the north. The pipeline is just on the north side of the former Bertha Barber tank site and also appears to intersect the remains of dike walls which were visible to the west of the tank site. Our pipeline is a discharge line off of the Skaggs compressor station and transports compressed natural gas to the Monument plant. The gas stream is scrubbed to remove the condensate at the compressor station prior to entering the pipeline.

There was no evidence of hydrocarbon impacts along the pipeline right-of-way, however some visible impacts to the surface soil were noticed in and around the former tank site. To provide the information you requested in your letter, I contacted the field operators at the Dynegy Monument Facility and they indicated that the line adjacent to the tank battery is a poly line that was installed in 1993. The poly line extends to the west approximately 400 yards to point where it transitions to a steel line. No leaks have occurred on the poly line since it was installed, however, the operators did indicate that there was a leak on a steel section of the line approximately 9 months ago. The leak site was near the transition point approximately 1/4 mile west, northwest of the tank battery.

I inspected the leak site on the steel line, the line is still exposed, and found no visible evidence of hydrocarbon impacts on the sides or at the base of the excavation. I took a soil sample from below the line at the base of the excavation. The sample was a composite of 4 soil samples collected from below the sand, which had blown into the excavation. I've attached the analysis results which were non detect for TPH and BTEX.

We would be glad to discuss this issue further with you and to review any of the site assessment information you may have on the site. Please advise if you need any additional information or clarification on the information presented here. Dynegy is committed to protecting people and the environment.

Sincerely,

RE: PIPELINE SPILL SITE
MARATHON BERTHA BARBER TANK BATTERY

Dear Mr. Morris:

The New Mexico Oil Conservation Division's (OCD) review of Marathon Oil Company's (MOC) January 31, 2000 "SITE INVESTIGATION REPORT, GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY" has shown that ground water from a monitor well upgradient of MOC's Bertha Barber Tank Battery but downgradient and adjacent to a Warren pipeline that was recently repaired is contaminated with hydrocarbons in excess of the New Mexico Water Quality Control Commission standards. MOC's Bertha Barber Tank Battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico.

As the current operator of the Warren pipeline, the OCD requires that Dynergy Midstream Services, L.P. provide the OCD with all information related to pipeline leaks, spills, repairs and remediation actions at this site. Please submit this information to the OCD Santa Fe Office by June 23, 2000 with a copy provided to the OCD Hobbs District Office.

If you have any questions, please contact me at (505) 827-7154.

Sincerely,

RE: Site Investigation Report
Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Anderson:

As required by your letter dated July 29, 1999, I have enclosed the Site Investigation Report dated January 25, 2000 that was prepared for Marathon Oil Company (Marathon) by ARCADIS Geraghty & Miller, Inc. The report contains the results of the site investigation and quarterly monitoring activities that were completed at the former Bertha Barber Tank Battery in accordance with the approved Stage 1 Abatement Plan dated April 1999. The former tank battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico.

If you have any questions or need any additional information, then please call me at (915) 687-8312.

LEGAL NOTICE NOTICE OF PUBLICATION STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following State 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Marathon Oil Company (Marathon), M. Paul Peacock, Advanced Environmental & Safety Engineer, Telephone (915) 682-1626, P.O. Box 552, Midland, Texas 79702, has submitted a Stage 1 Abatement Plan Proposal for the former Bertha Barber Tank Battery, located approximately 1.5 miles south of Monument, New Mexico in the N1/2, SW1/4 of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon operated the crude oil tank battery until early 1998. In the summer of 1998, Marathon initiated a voluntary environmental site investigation at the former tank battery. Phase-separated hydrocarbons were discovered on the ground water during the installation of monitoring wells. The State 1 Abatement Plan Proposal presents the following subsurface investigation activities: confirm site geology and hydrogeology; conduct a registered water well search within a mile radius of the former tank battery; install seven (7) soil borings with temporary piezometers; install three (3) monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each soil boring and monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all

well locations by a professional land survey or registered in the State of New Mexico; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The State 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Dr. Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m. Monday through Friday. Prior to ruling on any proposed State 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted.

RE: Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Olson:

As you requested in our telephone conversation on July 21, 1999, I have enclosed copies of the certified mail receipts for the notification letters, which were submitted to the surface owners and the parties requesting a notice of the Stage 1 Abatement Plan for the former Bertha Barber Tank Battery. The former tank battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. I have also enclosed a copy of the affidavit for the legal notice, which was published in The Albuquerque Journal on June 8, 1999. I have not received the affidavit from the Lovington Daily Leader for the legal notice. However, I will forward a copy of the affidavit in a separate correspondence.

As we discussed, the site investigation work is scheduled for the week of August 2, 1999. If possible, please complete your review the Stage 1 Abatement Plan by July 30, 1999. If you have any questions or comments, then please call me at (915) 687-8312.

