Subject: [EXT] Confirmation Sampling Notification - Goodnight Midstream - 12/7/2020 Release, UL "M", Sec. 25, T22S, R31E
Date: Tuesday, December 15, 2020 2:25:53 PM

Etech anticipates collecting excavation confirmation soil samples from a Goodnight Midstream Reportable Release Site known internally as the Tanks CDP Release. The release occurred on December 7, 2020 and is located in UL M, Sec. 25, T22S, R31E in Eddy Co, New Mexico. This is a recent release and remediation/initial response activities are currently underway. I wasn't able to locate an incident number as I don't think it is available yet, but will provide that to the group once it becomes available so this email might be filed appropriately. Thanks.

Joel W. Lowry
