Attention: Mr. J. W. Adams

Administrative Order NSP-102

Gentlemen:

P
Reference is made to your application for approval of a 160-acre non-standard gas proration unit in the Eumont Gas Pool consisting of the following acreage:

Township 21 South, Rge. 36 East, NMPM
SE/4 of Section 13

Y
It is understood that this unit is to be ascribed to your Marshall Well No. 1, located 1980' from the South line and 660' from the East line of Section 13, Township 21 South, Range 36 East, NMPM, Lea County, New Mexico.

By authority granted me under provisions of Rule 5, Section (b)-6 of the Special Rules and Regulations for the Eumont Gas Pool, as set forth in Order R-520, you are hereby authorized to operate the above described acreage as a non-standard gas proration unit, with allowable to be assigned thereto in accordance with pool rules, based upon the unit size of 160 acres.

Very truly yours,

W. B. Macey
Secretary - Director

RE: Application of Makin Drilling Company to form a non-standard gas proration unit in the Eumont Pool, Lea County, New Mexico, consisting of 160 acres being the SE/4 of Section 13, T-21S, R-36E.

Attention: Mr. W. B. Macey, Secretary-Director

Gentlemen:

The Makin Drilling Company herewith applies for formation of a non-standard gas proration unit in the Eumont Pool, Lea County, New Mexico, consisting of 160 acres being the SE/4 of Section 13, T-21S, R-36E. The Makin Drilling Company #1 Marshall well was drilled and completed in the vertical and horizontal limits of the Eumont Gas Pool; exact location is 1980' FSL and 660' FEL, Section 13, T-21S, R-36E. All rules and regulations of the Commission were followed in the drilling and completion of the well and applicable forms were filed, received, and approved by the Hobbs district office.

A plat is attached showing the acreage to be dedicated outlined in yellow. This plat also shows the well location, with distances from the section line and the offset ownership.

The operator respectfully requests that the Commission grant his application for a non-standard proration unit in the Eumont Gas Pool, consisting of the above described 160 acres, for the following reasons:

1. The well is located in the existing Eumont Gas Pool, and completed in its vertical and horizontal limits.
2. The acreage covered by this application, in the opinion of the operator, will be adequately drained by the well in its geographical location.
3. Existing rules and regulations of the Commission have been followed insofar as drilling and completion, geographic spacing, and information requested by the Commission.
4. The operator believes that the granting of this application will serve the interests of conservation of natural resources in the state of New Mexico.