Sincerely,

A handwritten signature in black ink that reads 'M. Paul Peacock'.

RE: Transferred Park

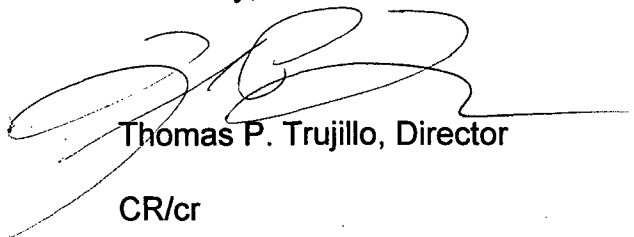

Dear Sir:

We received your letter dated June 1, 1999. Unfortunately, Harry McAdams Park was transferred to the City of Hobbs on 12/18/96. It is located 5 miles North of Hobbs via NM 18 Lovington Hwy. 5000 Jack Gomez Dr., Hobbs, NM 88240
Office # (505) 392-5845.

Therefore, State Parks and Recreation Division would like you to omit our address from your mailing list.

If you have any further questions please call (505) 827-1182.

Sincerely,

Thomas P. Trujillo, Director

NOTICE OF PUBLICATION

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

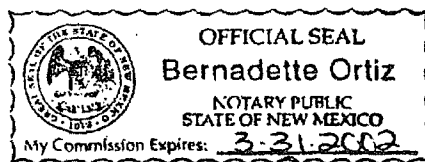

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, Telephone (505) 827-7131:

Marathon Oil Company (Marathon), M. Paul Peacock, Advanced Environmental & Safety Engineer, Telephone (915) 882-1626, P.O. Box 552, Midland, Texas 79702, has submitted a Stage 1 Abatement Plan Proposal for the former Bertha Barber Tank Battery, located approximately 1.5 miles south of Monument, New Mexico in the N 1/4, SW 1/4 of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Marathon operated the crude oil tank battery until early 1988. In the summer of 1988, Marathon initiated a voluntary environmental site investigation at the former tank battery. Phase-separated hydrocarbons were discovered on the ground water during the installation of monitoring wells. The Stage 1 Abatement Plan Proposal presents the following subsurface investigation activities: confirm site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the former tank battery; install seven (7) soil borings with temporary piezometers; install three (3) monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each soil boring and monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; and prepare a report summarizing field activities and laboratory results.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1525 N. French Dr. Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on any proposed Stage 1 Abatement Plan Proposal, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted.

**RE: GROUND WATER ABATEMENT PLAN (AP-11)
BERTHA BARBER TANK BATTERY**

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) April 15, 1999 "GROUNDWATER ABATEMENT PLAN (AP-11), FORMER BERTHA BARBER TANK BATTERY, MARATHON OIL COMPANY". This document contains MOC's Stage 1 Abatement Plan Proposal for investigating the extent of soil and ground water contamination at MOC's Bertha Barber Tank Battery located in Unit F, Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The document also contains a proposed notice of publication of the Stage 1 Abatement Plan Proposal.

The OCD has determined that the above referenced Stage 1 Abatement Plan Proposal is administratively complete. Before the OCD can issue approval of the Stage 1 proposal, the OCD requires that:

1. MOC issue by June 8, 1999 the proposed Stage 1 notice of publication in the Albuquerque Journal and the Lovington Daily Leader pursuant to OCD Rule 19.G.(2).
2. Prior to issuing public notice, MOC shall issue written notice of the Stage 1 proposal pursuant to OCD Rule 19.G.(1). Enclosed you will find a 3.5" disk containing a "Word" listing "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d). The disk also contains the contact for the New Mexico Trustee for Natural Resources.

Please provide the OCD with proof of publication and proof of written notice upon completing issuance of the written and public notice. If you have any questions, please contact Bill Olson of my staff at (505) 827-7154.

Sincerely,

Roger C. Anderson
Environmental Bureau Chief

RE: Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Anderson:

As required by your letter dated February 9, 1999, I have enclosed the Stage 1 Abatement Plan dated April 1999 that was prepared for Marathon Oil Company (Marathon) by ARCADIS Geraghty & Miller, Inc. for the former Bertha Barber Tank Battery. The former tank battery is located in the North ½ of the Southwest ¼ of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. The plan outlines the proposed site investigation activities to define the extent of soil and groundwater contamination that was discovered during the 1998 voluntary site investigation of the former tank battery by Marathon personnel.

The Notice of Publication is also enclosed for your approval. Pursuant to 19 NMAC 15.A.19.G.2, Marathon will issue the approved public notice in the Hobbs News Sun newspaper and the Albuquerque Journal newspaper within fifteen days after your office determines that the Stage 1 Abatement Plan is administratively complete.

If you have any questions or comments, then please call me at (915) 687-8312.

