## INTRODUCTION

On behalf of Plains Marketing, L.P., (Plains), TRC Environmental Corporation (TRC) is pleased to submit this 2019 Groundwater Status Update in compliance with the New Mexico Oil Conservation Division (NMOCD) letter of May 1998, requiring submittal of an Annual Monitoring Report by April 1 of each year. Beginning on May 29, 2004, project management responsibilities were assumed by TRC, previously NOVA Safety and Environmental (NOVA). The Monument 18 Site (the Site), formally the responsibility of Enron Oil Trading and Transportation (EOTT), is now the responsibility of Plains. This report is intended to be viewed as a complete document with figures, attachments, and text. The report presents the results of the groundwater monitoring events conducted in calendar year 2019. For reference, the Site Location Map is provided as Figure 1.

**On March 10, 2017, the NMOCD Santa Fe Office approved the temporary cessation of groundwater sampling at the Monument 18 Release Site due to continuing excavation activities.**

## SITE DESCRIPTION AND BACKGROUND INFORMATION

The legal description of the site location is NW ¼ NW ¼, Section 7, Township 20 South, Range 37 East, Lea County, New Mexico. No information with respect to the release date or volume of crude oil released and recovered is available as the release occurred while the pipeline was operated by Texas New Mexico Pipe Line Company (TNMPL). The Release Notification and Corrective Action Form (C-141) is provided as Appendix A.

*A Remediation Summary and Proposed Soil Closure Strategy (Work Plan)* was submitted to the NMOCD in March 2013. The Work Plan proposed soil remediation activities intended to progress the site toward an NMOCD approved soil closure.

On April 22, 2013, Plains received approval from the NMOCD to commence the activities outlined in the Work Plan. Excavation activities began during the 3<sup>rd</sup> quarter of 2013 and continued throughout 2014.

In the 2<sup>nd</sup> quarter of 2015, Plains submitted and received NMOCD approval for the *Interim Remediation Summary and Revised Proposed Soil Closure Strategy*.

On October 31, 2016, Plains submitted an *Addendum to the Interim Remediation Summary and Revised Proposed Soil Closure Strategy* (Addendum) to the NMOCD. On January 27, 2017, Plains verbally requested an amendment to the Addendum and February 7, 2017, Plains received an email approval from the NMOCD.

Additional details of NMOCD approved soil remediation activities will not be addressed in this 2019 Groundwater Status Update. A *Remediation Summary and Soil Closure Request* will be prepared and submitted to the NMOCD at the completion of the NMOCD approved activities.

Currently, there are five (5) monitor wells (MW-3, MW-5, MW-6, MW-9, and MW-10) on site. Monitor wells MW-1, MW-4, MW-7, and MW-8 have been temporarily excavated.

**On March 10, 2017, the NMOCD Santa Fe Office approved the temporary cessation of groundwater sampling at the Monument 18 Release Site due to continuing excavation activities.**

### **ANTICIPATED ACTIONS**

Quarterly gauging and groundwater sampling will resume when excavation activities are completed.

*A Remediation Summary and Soil Closure Request* will be submitted to the NMOCD on completion of the NMOCD approved excavation activities.

An Annual Monitoring Report or Groundwater Status Update will be submitted to the NMOCD before April 1, 2021.

### **LIMITATIONS**

TRC has prepared this Groundwater Status Update to the best of its ability. No other warranty, expressed or implied, is made or intended.

