Was this a major	If YES, for what reason(s) does the responsible p	party consider this a major release?
release as defined by 19.15.29.7(A) NMAC?	The flaring amount released exceeded 500 MCF.	
∑ Yes ☐ No		
ICVEC	discriminate OCD2 D. Lang To Lang 1	77
If YES, was immediate no	notice given to the OCD? By whom? To whom?	when and by what means (phone, email, etc)?
Jessica Zemen sent an em	nail on Monday, November 16, 2020 at 1:45 PM to	Ramona Marcus detailing the flaring event.
	Initial Respon	nse
The responsible	party must undertake the following actions immediately unless	they could create a safety hazard that would result in injury
☐ The source of the rele	ease has been stopped.	
∑ The impacted area has	as been secured to protect human health and the en	vironment.
Released materials ha	ave been contained via the use of berms or dikes, a	bsorbent pads, or other containment devices.
All free liquids and re	recoverable materials have been removed and mana	ged appropriately.
If all the actions described	ed above have not been undertaken, explain why:	
Released material was no	ot a liquid therefore the fourth option does not appl	vi
Released material was no	a inquia diererore die rourdi option does not appr	,.
		tion immediately after discovery of a release. If remediation have been successfully completed or if the release occurred
		ttach all information needed for closure evaluation.
I hereby certify that the info	ormation given above is true and complete to the best of	my knowledge and understand that pursuant to OCD rules and
regulations all operators are	required to report and/or file certain release notification	s and perform corrective actions for releases which may endanger
-		es not relieve the operator of liability should their operations have bundwater, surface water, human health or the environment. In
addition, OCD acceptance of and/or regulations.	of a C-141 report does not relieve the operator of respons	ibility for compliance with any other federal, state, or local laws

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: Each of the for N/A due to release report is a flare event.	llowing items must be included in the closure report.
A scaled site and sampling diagram as described in 1	9.15.29.11 NMAC
Photographs of the remediated site prior to backfill of must be notified 2 days prior to liner inspection)	or photos of the liner integrity if applicable (Note: appropriate OCD District office
Laboratory analyses of final sampling (Note: appropr	riate ODC District office must be notified 2 days prior to final sampling)
Description of remediation activities	
and regulations all operators are required to report and/or f may endanger public health or the environment. The accep should their operations have failed to adequately investigat human health or the environment. In addition, OCD accep compliance with any other federal, state, or local laws and/restore, reclaim, and re-vegetate the impacted surface area	d complete to the best of my knowledge and understand that pursuant to OCD rules file certain release notifications and perform corrective actions for releases which ptance of a C-141 report by the OCD does not relieve the operator of liability te and remediate contamination that pose a threat to groundwater, surface water, stance of a C-141 report does not relieve the operator of responsibility for for regulations. The responsible party acknowledges they must substantially to the conditions that existed prior to the release or their final land use in to the OCD when reclamation and re-vegetation are complete.