Sincerely,

A handwritten signature in cursive script, appearing to read 'M. Paul Peacock'.

RE: Groundwater Abatement Plan (AP-11)
Former Bertha Barber Tank Battery
Marathon Oil Company

Dear Mr. Olson:

This letter is to confirm our telephone conversation on March 9, 1999 concerning a deadline extension of the Stage 1 Abatement Plan for Marathon Oil Company (Marathon)'s former Bertha Barber Tank Battery located in the North 1/2, Southwest 1/4 of Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. On February 19, 1999, Marathon received the letter dated February 9, 1999 from Roger Anderson of the New Mexico Oil Conservation Division (OCD), which required that the Stage 1 Abatement Plan be submitted to the OCD by April 1, 1999. Pursuant to OCD Rule 19.E.1, Marathon will submit the Stage 1 Abatement Plan to the OCD on April 20, 1999, which is sixty days after the receipt of the written notice on February 29, 1999.

If you have any questions or comments, then please call me at (915) 687-8312.

Sincerely,

A handwritten signature in cursive script that reads 'M. Paul Peacock'.

**RE: GROUND WATER ABATEMENT PLAN (AP-11)
BERTHA BARBER TANK BATTERY**

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) December 31, 1998 C-141 which contains MOC's notification of ground water contamination discovered during a site investigation at MOC's Bertha Barber Tank Battery located in Unit F, Section 5, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico.

Pursuant to 19 NMAC 15.A.19.C.1, the OCD requires an abatement plan for the Bertha Barber Tank Battery to abate ground water pollution. To initiate the abatement plan process, the OCD requires that MOC submit to the OCD by April 1, 1999 a Stage 1 abatement plan investigation proposal pursuant to OCD Rule 19.E.1. and OCD Rule 19.E.3 (attached).

If you have any questions, please contact Bill Olson of my staff at (505) 827-7154.

Chris Williams - OCD Hobbs.

OCD APPROVAL CONDITIONS
FOR
RCRA EXEMPT
UNLINED PIT CLOSURES

1. The following closure actions will be performed in accordance with OCD's February 1993 "SURFACE IMPOUNDMENT CLOSURE GUIDELINES":
 - a. Vertical and horizontal extent of contamination will be determined either prior to, during or upon completion of remedial actions.
 - b. Contaminated soils will be remediated to the OCD's recommended levels or a risk assessment will be provided which shows that an alternate cleanup level is protective of surface water, ground water, human health and the environment.
 - c. Final soil contaminant concentrations will be determined upon completion of remedial actions.
 - d. Soil samples for verification of completion of vertical extent, horizontal extent, and remedial actions shall be pursuant to the attached document called "FINAL PIT CLOSURE SAMPLING".
2. All wastes removed from a specific site will be disposed of at an OCD approved facility.
3. The OCD Santa Fe Office's Environmental Bureau Chief and the OCD Hobbs District Office will be notified within 24 hours of the discovery of ground water contamination related to a pit closure.
4. Upon completion of all closure activities, a completed OCD "Pit Remediation and Closure Report" form containing the results of all pit closure and soil remediation activities will be submitted to the OCD for approval. The report will include the concentrations and application rates of any materials or additives used to enhance bioremediation of the contaminants and the final concentrations of any soils landfarmed onsite or the final disposition of soils removed from the site. To simplify the approval process, the OCD requests that the final pit closure reports be submitted only upon completion of all closure activities including onsite remediation or landfarming of contaminated soils.
5. All original documents will be submitted to the OCD Hobbs Office for approval with copies provided to the OCD Santa Fe Office.
6. OCD approval does not relieve you of liability should closure activities determine that contamination exists which is beyond the scope of the work plan or if the closure activities fail to adequately remediate contamination related to your activities. In addition, OCD approval does not relieve you of responsibility for compliance with other federal, state or local laws and regulations.

Marathon Area Wide Pit Closure Plan
Approved on Sept. 12, 1998.
By: *[Signature]*
Per NMOC Letter dated 9/12/98
Price: Vierzbicki

Final Pit Closure Sampling

For RCRA Exempt Pits.

Bottom Hole Samples:

(Include location, depths & time)

TPH	EPA 418.1, 8015 (M), other if approved.
BTEX	EPA Method 8020, other if approved.
Chlorides	EPA general chemistry, other if approved.
Other*	See footnote.

Side Wall Samples:

(Include location, depths & time)

TPH	EPA 418.1, 8015 (M), other if approved.
BTEX	EPA Method 8020, other if approved.
Chlorides	EPA general chemistry, other if approved.
Other*	See footnote.

Remediated Soil Samples:

(If clean soil, not applicable)

TPH	EPA 418.1, 8015 (M), other if approved.
BTEX	EPA Method 8020, other if approved.
Chlorides	EPA general chemistry, other if approved.
Other*	See footnote.