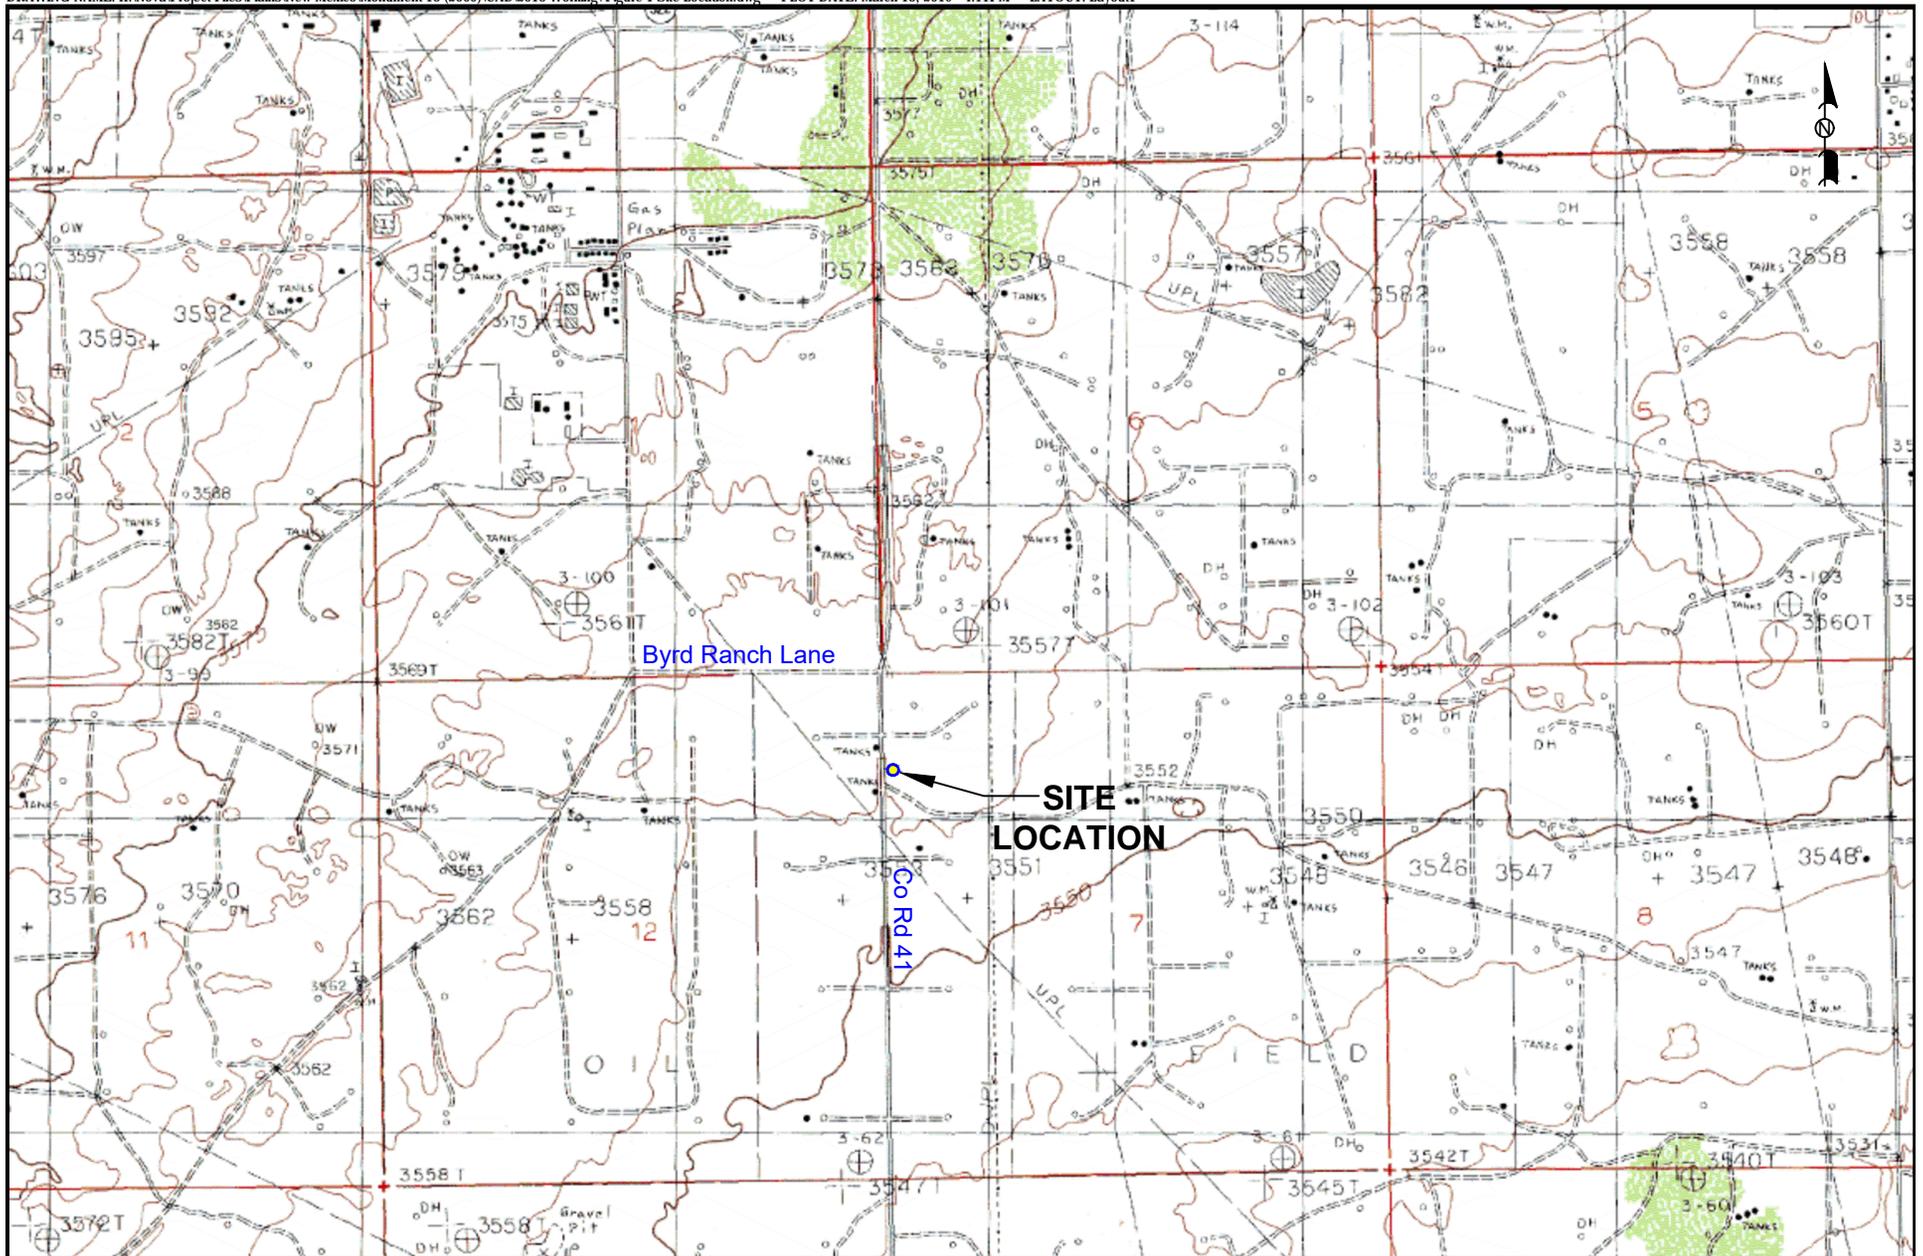

TRC has examined and relied upon documents referenced in the report and has relied on oral statements made by certain individuals. TRC has not conducted an independent examination of the facts contained in referenced materials and statements. We have presumed the genuineness of the documents and that the information provided in documents or statements is true and accurate. TRC has prepared this report, in a professional manner, using the degree of skill and care exercised by similar environmental consultants. TRC also notes that the facts and conditions referenced in this report may change over time and the conclusions and recommendations set forth herein are applicable only to the facts and conditions as described at the time of this report.

This report has been prepared for the benefit of Plains. The information contained in this report, including all exhibits and attachments, may not be used by any other party without the express consent of TRC and/or Plains.

Type of Release:	Volume of Release:	Volume Recovered
Source of Release:	Date and Hour of Occurrence Unknown	Date and Hour of Discovery
Was Immediate Notice Given? Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required <input type="checkbox"/>	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Describe Area Affected and Cleanup Action Taken.\*

**NOTE: Texas-New Mexico Pipeline was the owner/operator of the pipeline system at the time of the release, initial response information is unavailable.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
