RE: 2RP-5102

Kyle,

Your request for an extension to Feb 28th, 2019 is approved.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] URGENT - Extension request PLU #420 Battery/2RP-5102
Importance: High

Mike,

XTO is requesting an extension to the 90-day timeline for completed remediation and closure report submittal required in 19.15.29.12.B.(1) NMAC at the PLU #420 Battery (RP# 2RP-5102). The release occurred on November 19, 2018. XTO began site characterization sampling on November 27, 2018 and proceeded with excavation of impacted soil based on soil sampling results. Excavation confirmation sampling data from the most recent samples (collected February 6, 2019) indicate additional soil removal and sampling is necessary. XTO estimates final work and reporting can be

completed within two weeks. The 90-day deadline from the release date is February 17, 2019. XTO requests an extension of this deadline until February 28, 2019.

If you have any questions, please let me know. Thanks. –Kyle
