Re: 2015 Annual Groundwater Monitoring Report, Former Dowell Schlumberger Facility, 507 East Richey Avenue, Artesia, Eddy County, New Mexico. Discharge Permit GW-114.

Dear Mr. Billings,

Please find the Annual Groundwater Monitoring Report for the Former Dowell Schlumberger Facility in Artesia, New Mexico, on the enclosed CD. The report presents recommendations for modifications to the monitoring program and abandonment of unused monitoring wells. Schlumberger Technology Corporation kindly requests NMOCD review and concurrence with these recommendations so that the modified sampling program can be implemented during the April 2016 semiannual sampling event.

The Discharge Permit GW-114 renewal application was submitted to NMOCD on July 15, 2013, and Schlumberger Technology Corporation also requests a status update regarding the application review.

Should you have any questions regarding the enclosed submittal or the Discharge Permit renewal, please contact me at (281) 285-4747. I can also be reached by e-mail at [cocianni-v@slb.com](mailto:cocianni-v@slb.com).

I look forward to our continued work with you.

Sincerely,

V. COCIANNI

Virgilio Cocianni  
Remediation Manager