Sample Collection:

Per EPA SW-846 protocols or other approved.

Bottom Hole:

Five point composite unless there is "hot spots", which must be defined vertically.

Sidewalls:

Four point composite unless there is a wall that exhibits a "hot spot", which must be defined horizontally.

Remediated Soils:

Soils placed back in hole ; generally one composite if it accurately represents whole mixture.

* Footnote: NMOCD may require additional analysis depending on what was discharged into the pits. For example EPA RCRA Non-Exempt materials such as motor oils, paints, filters, solvents will require hazardous waste testing. NMOCD may require WQCC chemical constituents for Groundwater protection.

Attn: Mr. Wayne Price

Re: Surface Impoundment Closure, Bertha Barber Lease
Section 5, Township 20 South, Range 37 East

Mr. Price:

This correspondence is to inform you of surface impoundment closures due to commence in the course of remediation work at a location on the above-referenced lease. The remediation project is being undertaken following discontinued usage of the location as a tank battery.

Marathon intends to follow OCD's Unlined Surface Impoundment Closure Guidelines to close the two associated pits during the course of this remediation. Marathon will perform an assessment of contamination during the remediation process, and will take samples of the walls and bottom. Soils will be blended when possible or landfarmed until proposed levels are achieved. Contaminated soils will be mixed with the caliche surface of the wellpad. The threshold at which closure will be requested will take into consideration the ranking criteria presented in the Guideline, analytical results, and field observations. The appropriate paperwork will be filed with OCD when it is determined that these thresholds have been met.

Additionally, Marathon Oil wishes to submit this Pit Remediation and Closure Plan for use during any subsequent pit closure project in District I. A letter will be issued to the OCD prior to commencement of each new project, referencing this Plan. If you have any questions about this project, please contact me at (915)687-8306.

Sincerely,

A handwritten signature in cursive script that reads 'Jenelle L. Vierzbicki'.

MARATHON OIL COMPANY
PIT REMEDIATION AND CLOSURE PLAN

Introduction

Marathon Oil Company production pits in New Mexico will be closed referencing the Oil Conservation Division's Unlined Surface Impoundment Closure Guidelines.

Preliminary Site Assessment

A preliminary site assessment for each pit will be conducted according to procedures provided in the Unlined Surface Impoundment Closure Guidelines. The "depth to groundwater," "wellhead protection area," and "distance to surface water body" ranking scores will be determined to calculate the total ranking score for each pit. This total ranking score will determine the level of remediation required at each site. For each pit, this data will be recorded on a Pit Remediation and Closure Report. The preliminary site characteristic information will be submitted as part of the final closure report document.

Pit Assessment and Sampling

The extent and concentration of hydrocarbon-contaminated soil at each pit will be determined at the time of remediation. The depth and lateral extent will be investigated by excavation within the pit area. The level of contamination of the soil in the pit will be determined by using appropriate and available field testing methods (photoionizing detector (PID) meter and/or field Total Petroleum Hydrocarbon (TPH) tests). Excavation of soil will continue until field tests determine that clean soil (100 ppm, 1000 ppm, or 5000 ppm TPH, as determined by the site assessment ranking score) is encountered.

Pit Remediation and Closure

Contaminated soil will be excavated from the pit until clean soil as defined above is encountered or to the maximum depth that a backhoe can reach. For soil excavated from the pit, proposed cleanup levels will be achieved using one of the following methods:

1) Onsite Landfarming

Contaminated soils will be landfarmed on location adjacent to the pit or well pad area by spreading the soils in a six inch lift. The soil will be tilled periodically to promote biodegradation of petroleum hydrocarbons. Water and nutrients (fertilizer) may be applied periodically. This method relies on the stimulation of native microorganisms in the soils to achieve remediation.

2) Soil Blending

Contaminated soils and uncontaminated indigenous soils will be brought to surface and blended to meet the cleanup levels.

To ensure that the proposed cleanup level has been met, soil will be analyzed using EPA methods accepted by the OCD. The results will be reported on the Pit Remediation and Closure Report.

Once testing indicates that contaminated soil has been remediated to the proposed cleanup levels, it will either be placed back into the pit or left in place on the surface.

If soil contamination extends beyond practical excavation limits an evaluation of risk will be performed. If the evaluation indicates that the contamination does not pose a threat to groundwater and the OCD agrees, no further action will be taken. However, if the risk evaluation indicates that the contamination may pose a threat to groundwater, a separate remediation plan will be prepared to address this situation on a case-by-case basis.

Groundwater Contamination

If groundwater contamination is encountered during any of the phases of the pit closures, the water will be sampled, analyzed for constituents prescribed in the Unlined Surface Impoundment Closure Guidelines, and the results reported to OCD. A separate remediation plan will be prepared for each situation on a case-by-case basis. This remediation plan will be submitted to the OCD for review.
