OXY - WEST HOLLARHIDE DEVONIAN UNIT #102 1RP-5471

Mr. Dittrich,

OCD has received your Remediation Plan for OXY - WEST HOLLARHIDE DEVONIAN UNIT #102 1RP-5471, thank you. This Remediation Plan is approved with the following Conditions of Approval:

- OCD request OXY to remediate this site to the closure criteria for DWG < 50', i.e., 600 mg/kg for chlorides. Sample points SP3, SP4, SP5, SP7 and SP8 should be excavated to a depth of 1 foot. Sample points SP1 and SP2 will need to be excavated to a depth of 1.5 feet and sample point SP6 to 2.5 feet. Since the release was not on an active pad or production facility, the top 4 feet must meet the NMOCD Reclamation Standards by Rule 19.15.29.13.
- OXY will collect confirmation samples per 19.15.29.12.D NMAC to include the sidewalls of the excavation.

Regards,

Victoria Venegas

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
